**To:** Senate Health and Social Services  
**Subject:** I Support SB 156

I support Senate Bill 156.

I am asking today, to please support-pass Senate Bill 156 and please consider passing it through as soon as possible.

Time is running out for children to be able to enroll in fun summer camp programs that have made the Covid-19 immunizations a requirement to attend.

This is a very important Senate Bill that deserves a swift pass vote. It does not matter why some youths in Alaska have not taken the Covid-19 immunization. Regardless of their reason, it will be a far greater tragedy for young children to older teenagers to be excluded from activities such as summer camps that promote creative, educational, emotional well-being and developmental opportunities.

Passing this Bill will help to stop the massive division through out Alaskan communities and help to bring back normalcy within families, work places, schools, colleges and summer camp programs.

Please pass Senate Bill 156.

Sincerely,  
Denise Elsenbast

**Attachments:** 150 Peer Reviewed Scientific Studies on Natural Immunity.pdf; Reverse Transcription Pfizer Study.pdf

Senators,

I am a healthcare provider who has worked for nearly a decade in rural Alaska. I support SB 156 fully. Political discrimination under the guise of public health is disgraceful, immoral, and illegal. The inherent, civil, and privacy rights protected by our State Bill of Rights are being trampled by the public health department's encouragement of discrimination, individuals, business owners, employers, the health care facilities, and more. It has to end. This bill clearly states that COVID 19 vaccination is not an exception to the Bill of Rights for Alaskans. There is nothing scientific about the discrimination as it is medical consensus that these vaccines DO NOT stop transmission, see numerous studies below. A vaccinated individual can be infected and transmit the COVID 19 virus in EQUAL quantity as an unvaccinated individual; there are no grounds to even begin forcing another individual to become vaccinated to participate in society.

There have been too many reports to count of vaccinated hospital healthcare workers that caused nosocomial infection outbreaks among their vaccinated and unvaccinated patients. Healthcare workers also have inherent, civil and privacy rights, may I remind you all, though they are being trampled daily by hospital administration.

I have listed 5 studies concerning covid 19 transmission from vaccinated and unvaccinated individuals being **equal** within the body of this email that you should read prior to deliberating on SB 156. I have also attached a document containing an additional 150 peer-reviewed high-quality studies that include additional studies on transmission from vaccinated healthcare providers to vaccinated patients in nosocomial infections as well as the robust and superior naturally acquired immunity that outstrips vaccine-induced immunity. I also included a study demonstrating reverse transcription from mRNA to DNA in vitro human liver cells within 6 hours of exposure-I have attached the full pdf on this paper. This paper demonstrated in the lab that mRNA technology does in fact change human DNA quickly. This concern was "fact-checked" relentlessly so as not to deter individuals from becoming vaccinated, without the informed consent of this risk and often under duress. As a Christian, I am horrified that anyone has been forced or coerced into receiving DNA altering medical treatments against their will to keep their employment, benefits, to receive routine healthcare, to see their mother in a nursing home, all of these situations are common among my social circles.

<https://www.mdpi.com/1467-3045/44/3/73/htm>

I understand that you likely have not read these studies and can only begin to make an informed decision about SB 156 after evaluating all this evidence and testimony provided to you. Alaskans will remember which of you stood for equality, inherent rights, civil rights, and privacy rights as thoroughly we will remember the segregationists who voted down this bill to continue the political persecution in our State by the State against the people.

Studies that demonstrate equal transmission among vaccinated individuals as unvaccinated individuals:

**Sent:** Monday, February 28, 2022 10:27 PM  
**To:** Senate Health and Social Services  
**Subject:** SB 156 Covid-19 Vaccine Discrimination

Hello,

I am requesting that this email be made an official record in support of bill **SB 156, Covid-19 Vaccine Discrimination**.

This legislation not only protects individual liberty, parental rights and medical choices, but it prohibits any type of discrimination or denial of benefits based on the Covid 19 vaccination status.

It is immoral and unconscionable to force someone to get a shot to keep their job and their livelihood - a shot they strongly oppose.

I am shocked that we even need a bill like this in our day and age. What happened to the Nuremberg Code? What happened to anti-discrimination laws? What happened to the Hippocratic Oath by Doctors, and "do no harm"? Why are all of those things being ignored? (unlawfully I might add)

**I urge you all to support this crucial bill!**

If you don't, I fear you will start seeing a LOT of Alaskans moving out of state and moving states who still care about individual liberty and personal and medical freedom.

Thank you,  
Lisa Idell-Sassi

**Cc:** [REDACTED]  
**Subject:** Testimony SUPPORT for SB 156

I am a professional Electrical Engineer that has been practicing my license in this state for over 20 years. I am not a doctor but I do know what "science" is. I know how to research, I know how to read differing opinions, I know how to fact check on my own. I don't need Snopes to tell me what is true and correct. I know when my colleges are doing wrong and I know how to complain to the licensing Board about their behavior. I also know that there are other licensed professionals that have oaths to protect the public. And I know how to complain about their behavior too!

Life, Liberty and Pursuit of Happiness. Forcing or coercing people to participate in "experimental" medical procedures which could deprive them of all three violates those principles you all swore an oath to protect. I'm writing you all to urge you to support this bill out of committee.

If there was one change I would recommend it would be to change all references "agency/agents of the state [may] not" and "persons [may] not" to "agency/agents/persons shall not...require an individual to be vaccinated against COVID-19...". The use of the term "may" connotes a meaning that gives person in authority a choice "to do" or "not to do". The term "shall" requires it!

In regards to our Alaska State Constitution please consider Article 1 that is titled INHERENT RIGHTS that says "natural rights" described as "unalienable" in our US Constitution as a little more important to our community than Article 7, (behind 6 other Articles), where Public Health is 4th down in Article 7 (as has been stated by others) behind Public Education, State University and Board of Regents. You might be persuaded that there is an intent by our founders that the obligations by the state under later Articles are fine and necessary so long as they do not cross Article 1 INHERENT RIGHTS. Which is why it is stated first. In the current climate right now people are being abridged of either life, liberty or pursuit of their happiness, and in the case of the Alaska Constitution (also added by our State founders) the "enjoyment of the rewards of their own industry" when being required to subject themselves to unproven medical procedures or lose their jobs. There are currently no state laws that gives the government or any employer that right to abridge the US Constitution. So in effect people are already being denied their State Constitution Article 1 rights, including that of another Article 1 right in section 7 called Due Process. To me that means there is no law or process that allows the state to deny these rights, so technically for the last 2 years they (the State and/or private employers) shouldn't have been allowed by any court of law interpreting the statutes to fire people for not being vaccinated. **This bill would prevent any courts from "interpreting" the statutes to allow abridging our people these rights.** I for one would rather have it spelled out plainly in statute so a Governor cannot issue executive orders over it. Or a Judge cannot "rule against" it. Or a legislator cannot propose to change it without appropriate public response. Please make it easier for us that oppose the action of requiring vaccines to fight the court system. If this Bill could somehow be conceived as unconstitutional then let the minority and whatever lawyer money they have try to disprove it within the judicial system. This Bill, if approved into law would make it incumbent on a small proportion of people (in this state) to prove if there are benefits against it.

None of us want a tyrannical government telling us everything that we can and cannot do; nor empowering employers to do the same. To me this includes actions of both the legislature and the executive, as well as the judiciary that must make sense, and (as always) decide what ambiguous laws mean. This is most especially true if it violates the constitution for which this state (and our country) is founded. **I think the point of this bill is that it protects the will of the people to make their own determinations.** Article 1 Section 2, the very next clause after Article 1 Section 1

INHERENT RIGHTS is "**All political power is inherent in the people. All government originates with the people, is founded upon their will only, and is instituted solely for the good of the people as a whole.**"

Notice that "**for the good of the people**" is third behind "**ORIGINATES with the people**" and "**founded upon their will ONLY**". To me this means that regardless of what the "political science" says, our people in this state have a say in how they are governed. Which is why regardless of what you think about this bill it should at the very least be pushed out of your committee to be able to see the light of day. Maybe in the old days bills like this could be buried. But as has been stated by some "It's clear there is a lot of interest in this bill." I for one am interested. As are many of your own constituents, I presume.

#Nuremberg Code; #anti-discrimination; #Hippocratic Oath; and my favorite, where is your #Intellectual Honesty

Thank You

Mike Willmon

**To:** Senate Health and Social Services  
**Subject:** SB156

Dear David Wilson,

I would like to state my support of SB 156 and likewise urge senate support of this bill that would protect medical freedom in Alaska. No one should have their livelihood threatened or be denied access to school or services simply for declining a medical intervention. Alaskans have a right to weigh the risks and benefits of vaccination, as with any medical intervention, and make a free and informed choice without coercion. Many Alaskans have valid reasons, based on unique health history, previous infection and recovery from covid, or religious beliefs (for example) to decline vaccination. Removing freedom of choice only inspires division and dissension in our state and local communities. I urge you to support the side of freedom, peace, and unity for all Alaskans.

Sincerely,

Mike Belloni

**Sent:** Tuesday, March 01, 2022 8:59 AM  
**To:** Senate Health and Social Services  
**Subject:** SB 156 Support Testimony  
**Attachments:** SB 156 Support Testimony Letter - HHS.pdf

Senate HHS Committee Members,

Please see my attached pdf Testimony Letter in SUPPORT of SB 156, Covid-19 Vaccine Discrimination.

My name is Brittany Lauper, I live in Anchorage. I am writing to have my concerns be heard and to state that I fully support the proposed Senate Bill 156 to protect our God given rights to bodily autonomy.

In 2013, at age 27, I was diagnosed with a genetic disorder called Lynch Syndrome which causes my genes to mutate and attack my body and caused me to develop Colorectal cancer; by God's grace he healed me from that. Lynch Syndrome also gives me a much higher possibility of developing other cancers and unfortunately, I haven't been unable to get my yearly preventative exams due to the unreasonable requirements of the Doctor's offices & Surgery Centers i.e., being forced to suffocate with a mask and swabbing my nose with toxic chemicals. Additionally, I'm terrified of anything happening during an exam that could put me in the hospital. I've seen what is happening and how they treat people (especially the un-inoculated people) these past 2 years.

