Subject: Motor Fuel Tax

House Transportation Committee,

I am writing in support of HB104. I have spent my career in the transportation industry in Alaska designing and managing roadway projects. The current tax does not support the infrastructure we have. We need M&O budgets that support our growing infrastructure. Every year, with a large share of federal dollars, Alaska is expanding and building Alaska's infrastructure building more lanes, wider shoulders, taxiways, tug-roads, and improving safety. All this activity brings funding, jobs, and access to Alaska. We need to support the people and agencies that maintain our transportation system to keep us connected and moving across Alaska.

Sincerely,
Kristen Keifer
