Senator Shower,

Please support SB 156.

We should have the right to make free and informed choices about what we put into our body. We need to insure that Alaskans can't be coerced, intimidated, have their jobs threatened, have their attendance at school threatened or denied access to businesses or other public places if they choose not to receive these vaccinations.

Thank you!

Lee Parker

Dear senators,

I urge you to SUPPORT SB156 and protect medical freedom in Alaska!

I strongly believe that COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. I personally have lost my job after noncompliance with vaccines mandates. I have medical and religious exemptions that were not honored. NO ONE should lose their job, be kicked out of school, or denied access to public places for declining to accept a vaccine.

Many of my previous coworkers were coerced into getting the job to keep their jobs and feed their families. Coercion is illegal in Alaska and Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination just like other medications.

There are many reasons for declining a vaccination, including; personal health reasons, pre-existing immunity from a prior COVID infection, and objections over the unethical methods used to develop and market certain COVID vaccines.

There is already an ongoing shortage of healthcare workers due to these mandates. **Alaska should follow the example of other states and prohibit vaccination mandates in state law now!**

Respectfully,
Rebecca Crawford

Subject: Vaccine Discrimination

Hello,

I am writing in support of SB156 for many reasons. I am an unvaccinated healthcare worker holding on to a healthcare job that daily I wait for the email from my boss inquiring into my vaccine or exemption status so that I can remain employed. I've given 25 years of service to the healthcare industry. As a professional working adult I know no other job. I've held various healthcare positions in multiple facilities and companies across Fairbanks. My niche is specialized and I'm very proficient at it. But with this vaccine mandate push infecting the state, country, and world, my little slice of work life is now affected. And I'm not happy about it. I support Lora Reinbold's intention with this piece of legislation and I expect fellow legislators to do the same. This is an easy one. Even Juneau shouldn't be able to muck this one up. It is a freedom issue ladies and gentlemen. One's vaccine does nothing to protect another. This is common knowledge now. It does not protect against transmission. It does not protect against infection. The CDC has admitted this. I doubt the descriptor vaccine is even accurate. Regardless, there is very damning evidence, mostly ignored by mainstream media, that this vaccine may not be safe for some people. That alone should shelve any mandate whether levied by government or as a condition of employment. Period. Why we need a piece of legislation like this is insulting. This is discrimination in its purest form. Two societies. The privileged vaccinated and the pariah unvaccinated. This mandate does not breed unity. Quite the opposite. It divides people and pits them against each other. This is NOT America and is a poor testimony on liberty. I request, no DEMAND, my representatives in both the state house and senate to boldly and definitively support this legislation. No ands, ifs, or buts. Freedom. I'll do me. You do you. No hard feelings. If someone feels unsafe it should be THEM that dons the triple layer N-95 mask, face shield, goggles, gown, and cloth covering. NOT ME!!!!

Thank you and have a nice day.

Good morning Senator Mike Shower,

As a resident of this great state I request that you support Senate Bill 156 (SB 156).

Protection of medical privacy and the ability of individuals to select the types of medical intervention they deem best is key to protecting our individual freedom. Giving control of an individual's medical treatment to a governing body eliminates personal freedom and is a large step towards government ownership of its citizens. This is in stark contrast to the foundational structure and establishment of the State of Alaska and the United States of America; a government by the people, for the people.

Thank you,
Dennis Hansen

To Senator Reinbold,

I want to see vaccination discrimination outlawed in Alaska. I am with the public every day, and hear the results of vaccination relative to outcome. There is so little connection, I don't know why there is any credibility to vaccination left. It is far past the point of concern about health and is merely about control, which is highly unconstitutional.

Most sensible questions are never answered by those who insist on

vaccinating: why the border is open without regard for screening or vaccination; why we are targeting the lowest risk members; why proven treatments are overlooked.

I responded very quickly to proven treatments, and refused and will refuse to be the experiment of someone who unwittingly identifies himself as 'science.'

Hello to whom this email is addressed,

I am writing to encourage you to vote YES on this bill.

