**Regarding the Covid-19 Disaster Declaration:**

Over the past 10 months, I have yet to see a Covid-19 disaster.

Where are the sick overflowing our hospitals? This fall, our local hospital decide to stop renting space for a 40-bed covid emergency ward at a local church. I assume the decision was made because not once were the beds and space used. If the emergency is ongoing, why is there no longer a need for extra hospital beds? Could it be that there is not actually a state of disaster?

Please look at how the state's response to Covid-19 has effected our communities. The very fabric of our state is being pulled apart thread by thread, as people are told to cover their faces and stay away from each other. This must stop. We need each other, not just as businesses and consumers, but as neighbors and friends.

I have visited with numerous people who have tested positive for covid. Not one of them has expressed a desire to have the state protect them from covid, now or in the future.

Although I assume that not everyone has been exposed to covid, I am convinced that EVERYONE has been affected by the disaster declaration. Friends have told me of struggles with alcoholism, with their marriages, with depression and with loneliness. None of those are the result of individuals contracting covid. They are the results - at least in my opinion - of breaking community.

Instead of looking for financial relief from the federal government, I am asking the state of Alaska to grant relief from within. By voting no on SB56.

Sincerely, Toni Ross

**Subject:** restrictions

Dear Decision Makers,

This state has taken all the abuse we can put up with. Please remove all Covid related mandates and restrictions at once, you've managed to damage the state so badly. Do not play along with those who have an agenda to use this evil lockdown to destroy the freedom and unity of our nation and state. You can do better than this. There is so much proof that this disease isn't what we were told at first and the whole thing just needs to be put to an end asap. You hold accountability for the future in your hands, do not ruin what is being handed down to the children. The current death #'s are about the same as every other year in recent history, so please stop pretending you have no choice but to keep on harming the people of Alaska. AND, even if it were true, humans are free to make their own health choices, that is an absolute fact. It is not your place to try to dictate, you are welcome to attempt influencing and recommending - but when you make demands without the actual authority to do so you're very far out of your own boundaries. Do what you were hired to do. Don't let anyone bully you into stomping on the rights of Alaskans. Thank you for taking the time to read this. -Rebecca Dundore, Juneau AK
