AGENDA

Date: February 25, 2020

Time: 9:00 – 11:00 am

Location: Senate Finance Room 532

- I. Call to Order
- II. Oil & Gas Initiative Hearing per AS 24.05.186
 - a. Cori Mills, Department of Law
 - b. Megan Wallace and Emily Nauman, Legislative Legal
 - c. Department of Revenue
- III. Adjourn

Outline for Legislative Council hearing
19OGTX
February 25, 2020

I. Petition Certification

- a. Lt. Governor has 60 days from submission of the petition to review and make a determination. (AS 15.45.150)
- b. "...signed by qualified voters who are equal in number to at least 10 per cent of those who voted in the preceding general election, who are resident in at least three-fourths of the house districts of the State, and who, in each of those house districts, are equal in number to at least seven percent of those who voted in the preceding general election in the house district." (Art. XI, sec. 3)

II. Voiding Petition Through Enactment of "Substantially the Same Measure" (Art. XI, sec. 4 and AS 15.45.210)

- a. "If the lieutenant governor, with the formal concurrence of the attorney general, determines that an act of the legislature that is substantially the same as the proposed law was enacted after the petition had been filed, and before the date of the election, the petition is void and the lieutenant governor shall so notify the committee." (AS 14.45.210)
- b. Case Law – *Warren v. Boucher*, 543 P.2d 731 (Alaska 1975) and *State v. Trust the People*, 113 P.3d 613 (Alaska 2005)

III. Placing Measure on the Ballot

- a. Appears on the "first statewide election held more than 120 days after adjournment of the legislative session following the filing" of the petition. (Art. 11, sec. 4)
- b. Statute clarifies that "first statewide election" means "first statewide general, special, special runoff, or primary election." (AS 15.45.190)
- c. Lt. Governor required to hold public hearings at least 30 days before the election in each judicial district. (AS 15.45.195)

IV. Enactment and Effective Date

- a. Enactment – “If a majority of votes cast on the proposition favor its adoption, the initiated measure is enacted.” (Art. XI, sec. 6 and AS 15.45.220)
- b. Effective date – 90 days after certification of the election results. (AS 15.45.220)

A BILL

FOR AN ACT ENTITLED

“An Act relating to the oil and gas production tax, tax payments, and tax credits.”

BE IT ENACTED BY THE PEOPLE OF THE STATE OF ALASKA:

***Section 1.** The uncodified law of the State of Alaska is amended by adding a new section to read:

SHORT TITLE. This Act shall be known as the “Fair Share Act.”

Notwithstanding Any Other Statutory Provisions to the Contrary, the Oil and Gas Production Tax in AS 43.55 Shall Be Amended as Follows:

***Section 2, Applicability.** The provisions in Sections 3 and 4 only apply to oil produced from fields, units, and nonunitized reservoirs north of 68 degrees north latitude that have produced in excess of 40,000 barrels of oil per day in the previous calendar year and in excess of 400,000,000 barrels of total cumulative oil production. For other oil production, the tax shall be unchanged by this Act.

***Section 3, Alternative Gross Minimum Tax.** For oil production from fields, units, and nonunitized reservoirs that meet the conditions in Sec. 2, the amount of tax due for each calendar month shall be no less than:

(a) 10 percent of the gross value at the point of production when the average per-barrel price for Alaska North Slope crude oil for sale on the United States West Coast (La. Basin) during the calendar month for which the tax is due is less than \$50;

(b) an additional 1 percent of the gross value at the point of production for each \$5 increment by which the average per-barrel price for Alaska North Slope crude oil for sale on the United States West Coast (La. Basin) during the calendar month for which the tax is due is equal to or exceeds \$50. The maximum tax rate calculated in this section shall not exceed 15 percent, which is reached when the price per barrel is equal to or exceeds \$70; and

(c) No credits, carried-forward lease expenditures, including operating losses, or other offsets may reduce the amount of tax due below the amounts calculated in this section.

1 ***Section 4, Tax on Production Tax Value.** For production from fields, units, and
2 nonunitized reservoirs that meet the conditions in Sec. 2:

3 (a) The per-taxable-barrel credit in AS 43.55.024(i) and (j) shall not be used; and

4 (b) An additional production tax shall be paid for each month for which the
5 producer's average monthly Production Tax Value of taxable oil is equal to or more than
6 \$50. The additional tax shall be the difference between the average monthly Production
7 Tax Value of a barrel of oil and \$50, multiplied by the volume of taxable oil produced by
8 the producer for the month, multiplied by 15 percent.

9 ***Section 5, Separate Treatment.** For each producer, the taxes set forth in Sections 3
10 and 4 shall be calculated separately for the following:

11 (a) For oil and for gas;

12 (b) For each calendar month (annual lease expenditures shall be divided equally
13 among the 12 months of the tax year); and

14 (c) For each of the fields, units, and nonunitized reservoirs, the lease expenditures
15 shall be calculated, deducted, and carried forward separately.

16 ***Section 6, Greater-of.** For each producer, for each month, and for each of the fields,
17 units, and nonunitized reservoirs, the tax due shall be the greater of the tax under Section
18 3 or Section 4.

