I am writing in support of SB 156. There is no place in AK for mandated COVID vaccines. Not even the science supports it being mandated. We just never let this happen.

I strongly support this bill and urge your adoption of it into law. The Covid 19 vaccines are not only proving to be ineffective in stopping people from contracting it, but also does not stop people from transmitting. There are also many documented risks involved in receiving the vaccines. Much more so than any other historical vaccine. It is the right of every individual to be free to make medical decisions for themselves. This bill helps to solidify that already existing right. Feel free to contact me directly if you would like to discuss further. Thanks,
Mel Steinberg

Subject: Vaccine Mandates

Mandates

COVID-19 vaccine mandates violate the rights of Alaskans. We should not be coerced when it comes to our health and the health of our children.

Also, I oppose the mask mandate. I feel that if you want to wear a mask please do. It is well documented that this does very little to prevent the spread of the virus and for God's sake do not make it mandatory to mask our children in school.

Thank you
Jeff from Eagle River

Subject: SB 156 Covid-19 Vaccine Discrimination

Greetings,

I support Senate Bill 156.

However, I do not think SB 156, as written, protects my freedom enough. This medical mandate issue is not about the COVID-19 virus. This Senate Bill should be inclusive of ALL vaccines, including the SARS-CoV-2. Please change the wording to reflect all vaccines.

Bill Gates, Dr. Anthony Fauci, and the World Health Organization (WHO) are planning another pandemic, with another vaccine, in couple of years.

[**Bill Gates Says COVID Risks Have ‘Dramatically Reduced’ but Another Pandemic Is Coming + More**](#)

Since the Alaska legislature is taking the time to pass this SB 156, please have in include all vaccines.

Thank you very for your time.

Regards,

Patricia Bouton

Subject: Support Bill SB 156 and Medical Freedom

Dear Department of Health and Social Services,
Dear Senator and Representatives,

COVID-19 injections do NOT stop transmission and do NOT stop infection, therefore herd immunity is impossible to achieve through "vaccination" and therefore, mass vaccination have no epidemiological justification, and therefore the societal goal of vaccinating everybody to protect others is null.

With this reality, vaccination mandates go into the trash can.

These two acknowledgements from the CDC are official recognition of the statement above:

[Fully vaccinated people who get a breakthrough infection can transmit the virus, CDC chief says](#)

[CDC shifts pandemic goals away from reaching herd immunity](#)

Individual health protection is the only goal left for the C-19 shots, and that should be a personal health decision.

There is absolutely no scientific reason for the vaccination mandates and propaganda.
End all vaccine mandates, and make legislation that protects Medical Freedom in Alaska.

Make vaccine passports and other COVID-19 vaccine mandates **illegal** in Alaska.

Respectfully,
Mariyana McCann
Juneau, AK 99801

Subject: Protect Medical Freedom in Alaska and Support Bill SB 156

Dear Department of Health and Social Services, Senator, Representatives,

There is absolutely no reason for the vaccination mandates and propaganda since COVID-19 injections do not stop transmission and do not stop infection. And yet people have lost their jobs, have been kicked out of school, have been denied access to public places for declining this medical intervention.

End all vaccine mandates, and support legislation that will protect me and my fellow Alaskans from vaccine mandate and vaccine passports!

Respectfully,
Isaac McCann

Subject: Please support SB156

- SB 156 would allow Alaska citizens to move about freely in society, regardless of their COVID-19 vaccination status. It would also prohibit harmful employer COVID-19 vaccine mandates.
- These mandates [lay the groundwork for discrimination](#) against individuals who are simply exercising personal discretion regarding their own medical choices. Often, these mandates [include penalties for employees](#) who choose not to comply, even if they do not pose any type of risk to their coworkers, customers, or other individuals.
- It is not unreasonable to implement certain common-sense health and safety policies in the workplace, such as directing employees to stay home if they are sick, or if they are exhibiting certain symptoms which indicate that coming to work would pose an unnecessary risk to themselves or someone else or that would prevent them from performing their duties. It is [unreasonable to penalize perfectly healthy individuals](#) who simply have not received a particular vaccine.
- A person's job is a necessity for him or her. Individuals who want and need to work [should not have to choose](#) between losing a job that provides for themselves and their families, or taking a vaccine they do not want or need.
- Our American system of government was founded upon [protecting the rights of individuals](#). This protection entails prohibiting the intrusion upon these rights from other individuals and entities.
- Vaccine mandates are inappropriate, especially when the vaccine in question is already available to all who want it. These mandates force individuals who wish to remain unvaccinated into trying to opt-out of the process, rather than giving them the freedom to opt-in to vaccination based on their own initiative and informed consent.
- Even individuals who are vaccinated against a particular disease can [still spread and catch it](#).
- COVID-19 [vaccine passport](#) systems come with [serious privacy concerns](#).
- Any form of discrimination against individuals unvaccinated against COVID-19 is essentially a form of coercion to try and get them vaccinated by implementing barriers to navigate life. It also reduces the focus from health to mere vaccine status.
- Allowing COVID-19 vaccine requirements causes segregation, and potentially cuts individuals off from resources and services they need - such groceries or healthcare - simply because they have not received a vaccine that is the subject of such a requirement.
- This discrimination can even be life threatening. Some individuals [have been turned down from life-saving](#) organ transplant surgeries.
- Multiple states [have prohibited vaccine passports](#) including Alabama, Arizona, Arkansas, Florida, Georgia, Idaho, Indiana, Iowa, Montana, North Dakota, Oklahoma (for students), South Carolina, South Dakota, Texas, Utah (government ban only), and Wyoming. Alaska should too.

