

February 8, 2022

Dear Members of the House Resources Committee:

Kachemak Bay Conservation Society strongly opposes House Bill 52 (HB 52). HB 52 gives valuable public resources that belong to all Alaskans to the failing Tutka Bay Lagoon Hatchery (TBLH) and its operator Cook Inlet Aquaculture Association (CIAA).

- There is no practical, financial, or ecological reason for the land exchange proposed in HB 52.
- TBLH does not benefit fishermen and it does not benefit Alaskans.
- TBLH is not covering its costs or supporting other fisheries. Alaskans and Upper Cook Inlet fishermen are covering the losses and getting nothing in return.
- HB 52 needs a Fiscal Note and a financial audit.
- Tutka Bay Lagoon is a fundamentally flawed location for a hatchery.
- Kachemak Bay sockeye fisheries can continue without TBLH.
- TBLH is incompatible with Kachemak Bay State Park and has until 2031 to relocate out of the Park.
- Removing Park protections from the prized Tutka Bay Lagoon could do long-term damage our Alaskan heritage.
- HB 52 does not meet the Constitution's requirement that Alaska's lands and waters be managed "for the maximum benefit of its people" (Article 8, Section 2) or the requirement for "efficient development of aquaculture in the State" (Article 8, section 15).

There is no practical, financial, or ecological reason for the land exchange proposed in HB 52.

- While we appreciate the desire to add lands to Kachemak Bay State Park, we do not need to give up Tutka Bay Lagoon to add lands.
- Thirty-six acres of Parcel A are already in the process of being added to park
 management through the ongoing Interagency Land Management Assignment (ILMA)
 initiated by the Friends of Kachemak Bay State Park in May 2020.

- Parcel B was donated to the Park in 2016 by the Matthisens and Hopkins and has a deed restriction "for the use and benefit of the Division of Parks and Outdoor Recreation."
- Parcel C was purchased by DNR in 1997, and is currently managed by the Department of Parks and Outdoor Recreation as part of Kachemak Bay State Park. The parcel has a deed restriction that says the land is "to be managed for park and recreational purposes."
- HB 52 would be land swap of parcels of unequal value. Anyone who has been to
 Tutka Bay will immediately appreciate its epic beauty and ecological productivity.

 Lands there sell for a very high premium. On the other hand, much of the lands
 proposed to be added are inaccessible cliffs, ravines, and gorges.

Tutka Bay Lagoon Hatchery does not benefit fishermen and it does not benefit Alaskans.

HB 52 is a government handout to an operation that does not provide a public benefit. Frankly TBLH is a boondoggle. TBLH does not produce fish for fishermen, they produce fish for their own salaries. **TTBLH harvests at least 83% of the fish that return every year just to try to cover their expenses**, leaving just 17% of the fish for fishing families (see "Comparison of Commercial Common Property to CIAA Cost Recovery Harvest" chart below).

Since TBLH harvests nearly all the fish for themselves, Lower Cook Inlet seiners and setnetters made 97.5% of their income from places other than TBLH from 1992 to 2021 (ADF&G's "2018 Lower Cook Inlet Finfish Management Report").

This is the opposite of what the ADF&G "Private Non-Profit Hatchery Permit and Basic Management Plan" requires of TBLH. This permit says TBLH **should be providing 2/3 of their fish to the Common Property Fleet.**

TUTKA LAGOON HATCHERY BASIC MANAGEMENT PLAN

1.0 INTRODUCTION

Owned by the State of Alaska and operated by Cook Inlet Aquaculture Association (CIAA), Tutka Lagoon Hatchery (Tutka) produces pink and chum salmon for release at the facility and at selected remote sites in Lower Cook Inlet.

1.1 Production Limitations

Combinations of pink and chum eggs not exceeding 125 million and including no more than 20 million chum eggs may be incubated each year.

1.2 Goals

The Tutka program exists to make up to 5 million adult pink salmon available to common property fisheries each year. Chum salmon production may be substituted for at least part of the pink salmon production should ongoing trials demonstrate feasibility.