19 ***Section 7, Public Records.** All filings and supporting information provided by each
20 producer to the Department relating to the calculation and payment of the taxes set forth
21 in Sections 3 and 4 shall be a matter of public record.

22 ***Section 8, Scope of Initiative.** Nothing in this Act authorizes or requires the
23 Legislature to dedicate revenue, to make or repeal appropriations, to enact local or special
24 legislation, or to perform any unconstitutional act. While not required by this Act, the
25 revenues from this Act could be used to fund essential government services, capital
26 projects, the permanent fund, and permanent fund dividends.

27 ***Section 9, Severability.** The provisions of this Act are independent and severable, and
28 if any provision of this Act or applicability of any provision to any person or
29 circumstance shall be found to be invalid, the remainder of this Act shall not be affected
30 and shall be given effect to the fullest extent practicable.

STATE OF ALASKA
Division of Elections
Office of the Lieutenant Governor

Date: August 19, 2019

To: The Honorable Kevin Meyer
Lieutenant Governor

From: Gail Fenumiai, Director
Division of Elections 

Subject: 19OGTX – An Act relating to the oil and gas production tax, tax payments, and tax credits

The Division of Elections reviewed the sponsor signatures submitted in the application for the above referenced initiative petition.

We have determined that 163 of the 163 signatures submitted to be those of qualified voters. The application has a sufficient number of sponsor signatures to qualify for circulation of a petition under AS 15.45.030(2).

A copy of the computer printout listing the status of each sponsor for this petition application is attached.

Attachment: 19OGTX – Application Petition Signers Report

cc: Carol A. Thompson, Absentee and Petition Manager
Cori M Mills, Assistant Attorney General, Department of Law

Lieutenant Governor Kevin Meyer
STATE OF ALASKA

October 15, 2019

Robin O. Brena
810 N Street, Suite 100
Anchorage, AK 99501

Mr. Brena:

On August 16, 2019, I received your application for the following initiative that you entitled:

"An Act relating to the oil and gas production tax, tax payments, and tax credits."

I forwarded the application to the Division of Elections for verification of signatures and to the Department of Law for legal review.

The Division of Elections determined that 163 of the 163 signatures submitted were those of qualified voters. Therefore, the application has a sufficient number of sponsors to qualify for circulation of a petition under AS 15.45.030. The petition statistics report prepared by the Division of Elections is enclosed.

The Department of Law concluded that the proposed bill is in the proper form and therefore recommend that I certify this initiative application. A copy of the Department of Law opinion regarding the application is enclosed.

Consequently, I hereby certify your initiative application under Article XI of the Alaska Constitution and under the provisions of AS 15.45. I further certify that the proposed bill to be initiated is in the required form, that the application is substantially in the required form, and that there are a sufficient number of qualified sponsors. Your official certificate is enclosed.

The Division of Elections will prepare and print sequentially numbered petition booklets to allow full circulation throughout the state. Each petition will contain (1) a copy of the proposed bill; (2) an impartial summary of the subject matter of the bill; (3) a statement of minimum costs to the state associated with certification of the initiative application and review of the initiative petition; (4) an estimate of the cost to the state of implementing the proposed law; (5) the statement of warning prescribed in AS 15.45.100; (6) sufficient space for the personal information and signatures of each person signing the petition; and (7) other specifications that I decide would ensure proper handling and control. As soon as the booklets are available, they will be delivered to the Division of Elections office of your choice. You will also be provided with instructions and training for booklet distribution and accounting. These instructions must be followed.

The initiative petition must be filed within one year from the date notice is given that the petition booklets are ready for delivery. The petition must be signed by qualified voters (1) equal in number to 10 percent of those who voted in the preceding general election; (2) resident in at least three-fourths of the house

Robin O. Brena
October 15, 2019
Page 2

districts of the state; and (3) who, in each of those house districts, are equal in number to at least seven percent of those who voted in the preceding general election in the house district. Based on the 2018 General Election, you will need to gather a total of 28,501 signatures from qualified voters consistent with the foregoing requirements.

If you have questions or comments about the ongoing initiative process, please contact April Simpson in my office at (907) 465-4081.

Sincerely,

Kevin Meyer
Lieutenant Governor

STATE OF ALASKA
LIEUTENANT GOVERNOR
JUNEAU

CERTIFICATE

I, KEVIN MEYER, LIEUTENANT GOVERNOR FOR THE STATE OF ALASKA, DO HEREBY CERTIFY, under the provisions of Article XI of the Constitution of the State of Alaska and under the provisions of AS 15.45, the initiative application for *"An Act relating to the oil and gas production tax, tax payments, and tax credits."* which was received on August 16, 2019 and known as 19OGTX.

I FURTHER CERTIFY that the proposed bill to be initiated is in the required form, that the application is substantially in the required form, and that there is a sufficient number of qualified sponsors.