It is one of the few straight forward bills I have read and its content has the highest level of importance in our modern world.

Any who oppose this bill will be noted. Know that there are a lot of people interested in this bills outcome and the persons who oppose it.

I sincerely hope we as Alaskans are fortunate enough to not have the establishment influence in our ranks.

I doubt that is the case and i am sure someone on this email is partial to the NWO agenda. Regardless, its in your best interest to not expose yourself on this legislation.

Do the right thing and ensure we Alaskans have a safe haven here in our home state.

Thank you.

Best regards,

Joel

Dear Senator Showers,

I implore you to consider voting yes on the upcoming bill, SB156. I am a freedom-loving Alaskan and American. I am not an anti-vaxxer, but it is every person's inherent right to choose which chemicals to put into our bodies without having to worry about losing our jobs, denied medical access or access to public places. I am sure you would not want to be forced to put something into your body that you did not want, whether it be a covid shot or anything else for that matter. I have had covid and, therefore, I have natural antibodies, as do many others. No one, not even the vulnerable, should be forced to do this against their will. America was founded on freedom, unlike the tyranny of the government those founding fathers ran away from. You were elected to represent us and do the will of the people, not to bring tyranny to this country. And any American that thinks this is okay to force this on others needs to maybe have a history lesson about WHY America was founded.

Sincerely,

Tue 2/8/2022 2:31 PM

Representatives,

I reach out to you as a concerned Alaskan, wife, mother of 5 and a business owner. I have held trust in our medical system most of my life. I was adamant about receiving vaccinations on schedule. I never considered myself an "anti-vaxxer".

Then we faced the outbreak of Covid-19. The response left heads spinning. So much conflicting information and people who claim to have all the answers...changing the answers. Lies, deceit and pressure has left a bitter taste in the mouths of many Alaskans. Especially here in Fairbanks where the medical options are so limited.

We were very concerned with the unethical and rushed development of these Covid-19 "vaccinations". My husband and I decided we wanted more information before making our decision.

Then the pressure to become "fully vaccinated" was laid on thick. Not suspicious at all. Our entire family contracted Covid-19 in the first wave. We recovered and developed natural immunities.

We researched and learned of all the benefits natural immunity has to offer on a broader spectrum and were by then seeing friends and family encounter negative reactions to "covid vaccines" as time went on. Because of this we decided to stay with natural immunity.

We firmly believe people should be able to make their own choices medically. We should not fear losing jobs and income, which puts food on our tables, and in our children's mouths, and fuel in our tanks, because employers or officials decide to take choices away from us. Not enough is known and no one has the right to trample on individuals rights.

Will you deny many Alaskans and their children their rights and liberties?

I can assure you that I, and many others in agreement with my stance, will not go along quietly. We will have a voice. We have to because this is in no way acceptable. We have seen the risks and it's not being accurately represented. When you see loved ones injured by this "vaccine" or even die, the answer to us is simple. We will not risk our lives for experimental injections which were created via unethical development methods.

I have several friends still dealing with these side effects today including my best friend who struggles with sever pain and heart issues now at the age of 34. Otherwise a healthy and active hiker and biker with no previous conditions. Her dreams have been crushed by debilitating side effects caused by Pfizer covid "vaccination". Her symptoms began soon after her injection. She is having to get continued medical care and further testing. She is now on heart and blood pressure medication for the foreseeable future. She had to take the vaccine for her job. A concerned mother of two just trying to give her kids the best, can now hardly manage to cook dinner.

My husband's best friend was taken to the ER within hours of his covid "vaccine" because it caused blood clotting in his lungs. He is still struggling and now on continued medications as well.

None of this is acceptable in any way. SB 156 needs to be passed. Mandates over peoples lives can not be allowed in the Land of the Free. It is nothing more than gift wrapped oppression. We are citizens of a Free Nation, not subjects to rule over.

I choose freedom for myself and my family. Freedom of choice and say no to oppression and coercion.

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical experimentation. Because THAT is what this has become. Just one more thing to divide people and allow for unneeded segregation.