1.3 Objectives

Annually collect 125 million pink salmon eggs, release 100 million fry, experience returns of 5 million adults, produce revenues from harvest and sale of returning fish that are at least equal to costs of hatchery operation and operate efficiently so that at least 2/3 of the fish are harvestable by common property fisheries.

* From *2018 Lower	Cook Inlet Area Management	Report*					
† Calculation based of	on ADF&G weights and price	per pound.					
† † Expenses from C	IAA Annual Reports, CIAA 990	0s, and Au	dits. Expenses from	1991-1999 am	not available as of 1/20	/22.	

Even though TBLH is keeping nearly all the fish for themselves, they have not come close to covering their expenses for the entire period of CIAA management. We estimate that TBLH has lost an average of almost \$600,000 per year since 2012 and they have lost almost \$9 million since they began operating the hatchery.

CIAA needs to continually borrow state funds just to keep the lights on, suffering from chronic debt to the State of Alaska, Department of Commerce, Community, and Economic Development, Division of Investments. They are also taking money from Upper Cook Inlet fishermen's Salmon Enhancement Tax contributions—even though these fishermen get absolutely nothing for their contributions.

TBLH has no business plan to pull them out of the hole they're in.

CIAA manages a number of other hatcheries in the region, and the organization as a whole is in chronic debt to the State of Alaska, with a **current debt of over \$16 million to the State of Alaska**. In accordance with AS 16.10.540 "Voluntary Assessment On Sale of Salmon," these debts are the responsibility of Upper Cook Inlet fishermen, who have never had access to the hatchery fish that created these debts.

All of this is reason to phase out TBLH by 2031—as the State Park Management Plan outlines—not to give hand over our prized public lands and waters to them.

Both ADF&G Director Sam Rabung and Representative Vance have argued that TBLH should continue to operate so that TBLH cost recovery can pay off CIAA's debts. This is backwards: TBLH is a cause of—not a solution for—CIAA's substantial debt load.

Director Sam Rebung has also argued that TBLH pink salmon pay for China Poot Sockeye. He has shown no financial records to support this claim. The above numbers show that TBLH cannot pay their own expenses, let alone cover the expenses of other fisheries.

HB 52 needs a fiscal note and an audit.

If you decide to pass this bill out of the House Resources Committee, we ask that you refer it to the Department of Commerce and the House Finance Committee for an assessment of all the money that CIAA and the State spend to support TBLH–please dig for buried costs in CIAA (include head office), DNR (permitting, lawsuits with CIAA), ADF&G (Regional Planning Teams, Otolith Recovery, lawsuits, permitting, Annual Reports), borrowed money and Debt Services. The true cost of this facility to the State needs to be included in the Fiscal Note.

Secondly, legislators need an audit from the Department of Commerce for absolute clarity on the amount of money that Cook Inlet Fishermen have been contributing to TBLH, and we need clarity on the amount of debt from this facility that these fishermen are liable for. No legislator can vote on this bill without knowing the cost to commercial fishermen in Cook Inlet.

Tutka Bay Lagoon is a fundamentally flawed location for a hatchery.

Deeper water, better freshwater input, and improved access are needed to make TBLH self-supported. CIAA and ADF&G have said this many times over in many publications. See, for example, this excerpt from the CIAA February 2016 Report to the Kenai Peninsula Borough Assembly:

"During years of previous Tutka Bay Lagoon hatchery operation, CIAA discovered that it is imperative that large returns of salmon should not be allowed to reach the lagoon. There, tender (boats for hauling salmon) access is very limited. The lagoon is shallow and thus only accessible on higher tides. It also has meager stream flow through it. These factors make it susceptible to high temperatures and deoxification. Cold water and fresh water both hold oxygen better than warm water and salt water. With the warming trend that has occurred recently in Tutka Bay, those factors have caused big problems."

Moving the hatchery out of the shallow Tutka Bay Lagoon will be good for fishermen.

Kachemak Bay Sockeye fisheries can continue without HB 52.

Both Director Rabung and Representative Vance have claimed that the Kachemak Bay sockeye and TBLH pink salmon fisheries are interdependent and HB 52 is needed to "save China Poot". This is not true. The popular sockeye fishery can continue without

TBLH. The argument is ploy to gain political leverage.

