Subject: Please pass SB156 out of committee

Dear Chairman Kreiss-Thomkins and Committee Members,

Please support SB156 to uphold the right of Alaskans to exercise informed consent for medical procedures.

The safety and effectiveness of Covid-19 inoculations are still being evaluated, while they continue to be distributed under Emergency Use Authorization.

The most recent safety data from the CDC and FDA administered VAERS system suggests that these injections can not be judged "safe" without serious further examination.

VAERS data released April 8, 2022 by the Centers for Disease Control and Prevention included a total of 1,226,314 reports of adverse events from all age groups following COVID vaccines, including 26,976 deaths and 219,865 serious injuries between Dec. 14, 2020, and April 8, 2022.

Informed people armed with this data might reasonably choose not to volunteer for a Covid-19 vaccine injection. Their right to choose has been under attack for the whole course of this experimental vaccine program.

SB156 will protect people's right to choose.

Thank you for your positive vote,
Rolan Ruoss

Subject: SB 156... All eyes will be on you

Representatives of the House State Affairs Committee,

Tomorrow you will be hearing SB-156. I will be watching as well as many other Alaskans. We will be watching to see if you will continue to allow discrimination to continue in this state. Discrimination that has cost people their jobs and lively hoods or has casued people to compromise their beliefs and bodily autonomy to ensure that their families don't fall into ruin.

Discrimination that is based in ideology and not scientific facts.

I hoped, as I am sure many of you did, that the vaccines would substantially reduce the impact of COVID. Similarly to what was seen with Polio and Smallpox. However, that is not the case. The data that has been coming out of highly vaccinated countries like Qatar (88.5% of the total population vaccinated) and United Arab Emirates (99% of the total population vaccinated) show that while the vaccines have great results for the individual in lowering the risk of hospitalization or death they do not have the social impact that was desired. Vaccinated and even boosted individuals can still catch and transmit COVID.

I ask that you please hear the bill, discuss the bill and move it to its next committee. Those of us that are watching are hoping that you continue with this country's long standing tradition of antidiscrimination and you move this bill.

Thank you

Louis Imbriani

Subject: CSSB156

Dear House State Affairs members,

Thank you for scheduling this bill for a hearing! It is one of the most important issues you will contend with this session: Freedom of choice over issues related to one's own body, and protection from discrimination. Our constitution protects our right to privacy, and this should include our right to choose our own medical interventions, without being punished for that decision. While some of us may not agree on the definition of "medical interventions," there is no doubt about our veins belonging to us.

Nobody should have to choose between their livelihood and accepting foreign matter into their veins, especially one such as the Covid vaccination which contains unknown and undisclosed chemicals and substances. Has the list of ingredients ever been disclosed?

A person should be able to refuse the vaccine, for ANY reason, and they should not be discriminated against, in any manner, based on their choice. A parent should also have the right to refuse a vaccination for their minor child.

I agree with the addition of the language pertaining to insurance coverage as well. There shouldn't ever be any leveraged used to force someone to accept a shot!

I am not anti-vaccination, but I would like to see legislation which pertains to ALL vaccines. People should be given the information, and then allowed to decide which ones they want to receive. Informed consent should be required before administering any drug, or medical procedure. Informed consent has been the rule in the past, but it seems to have fallen by the wayside when it comes to Covid. Sadly, many anomalies have occurred in both the rules and the rationale with the advent of "Covid."

Please pass this bill out of committee and onto the next step. Let's get it passed this session and give employees some relief, and the recognition that they are sovereign over their own bodies.

Thanks again for hearing this bill and for your consideration!

Respectfully,

Linn McCabe
Big Lake

Subject: SB156 - Prohibit COVID-19 Vaccine Discrimination

Dear House State Affairs Committee:

Please pass SB156 either in the form it was received from the Senate, or in a form that enhances its intent. In your consideration of SB156, please consider the vaccine discrimination presently occurring in New York City.

Athletes and performers in NYC are exempt from vaccination requirements, while the common citizen and employee are not. Many unvaccinated employees have been fired, and more are likely to follow.

Exempted athletes and performers most commonly cited in news stories are highly paid professional athletes. In light of vaccine mandates for non-athletes, the exception carries a connotation of unfair economic privilege; something that rallies and ignites socialists' reactions. In practice, however, what NYC truly has is not a case of economic privilege based vaccine discrimination, but instead, vaccine discrimination based on the cultural value of artists to the political agenda of NYC politicians.

Not all performers are highly paid athletes. Performers could include ballet dancers, comedians, tribute bands, mimes, and ventriloquists. Performing, including athletic performance by highly paid athletes, is an art form. Instead of highly paid athletes, we should recognize the exempted athletes and performers collectively as artists.

Lifting restrictions on artists has the effect of securing widespread conformance among NYC's general population with NYC mandates. Making an individual decision to not participate in the art and culture of New York City equates to an act of self-ostracization, and ultimately – in many cases – financial ruin.

Art is not socioeconomically stratified. In the specific case recently cited by Fox & Friends Weekend of a fired food service worker at Yankee Stadium, the artform in question (Yankees baseball; perhaps the most popular and most valued artform in NYC) is fully integrated throughout NYC culture across all socioeconomic aspects and levels. Art is culture. Much like a gladiator event at the Roman Colosseum was for the Romans, New York Yankee baseball is perhaps the most prominent expression of the art and culture of New York City. It is clear, therefore, that the entanglement of mandates and exemptions with athletes and performers makes art and the art industry the preferred agent of cultural transformation for New York City.