In accordance with AS 15.45.090, I shall prepare a sufficient number of sequentially numbered petitions to allow full circulation throughout the state.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed hereto the Seal of the State of Alaska, at Juneau, the Capital,

This 15th day of October,

A. D. 2019

Kevin Meyer
.....
LIEUTENANT GOVERNOR

THE STATE
of ALASKA

GOVERNOR MICHAEL J. DUNLEAVY

Department of Law

The Honorable Kevin Meyer
Lieutenant Governor
P.O. Box 110015
Juneau, Alaska 99811-0015

Re: *19OGTX Ballot Measure Application Review*
AGO No. 2019200671

Dear Lieutenant Governor Meyer:

You asked us to review an application for an initiative bill entitled:

An Act relating to the oil and gas production tax, tax payments, and tax credits. (19OGTX).

Despite the seemingly simple and straightforward title of the initiative bill, the language of the bill is difficult to interpret and raises a number of implementation and constitutional questions. The bill does not follow normal drafting conventions and does not clearly identify what statutes it is seeking to amend or create, while also stating that the new laws would go into effect “notwithstanding” any existing laws to the contrary. Because of these issues, the bill may not accomplish what was actually intended by the initiative sponsors. It is also likely to lead to litigation over the meaning of various provisions and questions of equal protection, due process, and the delegation of authority to Department of Revenue. These various issues are discussed briefly in the first section of this letter describing the proposed initiative bill.

However, none of these issues amount to legal grounds to deny certification of the initiative. Instead, these are mainly post-enactment concerns. The Alaska Supreme Court “refrain[s] from giving pre-enactment opinions on the constitutionality of statutes, whether proposed by the legislature or by the people through their initiative power, since an opinion on a law not yet enacted is necessarily advisory.”¹ Because the low threshold

¹ *Kohlhaas v. State*, 147 P.3d 714, 717 (2006).

required of initiatives is met, we conclude that the application complies with the constitutional and statutory provisions governing the initiative process.

I. The proposed initiative bill.

The bill proposed by this initiative would change the production tax applied to certain oil production on the North Slope where the company produced more than 40,000 barrels of oil per day in the prior year and more than 400 million barrels of total cumulative production. This applicability section uses new terms such as “field” and “units,” currently not used in the tax code, so it is unclear exactly what areas would fall under this new tax regime.

The initiative bill would change the production tax such that oil meeting the production thresholds stated above would be taxed according to the greater of one of two new taxes. One tax—in Section 3 of the initiative bill—would be a tax on the gross value at the point of production of the oil at a rate of 10 percent when oil is less than \$50 per-barrel to a maximum of 15 percent when oil is \$70 per-barrel or higher. In existing law, the gross value at the point of production is calculated with deductions for transportation costs.

The other tax—in Section 4 of the initiative bill—is more difficult to ascertain. It would be based on a calculation of a production tax value for the oil that would allow deductions for certain lease expenditures in addition to transportation costs. This tax on production tax value would be calculated based on the difference between the production tax value of the oil and \$50, the remainder of which would be multiplied by the volume of the oil, and then the product of that would be multiplied by 15 percent. Where it gets truly confusing is that the initiative bill describes this tax as an “additional production tax,” but includes no reference to the tax to which it is meant to be added. Because it is unclear what tax it would be added to, the plain reading of the bill language is that it would not be in addition to any other tax for that oil. The only tax applied could be the so-called “additional tax,” and this tax would always be lower than the alternative gross minimum tax in section 3 because of the way they are both calculated. In this event, it is unclear whether the initiative could result in a tax increase or decrease across various oil prices when compared to existing tax law. .

The initiative bill would also eliminate the applicability of certain tax credits and other tax incentives against these two taxes. The taxes would also be calculated for each field, unit, or nonunitized reservoir on a monthly basis, instead of an annual basis.

As a starting point, the initiative bill fails to amend specific statutes and instead includes the general phrase: “Notwithstanding Any Other Statutory Provisions to the Contrary, the Oil and Gas Production Tax in AS 43.55 Shall Be Amended as Follows.” It

is unclear how these provisions will actually be inserted into existing statute by the revisor of statutes, which makes it difficult to determine exactly how the initiative bill would change existing law.² The vagueness of the language and the lack of definitions would also lead to numerous implementation and potential constitutional concerns post-enactment. In light of the difficulties interpreting this initiative bill, the following provides a sectional summary of the initiative bill and a discussion of the implementation and potential legal concerns with each section.

Section 1 would add the short title “Fair Share Act” to uncodified law.

Section 2 would add an applicability section to establish that the new taxes under section 3 (alternative gross minimum tax) and section 4 (tax on production tax value) apply only to oil produced from “fields, units, and nonunitized reservoirs” north of 68 degrees North latitude that have produced in excess of 40,000 barrels of oil per day (bpd) in the previous calendar year and 400,000,000 barrels of total cumulative oil production. It is unclear from the language in the initiative bill as to whether the change in tax would apply to oil meeting one or both of the above production thresholds. The bill also fails to provide any definitions for “fields, units, or nonunitized reservoirs.” These implementation issues may ultimately raise constitutional concerns, such as whether the law unconstitutionally violates equal protection³ and due process.⁴

² Vagueness or failure to follow technical drafting requirements is not a ground on which an initiative application can be denied.