The mRNA gene editing technology that these injections use affects the DNA & genes of the person receiving it - and I will not risk testing them on my body for any reason. There is no transparency, no informed consent and when we ask questions, we are demonized. Even if these weren't experimental, I still would not test them on my body without being FULLY informed which the FDA is obviously not willing to permit as observed by their past & current actions. That is my decision and my God given and constitutional right to make medical choices for myself.

In December, I finally met with my Colorectal doctor (whom I had previously greatly respected) to see if she would be willing to sign a medical exemption for my employer (although I had a religious exemption letter prepared as well, I felt I qualified for both). After sitting down with my Doctor going through all my questions & notes I brought with me, all she could say was "it's safe and effective" ... No elaboration on how it could affect someone with Lynch Syndrome and DNA disorder. When I respectfully asked her "is this your medical opinion that it's safe for me and my personal medical history? Or is this your personal ethical opinion because you think I should get it?" And she said it's her personal ethical opinion and she believes everyone should get it... then adding "You could probably find an anti-vax doctor in town that would sign your medical exemption." This, to me, is medical malpractice.

The audacity of a government thinking they can force something into my body and implement a blanket mandate over every human with NO regard to personal medical circumstances or religious beliefs is not only unconstitutional, but an egregious human rights violation.

Additionally, to require us to jump through stressful, time consuming & financially costly hoops to get a medical or religious exemption - that has been shown to likely be denied by most employers - only to put us on a government list to keep track of the exemptions that are accepted, makes me feel like less of a human.

The stress and anxiety caused from the threats of losing our ability to make an income is not to be downplayed either. This is NOT about my health. This is NOT about my safety. This is about the federal government being able to persecute us and control our lives - indefinitely. This is not right... Something very, very bad is happening here.

This medical experiment they are coercing many confused & fearful people to a part of is nothing less than criminal. I know you have seen the unbelievable numbers of deaths and injuries caused from this. I do not understand how anyone is still pretending like this is any kind of cure for getting back to our normal free lives. Anyone who is injected can get this illness and still spread it. It's completely illogical.

It is YOUR DUTY to secure & protect our rights. Emergency power is NOT a governing power in our state. We need to hear more of our state leaders taking a bold stand and speaking up about the dangers of this shot. If we the "little people" are aware of the data - you must be aware too. Being willfully ignorant will not be acceptable when this is exposed for what it is. I will not accept this as "safe and effective". It is a lie. There is no evidence this is safe OR effective. There are no successful safety studies. It is dangerous and it is killing people. This injection is the most toxic in US history - and it's only been 1 year - and our lives are being threatened with it. You are our Representatives for the main purpose of keeping our inalienable rights safe & sacred. PLEASE support this crucial bill.

**Liberty is not dead; it is a living, vibrant, powerful force and it will not be taken from me.**

So, I fully support SB 156, Covid-19 Vaccine Discrimination and I only support our elected leaders that uphold their oath to protect our sovereignty of choice.

Thank you for your time.

Brittany Lauper

**From:** Alisha <[REDACTED]>  
**Sent:** Tuesday, March 01, 2022 9:16 AM  
**To:** Senate Health and Social Services  
**Subject:** Testimony in support of SB156

Hello, my name is Alisha Asplund. I am from district D8 and I will be representing myself, my mother- Beth Asplund District D8, my cousin Olivia District D8 and My Aunt- Bonnie Hager District E9 today

We support SB156

My mom and I feel that individuals should not be threatened with loss of employment, denied access to an education, lose the ability to travel within and between states, or denied access to public places for simply declining to comply with "one size fit all" health interventions or treatments such as COVID-19 vaccination, and thus be denied the right to weigh the benefits and risks that are relevant to them as an individual with their specific medical history and personal health conditions.

My mom and I feel very strongly that we should be trusted to make our own personal medical decisions based on our personal medical history, individual health conditions, or other valid personal or ethical reasons.

My mom and I do not believe that the government should support or facilitate the discrimination of individuals based on the individuals COVID-19 vaccination/immunity status or other personal health choices. The government should not allow the use of a persons vaccine or immunity status to be used as a means to discriminate against and deny them their rights, ability to work or travel.

My Aunt and Cousin wanted me to make sure to include that they are specifically against the idea of vaccine passports being required for travel. And supports the section of the bill that stated "may not require an individual to produce documentation of the individual's COVID-19 vaccination status or a COVID-19 immunity passport in order to travel to or within in the state."

11                    **Sec. 18.09.260. Personal vaccine history.** A state agency, an employee of the  
12                    state, or an agent of the state may not require an individual to produce documentation  
13                    of the individual's COVID-19 vaccination status or a COVID-19 immunity passport in  
14                    order to travel to, or within, the state.

Thank you for your time

**Subject:** SB156

I am writing in support of SB156. I am in jeopardy of losing a 13 year career as an RN due to the COVID-19 vaccine mandate. I lost an 80k a year job because I was forced into a corner of either getting the vaccine or subject myself to weekly testing.

This mandate (jab and testing) is destroying peoples lives, jobs, businesses and careers.

Please end this madness. These "vaccines" are dangerous. This fact was brought into the public forum by Senator Ron Johnson and Liberty Counsel is taking up the case for military members and federal contractors who have been injured by these "vaccines".

This is a problem that is only going to get bigger and the consequences have been awful and they will only get worse as time goes on.

**Sent:** Tuesday, March 01, 2022 10:56 AM  
**To:** Senate Health and Social Services  
**Subject:** Vote for SB156, please

Hello Members of the Senate Health and Social Services Committee,

I am in support of SB156, and I ask you to please, vote to pass this bill. This bill reaffirms the commitment to protect Constitutionally recognized rights of life, liberty, and property naturally possessed by each person, granted by God.

COVID-19 mandates attack a person's right and responsibility to make decisions in the best interest of their own life. Whether, or not, those mandates are/were effective in protecting people is unclear and controversial. And, introduction of a chemical injection treatment has caused deaths and life-long injury calculated segment of the people.

There is also evidence that the COVID-19 mandates are backed by the industry that provides "a cure". Conflict of interest?

Please defend the people's lives, and rights by voting for SB156. .

Thank you for your time and consideration,

Julia Tenison  
1200 W Dimond Blvd  
Anchorage

**Sent:** Tuesday, March 01, 2022 10:59 AM  
**To:** Senate Health and Social Services  
**Subject:** Support SB 156

**I am writing in support of SB-156. No one should be fired or refused employment because of their choice to choose medical freedom and bodily autonomy over fear and coercion.**

**Please protect our rights of choice and medical freedom.**

**Citizens are being coerced to choose treatments inappropriate for them based on their personal medical history and beliefs.**

**The following is my personal experience with this current injustice.:**

I was employed from 6/29/2015 to 9/10/2021 (over 6 years) with Chugach Training & Educational Services LLC at Alaska Job Corps in Palmer as a Medical Record Clerk in the Wellness Clinic.

(This included working from home 2 days a week for several months during the 2020 COVID restrictions period 4/2020-11/2020 - all staff was tested before our staff and students were allowed to begin to return to Center.)

About 3 PM on Friday 8/27/2021, a user wide email was sent from our Center Director informing us that due to the Biden issued COVID vaccination mandate, as of 9/01/2021 all employees were required to show verification of COVID-19 vaccination or to complete & show verification of negative COVID-19 tests 3 times a week to have access to the Alaska Job Corps Center to continue working.

Due to religious and health reasons, I do not wish to risk taking the vaccine, and feel that is is discriminatory to request only unvaccinated persons to test, as vaccinated persons can still contract and spread the virus.

I expressed my concerns and beliefs to my Center Director who indicated the order was issued due to the Federal mandate.

I worked the following Monday 8/30 & Tuesday 8/31 and submitted my remaining leave time through 9/10/2021 in hopes of a change in policy. (I had already entered leave for Friday 9/3 for an extended 4 day Labor Day weekend).

on 9/13/2021 Monday, I spoke to HR and informed her I would need to turn in my keys and ID if policy had not changed. I was asked to write a letter of resignation. I indicated I was not resigning, but being forced to find employment elsewhere to earn income to survive since they were not allowing me on Center to work and wrote a letter to that effect upon submitting my keys & ID.

I applied for state unemployment benefits on 9/14/2021 online and have been continuing to file weekly claims and submitting required job searches.

I received a phone call from AKUIB for details of my employment separation and was highly offended to be subjected to having to justify my personal and medical reasons for my decision.

On 10/17/2021 I received a letter in my PO box postmarked 10/14/2021 (letter dated 10/13/2021) from UI Claim Center. The UI Claim Center letter indicated they determined that I did not establish good cause for voluntarily leaving my work & therefore denied benefits from application until 10/23/2021 as well as having my maximum payable benefits reduced by 3 times my weekly benefit amount.

I did not receive ANY UIB benefits until 12/3, have been seeking new employment, and NOT as of yet received a hearing date for my appeal.

As a 62 year old voting taxpayer who has worked since I was 12 years old, I am astonished at the injustice I am receiving.

Thank-you for your time & consideration.

Gyulene McKenzie

**From:** [REDACTED]  
**Sent:** Tuesday, March 01, 2022 11:05 AM  
**To:** Senate Health and Social Services; Sen. Mia Costello  
**Subject:** SB 156

I am writing in support of Senate Bill 156, which includes language to eliminate any mandates for vaccinations, particularly the experimental sort deployed (and STILL deployed) for Covid 19.

1. Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
2. Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**
3. Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

This doesn't address all of the many reasons to support this bill, but it should be enough.

Thank you for your consideration.

**Sent:** Tuesday, March 01, 2022 11:12 AM  
**To:** Senate Health and Social Services  
**Subject:** Yes on 156 - No on vaccine passports!

Dear Committee Members,

I urge you to support Senate Bill 156 that will protect Alaskans' freedoms. Each of us are responsible for the protection and well being of ourselves and those around us. It is our duty to act in the best interest of our communities and we are smart and compassionate enough to do so in the best ways possible.

