This is the detailed angler data entry screen. There is a “No catch” option to provide easy entry & validation for an angler who caught no fish during the trip. “Add New Catch” allows entry of new fish for the angler-trip.

It also provides a way for anglers who kept halibut in 2 International Pacific Halibut Commission areas in the Gulf of AK to certify their harvest as required by federal regulation.

Angler list screen summarizes angler data.

Cannot Validate Trip

3 errors found:

1. Total salmon hours fished not specified (required if primary salmon stat area is selected)
2. Total bottomfish hours fished not specified (required if primary bottomfish stat area is selected)
3. At least one charter halibut permit must be entered as an angler has kept CHP halibut in IPHC area 2C or 3A

OK

Detailed error messages give guides an opportunity to correct any mistakes, greatly improving accuracy of the data received.
