

SB 214

Deborah Brollini <[redacted]>

To: Senate State Affairs

Good afternoon,

Given that social media utilizes algorithms that privacy becomes a high issue. Algorithms determine your feed. So, maybe adding the serious privacy issues to the bill.

Alaska's constitution has the strongest privacy protections in the country.

Thank you for your leadership. I support this bill.

Thank you

Senators,

I am writing to urge you to support and pass SB 214. Censorship is antithetical to first amendment of the United States constitution.

Historically censorship is not used to censor bad ideas, it was used to silence opposing views and political dissenters. We must hold social media companies liable for violating the first amendment, for using censorship to sway elections and interfere with the constitutional republic.

Thank you,  
Kendal Kruse