A one-size-fits-all appearance of public safety that does not actually ensure public safety is not the solution. Many have valid reasons for declining COVID-19 shots, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccine.

Personal health care is just that - personal. No person should be forced to take injections against his or her will. It's a horrific overstep to even suggest such treatment of a human being. Every person has the right to life, liberty and the pursuit of happiness. An arbitrary mandate that COVID-19 shots, found to be less and less effective all the time, should obstruct that right is unconstitutional, reprehensible and alarming.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination and make informed decisions. We are fully capable of making intelligent choices in the best interest of ourselves and our communities. Let's stand together to protect freedom while it is still an option.

Respectfully,  
Sarah Hoover

**To:** Senate Health and Social Services  
**Subject:** Public testimony

Please read this into public testimony for the hearing on Senate Bill 156.

Greetings,

I am writing in to ask for support of Senate Bill 156.

While I already believe that the Government shouldn't try to restrict the movement of the people, I have an additional reason I believe this bill should go through.

Demanding vaccination in order to move freely is detrimental to anyone who chooses not to receive the vaccine, but is further detrimental to those who cannot receive the vaccine.

The Covid 19 vaccine is not recommended for anyone who has ever had anaphylaxis. I have two children who have had anaphylaxis to certain exposures, and both require an epi-pen for life saving measures. I believe if our population is required to show a vaccine passport, to move freely, it will unnecessarily discriminate against those who cannot safely obtain the vaccine.

I believe in the right to medical care absent the interference of Government, and I respectfully request you adopt this bill, not only to protect our already valuable freedoms, but to further protect those who would be persecuted for something they literally have no control over.

Thank you very much for your time and attention to this important matter.

Cejie Benoit

I support SB 156. Citizens should be able to make an informed choice for their bodies by looking at all the science and comparing that with their individual health conditions at the time. Many medical procedures have been approved by the FDA and then later recalled. I am lucky that my mom did not take a drug that was given in about the 1960's for pregnancy issues. This drug caused my classmate to be born with a stub for an arm. Very sad.

**Sent:** Tuesday, March 01, 2022 12:50 PM  
**To:** Senate Health and Social Services  
**Subject:** Support SB156 - Testimony, Medically Harmed by Vaccine/Mask requirements

I fully support SB156. Please stand in support of personal liberty. I was harmed by vaccination and masking requirements by being denied medical treatment during childbirth. Please consider my testimony.

When I was in labor with my second child, I was unfortunately transferred to Bartlett Regional Hospital in Juneau. I had been laboring for over 40 hours, and my body was trying to push my body also wasn't ready, so I had to fight the urge to push. This was the hardest thing I have ever had to do in my entire life. It was all I could do to focus my eyes on a spot on the ceiling and breathe deep breaths until the all consuming urge to push that baby out passed. If I gave in to my instincts, I would damage myself and likely need surgery. When I got to the hospital, I needed an epidural. Not for the pain, but to slow my labor down and help my body relax and finish dilating. It was medically necessary.

When I arrived at the hospital, despite being told that there would be someone there waiting at the entrance to escort me to my room, I was harassed by a young man at a COVID screening booth. I was moaning in pain, using all of my effort to focus on breathing and not pushing. There was a policy on the books at Bartlett exempting laboring mothers from needing to wear a mask. Nonetheless, the man from the screening booth followed me into the elevator and forcefully held a mask over my face with his hand until I was in my room, against my verbal protest.

I knew that my son was going to be born with club feet, and with no pediatric orthopedic specialists in Juneau, I knew that I would likely be needing to travel. This was January 2021, when the State of Alaska still had travel restrictions. I had written on my birth plan, and I verbalized to my care providers at Bartlett that I did not consent to a COVID test, because if it were positive, I would not be able to travel to seek the necessary immediate treatment for my son's condition. Nonetheless, they refused to submit the order for my epidural until I consented to a COVID test. I did not consent. They denied me medical care because I was unvaccinated and refused to be tested. I was tested anyway, and the epidural order was put in. My son was born 8 hours later, and I did need to urgently travel to Anchorage for treatment. Had I tested positive, my son would not have been able to seek necessary medical treatment because of airline and state travel restrictions.

This was wrong. I was denied medical care, at the detriment of the health of myself and my unborn child, to "minimize risk" for staff who had it within their power to just wear higher grade protective gear if they were not comfortable with the risk of their profession.

Thank you,

**From:** BAV [REDACTED]  
**Sent:** Tuesday, March 01, 2022 12:52 PM  
**To:** Sen. Tom Begich  
**Cc:** Senate Health and Social Services  
**Subject:** SB 156 - Support & Strengthen!

Dear Senator Begich,

As a long time constituent, I wanted to express my amazement at where we find ourselves in history. We are faced with needing to put a bill in place - SB156 - in order to protect the minority from the tyranny of the majority. As Vera Sherav has mentioned, what is good for the individual is good for everyone, not the other way around. To avoid repeating mistakes of the past, I ask that you not only support this bill, but work to broaden and strengthen it.

After sitting on the sidelines for over two years, I've decided I will no longer be shamed into silence around this issue. I believe vaccine and the associated mandates to be legalized rape or assault. At the same time, since the pharmaceutical industry and all who administer the COVID shots are immune from liability (as well as for every childhood immunization), who will pay for the damages? Why has the government and the private sector been allowed to require an unproven shot that only I will suffer the consequences if harmed?

At the same time, the discrimination being allowed or promoted by businesses and agencies around this issue would have been unthinkable a few short years ago. Due to mask and testing mandates, I find myself not frequenting many business establishments or enjoying live performances. I am not alone in my views and experiences. Dozens of my friends are also seeing the wrongs that are being perpetrated against citizens of this state, across our country and around the globe.

I want to be proud to be an Alaskan. That means I challenge you, this committee, and this legislature to act with intelligent leadership and compassion. To rise above the fear based rhetoric surrounding the COVID crisis and institute the protections provided under this bill so that Alaska can once again lead this nation in civil liberties and rights similar to passage of the Anti-Discrimination Act of 1945.

Thank you for your time,

Beth Verrelli  
Anchorage, AK

Alaskans deserve to have their body autonomy protected. And also their personal medical information.

The Covid 19 injections is an unproven, unreliable injection of which the long-term effects/affects are unknown.

We should not have to choose between an injection and our livelihoods or our freedoms to move about freely in society.

We should not be required to "show our papers" to get into events.

Kindest Regards,  
Amy Breaux

Senators,

I think it is about time for a bill recognizing our rights to choose supersede any sort of restrictions. We should have never gotten to this point in the first place, but for nationwide fear mongering

The greatest danger of this virus has been to those near 70 years and older, hence there is no reasonable basis for broad spectrum mandates.

Treatments which were highly effective have been suppressed. Read some of Dr Peter McCullough expert writings.

Vaccines have had catastrophic side effects, many of which have been unreported in the mainline television news, I can share a personal account of a family member whose life was altered forever by a moderna covid vaccine. Vears reported cases are a fraction of all cases, and even at that they number above 20,000 growing weekly.

Thank you for considering my quick observations. I support SB156.

COVID vaccines do not prevent infection or transmission but are designed to reduce seriousness of disease. It should be the employees decision on whether to take this vaccine as it only affects their personal health. I have known plenty of vaccinated coworkers who have tested positive for COVID recently even some who were also boosted. I have also had health care worker friends who were fired solely for not being vaccinated. Common sense should prevail. Thank you.

**Subject:** Re: SB156 and other mandates, at todays March 1 for 130 Testimony

Edited update. Clarify:

I just dont think political or city should control our lives .. Let People choose their body, their freedom, their rights, so.. Sb156 just needs to support people's freedom .. I realized that.. so many appeals and Testimonies can mess my thoughts .. FOR ONCE for all ( stop means to stop the POWER of political control over people's lives.. ) That What I meant ( for the Sb156).

I want to share this **AGAIN**, Please please DO not let them mandate us, We all have the freedom of choice . A Lot ot medical people cannot have anymore on top of risk injury, there are a lot of people who have allergies that are in the vaccine and cannot have it. Leave that to **CHOICE TO** the people. If you do not let people have a choice of their own bodies. People will rise, people will fight back. We don't need problems in this Alaska state.. We are doing well. SB156 to remove power authority of telling people. How to live. And start **supporting the constitution of the United States for the people, even ALASKANS!!** They have **violated** the **HIPPA** rights, **ADA rights**. We want it back.. our private lives ... Let us be, LET LIFE moving again , Cities need to run their lives business to number things thrive again not dying thrive type things. **GO FOR THE People. not for power,nor greed, please..**

COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children. There is already an ongoing shortage of healthcare workers due to these mandates. **Alaska should follow the example of other states and prohibit vaccination mandates in state law now!**"

Thank you!

Christy Montero

**From:** Jacki Makinen [REDACTED]  
**Sent:** Tuesday, March 01, 2022 1:40 PM  
**To:** Senate Health and Social Services  
**Subject:** SB 156

I am writing to you asking for your support of SB 156, "An Act relating to COVID-19 immunization rights; and relating to objection to the administration of a COVID-19 vaccine."

There has been much political and personal turmoil since the start of the pandemic in 2020 and that turmoil continues in many places, both at home and abroad. Since the emergency authorization for a vaccination against COVID-19, and subsequent approval, there have been those people that have chosen not to be vaccinated for various reasons. Some of those people willingly gave up jobs and sources of income to stand by their choice. As liberty-minded Americans, this bill respects and supports both liberty and equity.

Discrimination already comes in many forms, and many of those forms have been denounced within our laws, statutes, and legal system. To not pass a bill such as this, senators are merely encouraging a new form of discrimination: discriminating against a person's choice. I will not reiterate the age-old argument of "my body, my choice" that has rang throughout the country every election year. To have freedom, we must accept consequences for each choice, but never should one of those consequences be discrimination encouraged and supported by legislators and law-makers. Each individual must take personal responsibility for their decisions, even if that decision means that they are putting themselves at risk. As of 2020, the state's bureau of Vital Statistics continued to report that Alaskans were more at risk of dying from cancer or heart disease than COVID-19.