The first thing to understand is the difference between Tutka Bay Lagoon and TBLH. In the image below, the lagoon is an actual water body in the yellow circle; TBLH are the facilities in the orange circle. Activities supporting sockeye only occur in the yellow circle, in the lagoon itself—not in the facilities.

This is because TBLH

cannot successfully rear sockeye salmon, due to issues with the IHN virus that have occurred there. See, for example, the 1998 Tutka Hatchery Annual Management Plan, which states: "Due to problems associated with securing a disease-free water, CIAA elected to discontinue the sockeye project in the Tutka Bay Lagoon Hatchery in 1998." Sockeye that return to Kachemak Bay are reared and at the Trail Lakes Hatchery, near Seward. Remote egg-take and remote release of sockeye occur in the lagoon, in the yellow circle.

Remote egg takes and remote releases happen all over the state without hatchery facilities and without leases. This operation is no different. This is why the **sockeye fisheries continued in Kachemak Bay when TBLH was closed from 2004 to 2011.** According to CIAA Director Dean Day, a single CIAA board member did the egg take and remote release in the lagoon during that time.

The Kachemak Bay sockeye fisheries can and should continue with permits from DNR and ADF&G, without HB 52. There would be no "disposal issue" (lease) with permit like this, and the fishery is compatible with Kachemak Bay State Park.

TBLH is incompatible with Kachemak Bay State Park and has until 2031 to relocate out of the Park.

HB 52 seeks to overturn the Draft <u>Kachemak Bay State Park Management Plan</u> and the extensive 7-year public process that created it. The Park Plan would relocate the hatchery out of the Park by 2031 and convert structures in the lagoon into "group camp facility." HB 52 seeks to roll back this plan and the massive public process behind it.

TBLH is incompatible with the park's founding statute, Alaska Statute 41.21.990, which defines a "scenic parks" as:

"relatively spacious areas of outstanding natural significance, where major values are in their natural geological, faunal or floral characteristics, the purpose of which is directed primarily toward the preservation of its outstanding natural features and where development is minimal and only for the purpose of making the areas available for public enjoyment in a manner consistent with the preservation of the natural values such as camping, picnicking, sightseeing, nature study, hiking, riding and related activities which involve no major modification of the land, forests or waters, and without extensive introduction of artificial features or forms of recreational development that are primarily of urban character."

After a long public processes surrounding the State Park Management Plan, DNR determined that the Tutka Hatchery "is inconsistent with the legislative management direction for the park as a 'scenic park'" ("Kachemak Bay State Park and Kachemak Bay Wilderness Park Management Plan, Intent-To-Adopt," p. 152).

The change in status from "compatible" to "incompatible" in the Management Plan is not out of the blue. It is a response to changes in the operation since the last Park Plan was written in 1994—the same year that Tutka Bay Lagoon Hatchery transformed into an industrial operation:

"Tutka Bay Lagoon Hatchery had an initial capacity of 10 million pink salmon eggs, but major renovation work in 1993-1994 increased the physical capacity to 150 million eggs." (Fishery Management Report No. 17-26 2016 "Lower Cook Inlet Area Finfish Management Report" by Glenn Hollowell Edward O. Otis and Ethan Ford, ADF&G, (p. 20)).

Source: 1976 1990 ADF&G FRED Annual Reports to the Legislature, 1991 2018 TBLH Annual Reports

At the outset, Tutka Bay Lagoon Hatchery's releases were relatively similar to the sizes of the wild run in Tutka Creek–stream surveys that took place three years before hatchery releases began to estimate returns of 14,500 fish to Tutka Creek. Returns remained in that range until the early 90s; however, a change in the from the ADF&G permit of 40 million to 125 million eggs in 1994 represents a shift in purpose and scope of impact from the initial intent of rehabilitation. Since then, releases are an average of 30 times larger than the original wild run.