For the Mayor of New York City, vaccine exemptions fuel his political base with the social friction it is built upon which further empowers him. It also enables the desired cultural change; the financial ruin and cultural ostracism of the unvaccinated, and the compliance of those who have no other alternative. This yields a political cleansing of individuals from NYC who are either unsupportive or non-compliant. Achieving this objective is largely made possible by preserving the ability of artists to continue functioning with minimal impact from the very mandate and commandeered authority NYC intends to entrench as a new cultural norm.

While it is already clear to me that the vaccine mandates too many have already suffered from are unsavory, should a bill like SB156 not become law soon, what could that mean for Alaska and Alaskans in the future? Can you completely rule out the possibility of a current or future scenario where, as is occurring in New York City, a political party and favored industry exploits public health authority to effect dramatic cultural change in Alaska?

To insulate and protect Alaskans from the kind of disturbing health and cultural manipulation occurring in New York City, please pass SB156.

Sincerely,
Lucas Smith

Subject: SB 156: Committee Members Commended, Admonished

Dear House State Affairs Committee,

As an Alaskan and a constituent I am writing to commend Representatives Eastman, Kauffman and Vance for upholding their Oath of Office by requesting that SB 156 be heard.

Additionally, I write to admonish Representatives Kreiss-Tomkins, Claman, Tarr and Story for failing to uphold the Oath they swore by when taking office. While your reasoning may be sincere, it is sincerely in error. Be it fear, misinformation, personal bias, agenda's or a need of additional education regarding the Constitution of the United States and the Constitution of the State of Alaska, there is no justification for preventing a bill from being heard which protects the individual's rights to privacy, to choose their own medical interventions and to not be discriminated against. Your lack of action calls into question the integrity with which you represent Alaskans. I urge you to re-evaluate your positions, if not for the sake of your Oath of Office and those you represent, do so out of self preservation. For the suffocating dust of the trampled guaranteed rights and freedoms of others will eventually consume the freedoms so important to you. You cannot sow Field Bindweed seeds (an Alaskan classified prohibited/restricted noxious weed) and reap blueberries. Restricting freedoms by preventing bills like SB 156 from being heard will yield yet more restriction of freedoms.

When SB 156 first presented to the House State Affairs Committee, I emailed Committee Chair Representative Kreiss-Tomkins regarding this bill. I never received a response.

Sincerely,

Kathy Harris

Subject: HB 156

Dear Jonathan (and House State Affairs Committee),
It's been brought to my attention that you haven't scheduled HB 156 for a hearing and I wonder why not? Do you have a particular reason or several reasons, please write me back and let the public know also.

What comes up for me is that you're opposed to such an anti-discrimination law. That you have no problem with the possibility of the State of Alaska making laws that would create a second-class citizenry. Is this so?

I would have thought no Alaskan would ever want that to happen but I remember one time in the last year or so during the heat of the panic and fear around the virus, when another Hainesian woman, similar to me in so many ways, (Eli White's mom, we were all so pleased with his first jobs years ago with you) told me she agrees with separating the vaccinated from the unvaccinated by any means available. She shocked me then and the idea still shocks me. I don't know if she still feels that way but you're in government, do you feel that way also? I'd very much like to know.

I absolutely encourage you to schedule the hearing of course, but I really wonder why you're sitting on this? Do you have a better anti-discrimination bill to offer Alaska? I look forward to your response.

Thanks very much, sincerely, Evelyn Vignola

Subject: Amendment 49 and HB156 SB156

Will you please consider HB 156 and all the amendments to the house for a vote. Those that have taken the vaccine have become sick with Covid to the point it is not just a rare case. Speaker Pelosi who got all the shots, boosters and masked up demanding all others to do the same is now infected with Covid and she is not the only one. The vaccines have NOTHING for ANY VIRUS, the vaccine is actually for another purpose. There is nothing that shows us what the long term effects of taking this vaccine. Parasites have been found in the vaccine primarily Tripanosoma Cruze and the Hydra Valgarius. All this was run through under an emergency order where is that emergency? The numbers do not add up sorry CDC keeps changing the actual numbers. People that were in a car accident or a heart attack were counted. Too many lies that were told are coming to light on the Covid vaccine. How many people dropped dead within 24 hours of taking the vaccine? There have been plenty but the actual numbers are kept 🤔 secret. Enough of this nonsense. Thank you for protecting use against vaccines, vaccine passport and stop the discrimination against those who choose not to be vaccinated!! Craig Downing District 27 🙏🙏 ususSent from my iPhone

Subject: SB 156

Good afternoon,

My name is Amanda Spratt and I am writing to implore you to hear SB 156 in the House. This bill received great support in the Senate, and in my opinion it is one of the most important bills to be heard, as the implications of this bill not being passed would be a devastating impact on nearly 40% of Alaskans. With only 61% vaccination statewide, this leaves 39% of the population potentially unable to be employed if vaccine discrimination is not stopped in its tracks! Nearly 40% of Alaskans who either cannot or simply do not wish to be vaccinated are being pushed out of society. Employment is the biggest issue, but there are others. Many colleges and universities around the country are requiring vaccination as a condition of enrollment. We need to make sure that does not happen here. Already vaccination is required for student housing at the University of Alaska. This has been a disqualifier for my own son. This same son has been offered a very desirable summer internship that is contingent upon him being vaccinated. At this time he is applying for a religious exemption, but there is no guarantee that one will be granted. None have been granted military wide, which is affecting another one of my sons who is currently serving in the Coast Guard. His religious exemption request has been denied and at this point he is awaiting discharge. Employment and education are big deal issues. Issues that could affect 40% of Alaskans. Aside from these, 40% of Alaskans are being excluded from cultural events, conventions, and other special events. No one should be required to take anything into their bodies, especially an experimental product that has caused 30,000 deaths and over a million serious adverse reactions, in order to secure employment, receive an education, or participate in society.