If you could please provide me with a list of the covid-19 long term side effects, who is responsible to pay for medical costs when we are injured via this medical experimentation, and keep an eye on who has stock in Moderna, Pfizer and Johnson and Johnson that would be much appreciated.

Forever for freedom,
Nina Delain

Subject: Support IN FAVOR of Senate Bill 156

I could write a dissertation on this topic but, I will spare you. The C19 mandates narrative we have lived under for the last two years are nothing more than a moving target. The "science" is far from settled as some would have us believe but, it appears to be getting clearer as the narrative continues to change. In times when facts become fiction and fiction becomes facts, we must take a stand for reality. Let me be clear, I'm neither for, nor against vaccines. What I am is a believer in individual choice and taking personal responsibility for ones own actions. It is my responsibility to weight the benefits and/or consequences for my personal medical decisions. Informed consent implies one has the right to choose to consent or not.

Government C19 mandates are an attempt to coerce and stifle open discourse. Have we forgot our founding principles? The C19 mandates infringe on individual liberty and the freedom to choose what's best for oneself. The result is discrimination based on conformity. I support Senate Bill 156 in its present form. I hope we can remember we live in the great State of Alaska where hardy folks make up their own mind and are aloud to think for themselves.

As a veteran who served in Europe during the Cold War, I've had a first hand look at oppressive governments that control the masses through mandates, intimidation, coercion and oppression. I hope we choose the right road and avoid becoming a police state where people live in constant fear. We don't need anymore Covid cowards. Do the right thing and pass this bill.

Subject: Senate Bill 156

Dear Senator,

I'm writing in support of passing Senate Bill 156 and I appreciate your time.

My name is Teea Winger, I'm born and raised in Kenai. I'm a mother to three children (7,9,12), I serve on the Kenai City Council and my husband works in construction. We believe strongly in giving back thru volunteering, monetary donations or one's time.

As a mother it's my obligation to do what's best for our children. Those tough decisions start at days old with immunizations. Our children were given no more than one oral or injected vaccine at a time, thru all the "sets" of baby immunizations. That was our choice to safely administer vaccines one at a time to our children. My husband and I are not anti-vaccination we've both had all our vaccines as children and had adult boosters. It's our choice to make an informed decision on which vaccines our family receives. Our family does not want the flu, HPV or COVID vaccines and that should be our choice without consequences.

We have come to a point in this world that I never thought our we or our children would experience, forcing a vaccine without choice.

I understand the hardships we have all faced while navigating the last two years of a COVID world. However, no one should be denied the right to earn a living, go to an event, medical procedures, shopping, or education over a vaccination status. My husband should not be worried about leaving a company he loves to work for due to fear of forced vaccination. This puts unnecessary stresses on us and our family.

If a person wants to be vaccinated, that's great and their choice! If they want to wear a mask by themselves in the car, that's great and their choice! If a person doesn't want to be vaccinated or wear a mask, that's great and their choice!

This body has a chance to draw the line in the sand and say enough is enough. Policies are proving to be more deadly. This body has a chance to stand for personal liberty and the freedom to choose. In December 2021 the Kenai City Council voted unanimously to adopt Resolution 2021-70 Opposing Government Mandates Requiring Vaccines and Face Coverings Related to COVID 19. I will attach it. Our body has drawn the line in the sand.

Please vote yes on SB 156

Thank you,

Subject: Please Support Senate Bill 156

To the Senators of the State Senate Affairs Committee,

I'm writing to implore you to support Senate Bill 156 to make any vaccine mandates or vaccine passports unlawful in the state of AK.

Nobody should be coerced in any way to receive a medical treatment, especially if that treatment comes with risks, and even more especially if the full extent of those risks are unknown. To do so is an outright attack on Alaskans' civil, inherent and religious rights as listed in Article 1 of the AK constitution - causing inequality between those vaccinated and unvaccinated, denying individuals the ability to make free-will decisions to protect their life and liberty and pursuit of happiness, and violating the moral objections of the religious.