Though it has never been studied by ADF&G, DNR, or CIAA Tutka Bay Lagoon Hatchery pink salmon in all likelihood significantly disrupt the protected natural flora and fauna of the park by reducing fitness and productivity of King, Tanner and Dungeness crab, halibut, shrimp, herring, Pacific cod, clams, and muscles. Juvenile pink salmon are known to either compete with or predate upon these species.

Other "major modifications" of Park waters include fish food that settles below pens, chemical discharges, depletion of oxygen levels in Tutka Bay Lagoon, and historically large-scale carcass dumping in a Fjord with poor flushing. Types of waste include

excess feed, fish feces and urine, fish carcasses and biofouling. Hypernutrification is problematic in fjords and basins, like Tutka Bay, because they tend to be characterized by low flushing rates and therefore may be sensitive to organic waste loadings.

It is deeply concerning that, according to telephone communications with DEC Seafood Processing Lead Clynda Case and Jackie Ebert, Environmental Specialist IV, there is no historical record of any reporting from Tutka Bay Lagoon Hatchery to DEC on water quality of effluent discharges, receiving water body quality, or the benthos below the net pens or in in the carcass dumping grounds, or on water flow at the net pens or at the carcass dumping site.

Removing statutory Park protections from the prized Tutka Bay Lagoon may do long-term damage to lands and waters.

HB 52 would remove the protections provided by Alaska Statute 41.21.990, including language specifying that the purpose of the park "is directed primarily toward the preservation of its outstanding natural features and where development is minimal and

¹ "Marine Environmental Quality in the Central Coast of British Columbia, Canada: A Review of Contaminant Sources, Types and Risks" Canadian Technical Report of Fisheries and Aquatic Sciences 2507, 2003, p. 41. Online at: http://www.dfo-mpo.gc.ca/Library/278588.pdf

only for the purpose of making the areas available for public enjoyment." Removal of statutory protections for approximately 124 acres of park land would allow CIAA to build roads, build more buildings, dam Tutka Creek, dredge the entrance to Tutka Bay Lagoon, etc.

Changes like these have no place in our outstanding Park. Tutka Bay is the second most visited part of Kachemak Bay State Park, and such activities would outrage our local community and harm the important Homer tourism industry.

HB 52 Legal Concerns.

- 1) Since this hatchery provides little to no benefit to commercial fishermen and survives on ongoing loans from the state and taxes from fishermen who don't even fish there; since it would remove lands from the second most visited area of Kachemak Bay State Park, which is a source of income for a diverse set of stakeholders, it does not meet the standards for resource management set in Article 8, section 2 of the Constitution that says we should manage lands and waters for the benefit of Alaskans.
- 2) Since the hatchery for its entire period of operation has only ever made approximately 15% of the returning fish available to the common property fleet, they run afoul of their original operational permit, which requires that they make 2/3 of the fish available to the commercial common property and a secondary later permit that requires that they make 50% of the fish available to the common property.

- 3) For the same reasons listed in (2) TBLH violates Article 8, Section 15 of the Constitution, which requires promotion of "the efficient development of aquaculture."
- 4) HB 52 is an effort to resolve the fact that the IMLA between the Alaska Department of Fish and Game and the Department of Natural Resources, the document that allows the hatchery to exist on Park Lands, has never been legal. DNR's Monica Alvarez acknowledged this in a recent State Park Citizen Advisory Board meeting, saying "it has never been legal". Given these circumstances, the hatchery should move out of the park, and the Park boundaries should not be redrawn.
- 4) The following Claims by the Director of Fish and Game and Representative Vance have no legal merit: a) the claim that ADF&G will have to pay for facilities to be removed if the hatchery closes is false and does not match the terms laid out in the IMLA and b) the claim that the sockeye operation will need to shut down if the pink salmon operation shuts down is based not based in law; it will be legal to continue to run the sockeye operation going forward without the pinks and the facility though permits from DNR and ADF&G.
- 5) ADF&G Director Sam Rabung has said on multiple occasions that ADF&G will have to pay for the removal of buildings if the TBLH is shut down. This is not true. According to the IMLA that sets the terms for the use of the land, ADF&G and DNR can come to any agreement they want about those buildings. The relevant language from the IMLA is here:
- 7. IF ADF&G ceases to operate the hatchery, either directly or through a cooperative operating agreement, ADF&G will remove the improvements and provide a reasonable level of restoration of the land unless other arrangements are made with DNR. Restoration will include regrading and drainage of the hatchery site to natural contours and seeding with grass.