Please hear this bill. With so many people being affected by this issue, you have a duty to hear it. We the people have the right to know where our elected representatives stand on matters that affect our lives in such a big way.

Thank you,
Amanda Spratt

Subject: SB 156

Hello,

I am writing to voice my support of SB 156 and to ask for a hearing for this bill. It has had huge support from the public in the Senate. And we are seeing more and more information, such as from recently released Pfizer documents, that natural immunity surpasses any protection from these vaccines. Medical

freedom is a basic human right. Everyone has the right to bodily autonomy and informed consent, free from coercion and force. Please support this bill. To deny someone services or employment based on a personal, private medical decision is nothing short of discrimination. We are on a dangerous slippery slope to creating a two class system of lesser human beings, and the thought is despicable. Please, protect the minority, protect the right to govern our own bodies, protect me and my children from forced vaccinations, and protect the equal rights of the unvaccinated.

Thank you,
Elizabeth

Subject: SB 156 Covid Discrimination

Representatives -

I am writing to request that SB 156 be heard immediately in the House State Affairs Committee so the House has an opportunity to hear from all Alaskans on this issue. the majority of Alaskans do not believe that forced medical care against their will is right. This bill prevents businesses, governments, and others from discrimination and protects the individual's right to choose the best course of action for themselves.

I urge you to not allow process or technicality to delay hearing this bill. Alaskans are being impacted every day. My wife was forced out of her job and now with the CMS mandate will never be allowed to work in her field again, never be able to use her degree or earn as much income. This mandate has negated her Master's in Dietetics.

As for myself, now the sole income for our house of 5, with three kids under 7, my job is threatened every day by these mandates. I have taken to working additional hours and even taken a second job to secure additional income and potentially replace my income should the worst happen.

As a project manager in Alaska for the past decade, I can tell you these mandates are absolutely reducing the number of quality workers looking to fill jobs in Alaska. We have less applicants every day when they see any requirements for vaccines.

Again, i urge you to not hide behind procedure or delay tactics. Bring this bill to the committee and witness the overwhelming support you will get from the people calling in to support this bill.

If we do not have the individual right to decide what we can put in our bodies, we have no rights at all and the leaders of the emergency can use force against the people legally. This is not a sterilizing vaccine.

As a survivor of Covid and the "winter of death and despair," we know now that the unvaccinated pose no more risk than the vaccinated.

Covid is over. its time to stand up for individual rights which is your sworn duty to protect.

I welcome any debate via the phone and my cell number is below.

Thanks

Mike

Subject: SB156, Prohibit COVID-19 Vaccine Discrimination

Dear Committee Members and Chair Kreiss-Tompkins,

Given the recent and ongoing government transgressions against the natural rights of individuals due to a campaign of coerced vaccination, passing SB156 is an essential precaution for providing clarity to the government and other organizations. This bill empowers individuals to resist unlawful government medical experimentation and our recognized natural right to liberty and the pursuit of happiness. Please pass SB156 either in the form it was received from the Senate, or in a form that enhances its intent. Not scheduling this bill for hearing and passage is a demonstration of the Committee's intent to obstruct and degrade individuals' ability to exercise their natural rights. I hope that is something you are comfortable with should the bill not become law.

Sincerely,
Lucas Smith

Subject: SB156 SA Committee Hearing

Hello Representative Kreiss-Tomkins,

I am writing to request that SB156 (Non-Discrimination on COVID-19 Vaccination Status) be scheduled and heard within the House State Affairs committee immediately.

It is unconscionable that even *this week* there are large scale events held in Juneau prohibiting individuals who cannot receive the covid-19 vaccine. In concert with medical professionals some Alaskans have chosen to not receive the covid-19 vaccine, which, despite following medical guidance, they cannot now participate as they would have normally in past years. Note that this paradigm has not existed in modern times for *any* other vaccine, nor does a 100% covid-19 vaccinated population enjoy protections from exposure to, nor prevention of transmission. An individual should not be required to show documentation of medical procedures by non-medical personnel. Further, these current practices are hindering community members from otherwise publically available services & vibrant arts opportunities.

Your action here is imperative. Please advise when it will be heard in committee.

Warm regards,
Cody Bennett
Juneau, AK

Subject: Please Support SB 156

Please support SB 156. Citizens of Alaska should not be forced to take a vaccine to work, play, buy food or attend educational institutes. Each individual should be responsible for what they take and not be forced to inject a substance into their body to function in society.

The COVID shot is an experimental vaccine and while many want to ignore this fact, it's true. The VARS system and the European System is fraught with reports of adverse reactions to the COVID shots. Recently released Pfizer Documents actually show they knew about the adverse effects but pressed forward anyway and the CDC approved it. Why are so many of our young athletes faced with heart problems after being fully vaccinated? Just this week, at the Miami Quarter Finals, 15 athletes quit competing citing health issues. This has never happened before and the only change is the COVID shot requirement. Again, people should not be forced to take an experimental vaccine under any circumstances.