The Covid-19 vaccines use new, virtually untested mRNA technology and they have been developed and "approved" at an unprecedented speed without appropriate time to determine long-term or even short term consequences. Even worse, they have utterly failed to stop the spread of the Covid-19 disease. The VAERS vaccine reporting system makes it clear that in the short term, Covid-19 vaccine side effects are numerous, frequent and sometimes deadly. No Alaskan should be denied the same civil liberties that anybody else has because they choose not to take the risk of being vaccinated. No Alaskan should lose their job, their ability to provide for themselves and their families, because they choose to stand up for their rights and not submit to an unproven medical treatment. Additionally, they should not have to submit to weekly testing to prove they are not sick when they don't have any symptoms. Such testing is expensive and often yields inaccurate results. Lastly, no Alaskan should be coerced into getting a treatment that violates their religious views on the sanctity of life. All of the currently available Covid-19 vaccines have used fetal cells in either development or testing. Many religious persons find fetal cell usage detestable and know that the continued acceptance of the use of fetal cells for research is a guarantee that the lives of the unborn will continue to be discarded to fuel the research industry and no alternative methods for testing new therapies will ever be developed.

Please vote to support Senate Bill 156 and protect the rights of your Alaskan constituents.

Sincerely,
Brandi Fleshman

Subject: SUPPORT SB 156

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion.

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Subject: Outlaw vaccine mandates

COVID vaccines have not been shown to prevent infection or transmission with a slight but real risk of serious side effects, as evidenced by VAERS reports . People should be able to choose freely whether to take the vaccine as it does not protect others, only the person receiving the vaccine. Thank you.

Douglas McKinnis <dwmckinnis@alaska.gov>
To: Senate State Affairs

Members of the Senate State Affairs Committee:

Please support SB156!!

For personal freedom to thrive, vaccine passports must be codified as unlawful. We need your support.

No free society can endure the tyranny of vaccine passport restrictions.

Remember the Truckers!

They speak the message of the Alamo. Personal Freedom must be defended. Attacks on our constitutional rights will be defended at all costs.

Please join the freedom loving by supporting SB156.

Thank you sincerely!

Mia Costello <Sen.Mia.Costello@akleg.gov>; Sen. Roger Holland <Senator.Roger.Holland@akleg.gov>; Sen. Scott Kawasaki <Sen.Scott.Kawasaki@akleg.gov>

Subject: Fwd: SB 156 my testimony

Good Morning All -

I am writing in support of SB 156 and would like this testimony submitted to the record. I am a project manager who has served all of Alaska for the past 15 years, 10 of that in rural Alaska. I am originally from Eagle River and now reside in Palmer with my wife and children.

As a direct result of this pandemic, our livelihoods have been threatened every day since the experimental vaccination began being administered. Both of our employers have stated that we may be subject to disciplinary action, or in the case of my wife actually terminated despite our deeply held religious beliefs and documented medical exemptions. In addition, our entire family survived COVID Exposure in 2020 but are not allowed to cite natural immunity. This one size fits all medical approach is unscientific, discriminatory in nature and at best unethical. Vaccines are proven dangerous and ineffective as demonstrated by my daughters reaction in 2019. She was given a well child exam vaccine as part of the vaccine schedule, and immediately went into uncontrolled vomiting, seizure and spiked fevers for days. I was on site in rural AK, with no way home to take care of my family due to a medically induced life threatening event. Our doctor spend 6 months denying the reaction, and finally when pressed agreed that it was most likely the vaccine that cause the reaction, but didn't want us to have a negative opinion of vaccines.

After reading the insert of the vaccine, we learned the manufacture stated her reaction was known side affect, and she should not receive any vaccines if the reaction occurred. When we approached our doctor on this issues, we were hastily thrown out of the practice as anti-VAXes. We were not even allowed to question the vaccine. The law provides for exemptions, but medical professionals, business and government is allowed to discriminate against a population for a purely political and partisan issue.

