FISCAL NOTE ANALYSIS

STATE OF ALASKA 2020 LEGISLATIVE SESSION

BIL	L	NO). H	łΒ	253

Analysis

	This legislative proposal would prohibit the department from selling, transferring, or disposing of a vessel within the Alaska Marine Highway System's (AMHS) fleet without first obtaining legislative approval. The financial impacts of this proposal cannot be determined at this time because the actual costs will vary depending on the vessel size, moorage location, and the amount of time it takes to obtain legislative approval to sell, transfer, or dispose of the vessel.			
	The AMHS is currently paying \$2.36/foot per day for moorage of the two Fast Vehicle Ferries (FVFs), plus utilities, while attempting to sell these vessels. This is a cost of \$18,584 per vessel each month for moorage and an average cost of \$5,000 per month per vessel for utilities. This is a total cost of \$23,584 per month for each FVF (combined cost of \$47,168 per month, or \$566,016 per year).			
	If this legislative proposal becomes law and subsequent legislative approval to sell, transfer, or dispose of a ferry is not approved in a timely manner, costs to department could accumulate quickly while waiting for approval to start the divestiture process.
