

Admiralty Upland Parcels

Unit ID/	Acres	Name	MTRS	Designation	Management Intent	Resources and Uses
A-01 437.13		Funter Bay SMP, Admiralty Island	C42s64e, sec 1, 2, 10, 11, 12	Pr	Parcel is to be managed as a state marine park, under the state regulations for such facilities generally and under the requirements of AS 41.21.304-14 specifically.	This parcel includes the Funter Bay State Marine Park, created and managed under AS 41.21.304-14.
A-02 223.39		Funter Creek, Admiralty Island	c42s64e, sec 2	Ru	Parcel is to be retained by the state and is to be managed in a manner consistent with the adjacent state lands, which are part of the Funter Bay SMP. Development in the parcel is not considered appropriate, except as related to the recreational functions of the state marine park.	Parcel is bordered on the west and east by the Funter Bay State Marine Park, and by the Tongass National Forest on the north. Its southern boundary is formed by an area of private land and by Funter Bay. Characteristically, the parcel is slightly sloped toward the bay and is vegetated by spruce and Western Hemlock of the coastal rainforest. There are few wetlands within the parcel except isolated palustrine wetlands in the northern part. The tract of private land contains one prehistoric site: the Funter Cannery. The parcel is used primarily for recreational purposes; a Forest Service trail (Bear Creek Trail) traverses portions of the parcel close to Funter Bay. The TLRMP designates the adjacent National Forest land as 'Semi-Remote Recreation'.
A-03 18.5		Ledge Island, Admiralty Island	C42s64e, sec 3	Ru, Pr	Parcel is to be retained by the state and is to be managed in a manner consistent with nearby state lands, which are part of the Funter Bay SMP. Development in the parcel is not considered appropriate except as related to the recreational functions of the state marine park.	Parcel is an island within Funter Bay. Although adjacent portions of adjacent Admiralty Island are included in the Funter Bay State Marine Park, Ledge Island is not. The parcel is characteristically flat, with vegetation characteristic of the coastal rainforest, and contains no known wetlands. It is used infrequently for recreation purposes. There are no known prehistoric sites.
A-04 59.91		Horse Island, Admiralty Island	C42s65e, sec 2, 11	Pr, Ha, Ru	The remaining state land within this parcel, associated with the tracts (A,B, C, D, E, F, G, H, I, J, and K), are to be retained by the state and are to be used for public purposes or habitat protection. Except for Tracts C and G, the tracts are intended to function as open space, act as buffers between portions of the subdivision, or provide areas of public recreation. Tract C may be appropriate for public buildings or other public uses. Tract G contains an eagle nest. The following designations apply: Undeveloped Recreation (Ru) -- Tracts A, E, I, and K; Public Retain (Pr) -- Tract C; Public Retain (Pr) and Undeveloped Recreation -- Tracts B, D, F, H and I; Habitat (Ha) -- Tract G. Note: Tracts B, C, D, F, H and I are labeled 'boat haul-out' on plat. Development of these tracts for this purpose is considered appropriate. Further, Tract C is identified as a 'community building site' on the plat; this use is also considered appropriate.	Parcel is located in Stephens Passage off the eastern coast of Mansfield Peninsula, south of Colt Island. It is an area of a previous state subdivision (ASLS 85-256). The tracts within the subdivision have been retained in state ownership.

Area to be managed consistent with requirements of AS 41.21.304-14 within State Marine Park and for habitat protection within those areas not part of the SMP.

This unit falls within the Funter Bay Special Management Plan. There are several anadromous stream estuaries where brown bears concentrate. There are also some eagle nests located along the coastline of the unit. The estuaries are used by juvenile coho and chum salmon for rearing and by adult coho, chum and pink salmon for schooling, spawning and migration. Anadromous streams identified are 112-63-10070, 112-63-10050, 112-63-10120 and 112-63-10080, 112-63-10130. Red King crab and dungeness crab are also harvested within the unit as well. This unit is also a known commercial sablefish harvest area. Historical access by use of float plane and boat are prevalent in this unit. Float plane access and a boat landing is located in this unit. Protected anchorages are also provided in this unit. A state dock exists in this unit.

Exposed tidal flats, intertidal marshes, some mixed sand and gravel beaches, and exposed wave-cut platforms.

Protect salmon and brown bear habitat values. Maintain commercial and community use harvest in this area.

This unit is used by pink salmon for schooling, spawning and migration. This unit contains an anadromous stream estuarine area where brown bears concentrate, anadromous stream 112-65-10280. Eagles nests can be found within the unit. There are also known spring concentrations of brown bears along fish streams. Dungeness, tanner, and red King crab are also harvested within this unit. This unit also supports community harvest of deer and marine invertebrate for Angoon and Tenakee residents. Demersal shelf rockfish, Lingcod, Pollock, Sablefish, Pacific cod, Flounder, and other rock and groundfish are commercially harvested in statistical area 345803 which falls within this unit.

Both exposed and sheltered tidal flats, exposed wave-cut platforms, intertidal marshes, mixed sand and gravel beaches, and gravel (granules to cobbles) beaches.