While some argue that mandating that employers can't require a covid vaccination impacts the rights of the employers, this is fool-hearty logic. The Government already restricts the employers from discriminating against people through Title VII. But now people want to state that employers would be impacted if our State Legislation passes a law that employers can't discriminate against those that refuse the vaccination. How is this actually impacting the

business? Getting the COVID shot does not stop the spread and it does not stop people from getting COVID. So why would a business want it? Because of their own personal beliefs! Title VII prohibits this type of discrimination. A person can't discriminate against another because of their sex, religion, place of origin, disability, or age but they can discriminate because of an experimental vaccination? A vaccination that can actually harm a person!

Please support SB 156 and advocate for our constitution that deems every person is an individual. As an individual, people should have the right to deny the COVID Shot and not worry about their livelihood. Forcing a vaccine flies in the face of our State Constitution and US Constitution and a person's individual rights! Please do what's right! Support SB 156.

Thank you,

Patty R. Wilbanks
Alaska Citizen

Dear Representative Kreiss-Tomkins,

Thank you for your hard work and service in the legislature. I have especially admired and appreciated your work in supporting Alaska Native Languages.

I'm a life-long Alaskan, currently living in Haines. I'm writing to you today in regard to Senate Bill 156 "Prohibit COVID-19 vaccine discrimination". Over the past two years we have experienced an unprecedented loss of deeply personal choices in order to keep jobs, travel, and participate in life; all under the guise of protection and safety. Given the fact that there is now ample evidence which brings into question both the safety and effectiveness of the COVID-19 vaccinations, it is not reasonable nor ethical to restrict access to employment, travel, public events and services, etc., based on one's vaccination status. Alaska is a place where we live and let live. No threat exists that warrants the kind of overreach into our personal lives that has occurred in recent times. Although our constitutional rights and existing laws should already be protecting us from being coerced to accept unwanted medical interventions, Senate Bill 156 would further that protection. I am writing to ask that you and the House State Affairs committee schedule this bill for a hearing. This bill is about protecting our health and our freedom.

Thank you again for your service.

Sincerely,
Keri Eggleston

Subject: SB156

Dear Representatives,
Please allow SB156 to move through your committee. The whole Covid pandemic has divided the country, our beloved state and even families. The swirl of misinformation has a life form of it's own. Please let this bill pass through. The question then has to be asked "Why not?" What is there to fear? I am a life long Alaskan of 67 years and was taught to think for myself, gather as much information as possible and then make my decision. If it was wrong, then adjust accordingly. Now that there is a plethora of information from all around the world, I would say some of the nation and state's decisions were wrong and it's time to make a course correction. A small party of seven should not be the totalitarian voice of all Alaskans.

Thank you,
Marty Kincaid

Subject: Support for SB156

Thank you for taking the time to hear from Alaskans on this important piece of legislation. I have supported its passage through the Senate and would like for it to be heard in the House. This bill is critical for Alaskans to maintain their constitutional freedom. Too many people have been discriminated against because of their vaccination status. Many have lost their jobs and those who would "Follow the Science" should recognize that the so called Covid 19 Vaccine does not stop the transmission, nor does it keep anyone from contracting it. Those with natural immunity are actually found to have better resistance to Covid 19 than the vaccinated. Regardless of where you fall in your belief on the vaccine, nobody has the right to mandate an experimental medical procedure in order to work, or take care of your family. This bill strengthens our rights under the state and federal constitution.

Please schedule this bill for review as soon as possible. We need this to pass to protect people in Alaska against rank discrimination. If any of you would like to discuss this further, please feel free to contact me directly any time. Thank you for your consideration,

Mel Steinberg

Subject: My Testimony on SB 156

I also write in support of SB 156. It's a shame that there needs to be a law like this even introduced in order to reinforce our already existing freedom from medical and religious tyranny. We shouldn't be living of such threats and in fear like we have for the last 2 years with our freedoms being threatened, restricted, and suspended. Never in my life did I think I would see experience this in America. If I had known my country would do this to its people, I never would have signed up to defend her after 9-11. I don't know that living under the tyranny of someone like Saddam Hussein would be much worse than the trend away from freedom that we're seeing now. We all see where this is going. For many years we warned that vaccine mandates would be threatened and pushed on us, and we were called conspiracy theorists, but here we are. Maybe tyrannical governments in the past have established precedent with vaccine mandates and restrictions on freedoms for various reasons, including health concerns, but there is also precedent of mass genocide by tyrannical governments when the people would not comply with their immoral demands, so precedent does not make something established, moral, or acceptable, in our present, or our future.