The general rule is that a court should not determine constitutionality of an initiative unless and until it is enacted. The rule against pre-election review is a prudential one, steeped in traditional policies recognizing the need to avoid unnecessary litigation, to uphold the people’s right to initiative laws directly, and to check the power of individual officials to keep the electorate’s voice from being heard.”

Alaskans for Efficient Government, Inc. v. State, 153 P.3d 296, 298 (Alaska 2007).

³ See *Lehnhausen v. Lake Shore Auto Parts Co.*, 410 U.S. 356, 359 (1973) (The Equal Protection Clause does not mean that a State may not draw lines that treat one class of individuals or entities differently from others. The test is whether the difference in treatment is an invidious discrimination); *State v. Reefer King Co., Inc.*, 559 P.2d 56, 65 (Alaska 1976) (the classification in question must “be reasonable, not arbitrary, and must rest upon some ground of difference having a fair and substantial relation to the object of the legislation, so that all persons similarly circumstanced shall be treated alike”).

⁴ See *Pacific Tel. & Tel. Co. v. City of Seattle, Wash.*, 291 U.S. 300, 304 (1934)

Under existing law, the State is divided into segments for purposes of the oil and gas production tax. Oil from the North Slope and gas not used in the state produced on the North Slope are included in one segment. Instead of one North Slope segment for this oil, section 2 would divide the North Slope segment into the “fields, units, and nonunitized reservoirs” that meet the production thresholds and then all other areas would remain under the current oil and gas production tax regime. This would be the first time the terms “fields, units, and nonunitized reservoirs” would be found within the tax statutes, and the initiative bill does not provide any definitions or guidelines for how the Department of Revenue should determine what this means. This raises questions on the delegation of taxing authority and the discretion granted to the Department of Revenue to sort out which areas of the North Slope are taxed under the 19OGTX tax regime and which areas fall under the existing tax statutes.

Additionally, there is a question of when the tax would go into effect if these thresholds are met. Would it occur the next tax year after the threshold was reached or the month after the threshold was reached?

Section 3 would establish a “monthly alternative gross minimum production tax” on oil identified in section 2. The gross tax rate would be 10 percent of the gross value of oil at the point of production in a calendar month where the average per-barrel price for Alaska North Slope (ANS) crude oil for sale on the United States’ West Coast is less than \$50. The gross tax due under this section would increase by 1 percent of the gross value at the point of production for each \$5 increment by which the average per-barrel price for Alaska North Slope crude oil for sale on the United States’ West Coast is equal to or exceeds \$50. The maximum tax rate under this section may not exceed 15 percent when ANS is \$70 per barrel or higher. Credits, carried-forward lease expenditures, operating losses or other offsets may not be used to reduce the amount of tax due below the amounts calculated under section 3.

Under existing law, a tax floor amount is calculated based on the gross value of oil for North Slope oil and gas on a segment basis as part of the annual tax levy. Generally in existing law, the application of tax credits, carried-forward lease expenditures, and other

The demands of due process are satisfied if reasonably clear definition is afforded in time to give the taxpayer an opportunity to comply...Before the duties of the administrative officer are performed we cannot say that the ordinance falls short of that requirement. At this stage appellant can show no more than apprehension that the definition which the administrative officer will lay down may be deficient. The Constitution cannot allay that fear.

offsets are not limited to the tax based on production from a particular field or unit. By creating these more discrete segments and a separate monthly tax levy, Department of Revenue would have an increased administrative responsibility to keep track of the different segments and when credits, etc. could be used. It would also have to be done on a monthly basis, instead of an annual basis, which means the per-barrel price of oil will have to be tracked each month, instead of the average over the year.

Section 4 would apply to oil identified in section 2 but only if the monthly tax would be greater under this section than the calculation in section 3 as required by section 6 of the bill. For that oil, the per-taxable-barrel credit under AS 43.55.024(i) and (j) may not be used. Further, a tax would be levied for each month in which a producers' average monthly production tax value for oil is equal to or more than \$50. The tax due is the difference between the average monthly production tax value for a barrel of oil and \$50, multiplied by the volume of taxable oil produced by that producer in a month, multiplied by 15 percent.

Subsection (b) of this section directs that: "An *additional* production tax shall be paid..." But no effort is made to identify what the "additional production tax" is in addition *to*, and the plain language of the initiative bill does not provide an answer. The sponsors likely intended for this to be in addition to the existing tax levied by AS 43.55.011(e). But the "Notwithstanding" language at the top of the initiative bill would seem to indicate that other tax statutes to the contrary do not apply when the production being taxed falls under the applicability section. Although it is unclear exactly how this section would ultimately be placed into the statutes, the plain reading limits the tax to what is included in section 4—meaning that it is a standalone tax, not added to another tax for that oil.

Section 5 would require that the alternative gross minimum tax (proposed in section 3) and the additional production tax (proposed in section 4) shall be calculated separately for oil and gas in each calendar month. In the monthly calculation, lease expenditures shall be divided equally over the 12 months of the tax year. Further, for each of the subject properties, lease expenditures shall be calculated, deducted, and carried forward separately.