"unless other arrangements are made with DNR" is the key part of this sentence from 1991 IMLA, p. 2.

Kachemak Bay Conservation Society opposes HB 52. We support the following:

1) A separate bill to shield Upper Cook Inlet drift fishermen and Lower Cook Inlet setnetters from debts incurred by CIAA for the development of hatcheries in Lower Cook Inlet—TBLH and Port Grahm, which produce fish for Lower Cook Inlet seiners. Upper Inlet drifters never had access to these fisheries, and they should not be liable for debts that have nothing to do with them. Lower Cook Inlet set-netters do not target or want pink salmon in Kachemak Bay and they cannot fish for fish in Port

Grahm; they should not be responsible for debts for fisheries that did not benefit them.

- 2) We support the establishment of a \$5 Sockeye stamp to help fund the China Poot Dipnet Fishery.
- 3) We support permits from DNR and ADF&G to allow CIAA to continue remote eggtake and remote release of sockeye in Tutka Bay Lagoon for the continuation of the China Poot Dipnet Fishery and the Southern District Sockeye run in Kachemak Bay that benefits both the seine and set-net fleet in Lower Cook Inlet.
- 4) We support the addition of the lands in the Cottonwood Eastland to Kachemak Bay State Park in a separate bill.
- 5) We support the Alaska Department of Natural Resources' proposed management of Tutka Bay Lagoon, which would restore the site and retain certain structures to be used as a group camp facility in 10 years time ("Kachemak Bay State Park and Kachemak Bay Wilderness Park Management Plan, Intent-To-Adopt," p. 152). Citizens and businesses of the Kachemak Bay region will benefit from the diverse uses of these facilities, including education, tours, camping, and more.

In conclusion, we ask you to vote NO on HB 52. This bill does not deserve to pass out of the House Resources Committee. However, if you do decide to pass it out of committee, this bill deserves close scrutiny through the following channels:

- Legislative Review
- Legal Review
- Financial Audit by Department of Commerce
- Financial Review from the House Finance Committee.

We need to know the true cost of TBLH to Alaskans and to Cook Inlet Fishermen.

Sincerely,

Roberta Highland, President, Kachemak Bay Conservation Society

Citizens Opposed to HB 52

02/06/2022 4:40:46 am	Alison OHara	alaskaselkie@gmail.com	99603		The 123 acres of park land where the hatchery is will benefit more people than the very small amount of fisherman that benefit from the poorly managed hatchery. I worry about the wonton waste associated with the hatchery as I've seen hundreds of salmon not harvested floating around the bay. I know their carcasses end up getting trapped behind the moraine in Tutka and then cause anaerobic activity when they sink to the sea floor and destroy life there. Parks is in the process of buying the potential land to be "traded" for the hatchery property for that reason alone HB 52 doesn't make sense.
02/06/2022 3:55:24 am	Ken Landfield	ken@ak.net	99603		
02/06/2022 2:39:34 am	Gordy Vernon	gogovernon@yahoo.com	99603		Want Tutka Lagoon to stay in the State Park!