I choose to not take the vaccine on religious grounds, as my body is my Temple, and I do not desire to defile it with what I, due my religious beliefs, deem to be toxic. My God, who is my Creator, is my Healer, and my Protector. Full stop. I only want to put into my body what I believe He deems to be acceptable in my Temple. I don't know whether this vaccine or its passports could be the dreaded mark of the beast, but see as how religious convictions are being tested with it, and people have been imprisoned with lockdowns, forced to cover their faces and airways, not allowed to go shopping or open their businesses to make an income, all in order to pressure them to comply, I see how it could be, so no thank you, because we all know what the Bible says about those who take that mark! If you don't know, it would behoove you to open a Bible and look it up! I also, and some of my family members, have in the past had

harmful reactions to vaccinations, including developing lumps, allergies to foods like fish and nuts, hearing loss, seizures, dangerously high fever, severe respiratory infections such as pneumonia, etc... I shutter to think what else may come down the road as a result of years and generations of vaccinations. I have such severe drops in blood pressure when presented with needles that I have several times passed out while giving blood and being given IVs, that I once was ordered by a doctor to never give blood again because the last time I gave blood he said he could not find a pulse and I did not seem to be breathing. He said it was not easy regaining my vitals and he at one point became very concerned that I might not regain consciousness that day. Looking back on the MANY and TRAUMATIC experiences I had after receiving medical "care", I later decided it best to leave my health and life to my Creator going forward, and that decision has worked out very well for me for the last decade, and I have not used my "free" medical veteran "benefits" since. If only my husband and I were paid more \$ for our service instead of being offered "free" medical pork, which we pay with our taxes and effects on our health, so not really free, that hasn't help us a bit in the end!

We should all treat others as we want others to treat us. I believe in the Golden Rule. I do not ask or force others to put what they believe to be dangerous toxins into their own bodies for my sake, and I do not appreciate anyone trying to force that on me, whether by holding me down or starving me or restricting my freedom to buy, sell, trade, shop for food, travel, or socialize and gather, the same extant as those who choose to be injected with substances that they believe to protect them, even though facts show the injected are becoming infected with Covid and transmitting it as much as those not receiving an injection. The argument for forced and coerced vaccinations on the unwilling or less willing has been that it will protect others, stop the spread, and eradicate the virus. This has proven to be untrue because even the boosted and fully vaxxed are still getting it and passing it on at nearly the same rate as those who refuse the jab, so why push this when we know it will not do what it was advertised to do from the beginning? Some admit this, and now say that one is less likely to die if they are vaccinated. What if I'm prepared for that knowing that we all die someday? What do you care how I die, whether it's from Covid, old age, or a car accident? Why shouldn't I be free to decide that a vaccine is not a risk that I want to take for my spiritual or physical health? You worry about me if I die from Covid? So what? I worry about you if you die from a shot. The claim that one is less likely to die from Covid if they're vaccinated is not looking to be true when one considers the short and long term effects of this experimental vaccine that are being reported, and aren't being reported. While I do not personally know anyone who died from Covid, I do know several people who regret taking the shot because they have experienced negative consequences in regards to their health, and we've heard plenty of reports of plenty of athletes and healthy young people dying and having strokes and heart attacks after being vaccinated, even unable to any longer play the sports that they were vaccinated for, in order to be able to play. I know people who are now anti-vax, not against Covid vaccines, but now ALL vaccines, because of what they're seeing and experiencing with these Covid vaccines.

I liken forced and coerced vaccination to the Greeks who forced the Jewish people to ingest pork, against their faith and religious convictions, and against the commandments of the God of Israel, during the time of the Maccabees. Tyrannical governments never last. They always fall, along with all those who lead in their oppression against the people, and history does not look upon them favorably. Support Freedom! Stand with us against medical and religious tyranny! It is violence!

Respectfully,
Mrs. Sanchez
USAF veteran

Subject: SB 156

I write in support of SB 156, both as an individual and as Associate Chief Medical Officer of America's Frontline Doctors. In fact, I further encourage that the act be strengthened to proscribe any person, governmental entity or employer to enquire as to vaccine status or to keep records of the same, except in the keeping of medical records by the individual's chosen providers.

The reality is that all vaccines, including those I would willingly give my own child, affect only the health of the vaccinated. No vaccine is superior to natural immunity in reducing transmission or providing immunity. Vaccines have never contributed to the eradication of any pathogen with animal reservoirs, which every pathogen except Variola (smallpox) has. Therefore, there is no governmental interest in forced or coerced vaccination. Vaccination is an immune system manipulation that any individual may consider, but it will have no effect on the disease risk of another individual.

Nor can an argument against SB 156 be based on the Biden administration's mandate for Medicare/Medicaid billing. While the Supreme Court of the United States has chosen not to enjoin such a mandate, it is still in trial with no final decision. It should be noted that no FDA approved vaccine for COVID-19 is available in the United States at present. While Comirnaty has been approved, it is not available in the US. Therefore no available COVID-19 vaccine in the US can be required as all are experimental, and no one can be forced to consent to experimental treatment under federal law. Further, while said mandate prevents submitting bills to Medicare/Medicaid from unvaccinated providers, it does not prevent any provider from delivering and charging for care. Employers can comply with SB 156 simply by charging patients directly for their services. The Federal government will then have the choice between ending its mandate, or making Medicare/Medicaid useless in Alaska. In short, SB 156 would simply make all employers and healthcare providers into a large bargaining block against the federal government's unconstitutional mandate. In fact, it is this financial coercion of this mandate that requires a "don't ask, don't keep records" amendment to SB 156, so that no employer or governmental entity can use vaccine status to discriminate on specious grounds.

SB 156 stands on the firmest ground, both for medical, biological and constitutional reasons.

Subject: Please schedule SB156 for hearing

Dear Representatives Kreiss-Thomkins and Claman,

Please schedule SB156 for hearing before the House State Affairs Committee.

It is important that Alaska law affirm the right of people to freely choose whether or not to take a Covid vaccine.