This is the first mention of gas in the initiative bill. Section 2 only applies to oil production and sections 3 and 4 only apply to production that meets the threshold in section 2—which is only oil production. Yet, section 5 states that oil and gas under sections 3 and 4 should be calculated separately. It is unclear what this provision would accomplish. The plain reading of sections 3 and 4 is that they would only apply to oil production and not gas production. This would be an implementation issue for the Department of Revenue.

Section 6 would provide that the tax due in a month shall be the greater of the tax levied under section 3 (alternative gross minimum tax) or section 4 (tax on production tax value).

As mentioned above, the plain meaning of section 6 is that the tax due will be determined by the greater of the calculation in sections 3 or 4, not section 4 plus some other tax. The likely result would be that section 4 is never implemented because the ten to fifteen percent alternative minimum tax is on the gross value and the fifteen percent under section 4 is on the net value. There is no legislative history to help determine the intent for these provisions, and it would be difficult to insert language into the initiative bill or insert another statute that is not expressly referenced.

Section 7 would establish that all filings and supporting information provided to the Department of Revenue relating to the tax calculations of sections 3 and 4 shall be a matter of public record. Although this could raise concerns over the constitutional right to privacy, the reality is that most of the tax documents would still likely be protected from disclosure. This is because making the tax documents “a matter of public record” simply means the Public Records Act applies, instead of being exempt from it. Under the Public Records Act, the Department of Revenue would have to review all the requested records and redact those portions that should be protected for reasons of privacy, proprietary information, or balance of interests, for example. These protections would likely apply to most, if not all, of the tax documents.

This section would conflict with current law that actually makes it a crime to disclose confidential tax documents.⁵ Based on the “Notwithstanding...” language, we assume this provision is intended to supersede the existing statute for any tax documents submitted for areas falling under section 2 of the initiative bill. This could be difficult to implement for the Department of Revenue because a document may contain information about multiple areas or require multiple different tax filings in order to keep them separate.

Section 8 states that nothing in the proposed legislation requires a dedication of revenue, enactment of local or special legislation, or performance of an unconstitutional act. The section would provide that the legislature could, but is not required to, use the revenues obtained from enactment of this act for essential government services, capital projects, the permanent fund, and permanent fund dividends.

Section 9 is a severability clause.

⁵ AS 43.05.230.

II. Analysis.

Under AS 15.45.070, the lieutenant governor must review an application for a proposed initiative bill within 60 calendar days of receipt and “certify it or notify the initiative committee of the grounds for denial.” The application for the 19OGTX initiative was filed with the Division of Elections on August 16, 2019. The sixtieth calendar day after the filing of the initiative is Tuesday, October 15, 2019.

Under AS 15.45.080, certification shall be denied only if: “(1) the proposed bill to be initiated is not confined to one subject or is otherwise not in the required form; (2) the application is not substantially in the required form; or (3) there is an insufficient number of qualified sponsors.”

A. Form of the proposed initiative bill.

In evaluating an application for an initiative bill, you must determine whether the application is in the “proper form.”⁶ Specifically, you must decide whether the application complies with “the legal procedures for placing an initiative on the ballot, and whether the initiative contains statutorily or constitutionally prohibited subjects which should not reach the ballot.”⁷

The form of an initiative bill is prescribed by AS 15.45.040, which requires four things: (1) that the bill be confined to one subject; (2) that the subject be expressed in the title; (3) that the bill contain an enacting clause stating: “Be it enacted by the People of the State of Alaska”; and (4) that the bill not include prohibited subjects. The list of prohibited subjects is found in article XI, section 7 of the Alaska Constitution and AS 15.45.010. An initiative bill includes a prohibited subject when it makes or repeals appropriations; enacts local or special legislation; dedicates revenue; or creates courts, defines their jurisdiction, or prescribes their rules.⁸ You may deny certification only if the measure violates one or more of these restrictions, or if “controlling authority establishes its unconstitutionality.”⁹

⁶ Alaska Const. art. XI, § 2.

⁷ *McAlpine v. Univ. of Alaska*, 762 P.2d 81, 87 n.7 (Alaska 1988).

⁸ AS 15.45.010; *see also* Alaska Const. art. XI, § 7 (prohibiting dedicating revenue, creating courts, defining court jurisdiction or prescribing court rules).

⁹ *Kodiak Island Borough v. Mahoney*, 71 P.3d 896, 900 n. 22 (Alaska 2003) (this is an exception to the general rule that the court will not review the constitutionality of legislation or initiative pre-enactment; the example given is a bill requiring segregation in direct violation of *Brown v. Board of Educ. Of Topeka, Kan.*, 349 U.S. 294 (1955)).

The initiative bill meets all four requirements of AS 15.45.040. It is confined to one subject—oil and gas taxation. The subject is expressed in the title, and the bill has the required enacting clause. Finally, it does not include any of the prohibited subjects and is not clearly unconstitutional under existing authority.