([https://dhss.alaska.gov/dph/VitalStats/Documents/PDFs/VitalStatistics\\_AnnualReport\\_2020.pdf](https://dhss.alaska.gov/dph/VitalStats/Documents/PDFs/VitalStatistics_AnnualReport_2020.pdf)) Shall we discriminate against those cancer patients that do not opt for chemotherapy? Shall everyone see a doctor to determine whether or not they have heart disease therefore they have to carry a card that shows that? As ludicrous as it may sound, this is the precise direction our state would be heading if this bill were not passed.

While you are at liberty and free to vote on this bill as you see fit, I will remind you that such a freedom comes with both a huge responsibility and huge consequences. Consequences are both good and bad. As elected representatives, you were chosen by the people – the people made a choice – to write/amend laws that protect the people: the people's rights and the people's property (physical, intellectual, and otherwise). Lawmakers are at the forefront of liberty as they hold tyranny in their hands.

Sincerely,

Jacquelyn Makinen

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thank you for listening to Alaskans!  
Sherri Jackson

March 1, 2022

Dear Chairperson and Members of the Senate Health and Social Services committee:

Thank you for allowing me to present some of the latest information on COVID vaccinations, made public yesterday by New York's Department of Health and by the United Kingdom's Department of Health and Social Care, today.

The data from over 365,000 children aged 5 through 11 in New York state revealed that *by one month after they were fully vaccinated, there was almost no protection remaining against COVID*. By five weeks, fully vaccinated children aged 5-11 were at *higher risk* of developing COVID than unvaccinated children, with the increase in risk becoming even greater over time.

For 852,000 New York children aged 12 through 17, protection after one month ranged between 40% and 67%, dropping gradually but steadily over the next several weeks.

While it might seem that boosters could be the answer, Europe's FDA, termed the European Medicines Agency, warned against too many boosters and their potential to cause immune damage on January 13, 2022.

Unfortunately, we are finally coming around to acknowledge that is no way to control the spread of COVID and its variants. For that reason, many states are already lifting their mask mandates and vaccine mandates are starting to go away.

In the UK, COVID vaccine mandates for health care workers were recently lifted. And an online poll of 90,000 people, conducted by the UK government and published today, found that 90% of respondents wanted no healthcare worker mandates, while only 9% were in favor of them.

Both the data and the people have spoken. Vaccine mandates for children make no scientific sense. Vaccine mandates for healthcare workers are unwanted by both the workers themselves and the public they serve.

Discrimination by vaccination status, when the benefit of vaccination rapidly declines, and the vaccinated can catch and spread COVID, is illogical and arbitrary. Please vote in favor of SB156.

<https://www.medrxiv.org/content/10.1101/2022.02.25.22271454v1.full.pdf> -- NY DOH preprint

## ***Pfizer Shot Is Far Less Effective in 5- to 11-Year-Olds Than in Older Kids, New Data Show***

**While protection against hospitalization is still strong, the vaccine offered almost no protection against infection, even just a month after full vaccination.**

" The Pfizer vaccine is the only Covid shot authorized for that age group in the United States. It still prevents severe illness in the children, but **offers virtually no protection against infection, even within a month after full immunization**, the data, which were collected during the Omicron surge, suggest.

The sharp drop in the vaccine's performance in young children may stem from the fact that they receive one-third the dose given to older children and adults, researchers and federal officials who have reviewed the data said.

The findings, [which were posted online on Monday](#), come on the heels of clinical trial results indicating that **the vaccine fared poorly in children aged 2 to 4 years**, who received an even smaller dose.

Experts worried that the news would further dissuade hesitant parents from immunizing their children. **Other studies have shown the vaccine was not powerfully protective against infection with the Omicron variant in adults, either.**

"It's disappointing, but not entirely surprising, given this is a vaccine developed in response to an earlier variant," said Eli Rosenberg, deputy director for science at the New York State Department of Health, who led the study. **"It looks very distressing to see this rapid decline, but it's again all against Omicron..."**

## **EU Drug Regulator Warns Against Overuse of COVID Booster Shots**

(Voice of America, January 13, 2022)

"The European Union's drug regulator is warning that too many doses of COVID-19 vaccines could eventually weaken the body's immune system, rendering the extra shots ineffective.

Marco Cavaleri, the head of vaccine strategy for the European Medicines Agency, said earlier this week that booster shots can be administered "once, or maybe twice, but it's not something

that we think should be repeated constantly.” Cavaleri said instead that boosters should be administered just like an annual flu vaccination.

Cavaleri is the latest health expert to urge against offering a fourth shot of a two-dose COVID-19 vaccine in an effort to provide extra protection against emerging variants of the coronavirus. Britain’s Health Security Agency said last week there was “no immediate need” for people to get a fourth shot, as the current booster regimens are providing good levels of protection. The World Health Organization has repeatedly said that providing first doses to poorer nations is a higher priority than richer nations offering boosters...”

**Sent:** Tuesday, March 01, 2022 2:50 PM  
**To:** Senate Health and Social Services  
**Subject:** SB156 Testimony

I would really appreciate it if our legislators would send a clear and resounding reminder to every organization, agency, employer, corporation, and group that Alaskans are still free. I would appreciate you even more if you would help to reverse the misinformation that the virus, that so many fear, requires a vaccination when in reality has a 99.8% survival rate. Put an end to the far reaching medical discrimination that has taken hold.

I was laid off from the north slope on the first day that all employees were required to wear a non-prescribed medical device over their faces in April 2020. Even dinner napkins were distributed to drape over our faces in the absence of any other covering. I have yet to find suitable employment that doesn't require a mask or an injection as a condition of employment. Consequently, my unemployment benefits ran out in December 2020.

Over the past 2 summers, I travelled to where my family is from in Western Alaska to go to fish camp. Summer 2020, we were required to complete paperwork and show proof of negative "tests". I was compliant. Summer 2021, the village of Unalakleet demanded paperwork to be completed, proof of a covid synthetic gene mutation shot otherwise currently referred to as a covid vaccine or proof of a negative test. (The shot or test were also required as a condition of travel for one of the air carriers). This time, I did not participate in that behavior. Upon arrival at the airport, I was asked by a stranger at the ticket counter for private health information (which I politely pointed out to them), then I answered their questions honestly. I was then told that I wouldn't be able to travel. I rejected that opinion and at that point they called Unalakleet and passed the phone to me. The lady on the phone identified herself as some covid team member and again a stranger asked for my health information, again I pointed out that she was asking me for private information, but despite that, I would answer. She replied that I would have to reschedule my travel until I had proof of a negative test. My question, was "under whose authority?" She replied that this was from this tri-villages covid team, or something like that. I replied that this team had not purchased my tickets. Upon my arrival in Unalakleet, I was met by the covid team representative and the Unalakleet police. They told me that I had to step outside to talk to them, where I was told that I had to fill out the paperwork. Incidentally, their paperwork includes all of my personal details (name, residence address, phone number), purpose for travel, destination, vaccination status, quarantine options. By signing the paperwork, a person is agreeing that they will comply and if not, agrees to fines of \$250-\$1000 and refusal to complete incurs a \$500 fine. I am not yet aware of any consequences for my non-participation. I had pointed out to them that the year prior, they were requiring proof of a negative test. This year they were requiring proof on an injection or a negative test, what would they require next year? A mark on my forehead or on my right hand? This is straight out of the book of Revelation in the Bible. This is exactly where they are so boldly leading us and at the same time thriving financially from funds provided by the federal government.

My life has been turned upside down by the fear that everyone is harboring. I spent 6 weeks (Feb – March 2021) traveling up and down the east coast without a mask and without an injection and miraculously survived without event (other than the dramatics of those that promote fear).

Please restore freedom in our state, the freedoms that corporations and government are trying to eliminate.

God bless you and protect you! You are in my prayers.

**From:** Donna Celia [REDACTED]  
**Sent:** Tuesday, March 01, 2022 3:02 PM  
**To:** Senate Health and Social Services  
**Subject:** Public Testimony: SB 156

Hello,

Thank you for taking my Testimony. I'm Donna Celia. I'm an Anchorage resident, and I was not able to give verbal testimony on this item. So I have included my comments below.

I would urge the Senate to pass SB 156. Vaccine discrimination has had a distinct personal impact on my family. Even though this legislation cannot affect the workplace discrimination for us, I thought our experience may be informative for this committee.

My husband is a member of the AK National Guard and works full time at a DOD civilian job. His prior military record includes four deployments to war zones, and he has served in active duty and guard service for nearly 15 years. He applied for a religious accommodation at both his jobs.

So, now every Thursday at work he is forced to enter the building through a special door for "unvaxxed only," he is forced to wear a mask on Thursdays only, and he is forced to take a toxic, self-administered covid test once a week, every Thursday. He jokingly named this "National Discrimination Day." He has repeatedly asked his leadership whether this process is part of the presidential mandate, or if it is the "accommodation" that he requested. His leadership regularly reverses themselves on which one of these things it is. If it is part of the "mandate" then how is it possible to segregate his shop into "Vaxxed" and "Unvaxxed" when vaccinated personnel can still catch, spread, be hospitalized and die from Covid? Why aren't vaccinated people being tested too? But if it is the "accommodation," then why is there no evidence that the government has granted his request? The IG personally informed him that no civilian personnel in his unit have received a religious accommodation. So, you see, the Federal Government is presently trying to have its cake and eat it too. Meanwhile producing a hostile work environment for its finest employees, in which they are forced to use separate doors, separate seating areas, wear a mask which marks them out as "unvaccinated" people, and they are subjected to different healthcare policies. This is functionally no different that telling "colored people" to use a different water fountain, or forcing "colored" people to attend different schools. Even though this discrimination is not race-based, it is discrimination against people who express strong religious objections to the vaccine. So, this is illegal discrimination based on religion, which is already against the 1964 Civil Rights Act.