It is a personal medical decision that should only be decided by personal informed consent, and not be forced, coerced, or influenced by any employer, public administrator, or private entity.

The data now show that the protection of the Covid vaccines is personal and it wanes with time; it can reduce in the odds of becoming severely ill, but does not prevent one from catching and spreading the virus, or in fact, still being hospitalized with Covid.

Additionally, as the Covid virus has mutated the vaccines have become increasingly less effective against the new variants, as in the case of the Omicron variant against which the vaccines are less than 20% effective. Even Bill Gates recently stated that the Omicron variant is doing a better job of delivering immunity and protecting against future infection than the Covid vaccines have done.

The science is sound - those who take the Covid vaccine get some protection for themselves, but Covid vaccination does not "stop the spread" or "protect those who we come in contact with". Those are misconceptions that still are widely believed and promoted as justification for vaccine mandates and vaccine passports.

In their recent testimony against SB156 in the Alaska Senate, Senators Kiehl, Stedman and von Imhof repeated the popular misconception that Covid vaccination of health care workers protects the people in their care. Unfortunately, these Senators' beliefs are not backed by the data and science. While they might sound like good ideas, they are simply not true.

In the emotionally driven atmosphere of Covid news and public messaging most of the public is not aware that the Covid vaccines are still in trial under Emergency Use Authorization - the Pfizer and Moderna Covid vaccines products that have gained FDA approval are still not available for distribution in the US. The Pfizer and Moderna Covid vaccine doses being currently administered are, as the FDA says in its public notices, "from existing stocks until the licensed products become available". In short, the safety of these products is still being evaluated, people taking these shots are volunteering in a medical experiment, and the makers of these products are fully protected from liability for any harms you may suffer.

Alaskans who are following the science and their good sense deserve to have their freedom to choose protected by law. SB156 will do that. Thank you for supporting freedom and science.

To: House State Affairs <HouseState.Affairs@akleg.gov>
Subject: Senate Bill 156

Dear Representatives on the House State Affairs committee,

Senate Bill 156 would ensure that discrimination would be forbidden on the basis of medical decisions concerning a vaccine that is highly controversial. This bill should be quickly moved to the entire House floor for a vote. Here are the reasons for allowing this bill to move forward:

- 1) The Constitution and previous laws have already recognized the God-given right of every individual to decide to receive or reject medical treatment.
- 2) The vaccine has already been reported to not prevent people from contracting the Covid 19 coronavirus, nor does it prevent passing the coronavirus on to others, therefore it is an ineffective vaccine.
- 3) However, if some people "feel safe" because they have already been vaccinated, and they believe that the vaccine protects them, then they should not suddenly "feel afraid" by being around someone who is not vaccinated. If people are afraid that unvaccinated people are a threat to them, then they just show that they themselves know that the vaccine is ineffective!
- 4) No person should be forbidden to provide for their family. Having a job and bringing home a paycheck is one of the best ways to provide for one's family. Being able to shop at stores to purchase the food and clothing needed, is another way to provide for one's family. Therefore, no person should be forced to lose their job, or be forbidden from entering a store or restaurant because they refuse to take an ineffective vaccine that has serious adverse side effects for thousands of people, and possibly millions more as the "long term effects" start to become evident.
- 5). The military database for medical statistics shows that various forms of aggressive cancers, serious nervous system issues, and other serious adverse effects have skyrocketed in military personnel after 2020 when this vaccine was mandated for military personnel. Therefore, this vaccine should not be mandated on any individual.
- 6) Many foreign medical studies have shown that there are far more effective ways of treating the Covid 19 sickness. This is why foreign countries have a far less death rate than the United States, because they allowed their doctors to actually try different medications and found much better success than this so-called vaccine.

Therefore, I urge you to move this bill quickly to the floor for a vote, so that no person is discriminated against for making medical decisions that differ from other the medical decisions that other people have chosen to make.

Sincerely,
Linda Skarie

Representatives,

I am writing to urge support to co-sponsor and to pass SB156. I would like my voice to be heard in support of SB156. As a resident of Juneau I have been subjected to discrimination for not choosing a medical procedure that I don't believe is the best option for me. Further more, I have been prevented from access to surrounding communities by similar discrimination, which has impacted my employment. All of this is based on the reliance of unproven preventions or documentation from unproven testing to some how prove that even though I have no symptoms. I am not sick. There is no reason that I should be discriminated against for my medical choices and this needs to end now.

Thank you,

Nathan Carey

Subject: SB 156 Public Testimony - Support

Dear Representatives,

I am in support of SB 156 and I would encourage you to hold a hearing.

Never before have private people and entities been allowed to ask for medical information in order to determine

- if they will give somebody entrance to a restaurant or store or not
- if they will employ you or not
- if they will fire you or not
- if you are eligible for an organ transplant or not
- if you are eligible for medical treatment or not

just to name a few things.

Besides the fact that it is unconstitutional to ask that question, how would you like it when you go to a grocery store and the person guarding the entrance asks you if you have had a colonoscopy in the last six months? Most people would be appalled, and rightfully so. Asking for a vaccination status is no different. It is private information and should remain that way.

Mandating / prescribing something that is a medical treatment is against the law. ONLY LICENSED PROFESSIONALS can prescribe medical treatment. That is why we have medical licenses. Neither an employer, nor a lodge owner, nor an assembly member, nor a senator is a licensed medical

professional. And even if they are, if the person they are mandating/prescribing the medical treatment for is not their patient IT IS ILLEGAL.