When evaluating the initiative bill, we carefully considered whether the initiative bill would enact local or special legislation and whether it violates the single-subject rule. When reviewing ballot initiatives, the court will “construe voter initiatives broadly so as to preserve them whenever possible. However, whether an initiative complies with article XI, section 7’s limits on the right of direct legislation requires careful consideration.”¹⁰

In order to determine if the initiative bill would enact special or local legislation, the court first considers “whether the proposed legislation is of general, statewide applicability.”¹¹ If the answer is yes, then there is no violation. But if the answer is no, you must then ask “whether the initiative nevertheless bears a fair and substantial relationship to legitimate purposes.”¹² This is similar to the most deferential standard applied in an equal protection review.¹³ The court has also said the legislation or initiative bill “need not operate evenly on all parts of the state to avoid being classified as local or special.”¹⁴

19OGTX further divides what is currently known as the North Slope segment for purposes of the oil and gas production tax. Instead of one North Slope segment, the initiative bill appears to divide the North Slope into “fields, units and nonunitized reservoirs”¹⁵ that meet the applicability section and other areas that do not meet the applicability section. The purpose of these changes is presumably to increase the State’s share of money from oil and gas development. Oil and gas development generally is a matter of statewide concern and will have statewide impacts both in the private sector and the public sector. Previous court cases have found that maximizing the economic benefits of oil and gas production to the people of Alaska is a legitimate state purpose.¹⁶ This initiative bill would further divide the North Slope segment with the goal of bringing

¹⁵ These terms are not currently found in the Department of Revenue statutes or regulations governing taxation. Likewise, the term “nonunitized reservoir” is not currently found in the Department of Natural Resources statutes or regulations.

¹⁶ *Baxley v. State*, 958 P.2d 422, 431 (Alaska 1998).

more money into the state treasury, which in turn funds government services. Similar to bills amending Northstar oil and gas leases,¹⁷ authorizing a three-way land exchange,¹⁸ and excluding Fairbanks and Anchorage from being the capital,¹⁹ this initiative bill appears to bear a fair and substantial relationship to the legitimate purpose of developing the State's oil and gas resources in the interest of all Alaskans. Therefore, it is not considered special or local legislation.

We also evaluated whether 19OGTX violates the single-subject rule because it includes both a substantive change to oil and gas laws as well as a change to the way tax records are treated and a statement on what the revenue could be spent on. Article II, section 13 of the Alaska Constitution requires that “[e]very bill shall be confined to one subject.” In the context of initiative bills, the single-subject rule is intended to protect “the voters’ ability to effectively exercise their right to vote by requiring that different proposals be voted on separately.”²⁰ Confining initiative bills to one subject assures both that voters can “express their will through their votes more precisely,” and “prevents the adoption of policies through stealth or fraud, and prevents the passage of measures lacking popular support by means of log-rolling.”²¹ Log-rolling, the Court has explained, “consists of deliberately inserting in one bill several dissimilar or incongruous subjects in order to secure the necessary support for passage of the measure.”²²

We conclude that 19OGTX does not violate the single-subject rule because the provisions all relate to the administration of the proposed oil and gas tax. Section 7 of the initiative bill relates specifically to the tax records filed under “the calculation and payment of the taxes set forth in Section 3 and 4.” It is not a separate and distinct proposal on public records, but rather implements how documents that are created because of the new tax should be handled. Under existing law, these documents are all confidential and are not considered public records.²³ This initiative bill would make the

²³ AS 40.25.100, 43.05.230.

tax documents filed under the new tax regime public records and subject to the Public Records Act, including the protections provided under the Public Records Act like proprietary information and balance of interests.²⁴

Additionally, section 8 of the initiative bill does not amount to a separate and distinct subject. Section 8 simply states the legal reality that revenues generated by the new oil and gas tax “*could* be used to fund essential government services, capital projects, the permanent fund, and permanent fund dividends.” It does not attempt to dedicate the funds to any particular purpose or create a new program that would be funded by this money. Oil and gas tax and royalties make up the majority of the money in the state general fund, which is then used to pay for the State’s budget. Section 8 of the bill is acknowledging this fact and does not create any new distinct proposal that would amount to log-rolling, even if the language is clearly included to entice people to vote for the initiative bill.

The conclusion that an initiative bill satisfies the constitutional and statutory requirements does not speak to the initiative bill’s ultimate constitutionality or workability. The Alaska Supreme Court “refrain[s] from giving pre-enactment opinions on the constitutionality of statutes, whether proposed by the legislature or by the people through their initiative power, since an opinion on a law not yet enacted is necessarily advisory.”²⁵ The question is about timing—when is a lawsuit challenging an initiative bill proper, and the answer is often after the initiative bill has been enacted. As detailed in the discussion above regarding the initiative bill’s provisions, 19OGTX raises many questions that cannot be answered until the revisor of statutes places the initiative bill in the statutes and the Department of Revenue adopts regulations interpreting the new statutory provisions. At this stage, “all doubts as to all technical deficiencies or failure to comply with the exact letter of procedure will be resolved in favor of the” liberal construction of the initiative bill.²⁶ This in no way forecloses, and we do not opine on, future litigation over the constitutionality or interpretation of the initiative bill post-enactment. There are significant constitutional issues that can be argued with respect to this bill. However, these issues must be addressed by the courts post-enactment if legal challenges are made.