At the Guard, where he is a first sergeant to an undisclosed unit (undisclosed for his privacy), he will be making a decision within one week of today as to whether he will sign up for his final re-enlistment. He always wanted to complete a full career of service with the US Air Force/AKANG. He has an exemplary record. But now he has to wonder whether his next career move will put him into a discrimination trap. You see, he still has not received approval for his religious accommodation request. And even if he does receive an approval (which is enormously unlikely), he recognizes that the military can arbitrarily determine that his religious objection to the Covid vaccine will render him "unready to deploy" which will mean he could be dishonorably discharged. This policy makes him uncertain that, despite his best efforts throughout 15 years and 4 deployments, not even a SINGLE piece of bad paperwork, he could have his whole record of service destroyed simply for standing up for his religious beliefs. Isn't this exactly the kind of man you want to defend your constitutional rights? Yet, he, and others like him, may very well decline to further protect this country. What kind of people will take his place? I will restate: this policy is DESPITE the growing evidence that vaccines DO NOT prevent infection, spread, hospitalization, or death. So what do they do, other than destroy morale and harm our national security?

Websters Dictionary defines the term “anti-vaxxer” as a person who opposes the use of vaccines or regulations mandating vaccination. But you’ll see if you look at their website, that this definition was changed in October 2021. So, according to Webster’s Dictionary, my support for SB 156 makes me an “anti-vaxxer.” A derogatory epithet that applies to anyone who opposes vaccine mandates!

I’m giving you this perspective because SB 156 will protect Alaskan citizens from a similar fate. I urge you to acknowledge the insidious and divisive nature of vaccine mandates and vaccine passports. Please act today to protect Alaskan citizens in the public sector from the harm that has already befallen your neighbors serving in the military and federal jobs.

**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

### **SUPPLEMENTAL ADDITION TO MY TESTIMONY,**

from Dr. Joan Priestley, M.D.

Dear Committee members-

I am writing to provide further information concerning the relative risks to children, from the vaccines and from COVID infection.

Data from the Pfizer application for authorization in children revealed that not one child in the control group died, was hospitalized, or even had a severe infection. That is how children respond to COVID- they have a mild case, and bounce back. Hard to improve on that outcome.

The CDC Advisory Committee determined that the death of one child would be prevented, for every million doses given to children.

Each child get two doses, so 500,000 kids need to be vaccinated, to save one child's death.

However, the vaccine results in many side effects. Let's look at just myocarditis. Its incidence is between 1 : 2,600 (Hong Kong study), to 1 : 6,600 (Israeli study). I took an average of the two- 1 : 4,600.

The math is simple. Vaccinating 500,000 children will result in 108 cases of myocarditis. Let's pare that down to just 100 cases. Myocarditis is a serious medical problem.

30% of those cases will completely resolve (30 children). 20% will have their lives restricted and shortened (20 children). They will likely die of heart failure, stroke or heart attacks within 20 years.

50% will be completely disabled, and they will likely die within 5 years. That is 50 previously healthy children, who will lose their lives for the sake of preventing one COVID death.

The provisions of SB 156 help secure parental rights, to protect children from this needless and dangerous vaccine. Please consider these facts, when voting on SB 156.

Sincerely,

Joan Priestley, M.D.

**Subject:** Testimony in favor of SB156 - PLACE IN RECORD

Public Testimony in favor of SB156  
Senate Health & Human Services  
Tuesday 3-1-22

My name is James Squyres, I am from Rural Deltana. I am testifying before you today in favor of SB156. Alaska should set the example as the place where the right to life is protected and celebrated from conception to natural death.

The right to life includes the freedom and liberty to live without coercion from employers, schools, the healthcare establishment, and the government.

Alaskans must be free to make healthcare decisions for themselves and their children without coercion and to keep those decisions PRIVATE.

Article 1, Section 22 of the Alaska Constitution indicates... "The right to privacy is recognized and shall not be INFRINGED." You as legislators need to PROTECT US from privacy violations. It is your obligation to do so because the Oath of Office you took under Article 12, Section 5.

Alaskans should never fear the loss of income, employment, education, travel, or any services because they will not reveal their healthcare or vaccine status.

Let's move this bill out of committee without delay.

That concludes my testimony  
James Squyres  
Rural Deltana

**From:** cody [REDACTED]  
**Sent:** Tuesday, March 01, 2022 3:16 PM  
**To:** Senate Health and Social Services  
**Subject:** SB 156 proposed amendment

My name is Cody Loomis and I'm in Sitka.

Thank you for this opportunity to participate in our lawmaking process.

I greatly appreciate the intent of SB 156, and I appreciate the protection that it would provide if passed as written. My critique today is to caution the lawmakers about the specificity of the language in SB 156, my understanding of the language in the bill, is that it would only prohibit a vaccine passport implemented due to covid 19. I believe this is a limiting factor that has the potential to hobble it's effectiveness.

The infrastructure for a personal smart device/phone based digital health passport is currently in place, and is being implemented all over the world, and in some parts of this country. In the event that this digital health pass is implemented, It doesn't require a lot of mental gymnastics to imagine an American society that is more like the CCP social credit system than the free society that we used to occupy just a few short years ago. In the hands of a government with nefarious intent, the implementation of a digital health pass FOR ANY PATHOGEN OR DISEASE could usher in a state of tyranny and authoritarianism that we Alaskans have only read about in history books, or seen unfold on our news cycle in other parts of the country. In the instance where this becomes a reality, we will see people fight against this in any way that they have available to them. I implore you, remedy this situation before it escalates any further.

I have a couple of specific concerns with the language in this bill.

My first concern is that it seems that this bill would only protect Alaskans from vaccine passports that are implemented due to covid-19. If there is a variant in the future, designated SarsCOV3, or covid-22, or a different virus completely, will this legislation as written protect Alaskans from authoritarian tyrannical social credit systems implemented for anything other than covid-19?

The other issue that I have, is that the 10<sup>th</sup> amendment of the constitution of the United States already prohibits the Federal Government from wielding any power that is not explicitly granted to it by an act of congress or the constitution.

The FDA, the CDC, Government funded hospitals, and the state health authorities should not, and do not have enforcement authority for their recommended public health policies. In the lack of a state of emergency declaration by the governor, health mandates in place are illegal to enforce, and therefore the local municipal police, and the state troopers should be protecting Alaskan's rights. But they have not been doing anything close to this. They should be responding to this illegal behavior with investigations, and protection of the people. Where are the Alaska state troopers to protect and serve the population? why are local police not protecting the constitutional rights of civilians? We have a serious accountability problem in this state with our law enforcement agencies, and the duration of these blatant civil liberties violations lays bare the necessity for an elected protector of the citizens rights. The state legislature must implement a law enforcement agency that answers only to the people, and is sworn to protect their constitutional rights as a primary directive. Just as an elected sheriff is the ultimate law authority in counties in the lower 48, Alaska

needs the equivalent of a sheriff and deputies for each borough in the state to ensure that this kind of sustained and blatant allowance of individual liberty and suspension of bodily autonomy never happens again.

I appreciate that SB 156 will start the process of restoring the social contract between those who are governed, and those who are governing.

I have another concern that is more abstract. It is that Passing this legislation as written, tacitly agrees, that the federal government does have the power to enforce it's bureaucratic health decrees on everyone, and therefore, a state law is required to counter that power.

If a state law is necessary to protect Alaskans from federal interference in their personal health decisions, those lawmakers reading this, should rewrite this bill to prohibit public health passes in their entirety for any reason, and prohibit compulsory compliance in any and all public health mandates outside of a state of emergency.

I fear it is a grave mistake To limit this legislation to measures implemented only due to covid-19, and to limit this prohibition on medical discrimination only to state entities is a grave mistake. Protect the citizens rights that you represent, not a single person who wants to engage in mitigations will be prohibited to do so by this bill.

I am concerned that to forward this bill as written, should it pass and become law, is to invite the same institutions and bureaucracies currently trampling our individual liberty, to come up with another reason to implement their tyranny and oppression through a public health pass, or vaccine passport in response to the next public health threat that on a long enough timeline, will undoubtedly occur.

Thank you for your work on this matter, I truly appreciate the efforts of the lawmakers who have taken on this most contentious issue. Thank you for your service to the state of Alaska, and your service to the citizens who make up it's populace.

**Subject:** Testimony on SB156

I am one of the people who didn't get to testify by phone today. I hope that SB156 is passed. We are Alaskans, 50 yrs here, family all born and raised here, all active, informed voters. We did not move up here to have our privacy taken from us. In my opinion the whole Covid thing has been over played. We all had it except for my Mom who is 88, the rest of us now have Natural Immunity.

We are not anti vaxers, but this vaccine has not been tested. Long term side effects are unknown. We all know how many "approved" drugs are recalled after time has passed because of injuries.

The other thing which has made many turn against this vax is how it has been shoved down our throats. How we have been threatened, made fun of, lost employment and friends. The whole thing feels like a con now. I don't think anything the Gov can do will make those of us who are not vaxed, get vaxed. It is unreal to me that so many people rushed to not only receive it but to offer their Children up as lab rats. If things go bad, and seems to be a lot of injuries are turning up, people will want answers.

Thank you  
Pamela Hall

**Subject:** SB 156

Dear Health and Social Services Committee Members,

Our family is very concerned about continued vaccine mandates and discussion of the possibility of "immunity passports". Alaska has often been on the forefront of fighting for individual rights and freedoms. It's time for Alaska to take a stand and say NO to vaccine mandates.

- **Nobody** should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion**.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.
- Considering the emphasis placed on wearing masks helping to mitigate risk, individuals should be able to decline the vaccine while agreeing to wear masks and be tested periodically. They should also be able to use demonstrated immunity as a reason for exemption.
- This law should extend to the **medical workforce** as well. We should have the same right to make a decision regarding our health as the rest of the community. I and many others I work with have been directly impacted by these mandates.

Thank you for your service and attention to this matter.

**From:** Taunnie Boothby <[REDACTED]>  
**Sent:** Tuesday, March 01, 2022 5:52 PM  
**To:** Senate Health and Social Services  
**Cc:** Rep. Kevin McCabe  
**Subject:** SB156 - Testimony in Support

My name is Taunnie Boothby. I live in Willow, AK and I am in **Support of SB156**.