Tutka Bay lagoon is not the right place for the hatchery for many reasons. Not the least is that there is growing evidence that flooding these waters with hatchery fish is detrimental to the ecosystem. Another is that the hatchery benefits a small minority of commercial fishermen at the expense of the majority. Finally, taking bites out KBSP for every commercial interest that comes along is a fine way to destroy this valuable public resource. On/07/2022 11:35:00 pm Laurel Epps pathfinderak@icloud.com 99502 Paul R Anderson born2ranger@yahoo.com 85750 As a former 25 year Alaskan and Resource manager, I believe we need to keep our precious state park intact, remove conflicting uses from the park, and protect the marine and terrestrial ecosystems. I use KBay State park regularly, and I care deeply about its future for all Alaskans. On/07/2022 10:58:30 pm Jackie morrison sanjuancovealaska@gmail.com 99503 I on on want to set a precedent in removing park lands from state parks to satisfy a special interest. We can make this work another way. It is an incompatible use. On/07/2022 9:49:17 pm Virginia R Drais gdrais2021@gmail.com 99603 Because I feel that it is imperative to keep the Kachemak Bay State Park intact. This House Bill needs to be stopped NOW!	01/08/2022 5:50:03 pm 01/08/2022 2:45:07 pm 01/08/2022 10:10:33 am 01/08/2022 10:01:48 am 01/08/2022 8:06:52 am 01/08/2022 7:20:56 am 01/08/2022 6:15:46 am 01/08/2022 4:21:57 am 01/08/2022 3:43:09 am 01/08/2022 3:29:12 am 01/08/2022 1:37:47 am 01/08/2022 1:37:47 am 01/08/2022 12:45:36 am 01/08/2022 12:43:54 am 01/08/2022 12:43:54 am	Ceal Smith john miles Jill Rife Caitlin San Roman Linda Kaye Harter Kathleen Finn claire waxman Phil gordon Eric Knudtson Mark Luttrell Kat Haber Gerard Garland Ken Landfield Michael Yourkowski Mary. I dont trust vance Transferal of public lands to a private concern is unconstitutional. This is why! HB 52 does not meet the Constitution's requirement that Alaska's lands and waters be managed "for the maximum benefit of its people" (Article 8, Section 7) or the requirement for "efficient development of aquaculture in the State" (Article 8, section 15). Kate the park is the most important part of the equation, not the hatchery HB 52 is against Alaskan citizens, our world famous tourist industry, and advocates for a tiny few private businesses. Bad for people, bad for business, bad for our Parks. Vote against it, please. I love State Parks! Vance, not so much. We need to keep Kachemak Bay as pristine as possible. A hatchery in Tutka Bay is not consistent with that. Don't chop up the Park. Put the hatchery somewhere else if necessary. Preserve park. Hatchery loses money and adds little to local economy and of course SarAh Vance has not idea what she is doing This is a bad precedent to make for opening up a Pandora's Box with our park lands. Kachemak Bay State Park is visited by a lot of people every summer. It is a bad choice to after this park area for the purposes of a business that is failing anyway, and doesn't provide the same benefits to the public as the park does. This Hatchery does not belong in State park lands and waters and should be removed! It disrupts the natural ecosystem of Tutka Bay and beyond! Thank you This would be a very bad precedent to set - carving out state park land for private enterprise. Kachemak Bay State Park must stay protected in its entirety! It is an irreplaceable treasure for our community now, and for future generations! HB52 is a bad deal for Alaskans. Tutka Bay lagoon is not the right place for the hatchery for many reasons. Not the least is that there is growing evidence that flooding these waters with hatchery fish is detrimenta