B. Form of the application.

The form of an initiative application is prescribed by AS 15.45.030, which provides that the application must include the

²⁴ AS 40.25.120(4), (12), (14)

²⁵ *Kohlhaas v. State*, 147 P.3d 714, 717 (2006).

²⁶ *Yute Air Alaska Inc. v. McAlpine*, 698 P.2d 1173, 1181 (Alaska 1974).

- (1) proposed bill;
- (2) printed name, the signature, the address, and a numerical identifier of not fewer than 100 qualified voters who will serve as sponsors; each signature page must include a statement that the sponsors are qualified voters who signed the application with the proposed bill attached; and
- (3) designation of an initiative committee consisting of three of the sponsors who subscribed to the application and represent all sponsors and subscribers in matters relating to the initiative; the designation must include the name, mailing address, and signature of each committee member.

The application on its face meets the first requirement, as well as the latter portion of the second requirement regarding the statement on each signature page. With respect to the first clause of the second requirement, we understand the Division of Elections has reviewed the sponsor signatures and determined that the application contains the signatures and addresses of 163 qualified voters. The application also designates three sponsors to serve on an initiative committee, thus satisfying the third requirement. Therefore, the application is in the proper form.

III. Proposed ballot and petition summaries.

We have prepared a ballot-ready petition title and summary to assist you in complying with AS 15.45.090(2) and AS 15.45.180, as is our office's standard practice. Under AS 15.45.180 a ballot proposition must include a "true and impartial summary of the proposed law." That provision also requires that an initiative's title be limited to 25 words, and that the number of words in the body of the summary be limited to the number of sections in the proposed law multiplied by fifty. "Section" is defined as "a provision of the proposed law that is distinct from other provisions in purpose or subject matter."

The bill has nine sections, which would allow the number of words in the summary not to exceed 450. Below is a summary with 20 words in the title and 396 words in the summary, which we submit for your consideration.

An Act changing the oil and gas production tax for certain fields, units, and nonunitized reservoirs on the North Slope

This act would change the oil and gas production tax for areas of the North Slope where the company produced more than 40,000 barrels of oil per day in the prior year and/or more than 400 million barrels total. It is unclear whether the area has to meet both the 40,000 and 400,000 million thresholds or just one of them. The new areas would be divided up based on “fields, units, and nonunitized reservoirs” that meet the production threshold. The Act does not define what a field or unit is. For any areas that meet the production threshold, the tax would be the greater of one of two new taxes.

- (1) One tax would be a tax on the gross value at the point of production of the oil at a rate of 10% when oil is less than \$50 per-barrel. This tax would increase to a maximum of 15% when oil is \$70 per-barrel or higher. No deductions could take the tax below the 10% to 15% floor.
- (2) The other tax would be based on a calculation of a production tax value for the oil that would allow lease expenditure and transportation cost deductions. This tax on production tax value would be calculated based on the difference between the production tax value of the oil and \$50. The difference between the two would be multiplied by the volume of oil, and then that amount would be multiplied by 15%. The existing per-taxable-barrel credit would not apply. The Act uses the term “additional tax” but it does not designate what tax is in addition to. The result is that this tax would likely always be less than the tax above.

The Department of Revenue would calculate the tax for each field, unit, or nonunitized reservoir on a monthly basis. Taxes are currently calculated on an annual basis, with monthly estimated payments. Since these new taxes would only apply to certain areas, a taxpayer would still have to submit annual taxes for the areas where the new taxes do not apply.

The Act would also make all tax documents relating to the calculation and payment of the new taxes a matter of public record. This would mean the documents would be reviewed under the normal Public Records Act process, and any information that needed to be withheld, for example for privacy or balance-of-interests reasons, would be withheld.

Should this initiative become law?

This summary has a Flesch test score of 54.7. We believe the summary satisfies the target readability standards of AS 15.80.005.²⁷

²⁷ Under AS 15.80.005(b), “The policy of the state is to prepare a neutral summary that is scored at approximately 60.” While this summary is slightly below the target readability score of 60, the Alaska Supreme Court has upheld ballot summaries scoring as

IV. Conclusion.

Despite the failure to follow technical drafting requirements, the proposed bill and application are in the proper form for an initiative and the application complies with the constitutional and statutory provisions governing the use of the initiative. We therefore recommend that you certify the initiative bill application and notify the initiative committee of your decision. You may then begin to prepare a petition under AS 15.45.090.

Please contact us if we can be of further assistance to you on this matter.

Sincerely,

KEVIN J. CLARKSON
ATTORNEY GENERAL

Cori Mills
Assistant Attorney General

**Estimate of Costs to the State of Alaska for Implementation of the Voter Initiative 19OGTX:
Alaska's Fair Share Act**

Multi Agency Cost Summary

Agency	Cost
Department of Revenue	\$7,500,000
Department of Law	\$425,000
Office of the Lieutenant Governor – Division of Elections	\$96,114
Office of the Lieutenant Governor	\$9,000
TOTAL	\$8,030,114

Estimate of Costs to the Department of Revenue

As required by AS 15.45.090(a)(4), the Department of Revenue Tax Division has prepared the following statement of costs to implement the proposed oil and gas production tax ballot initiative. The minimum cost to the Tax Division to implement this change is estimated to be \$7,500,000.