Subject: SB 156 support

Dear, Senator Wilson,

I'm writing to say thank you for your service in our Legislature and for your thoughtful review of SB 156.

I was born and raised outside Fairbanks, AK. I now live and work in Juneau and have since 2009. I am in strong support of Bill 156.

I generally do not agree with any mandatory medical intervention, by the government or anybody else. SB 156 supports medical freedom - it is an inalienable right that should hold for all medical interventions of any type for all individuals. As United States citizens and humans of this planet, we have a right to choose which substances are placed or consumed into our bodies and which are not. Not to mention, the long-term effects of the covid mitigation have not been studied, nor can they be with the short timelines they have been available. The short term effects of the covid "vaccines" show numerous documented cases of severe reactions on the CDC VAERS website. I have spoken to individuals directly that have lost their jobs due to medical complications of the covid "vaccine", documented on this site. Taking it is not without risk and therefore cannot be mandated for employment, for travel, or participation in community events.

In addition, should an adverse reaction occur, there is no acknowledgement or responsibility for it. An individual may lose their life or livelihood as a result of a covid "vaccine" and nobody is held accountable, even if that injection is a condition of employment. The individual that must live with the consequences must be the one to make their own choice whether or not to take that risk, just like any other medical decision and independent of their religious or personal beliefs.

Regardless of the drug, vaccine, or medical procedure, informed consent must always be given - period.

Again, thank you very much for your time and service.

Take care,
Megan Buzby

Dear Mr. Wilson,

I would like to state my support of SB 156 and likewise urge senate support of this bill that would protect medical freedom in Alaska. No one should have their livelihood threatened or be denied access to school or services simply for declining a medical intervention. Alaskans have a right to weigh the risks and benefits of vaccination, as with any medical intervention, and make a free and informed choice without coercion. Many Alaskans have valid reasons, based on unique health history, previous infection and recovery from covid, or religious beliefs (for example) to decline vaccination. Removing freedom of choice only fuels division and dissension in our state and local communities. I urge you to support the side of freedom, peace, and unity for all Alaskans.

Sincerely,

Kirsten Belloni

Subject: Testimony FOR SB156

Hello! Thank you for voting FOR SB156 to prohibit Covid-19 vaccination status discrimination. I believe strongly in the right of individuals to make the personal decision if disallowing any substance to enter their body at any time, and that they should not be discriminated against for refusal.

Here is my personal testimony. As an infant I was given the Pertussis vaccine in 1980. Hours later I had an intense neurological response (seizures). Thankfully there were no lasting effects. Due to similar episodes in children, that vaccine was subsequently pulled and replaced with a safer formula.

With this history, I choose not to take any vaccine, or give any vaccine to my children, that has not been TIME tested for a minimum of 10 years. It would be life disrupting and disheartening to be limited in travel or public service due to this reasonable decision.

Thank you for your consideration and passing this bill!

Nannette Foster

Hi , my name is Craig Downing and I support SB 156!!

In the last two years we have learned that Dr Fauci and the CDC lied about gain of function, lied about mask. Bill Gate, Dr Fauci and many other Eugenists had and still hold patents for Covid 19 vaccines in 2019 before the virus was released on the population. Dr Fauci tortured and murdered dogs with parasites some of the same ones that have been found in the Covid-19 vaccine such as the Tripanosoma Cruzi and the Hydra Vulgaris which they tweaked to survive the salt of human blood which in turn made it indestructible. Dr David Martin gave us all the Laws that have been broken by CDC, FDA, and Dr Fauci himself. Where is the accountability!! This bill needs to include strict penalties for violations of SB 156. After all we know now there should be no hesitation in getting this bill to the Governor's desk.

Thank you!!us🙏🙏

My name is Roberta Jamestown, I worked for an IHS facility that mandated covid vaccines, but didn't give an option for religious exemption. I believe it to be my constitutional right on what I put or not put in my body. As a result of refusing this vaccine, was let go. As head of household and lone person in my house paying rent utilities, groceries, and all other bills, this is a hardship for me. Therefore am in great favor of this bill being past.

Attn: Senate Chair David Wilson

I hope this email reaches you in time to “count” amongst the growing group of citizens who are concerned about our rights to bodily autonomy. Please pass SB156 so that we may retain the freedom to choose for ourselves what substances do or don’t enter our systems, & to end the mandates/lockdowns/etc. that have been proven to cause more harm than good! To do anything other than promote this bill is to advance the authoritarian regime that seeks to enslave us all by removing our rights at EVERY level.

To threaten/coerce people with the prospect of not being able to provide for their families if they don’t accept an experimental cocktail into their bodies should be considered a criminal act, & indeed a great many of the perpetrators of this travesty are being tried for Crimes Against Humanity at the Hague in the Netherlands. Additional lawsuits are underway against government officials across the globe who’ve participated in the pressure to comply with an agenda whose only beneficiaries are the wealthy overlords who desire to control every detail of the general public’s lives.

Americans in general & Alaskans in particular are strong-willed people who live here precisely because we treasure freedom. Please help retain the principles set in place by our forefathers, & protect our future generations’ freedom by passing this bill. We are hoping & praying that you & your constituents will make it crystal-clear that the best interests of those who put you in office & whom you represent are your first priority.

With hope & gratitude,
Virginia (“Ginger”) Duncan