O1/07/2022 10:58:30 pm Jackie morrison Sanjuancovealaska@gmail.com 99523 I own property in Tutka Bay that has been in the family for roughly 50 years. O1/07/2022 10:53:44 pm Nina Faust Sanjuancovealaska@gmail.com 99602 I do not want to set a precedent in removing park lands from state parks to satisfy a special interest. We can make this work another way. It is an incompatible use. It is an irreplaceable treasure for our community now, and for future generations! HBS2 is a bad deal for Alaskans. Tutka Bay lagoon is not the right place for the hatchery for many reasons. Not the least is that there is growing evidence that flooding these waters with hatchery fish is detriment
	01/08/2022 5:50:03 pm 01/08/2022 2:45:07 pm 01/08/2022 10:10:33 am 01/08/2022 10:01:48 am 01/08/2022 8:06:52 am 01/08/2022 6:15:46 am 01/08/2022 4:21:57 am 01/08/2022 3:43:09 am 01/08/2022 3:29:12 am 01/08/2022 1:37:47 am 01/08/2022 12:45:36 am 01/08/2022 12:45:36 am 01/08/2022 12:43:54 am 01/08/2022 12:43:54 am 01/08/2022 12:24:33 am 01/08/2022 12:24:14 am 01/08/2022 12:24:14 am 01/08/2022 12:25:53 am 01/08/2022 12:06:25 am 01/08/2022 11:52:30 pm 01/07/2022 11:52:26 pm 01/07/2022 11:52:26 pm 01/07/2022 11:52:26 pm 01/07/2022 11:52:26 pm	Ceal Smith john miles Jill Rife Caitlin San Roman Linda Kaye Harter Kathleen Finn claire waxman Phil gordon Eric Knudtson Mark Luttrell Kat Haber Gerard Garland Ken Landfield Michael Yourkowski Mary. I don't trust vance Transferal of public lands to a private concern is unconstitutional. This is why! HB 52 does not meet the Constitution's requirement that Alaska's lands and waters be managed 'for the maximum benefit of its people' (Article 8, Section 7) or the requirement for "efficient development of aquaculture in the State" (Article 8, section 15). Kate the park is the most important part of the equation, not the hatchery HB 52 is against Alaskan critizens, our world famous tourist industry, and advocates for a tiny few private businesses. Bad for people, bad for business, bad for our Parks. Vote against it, please. I love State Parks! Vance, not so much. We need to keep Kachemak Bay as pristine as possible. A hatchery in Tutka Bay is not consistent with that. Don't chop up the Park. Put the hatchery somewhere else if necessary. Preserve park. Hatchery loses money and adds little to local economy and of course SarAh Vance has no idea what she is doing This is a bad precedent to make for opening up a Pandora's Box with our park lands. Kachemak Bay State Park is visited by a lot of people every summer. It is a bad choice to after this park area for the purposes of a business that is failing anyway, and doesn't provide the same benefits to the public as the park does. This Hatchery does not belong in State park lands and waters and should be removed! It disrupts the natural ecosystem of Tutka Bay and beyond! Thank you This would be a very bad precedent to set - carving out state park land for private enterprise. Kachemak Bay State Park must stay protected in its entirety! It is an irreplaceable treasure for our community now, and for future generations! HBS2 is a bad deal for Alaskans. Tutka Bay lagoon is not the right place for the hatchery fish is detrimental to the ecosystem. Another is that the hatchery benefits a small minority of commercial fishermen at the

