My name is Mike Coons and I'm speaking for myself.

I have scanned HB66. This has zero to do with effective election reform. The only bill progressing is SB 39, with a new CS coming this week with even better improvements, that does real election reform for all voters, equally!. Yet, sadly, I am sure this committee chair will not bring up SB 39 when it comes forward. I fully expect that the Speaker will put multiple committees on to SB 39 which we all know is the means of killing a bill.

HB66 allows same day registration and voting. Oh, sure, it says that people have to show that they live in that district for 30 day prior, but we all know that the follow up has no means to disallow the fraudulent vote from being counted! Thus more voting fraud allowed.

I am so tired of the socialist left pushing for weaking our elections so that more and more votes can come in to support socialism and those reps and senators that support socialism. I am so tired that when an outstanding Senator like Mike Shower, whom has served our nation in battle, unlike most in this House have done, supports real, solid election reforms is attacked wrongfully as racist! BTW, when your side pulls the race card, you show you have nothing and thus loose the argument!

I am sure that this committee will disregard my and others tesitmony and will pass out and that the socialist majority in the House will vote for HB66. I can bet this is dead on arrival in the Senate. Sadly, this House will block SB 39 as well. Thus you are hopeful that the upcoming election will give you the edge with fraud, electionering, ballot harvesting, etc. We will see!