I want to tell you a story regarding the harm caused by infringing on our health freedoms.

Imagine that you have dedicated your life to public service for over 30 years, primarily in Law Enforcement at the State level. Then the pandemic occurred, and the COVID-19 shot became required for continued employment. You consulted your Dr. because, after all, you are not a Dr. The Dr reviews your medical records and, based on the analysis, states, "Thant under no circumstances are you to take this shot because of a prior anaphylactic shock reaction. It could take your life based on your history."

The Dr. writes a medical exception document, and it is presented to your employer. The employer says, "Thank you, but we have no accommodation for you." What do you mean, there is no accommodation needed? They sate, "Oh, but you are not qualified for your current position. Your options are to resign, or you will be fired."

**This happened!**

It did not happen in Alaska but in Washington State. We should never be threatened, and our freedoms must be protected. My friend was fired and moved to a more freedom-loving state.... unfortunately, that was not Alaska but Texas. I am awaiting his justice from the court system against the Governor of Washington that had no right to require my friend to risk his life on an unproven, dangerous medical experimental gene therapy shot without any consideration. If he had died, what would his wife have done and his boys? This cost would be too much with no accountability by the State, Pharmaceutical companies, or the Federal Government. This is not ok to do to people.

I am not an anti-vaxer, but it should be with the proper informed consent of the risks a person is allowed to make that decision with their Dr.

Please pass this bill.

Thank you,

Taunnie Boothby

**To:** Sen. Lora Reinbold; Senate Health and Social Services  
**Subject:** In support of SB156 and individual liberties

Dear Members of the AK Senate:

I am entreating you to please help us regain and retain our freedoms. A bill like this should never have to be introduced, but what other way is there to correct the overreach that has already occurred? Now we Must protect our quickly eroding freedoms and liberties at once with this SB 156.

We do not want COVID-19 mandatory injections. We do not want mandatory COVID-19 passports. We do not want COVID-19 discrimination. We do not want COVID-19 mandatory injections for employment public or private. We do not want COVID-19 discrimination. We do not want COVID-19 mandatory injections for employment public or private. It's intrinsically wrong to create an environment of coercion and/or not allow citizens to have the liberties we inherently have and you should be helping to preserve.

Finally, there is a serious concern of the discrimination that is occurring as a result of all in power who are weaponizing and politicizing medical choices and status. If you are anti-discrimination, then why are you as a state legislature willing to discriminate against people for their own right to medical freedoms and choice? Please do the right thing and support and pass senate bill 156.

Respectfully,

THERESA GROVES

Fairbanks, AK 99712

**Subject:** SUPPORT SB 156

We as Alaskans are concerned with the threat to personal liberty posed by vaccine mandates and so-called "vaccine passports". It is morally wrong that in order for an individual to have a livelihood to support family and a career to advance their efforts, one must accept a medical intervention. These rights of life, liberty, and the pursuit of happiness are constitutionally protected, and the state of Alaska must not deny the free moral agency of an individual to discern and make decisions for self and dependent children.

Sincerely,

James and Shannon Miller  
Fairbanks

Hello Senators,

Please Support SB156 "The Medical Freedom Bill". If our right to consent or not to consent to what enters our bodies is not preserved, then we really have no rights at all. We are basically experimental guinea pigs to be auctioned off to the highest bidder.

I think many Alaskans would rather see the whole system collapse, then become experiments. Most Alaskans choose freedom over safety everyday. The simple choice to live in this land proves that idea. We live in one of the more naturally dangerous and extreme states in our country. If citizens want safety let them live in the other 49 states and let Alaska be free.

Thank you

**Sent:** Tuesday, March 01, 2022 8:06 AM  
**To:** Senate Health and Social Services  
**Cc:** sherrycoburn@rocketmail.com  
**Subject:** SB156

I was born in the United States of America and I have enjoyed more freedoms and Liberties being a citizen of this great land than any other citizens of other countries in the world! I love being an American and have been proud of my country and enjoyed all of the great things that we have, until this past 2 years.

I have been appalled at how our rights have been stripped away and our freedoms have been trampled. And for what. Nobody is really looking at science. The whole idea of Science is to be disputed and many people (scientists) looking at the data and experimenting so that a hypothesis can be proven. That is what we have not seen or heard in the past 2 years. We have been told a narrative that we must wear a diaper that does nothing to protect us from any virus. It has been scientifically proven to not be effective and yet we have mandated our citizens to wear an oxygen depleting, bacteria producing, medical device where people are breathing in their own dirty air. We have had more disease from wearing the mask, and no proof there was any good reason to wear it.

And then we have been forcing people to get a vaccine. If vaccines worked for a common cold virus, we would have had a cure for the common cold but we learned that we can't because a virus will mutate and replicate too quickly. How is it that we know from science that we can not make a vaccine for a virus. It is not a disease, it is a virus. We have been blessed by our creator to have an immune system to take care of us when we get exposed to a virus. We have had many more viruses that have been much more serious than Corona. Sars, Mars, Eboli, HINI, West Nile, Aids, We didnt have a vacine and yet we lived, and got heard immunity and everything was fine. We did not shut down the way of life as we know it and guess what we all survived.

Why now has society believed the lie that they have a magic unicorn vacinne that will cure this. With no testing, nor proof that it would do any good. We have not even been told what is in it. We have not had informed consent. There are not long term studies to show us how humans will respond to this medical treatment. Why has so much been done to force people to take this unproven bioweapon? People have not been informed, they have been incentivized, or coerced to take this experimental drug.

I have lost my job because I refused to take something into my body that was unproven and there was no informed consent. This is so illegal! Why have we allowed the cost of human life, liberty, a righth to earn a living and make medical decisions for our own body to be stripped from us? Why?

What happened? I lost my job because I would not have the vaccine. Do you know how terrified I was to look at not having any income, or put poison in my body. I should not have been faced with that conumdrum ever! When you give up your rights and freedoms for safety you loose both. I want to live in the country I was born in, not this country we are experiencing now where the government thinks they have to tell us what to do. I will not turn over my God Given Right to breathe, and take care of the temple he gave me just so the pharmaceutical companies and the corporate doctors and hospitals can make alot of money.

You need to use strong words in this bill. Make it so nobody, no entity, group, organization, or government has any right for any reason to force someone to do something when they have no proof that it will do them any good, or that it will do anything to protect others.

We have the data now that the opposite is true. We have had more adverse events and deaths from this vaccine than all the other vacinnes combined worldwide over the past 30 years.

It is your obligation to protect the citizens you represent. It is your duty and this is what I want and everyone I know wants. We want to be protected and have the right to make decisions for ourselves to do our own research and make informed decisions.

Please vote to get this bill on the Senate floor and get this passed. Do everything you can do to ensure this happens. You will have some answering to do if you do anything less than what I am requesting.

Respectfully,

Sherry D Coburn

**Subject:** Support of Senate Bill 156

I'm writing in support of Senate Bill 156.

The last two "pandemic" years of my family's lives have been enormously effected due to mask and vaccine mandates and requirements that ask citizens to show proof of vaccination.

Without proof of vaccination (which as you know and support- is our own personal private decision) our family has not been able to send our kids back to their private school they both had been attending since preschool. Without proof of vaccination, I was unable to return to my job in the education sector to which I'd been devoted to for the majority of my adult life. These things forced our family into homeschooling our children, forced me to find other temporary entry level jobs that could appreciate and understand why I could not supply a Covid vaccine card. The Covid vax card requirement forced my Mother out of her job, six months away from retirement. In the same hat, it forced her out of her housing because in the small Alaskan town she lives in, she was renting from her work organization. She had worked and lived there for 11 years. Poof! In an instant the rug was pulled from under her- all because of this white card.

The many places that required proof of vaccination meant that we could not do much outside of our personal household. It meant that trips to see my husbands family, who all live in Hawaii, were I allowed. We weren't welcome. It meant that we all had to push pause on our preventative, routine and other healthcare plan needs for over two years because we were not welcome into Dr offices and clinics like those who had a little white card. It meant that our family was sequestered, isolated and are still seeing and feeling the effects of that in a larger sense even today.

I support this bill 100%. No government entity, private organization or publicly funded group should tell each of us what we should and should not do with our bodies.

Two of my children and I have two rare, genetic blood-clotting disorders, which are the main reason preventing us from seeking out any version of this vaccine. Had I complied with the many entities bullying us to get the vaccine and that it was safe, we would not be here today. We would be dead. There is absolutely no question about it. . My doctor stands by this statement with medical proof.

We have been cut off from friends, relatives, church, employers, travel opportunities, our medical care facilities and services, and for awhile even our own public library... all because we don't carry around a white Covid vaccine card and could not comply with the mandate.

This Bill is essential for the safety and well-being of my children and future generations to come. I am pleading with Senators who do not see eye to eye on this topic to call me, come to my home, I am willing to provide as many details, documents and discourse about what it has been like to live through the experience of being silenced, being treated as "less than" all because of this particular requirement and the unnecessary mandates.

I appreciate what you are doing, what you stand for and how dedicated you've been at being the voice for many of us who have been silenced. If there is anything I may do to assist in ensuring the bill is passed, please notify me as I am willing and prepared to support in whatever ways necessary.

Warmth & Light,

Shelbi Lynne Voit

Chugiak

**Subject:** I support SB156

I am testifying before you today in favor of SB156.

Alaska should set the example as the place where the right to life is protected and celebrated from conception to natural death.

The right to life includes the freedom and liberty to live without coercion from employers, schools, the healthcare establishment, and the government.

Alaskans must be free to make healthcare decisions for themselves and their children without coercion and to keep those decisions PRIVATE.

Article 1, Section 22 of the Alaska Constitution indicates... "The right to privacy is recognized and shall not be INFRINGED." You as legislators need to PROTECT US from privacy violations. It is your obligation to do so because the Oath of Office you took under Article 12, Section 5.

Alaskans should never fear the loss of income, employment, education, travel, or any services because they will not reveal their healthcare or vaccine status.

Let's move this bill out of committee without delay.