01/07/2022 9:03:00 pm	Rika Mouw	rikamouw@gmail.com	99603		I am adamantly against this bill as I do not believe in privatizing any public lands for any reason, especially for something that will degrade public lands and waters. The hatchery does not need to be located where it is as there less intrusive locations elsewhere.
01/07/2022 9:00:10 pm	Jennifer Edwards	jedwardslat59@gmail.com	99603	No	HB 52 negates the mission of the AK State Park in which I recreate. The lagoon is being killed by the hatchery because it is operated for profit over science. Sarah Vance is spreading misinformation and should be publicly corrected. The fate of the hatchery is not linked to the subsistence dipnetting in China Poot.
01/07/2022 8:43:40 pm	John W Bushell	jb@AlaskaJohnnyB.com	99603		The park must not lose land. Rep. Vance has not listened to the people who have been caring for the park for years. Her House Bill 52 is the wrong move.
01/07/2022 8:34:03 pm	Dale L Banks	dale@loopylupine.com	99603	Loopy Lupine Distribution LLC/ LoopEride	
01/07/2022 8:25:53 pm	Laurie "Poppy" Benson	poppyb.ak@gmail.com	99603		I live in Homer and I care about the park. It have had wonderful visits to Tutka Bay Lagoon. I am also concerned that pumping out pinks is not doing the environment any favors. This is a park! One of the best parks! And the hatchery is not compatible with that.
01/07/2022 8:12:04 pm	AMY RATTENBURY	akrattenbury@yahoo.com	99603		
01/07/2022 7:59:56 pm	Ed Berg	edwardberg100@gmail.com	99603	Kenai Peninsula College	This bill sets a terrible precedent for removing lands from any state park in Alaska.
01/07/2022 7:58:50 pm	Sue Christiansen	suechristiansen@yahoo.com	99603		Sets dangerous precedent for all State Parks. Not ok to remove the highest protection of our State Park Land! The solution is to relocate the Hatchery, as stated in the KBSPS Draft Management Plan (7 years of public process to come up with the solution). The hatchery is fiscally failing and has been for many years. HB 52 is a reckless use of State money!
01/07/2022 7:53:05 pm	Meghan dee	eednahgem@mail.com	99502	I work locally in the summer on the spit	I care about the health of kachemak bay, it's animals and it's citizens. We have to preserve our beautiful home for generations to come.
01/07/2022 7:53:00 pm	Linda Gorman	akbearnut@gmail.com	99603		I disagree with Ms. Vance on her bill.
01/07/2022 7:51:02 pm	Kaylee Bendixen	kaylee_bendixen@yahoo.com	99612		
01/07/2022 7:50:11 pm	John Lancaster	john.chiefstew@gmail.com	99603		
01/07/2022 7:50:00 pm	Edward	Ironheartshadow@yahoo.com	99501	Halcyon Dream Inc.	Keep our state parks untrammeled.
01/07/2022 7:49:46 pm	Aron Peterson	aron.peterson@icloud.com	99603		This would set an unacceptable precedent for removing land from the State Parks. There is not enough fresh water coming into this lagoon for this hatchery and access to the lagoon is tide dependent. This is simply just a bad idea.
01/07/2022 7:46:52 pm	Kiana Slone	kianaslone@rocketmail.com	99517		
01/07/2022 7:41:55 pm	Robbi Mixon	ninjaginja@gmail.com	99603		
01/07/2022 7:37:12 pm	Carol Sacheck	kbaycas@gmail.com	99603		State management of public lands and resources should continue to be for all the residents of Alaska, not special interest groups.
01/07/2022 7:33:15 pm	mary griswold	mgrt@xyz.net	99603		
01/07/2022 7:31:56 pm	Robert Glen	bglen.ak@gmail.com	99603		This bill is simply a bad idea. It's not good for Alaskans.
01/07/2022 7:30:39 pm	Mildred M Martin	millimom37@gmail.com	99603		Because the Park needs to be protected and Rep. Vance is not representing her constituents.
01/07/2022 7:28:47 pm	Phil Barber	phil.m.barber@gmail.com	99603		The park should remain as is, and as was laid out in the park management plan. This would set a horrible precedent for co-opting publicly owned land for private enterprises.
01/07/2022 7:28:44 pm	Shelley Gill	whaledetective@yahoo.com	99603	Yes	
01/07/2022 3:43:47 pm	Hunter Mindy	erik.mindy@gmail.com	99603		
01/07/2022 3:41:20 pm	Jeydie Quinones	jdquinones@hotmail.com	99516	No	I love kayaking Kachemak Bay, specially Tutka Bay
01/07/2022 2:50:27 pm	Angus Crane	whiteangus19@hotmail.com	99556		
01/07/2022 2:56:20 am	Kaitlynn Skundrich	kandb786@yahoo.com	99603		As a commercial and sport fisherman who lives in Homer, the health of our waters and wild fish stocks are extremely important to me. I think the state park was deemed such for a reason and it would be negating the purpose of the designation to remove an area from the state park so that a single business can continue operating. One which doesn't much beneifit the people or the ecosystem of the surrounding area.
01/07/2022 1:40:17 am	Patricia L Cue	pcue@acsalaska.net	99603	PO Box 745	Please don't support HB 52.
01/07/2022 1:28:33 am	Michael Romanovsky	lamascale@gmail.com	99603		
01/06/2022 11:30:38 pm	Cristen San Roman	cristen.sanroman@hotmail.com	99603		Tutka Bay Lagoon is an incredible part of our state park, I can in no way support the removal of, it or any park lands. Especially for the sake of a failing private group that has little to no benefit to the folks in my community and state.
01/05/2022 9:04:57 pm	Penelope Haas	pah02003@mymail.pomona.edu	99603	Haas Consulting	HB 52 is terrible management of Alaska's resources.
01/05/2022 5:10:05 pm	Skyler Kline	skylerkline@gmail.com	96740