The ballot initiative effectively creates a new tax calculation for production from fields, units, and non-unitized reservoirs that meet the applicability conditions in the initiative. For this production, there are several changes to AS 43.55. Per AS 15.45.220, the ballot initiative would be effective 90 days after certification.

The changes anticipated in this initiative will require substantial reprogramming of the Tax Revenue Management System (TRMS) and the Revenue Online (ROL) tax portal and must be accomplished in that 90-day timeline. We anticipate the programming changes to be significant and time consuming for internal staff as well as tax system contractors. This is based on the Tax Division having to produce a monthly return for the taxpayers filing on the third month end after the certification of the initiative. The division estimates a one-time cost of \$5,000,000 to program, test, reprogram, and implement the tax changes. No additional ongoing costs to maintain the tax programs are anticipated.

The testing of the tax changes will impact division staff resources and will impact core business functions for the Oil and Gas Production Tax Audit Group as well as division Audit Masters. There is the potential for audit delays, which could push division timelines beyond the six-year statute of limitations to issue the audits, thus putting state revenues at risk. There will also be a need for substantial amendments to existing regulations to fully implement the changes. This work will be completed by existing staff resources. The amount of internal resources required for this are estimated to be \$2,500,000, which includes the information technology, audit, accounting, and regulatory personnel resources.

The Department of Revenue estimates that full implementation will take at least one year and most likely longer; however, there will be a huge initial lift to be ready within the 90 days the law requires.

The initiative also creates the need for tracking and reporting of production thresholds for production from fields, units, and non-unitized reservoirs that meet the applicability conditions in

**Estimate of Costs to the State of Alaska for Implementation of the Voter Initiative 19OGTX:
Alaska's Fair Share Act**

the initiative. It will need to be determined whether this will be done within tax systems or by the Economic Research Group. All the existing forecasting tools related to oil and gas production taxes will also need to be updated to reflect the changes from the initiative. The time for this is assumed to be absorbed by existing staff resources is not included in the cost estimate.

Estimate by Category

Personal Services	\$2,500,000
<u>Outside Contracts</u>	<u>\$5,000,000</u>
TOTAL	\$7,500,000

Estimate of Costs to the Alaska Department of Law

As required by AS 15.45.090(a)(4), the Department of Law has prepared the following statement of costs to implement the Alaska Fair Share Act proposed ballot initiative. The cost to implement this initiative is approximately \$425,000.

If the ballot initiative passes, the Department of Law will be required to review and provide counsel on regulations in response to the new law. This regulations project could take approximately one year, and the Department of Law would provide a significant amount of counsel during this process.

The Department estimates that 1,800-2,200 hours of attorney time would be spent on the proposed tax law change with the Department of Law's hourly rate being \$169.16. Thus, the cost in attorney time is approximately \$375,000. It is anticipated that the department will be utilizing outside tax experts during this process in the amount of \$50,000.

Estimate by Category

Personal Services	\$375,000
<u>Outside Contracts</u>	<u>\$50,000</u>
TOTAL	\$425,000

Estimate of Costs to the Office of the Lieutenant Governor and the Division of Elections for the Ballot Initiative

As required by AS 15.45.090(a)(3), the Division of Elections has prepared the following statement of costs to implement the proposed ballot initiative.

The minimum cost to the Division of Elections associated with certification of the initiative application and review of the initiative petition, excluding legal costs to the state and the costs to the state of any challenge to the validity of the petition, is estimated to be \$96,114.

**Estimate of Costs to the State of Alaska for Implementation of the Voter Initiative 19OGTX:
Alaska's Fair Share Act**

Estimate by Category

Personal Services	\$60,577
Printing Services	\$1,300
Language Assistance	<u>\$34,237</u>
TOTAL	\$96,114

Six temporary employees will be required to review signatures for 2,520 hours at an estimated cost of \$44,555, and certification of the initiative application and review of the initiative petition estimated for 504 hours will cost an estimated \$16,022. Printing service expenses associated with certification of the initiative application and review of the initiative petition will require \$1,300 for the printing of voter booklets.

The estimated cost of translating the ballot measure language for audio and sample ballots, Official Election Pamphlet pro statement, Official Election Pamphlet con statement, and Official Election Pamphlet neutral summary into 11 languages required by the Toyukak Settlement and Section 203 of the Federal Voting Rights Act, will cost an estimated \$34,237.

Office of the Lieutenant Governor

Assuming the initiative is placed on the ballot, the minimum cost to conduct public hearings concerning the initiative in two communities in each of the four judicial districts is estimated at \$9,000.

Estimate by Category

Travel	<u>\$9,000</u>
TOTAL	\$9,000

Estimated travel expenses include round-trip air transportation, per diem and other associated travel costs for the Lieutenant Governor and staff to travel to seven communities in Alaska. It is assumed one of the hearings would be in Anchorage, which would not involve travel costs.