That concludes my testimony

I am emailing today to say YES to SB192 and HB334. I support bringing Alaska Midwifery statutes in line with national standards. This Bill satisfies the Legislative Audit Recommendation #1 given by the State of Alaska, by protecting Alaska Midwives and benefitting the public by increasing access to high quality, out of hospital midwifery care, lowering out of pocket healthcare costs to Alaskan families and lowering healthcare costs to the State of Alaska, and extending midwifery care for both mother and baby after delivery. I firmly support the passing of SB192 and HB334 now.

Sincerely,

Kiyanna G. from Eagle River, Alaska

Kiyanna G. from Eagle River, Alaska

Testimony of Lawrence D. Wood in support of SB156

Date: 2/28/2022

I am a 67 year Alaskan, married for 49 years, whose wife, Lydia, is a retired elementary teacher with 27 years experience in Alaska, whose children and their families live in Alaska. I am a retired businessman in mining, mining equipment and soil remediation equipment development, soil remediation, construction, with 18 years in telephony. I reside at 4750 Wolverine Rd., Palmer, Alaska 99645.

I support SB156 as necessary and as a needed end to the specter of abuse against the individual. There is no basis in science or medical practice for what has happened and is still happening with the fear mongering and forced inoculation using vaccines that are truly experimental and which are now shown to have a far greater propensity for harm than previously admitted by government.

Business and government have acted out of fear, misinformation, in an outright subterfuge in the attempt to suborn the rights of the individual in mandating these experimental vaccines for reasons now demonstrated to be without basis in science or fact, given the focus is the healthy population demonstrated to be least susceptible to the COVID virus—0-30 years of age without co-morbidities. The focus should have been on those with the greatest need, not on those least susceptible.

Further, all of the mRNA vaccines are still administered under Emergency Use Authorizations barring any recourse by an individual harmed by these vaccines. Why is that, if these vaccines are truly ‘harmless’?

The entire population of this country is being used as guinea pigs in a mass inoculation program using experimental vaccines in which the full impact upon the individual and the population is unknown.

Further, the policies, mandates and other means used by business and government violated informed consent as mandatory inoculations did not require informed consent between one’s personal medical provider or where children were inoculated without parental permission. Further, for many, it was a ‘you want to keep your job, you submit to the vaccination’ all or nothing choice. Many who have refused the shots, have lost their jobs. The damage to our medical care system is increasing as more professionals choose to quit rather than take an unknown and experimental shot that may kill them immediately after the shot, or 5 years down the road.

The COVID pandemic response has seen the rise of a centralized medical bureaucracy that does not allow any concerns by medical professionals regarding the vaccines to be presented and the public informed of such concerns. Instead, doctors who express concerns are literally hounded with their reputations impugned, their characters slandered by MSM and government officials. Medical licenses are revoked, suspended and practices run out of business. Same with any parent or individual who expresses concern about the long term health effects of these experimental vaccines.

With the mRNA vaccines this pogrom against those medical practitioners and scientists who question policy has gone to a new level.

Reputations are trashed, medical licenses are suspended or revoked for any medical professional who speak out against vaccinating the healthy and the very young. Same for those non-medical employees who balk at the coercive tactics and the unknowns of the experimental vaccines.

If you are unaware of this pogrom, you are ill-informed and need to have your staff investigate and provide you with the information. Use DuckDuckgo as the search engine, not Google, as Google wipes any article that does not support the CDC and NIH policies.

SB156 restores the rights of the individual and returns this aspect of medicine to informed consent rather than coercion without respect to the safety and experimental nature of these vaccines.

Look at the number of health professionals fired for not vaxxing. Why did they refuse the shot being forced upon children and adults who have no medical training whatsoever?

I have read many studies, listened and watched many interviews with Dr. Robert Malone, MD, the inventor of the mRNA process, and Dr. Peter McCullough, MD, a nationally respected TX cardiologist, as well as articles and videos by other experts in the U.S. and internationally. I read and signed the Great Barrington Declaration and the Belgian Doctors' Letter. I read many articles on the success of the Ivermectin protocol that eliminated COVID infections in Uttar Pradesh, India, a province of 240 million people from April-August, 2021. Some of which disclosed the involvement of the CDC and WHO. Same regarding the effectiveness of hydroxychloroquine. I am not ill informed nor speculative in this testimony.

The COVID pandemic response was the biggest screw-up in the history of mankind.

In my life, I have gone through many epidemics and pandemics including polio. I have never seen anything like what has happened to this country during the national pandemic response and Alaska's pandemic response. And, the ongoing vaccine mandates using vaccines that are not vaccines in the historical sense. These vaccines modify our DNA, produce blood clots in our capillaries and are expressed beyond the initial generation of cells out to at least the 4<sup>th</sup> generation beyond the initial shot. What is put in your system does not go away, and I am not referring to immunity. We are guinea pigs whose rights did not exist and still do not exist where COVID is concerned. Fear was used as an incredibly effective weapon against the population to coerce our cooperation.

The long term effects of these alleged vaccines will come into focus over the next decade. I pray that full accountability to the people of this nation and state is made before then. SB156 is a start in leveling the pandemic response versus rights playing field.

**Subject:** SB156

**Categories:** [REDACTED]

I support this bill. And request you vote yes for SB156. Sec. 18.09.280. It keeps the rights of parents/guardians to make medical decisions for their children/student(s). We should not have to fear that if we choose not to get certain vaccines for our children that we could be force to homeschool. And yes someone on Juneau school district board stated that in a meeting and there is staff in the district that feels this way.

We should not need to provide proof of this vaccine to be able to attend events, or our children participate in sports or other activities, or forced to show their Covid card or test negative. Staff should not need to test weekly and have results sent to employers if not vaccinated. Our person stasis private medical information.

It is my right as a parent with the help of their doctor to make all decision for my children without government over reach. Which has gone on way to long. My choice if they are vaccinated, my choice if they should wear a mask or not. These mandates have emotional damaged my children. One has been diagnosed with anxiety and being treated, speech has gotten worse that was already being treated. The mask has hindered them from their right to communicate with others since we all rely on listening and reading their lips, a face shield makes their vision worse that is already a issue that is not able to be corrected since it is blockage (tumors behind the eyes). My other child expresses and shows frustration about the mask at home. Stated to their doctor the masks need to burn in hell. Their speech also has gotten much worse.

Resident of Juneau,  
Mariah A. Rice

**Sec. 18.09.280. Objection to the administration of a COVID-19 vaccine.** 21 An individual may object to the administration of a COVID-19 vaccine to that 22 individual based on religious, medical, or other grounds. A parent or guardian of a 23 minor child may object to the administration of a COVID-19 vaccine to the minor 24 child based on religious, medical, or other grounds. A person may not require an 25 individual to provide justification or documentation to support the individual's 26 decision to decline a COVID-19 vaccine or to decline a COVID-19 vaccine for a 27 minor child.

Dear Senate Health & Social Services committee members,

I am writing in support of SB 156 and respectfully implore the Committee to advance this important legislation. I am not opposed to vaccinations. I am opposed to excessive government over-reach that infringes on the liberties of Alaskans.

Over the course of the COVID-19 pandemic, I have witnessed the widespread negative impact to our society as a direct result of the enforcement of policies that are designed to punish, humiliate, and isolate dissenting citizens who hold informed consent as a value. All Alaskans must be able to make their own choice whether to receive medical treatment, and should not have their liberty, economic opportunity, or participation in society abridged if they determine it is not in their best interest to receive the COVID-19 vaccination.

Now is the time to make a stand for Alaskans.

Thank You,

Terrya Gabriel  
Kenai, Alaska

**Categories:** [REDACTED]

Hello Senators,

It is a right for a person to select their own healthcare. It is scared between a person and their doctor. Nothing should come between that.

The narrative is falling apart  
the shut down was proven a failure  
six feet apart was silly and did nothing  
the masks have done nothing but harm, they also do nothing. A virus passes through it like football over a goal post.  
Proven safe track record is not proven and data from manufacturers is sealed for 75 years, why???????

WE are people not guinea pigs and let alone our children!

Do the right thing, it is unconscionable to force people and or discriminate against them in anyway for taking OR refusing to take a job that is unproven effectiveness and most of all safe

Dear Mr. Wilson,

I am writing to expressed support for senate bill 156. I feel very strongly that it is necessary for you to protect our medical freedom. Vaccine passports, mandates, and forced vaccination have no place in our free society. Given the experimental and controversial nature of the vaccine, no one should be forced to put it in their body. Most recently, studies are beginning to show that this gene therapy may have detrimental long lasting side effects including auto immune diseases.

Please support the bill that Lora Reinbold is putting forth to protect against mandates and passports.

Thank you,  
Scott

**Categories:** [REDACTED]

Dear Senator,

I am writing in support of SB 156, which relates to vaccine rights.

We have a right, as American citizens, to refuse any vaccine; even the Covid-19 shot.

There are many reasons people may not want to take the Covid-19 vaccine. Some have compromised immune systems. Some have antibodies to protect them after having had the disease. Some have seen terrible side effects and even death occur from these vaccines and are more fearful of the vaccine than the disease. If citizens who fear this disease are listened to, then those who fear the shot should also be recognized and accommodated.

Please pass SB 156 and secure the rights of all Alaskans, vaccinated or otherwise.

Thank you,  
Barbara Tyndall

**Subject:** SB156

**Categories:** [REDACTED]

Dear Senator Wilson,

I am writing to express my support for SB156 and to urge you to support this legislation too. It is sad that in today's world additional laws must be passed to ensure the freedoms we have always believed were ours under the existing laws and provisions in the US and Alaska constitutions. Today our freedoms are being trodden underfoot by power hungry, morally bankrupt and compromised elected and unelected officials. I fully agree with the following bulleted points:

- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion**.
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

I hope we can count on your support of this important bill.

.....the Hearing today, at 1:30pm.

I just called your office and spoke to Rachel. Rachel was very nice and helpful! 👍

I understand that, currently, you are not vocalizing your stance on SB156.

Would it be possible to have either you, or your spokesperson give me a call, at an appropriate scheduled time, to let me know your opinion? I would like to know your thoughts?? Both for SB156, or against SB156?