More recently, i have been threatened with my job and way to provide for my family and under constant scrutiny from employers and potential clients as to my current status. These entities take State and Federal funds and claim they do not have to comply with Civil Rights Acts or Title 7 anti discrimination laws. Vaccinated or not, no one should be allowed to discriminate against a personal choice that has no affect on anyone but themselves. The Vaccine has been proven, federally admitted to, and ignored by global media to NOT prevent transmission. The fact that a vaccinated person can spread Covid at the same rate as a vaccinated person means no passport, mandate or other form of proof will keep our population safe.

I expect your full support for this Bill to move on trough the committee process and become law. The world is opening back up and reducing all restrictions and you should be a leader in ending medical tyranny, government overreach, and legalized segregation.

Alaska is a free state. if we do not fight now, our children will not have the opportunity to fight in the future.

Mike Kruse

From: Dean Robinson <[REDACTED]>
Sent: Tuesday, February 8, 2022 12:18 PM
To: Sen. Mike Shower <sen.mike.shower@akleg.gov>
Subject: Support SB 156

Sir,

Please support SB 156. I lost my job (of over 16 yrs) due to exercising my freedom in not getting COVID 19 "vaccination". The losses both personally and collectively as Alaskans to these mostly ineffective mandates has been an unnecessary burden. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and make a free and informed choice, without coercion. It is important for the future economic direction of our state we not encumber ourselves with overly intrusive mandates and travel complicating regulations. We want to be a destination state, whether it be for recreation and tourism or permanent relocation. Freedom attracts, regulations repel.

Thanks

Dean L. Robinson

Subject: Opposition to Covid Vaccine Mandates

Dear Senate Committee:

I strongly oppose vaccine mandates, and I am in support of SB156 to protect our medical freedom in Alaska.

I don't know if you are aware of the turmoil in the world, but mandates are affecting us worldwide. Look at Canada! We the people are exhausted from the mandates and the segregation it has caused. As a nurse, I support medical freedom and privacy for all. Covid passports and mandating vaccines for employment, shopping, medical care, or education is unethical and wrong.

Let's make a stand together for Alaska and move forward from Covid-19!

Sincerely,

MaLai Smith

Subject: SB156 "An Act relating to COVID-19 immunization rights"

We would like to encourage support of Senate Bill 156. Our freedoms are very important to us as Alaskans, medical or otherwise. We appreciate your consideration of this all important issue.

To be clear, WE WILL NOT ACCEPT MANDATES.
Thank you for your time.

Sincerely,

Mary Garrett - Fairbanks

Tue 2/8/2022 2:23 PM

To whom It May Concern:

I am an Alaska Resident of 45 years and I strongly oppose COVID-19 vaccine mandates. Such a mandate violates the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. There is already an ongoing shortage of healthcare workers due to these mandates. **Alaska should follow the example of other states and prohibit vaccination mandates in state law now!**

It is critical that you stand up for Alaskans. If someone wants the vaccine they can get it; it is not right to FORCE such a vaccine on everyone.

Subject: Support Senate Bill 156

To The State Fairs Committee,

I am writing to you today because it has come to my attention that there is a bill being considered by this committee that supports protecting medical freedom in the Alaska. I urge you to support this bill.

I come from a very large family. I was born and raised in Alaska with my six sisters and have many generations of family members that have enjoyed the lifestyle Alaska promotes. My great grandparents homesteaded here when they were in their teens and have created a large family tree that has roots all over the state.

In my immediate family, all of my sisters (and their families) have had Covid. None of them had any bad side effects from the illness. Sadly, three of my sisters were COERCED into getting the "Covid Vaccine" (after the illness) in order to keep their jobs. All three of my sisters had an adverse reaction from the "vaccine" and two are still suffering from those reactions today. No one should ever have to choose between getting an experimental injection and their job. For that matter, no one should have to be threatened with anything being withheld from them and getting injected with this experimental gene therapy. I am ashamed that our country has gone down this path and I am hoping that our great state will stand up against this tyranny and do what is right.

Please support Senate Bill 156 and stand up for medical freedom.

Thank you for your time and your commitment to our State.

Best,

Katherine Gluth
