I vote no! To this. Just as other states are starting to open their states we need to open Alaska as well. This is unconstitutional and against our freedom rights, we are not willing to give up our freedom rights over a virus that has a 99.99% recovery rate! This is a slow global take over, this is a attack on our children and families, and America is awake, enough! We will not do this no more we will rise and stand against this because god is on our side. Kids are as symptomatic and there was no reason to close the schools if that's the case, if adults are so worried about the virus have them wear the mask. Just like pro abortions state" my body, my choice" well is my body and my choice on weather or not I get to wear the mask or take the COVID vaccine. I say NO! And I will continue to fight against this and fight for our constitutional rights.

Dear Sir or Madam,

I am writing in a public testimony for HB-76. I would like to see Anchorage, Alaska open up without masks. I do not trust that Fauci, Gates, and their colleagues have We the People of the United States's well-being in mind. If it be true that they are in this for financial gain shame on them. If it be true that Gates wants to depopulate the world by vaccines and abortions then masking is conditioning everyone to accept an unproven to be safe and effective experimental vaccine. We do not know the long term effects of the MRNA vaccine. (These are Mark Zuckerberg's words that he stated but quickly recoiled his statement because of money and those ties)

Bill Gates on depopulation through vaccines and abortion.

The truth shall set us all free. 🙏🏻✝️

<https://m.youtube.com/watch?v=LmzeYYWntxw&feature=share>

It is ridiculous that anyone is even suggesting that we vaccinate children and highschoolers above 16 years of age. The vaccine holds a potential risk to make our people unable to reproduce.

I see these policies put in place infringing on our Constitutional God-given rights. People are experiencing depression, suicide, loss of income, anxiety from wearing masks, adverse effects to un-tested, non-FDA approved only is it pushed through for emergency use. This is all very concerning. Our people have suffered long enough.

Please consider ending the emergency orders, lockdowns, masks, and stay far away from forcing vaccinations on the people.

Billionaire depopulation advocate Bill Gates says we must vaccinate the world. There are many people who will not accept an experimental potentially life altering vaccine. We should not have to.

Please do away with mask wearing, they are not as effective as you may think. Consult the OSHA Experts. Medical doctors know what to do once a virus enters the body, OSHA experts know what works and what doesn't work when it comes to preventing the virus from entering the body.

Please consider making an informed decision, look outside of mainstream media and use duckduckgo they are not compromised like google is, and be aware that Fauci and Gates motives could be harming many. I have done extensive research into who these two people are, I hope you do the same. Remember to value conservative voices and all voices. We have good hearts and are looking out for the best interest of all people regardless of political affiliation, religion, sex, class standing etc.

Thank you for your time and consideration in this matter.

In reference to HB 76

Although the governor has requested this power, he should not receive it.

No new emergency declaration authority should be given to anyone. By the way this bill is very long and wordy. You are trying to affect way too many aspects of existing law.

You do not give credit to the citizens of Alaska for having any common sense.

Open the state up and let people live and be responsible for them selves. That philosophy seemed to work in South Dakota and Florida, a state of small population and a state with a large population. I am sure Alaskans will do well if our government will just get out of the way.

In closing, it is not uncommon that when a group (committee) get assigned a task they set around and come up with what seems to be some good ideas. Stop, call home to some constituents and see what they think. It may very well be that the committee has some group think seeping in.

Thank for the opportunity to comment,
Frank & Donita Duncklee

No on HB76 because of inflated infection numbers and medication like Ivermectin and Hydrochloroquine that cure Covid within 48 hours, thus no concern for hospital bed shortage, which is the argument for emergency orders and lockdowns. It seems this is all about receiving Federal disaster money, but in reality, it should not be all about Federal money, it should be about the side effects of this experimental biological cocktail, (not technically a vaccine) and disaster these emergency orders are causing. This should not be about more federal money but about the thousands of Alaskans losing their jobs and kids not being educated because of these lockdowns fueled by emergency order. It should also be about protecting Alaskans from an untested so called " vaccine ".

Vaccines are being used for genocide in other countries. In Africa more young girls die of the vacs than from covid. Dr.s are warning in 3 to 6 months of an explosion of deaths and life threatening side effects. Why was no informed consent given ?? IHS has been vaccinating in the villages since December, without letting anyone know of the dangerous side effects. For example on the local talk radio a nursing mother said she was breastfeeding and still got vaccinated.. even though a few months earlier it clearly states at Senate HHS meeting to approve the vac with Commissioner Crum and Dr. ZINK on page 132 of the vaccine manual that breastfeeding or even sex should not be allowed because of infertility and birth defects.

End these lockdowns and pause these vacs because of false Covid reporting. On the 20th the WHO announced the PCR testing has been flawed by over amplification resulting to way too many false positives!!! Immediately stop amplifying above the 20 amplifications world wide!

(🙌 Above was all I was able to testify of because of two minute time constraints) Ended with telling them to please end these emergency orders

and lockdowns that are destroying Alaska !

Below is a continuation of related subject material as further evidence to end these Cancel Culture Lockdowns and unnecessary emergency orders ;

The over all death rate for all causes in 2020 was below the totals in the last nine years. I guess masks and distancing also cures deaths from cancer, heart disease, lung disease, diabetes, obesity, etc!!!!

The experimental "vaccine " does not stop the spread of the virus or prevent you from contracting the virus. It is considered successful if it lowers the severity of the symptoms!!!! Subjective not Objective! How do you measure that?

It's 99.99% survivable 60 yrs and below. Children's survival is 99.9997%.
Better than the Flu!

The vaccine has killed healthy people and has resulted in 50,000 adverse reactions.

No female of child bearing age should take the vaccine due to unknown potential adverse reactions to their placenta.!!!

Why does Africa have a death rate from COVID that is only 2% of the US death rate?? Oh yeah they have Hydroxychloroquine available over the counter. They take it every Sunday as a preventative for malaria! Hmm!

We have been played!!!!!!

Asking you all to end these emergency order lockdowns.

help stop these potentially harmful

v a c s.

HHSS,

I do not support HB76 extension of Covid Emergency Declaration. We never had a health emergency in the first place. This has gone on long enough. End this madness. No changes to laws even if it's temporary. We all know what two weeks to flatten the curve turned into, a year! I oppose HB76