I am in support of SB156. I believe no human being should ever be forced, or coerced, to receive ANY TYPE of medical treatment. (I strongly believe and support experimental medical research. I am in case studies at UCLA because I agreed to and received experimental high dose chemotherapeutic injections, including rescue pills, in 1984, at UCLA.) My family and friends, living in the Wasilla area, have strong beliefs that SB156 will pass in Committees and in the entire body of the Alaska Legislature.

I look forward to the Hearing today.... to watch and listen to the questions, opinions, and answers. I'll watch the Hearing on my phone.

Thank you, your family, and staff for your long hours of work and dedication to our great state.

God bless!

**Categories:** [REDACTED]

Hello Senator Wilson,

Please Support SB156 "The Medical Freedom Bill". I am a Veteran and I have given a portion of my life to help support our freedom. This bill supports freedom. Some freedoms included in this bill, I never thought where up for debate since they are enshrined in our constitution at federal level. The idea that I would need a provide medical document to get a job, to travel to a different place in the state of Alaska or to go to the grocery store is not a concept that I ever thought I would see. Then I look around at all the things going on in other states and those things are happening now as I write this letter. This bill is a good start down the path to making Alaska the freest state in our country and to preserve what so many have given everything for. I implore you to utilize your position given to you by the people to support this bill and support our freedoms.

Thank you for your time.

**To:** Sen. David Wilson  
**Subject:** PFD Constitutional Resolution Now - pass this first.

**Categories:** [REDACTED]

Dear Senator Wilson:

I am contacting my Legislators and the Governor to call for action this session on a fair PFD Constitutional amendment that Alaskans approve. Take the PFD off the revenue table first, then it will be possible to tackle other reforms needed for a sustainable fiscal plan.

The majority of Alaskans have called on politicians for six years to give the public a vote on any changes to the PFD and Fund.

Legislators continue to cut the PFD and that's the worst kind of tax. It is time to pass a CONSTITUTIONAL PFD NOW that Alaskans approve. The PFD law is no longer effective, I do not support a PFD by law. If politicians don't protect the PFD this session they will force Alaskans to vote for a Constitutional Convention - the PFD is the issue that will make this pass, and that is not the best way to solve our political problems.

Thank you for acting now for the public good and listening to your constituents.

Sincerely,

Reuben Johnston

**Subject:** PFD Constitutional Resolution Now - pass this first.

**Categories:** [REDACTED]

Dear Senator Wilson:

I am contacting my Legislators and the Governor to call for action this session on a fair PFD Constitutional amendment that Alaskans approve. Take the PFD off the revenue table first, then it will be possible to tackle other reforms needed for a sustainable fiscal plan.

The majority of Alaskans have called on politicians for six years to give the public a vote on any changes to the PFD and Fund.

Legislators continue to cut the PFD and that's the worst kind of tax. It is time to pass a CONSTITUTIONAL PFD NOW that Alaskans approve. The PFD law is no longer effective, I do not support a PFD by law. If politicians don't protect the PFD this session they will force Alaskans to vote for a Constitutional Convention - the PFD is the issue that will make this pass, and that is not the best way to solve our political problems.

Thank you for acting now for the public good and listening to your constituents.

Sincerely,

Amy Daniels

**Subject:** Senate Bill 156

**Categories:** [REDACTED]

Honorable Committee Members,

I strongly urge you to do what is right and support Senate Bill 156. The government has no business mandating personal health choices. The so called "vaccine" has not been properly tested, does not prevent acquiring the virus, has multiple adverse reactions to and including death, alters a persons DNA and weakens the immune system. Hospitals and doctors have betrayed their oath of do no harm, have withheld or denied known medication to patients with the virus and have in some cases contributed to their patients death. Please stop the madness and put an end to forced mandates and the Orwellian passport concept.

Respectfully

Robin BeDunnah  
Kenai, Alaska

Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.

Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**

Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Thank you for Listening to Alaskans and their families

**Subject:** SB 156

Dear Senator Wilson,

Our family is very concerned about continued vaccine mandates and discussion of the possibility of "immunity passports". Alaska has often been on the forefront of fighting for individual rights and freedoms. It's time for Alaska to take a stand and say NO to vaccine mandates.

- **Nobody** should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.
- Considering the emphasis placed on wearing masks helping to mitigate risk, individuals should be able to decline the vaccine while agreeing to wear masks and be tested periodically. They should also be able to use demonstrated immunity as a reason for exemption.
- This law should extend to the **medical workforce** as well. We should have the same right to make a decision regarding our health as the rest of the community. I and many others I work with have been directly impacted by these mandates.

Thank you for your service and attention to this matter.

Greg, Wendy and Ben Monrad

**To:** Sen. David Wilson  
**Subject:** SB 156

**Categories:** [REDACTED]

Dear Sen Wilson,

I am writing today to ask you to please support SB 156.

No one should be forced to put something in their body that they object to.

The idea of vaccine mandates and immunity passports just chills my bones, reminding me of Nazi Germany and current life in China under communist rule.

As a follower of Christ, I have a moral abhorrence to the way the mRNA "vaccines" were tested and/ or manufactured using aborted human baby tissue.

Furthermore, the University of Pittsburgh expose has revealed that fetal tissue is sometimes taken from aborted babies, delivered alive, with tissue gleaned before the heart stops.

If I were to accept one of these "vaccines," I would be supporting that evil industry.

I cannot be a part of that.

If vaccine mandates and immunity passports become the law in Alaska, our beloved state becomes a partner to that horrible crime.

Please Support SB 156.

Sincerely,  
Andrea Bennett  
Eagle River

**Categories:** [REDACTED]

- I say Stop all mandates with masks and covid 19 shots. I believe it is a flu and even a more dangerous variety, but I also believe it is a greedy money grab. Big Pharma is forcing us to pay our tax dollars
- over and over again for one shot after the other. And those same shots do not stop anyone from getting the flu and still passing it on to others. A vaccination should be able to accomplish its job of stopping the covid altogether.
- Nobody should be fired from their job, kicked out of school, or denied access to public places for simply declining to accept a medical intervention.
- Alaskans have the right to weigh the benefits and risks of COVID-19 vaccination, just like other medical interventions, and **make a free and informed choice, without coercion.**
- Many people have valid reasons for declining vaccination, including personal health conditions, pre-existing immunity from a prior COVID infection, and conscientious objection to the unethical methods used to develop certain COVID vaccines.

Re: Senate Bill 156

Dear Senator Wilson

This email is being sent in hopes that you support SB156 which would make it unlawful to impose coercive vaccine mandates and so-called "immunity passports" in Alaska.

Presently the Covid menace is waning, and herd immunity is more attainable as more people have had covid so a majority of people should already have natural immunity. The vaccine does not keep people from getting Covid, and there are risks to this vaccine that we are still finding out about. Just today it has been reported that Swedish researchers from Lund University found the messenger (mRNA) from the Fizer's Covid-19 vaccine is able to enter human liver cells and be converted into DNA, and found inside the cell's nucleus. The CDA has been saying for the past year that this would not happen. This is from CDC's own web page titled "Myths and Facts" about Covid-19 vaccines. Fizer does not say the findings from the Swedish researchers is wrong. So this new evidence should send shivers up everyone's spine.

To continue to compel people to take such an experimental vaccine has little to do with our health and more to do with money, power, and politics. Enough is enough, and we are tired of the continued bullying to take a vaccine that doesn't even work. More evidence on the harm caused by this vaccine is coming out and history will show this whole fiasco for what it really is.

Please think about helping Alaskans lead a more free, tranquil existence.

Hello senator David Wilson, Please vote for SB 156, to stop vaccine mandates AND the immunity passports.. I have lived in Alaska over 50 years. I am 77 now. I got covid in July and took my horse IVERMECTIN , and was over it is 2 days !!!!!!!!!!!!! And it only cost me \$ 4.95. !!!!!!!!!

Too many people, who have put 10, 20, 30 years in a company are being forced to leave because they will not take the chemical shot. It is NOT a VACCINE. Has nothing to do with a vaccine. That is why you can still get covid after you got the shot. It is strictly about the money to the big pharma companies and all the kickback to politicians David L. Lazer

**Categories:** [REDACTED]

We as Alaskans are concerned with the threat to personal liberty posed by vaccine mandates and so-called "vaccine passports". It is morally wrong that in order for an individual to have a livelihood to support family and a career to advance their efforts, one must accept a medical intervention. These rights of life, liberty, and the pursuit of happiness are constitutionally protected, and the state of Alaska must not deny the free moral agency of an individual to discern and make decisions for self and dependent children.

Sincerely,

James and Shannon Miller  
Fairbanks

Senator David Wilson,

I want to urge all Alaska lawmakers to strongly support Senate Bill 156. It is unfortunate that a bill like this is necessary as there are those who believe they mistakenly have the authority to make decisions for individual citizens of the United States. Please urge it's passing.

Stephen Brown

**Subject:** SB 156 Prohibit Covid-19 Vaccine Discrimination

**Categories:** [REDACTED]

Please support SB 156 to ensure Alaskans have the freedom to make their own medical decisions related to covid-19 shots. This bill will remove the possibility of loss of employment, educational opportunities, or access to services due to immunization status.

There is no reason to mandate shots for covid-19 as this illness is survived by over 99% of those who contract it. Alaskans are entitled to the right to decide if they want the covid shots or not. Please make that clear to all by supporting SB 156.

Thank you for your service to Alaskans.  
David and Florie Wilcoxson  
Fairbanks, Alaska

**From:** Greg [REDACTED]  
**Sent:** Thursday, March 03, 2022 5:19 PM  
**To:** Sen. David Wilson  
**Subject:** Vaccine Mandates

No one should be forced to take any type of vaccine, especially those that may negatively affect their general health and well being, be morally unacceptable for any reason or provide dubious protections. The SARS-COV-2 vaccine has only an Emergency Use Authorization which provides more immunity to the manufacturer than it does to the recipient. Please, no vaccine mandates.

Thank you  
Gregory J Van Thiel
