Subject: Please oppose the confirmation of Jason Brune for commissioner of DEC

Dear Representative Tarr,

Please oppose the confirmation of Jason Brune for commissioner of the Department of Environmental Conservation.

Mr. Brune's past involvement with Pebble as the head of public affairs and governmental relations for Anglo American during their former partnership with Northern Dynasty Minerals and personal advocacy for the project demonstrate he is too biased to make sound decisions based on science in regard to Bristol Bay and Pebble's proposed mine.

Many decision makers have argued that Pebble should be subject to a fair process, however putting a long-time Pebble advocate in charge of issuing and enforcing the proposed Project's permits is far from fair and not in the best interest of Alaskans.

Please oppose Mr. Brune's appointment and seek an objective individual to serve as commissioner of the Department of Environmental Conservation.

Sincerely,

Allison Lamb