Dividing the community into two "camps" is segregation and discrimination. And natural immunity is never being addressed in that scenario.

I urge you strongly to support SB 156. The dividing of our communities and pitching one person against another, making one person more "superior" than the other has to stop now!

Respectfully,

Irene Quednow

Subject: Unlawful and against Human rights!

The equal protection clause in the **14th Amendment** means that states must treat all their citizens equally. States can't favor men over women, whites over blacks, or heterosexuals over gays. AND VAXXED OVER UNVAXXED!!!

This HAS TO STOP! SEGREGATION IS WRONG, UNLAWFUL AND AGAINST OUR RIGHTS!

In Congress, July 4, 1776

The unanimous Declaration of the thirteen united States of America, When in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness.--That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed, --That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government,

I view the Declaration as a point of departure and a promise, and the Constitution as a set of commitments that had lasting consequences – some troubling, others transformative. The Declaration, in its remarkable concision, gives us self-evident

truths that form the premises of the right to revolution and the capacity to create new governments resting on popular consent.

I HOPE YOU DO TOO SIR!

BECAUSE WE THE PEOPLE HAVE THE RIGHT TO FIRE YOU!

WE DO NOT WANT SEGREGATION!!

Dear Representatives,

Please support SB 156. I know too many people who have been harmed by vaccinations. There should never be coercion to have someone do something to their body that may harm themselves. Government just needs to stop being the medicine man/witch doctor altogether.

Sincerely,

Mrs. Carmen Durham

Subject: SB 156

Representatives,

I urge you to hear SB 156. It passed the Senate with an enormous support from Alaskans and Senators alike.

I am a healthcare provider in Palmer and I support this whole heartedly. I am a mother of three, one of my children has had severe and rare reaction to previous vaccines that have cause life threatening seizures, over 105 fever for weeks off and on, and breathing difficulties that lasted for months.

There is no one medicine, surgery, medical intervention that is right for all people. Thousands of people die from Tylenol each year because their bodies could not tolerate it.

We cannot force medical products on other people against their will, we cannot circumvent the doctor patient relationship by allowing businesses to force medical interventions and give forceful medical advice. We cannot violate the inherent, civil and privacy rights specifically outlined in our constitution.

Article 21, the legislature must provide for the promotion of public health. That is not forcing people against their will to take products that have documented risks. Public health should be promoting nutrition, physical exercise, sleep, stress reduction, clean water. Using the public health department as an excuse to to use political force on Alaskans to receive products for which you cannot reverse or take out is the most horrendous rights violations I have seen in my lifetime.

I urge you to read the 500 testimonials and heart breaking stories from Alaskans that have had their lives ruined by the unconstitutional vaccine force that has been laid upon them. Many of them are now horribly injured and disabled unable to work following taking the vaccines.

I look forward to testifying at every opportunity and watching this bill move through the house.

Thank you for your time,
Kendal Kruse

Subject: In support of SB 156

Honorable Alaskan lawmaker,

As presently written, I agree completely with SB 156, which is presently before the House State Affairs committee. This bill, which received bi-partisan support in the Senate, should also be enacted by the House, in a timely manner.

By federal law, everyone is supposed to have the right to "informed consent" before receiving any vaccine or medication. Vaccine mandates, for any reason, deny this right, in violation of national and international law, including the Nuremberg Codes.

There is insufficient data concerning the COVID-19 mRNA vaccines for anyone to be properly "informed." The technology is new, but has a troubling developmental history. Trials were several years shorter than required for previous vaccines. The vaccine manufacturers and federal medical oversight agencies have not been forthcoming with pertinent data. However, by court order, Pfizer has recently begun to release the data by which the FDA granted Emergency Use Authorization. From what has been released thus far, it is evident that despite an alarming number of severe adverse events, observed early in the process, EUA was granted to a product that was far from safe.

From the beginning of the public vaccine roll-out, serious side-effects, including permanent disability and death have been reported to the VAERS. The government agencies, charged with analyzing adverse events and ensuring pharmaceutical safety, have largely ignored that data. (Now that the Pfizer data is being made public, we can see that they chose to ignore the severe risks, of which they were aware, from the outset.) Instead, they claim the vaccines are "safe and effective." However, contrary to what a vaccine is expected to do, these jabs neither prevent a person from catching the disease, nor from transmitting it to others. Yet, thousands of otherwise healthy persons have suffered serious injury or death, subsequent to receiving these vaccines.

Hundreds of medical doctors and scientists have spoken out against the necessity of these vaccines, citing vaccine dangers, and the availability of truly safe and effective treatment alternatives.

Several studies have shown that:

- Vaccinated people are actually more susceptible to contracting COVID variants than the unvaccinated.
- The death rate, especially among the young, is several times larger for those who receive the vaccines compared to those who contract the virus.
- Natural immunity is more robust and much longer lasting than the very limited immunity provided by these vaccines.
- Inexpensive, readily available medications and supplements are very effective for prevention and early treatment of COVID and all variants.
- The "all cause" death rate (among otherwise healthy, working age, people) increased by 40%, over prior years, in the year when vaccines became available. The 40% increase was originally reported by the CEO of OneAmerica Life Insurance Company, of Indiana). Since then, other companies and researchers have confirmed that they are observing much higher increases. There was no increase in "all cause" deaths during the first year of the Covid-19 pandemic (prior to the vaccines). Knowing these things, a prudent person is wise to decline a jab.

