Senate Finance,

I oppose extending the Health Emergency Declaration. The declaration expired in mid February. We are not in an emergency and there is no reason we should be. Open all of Alaska.

We since mid February should not be giving out any covid vaccines. They are EUA only. We are not in an emergency. They are experimental and not FDA approved. It is reckless that our state opened the eligibility for minors and all adults when it not approved and studies do not end til 2022-2023. This is not true informed consent. We don't know all the side effects of long term side effects. We should not extend the emergency only to give vaccines that are not able to stop spreading the virus. Only lessen it. Those vaccinated can still spread the virus.

Do not extend the Health emergency declaration. It is not warranted. PCR testing was done at the wrong number of cycles giving way to many false positives. Stop giving unapproved vaccines during a non declaration. Stop the mandates. This is unconstitutional. Our constitutional rights do not disappear during pandemics. Stop the tyranny!!

Stop the medical tyranny!! Take off your mask.

If this was about health you would be telling everyone about exercising, eating healthy and take vitamins. Over 70% of hospitalization were due to obesity.