SB-156 is necessary, to protect the legal right of individuals to informed consent (or rejection) of this and future government overreach.

Documentation for the above assertions is readily available, at sites such as:
www.AlaskaCovidAlliance.com

Please don't hesitate to ask, if you want other sources.

Sincerely,

David Wurm

Subject: SB156

Greetings!

I would like to state my support for SB156 and ask that you vote in favor of it.

I strongly believe that Alaskans' right to choose whether or not to receive a covid vaccine needs to be protected in law. Right now people are given a "choice," but that choice often also requires them to choose between employment or not, and entry into community events or not. That sort of "choice" is based on coercion and lacks compassion. It also goes against the informed consent principle of medicine. Social rewards and penalties should not be a factor in what sorts of health and medical decisions people make.

Though it's not any one's business, I'll tell you that I am vaccinated. I am NOT anti-vax. But I AM a firm believer that a person's mind and body are their own and that they are sacred. We each get to make our own health decisions, and not every person should be required by mandate to come to the same conclusions on how to achieve health. As we've seen in so many aspects of life, diversity is a good thing.

Though I do have a stamped covid vaccine card, I have personally refused to go any event that requires I show it. I stand firmly against vaccine passports as I believe they are more of a charade than an actual measure of health or likely-/unlikeliness of spreading covid. They are discriminatory with no true justification. If we are sick, we should stay home, period. A vaccine passport does not prevent a vaccinated person from entering an event when they are feeling under the weather. A vaccine passport does exclude a person who is well.

If the vaccine manufacturers were held liable for vaccine injury, I think everyone would feel more comfortable since they would know the manufacturers have really covered all their bases in ensure a safe product.

I believe SB156 will preserve bodily autonomy, which is the most basic human right. In a time when corporations can cover the planet with plastics that never go away, poison our water with toxic PFAS chemicals and pesticides, and pump excess sugar, food additives, and GMOS into our food--all things that are making people sick, killing our planet, and altering human life as we know it for forever--I think worrying about, mandating and monitoring an individual's vaccination status is a grave misuse of energy, focus, and funding.

I do not like the division that covid mandates have created in our small Alaskan communities. The tribalism on both sides is terrifying. I would like to see SB156 pass so that that people can make medical decisions without basing them on employment, schooling, or social exclusions. Vaccine passports are a form discrimination that has no place here.

Thank you for your service,
Lisa Daugherty

Subject: support sb 156/ set the date for all for us to hear

I just dont think political or city should control our lives .. Let People choose their body, their freedom, their rights, so.. Sb156 just needs to support people's freedom ..
FOR ONCE for all (stop means to stop the POWER of political control over people's lives..)

AGAIN, Please please DO not let them mandate us,
We all have the freedom of choice . A Lot ot medical people cannot have anymore on top of risk injury, there are a lot of people who have allergies that are in the vaccine and cannot have it.
Leave that to CHOICE TO the people. If you do not let people have a choice of their own bodies.
People will rise, people will fight back. We don't need problems in this Alaska state.. We are doing well.
SB156 to remove power authority of telling people. How to live. And start supporting the constitution of the United States for the people,
even ALASKANS!! They have violated the HIPPA rights, ADA rights. We want it back.. our private lives ... Let us be, LET LIFE moving again ,
Cities need to run their lives business to number things thrive again not dying thrive type things. GO FOR THE People. not for power,nor greed, please..

COVID-19 vaccine mandates violate the rights of Alaskans. No Alaskan should be coerced when it comes to their health and the health of their children.

There is already an ongoing shortage of healthcare workers due to these mandates.
Alaska should follow the example of other states and prohibit vaccination mandates in state law now!"

pass it so we can have our rights back and truckers as well right so we have life! encomny needs this passed SUPPORT your freedom and ours as well!!!

Subject: SB156

Good Morning -

I am writing to urge you to hear SB156 Covid Discrimination. I can personally attest that the letter of law is not being followed by companies doing business in Alaska. I am a project manager in Alaska for the past 15 years, most of my time in rural Alaska.

I am personally being harassed daily, threatened with job loss, and discriminated against because of my unwillingness to disclose my vaccination status. I am not anti-vax. I support Americans' right to choose their medical interventions and not be forced, coerced, or mandated into a decision.

The argument I have heard against this bill is that it prevents businesses from making their own decisions. That is not the essence of the bill. The bill requires a business to protect the rights of individuals and apply ADA, HIPPA, and Civil Rights laws that are already on the books to COVID 19. Large businesses are actively discriminating against Alaskan every day. My wife was terminated from her position and may never be able to work again in her chosen field. I am in a daily battle with my industry for the same reason.

The government's role is not to protect businesses. The role of government is to protect individuals' rights governed under the constitution. This virus has proven to be mutating to a less than a deadly seasonal annoyance. Government must promote public health, but the single sentence in the Alaska Constitution does not grant ultimate authority to allow mandates, forced mandates, or threat of social discrimination due to medical choices.

I will be calling in and following this bill closely. I will be tracking this bill and those that are for medical discrimination and the further perpetuation of government intervention into our lives.

Thanks

Mike Kruse

I hear that SB156 is currently in the House State Affairs Committee and I just wanted to let the committee know that I am watching and waiting to see how long it will take to make it through this committee. I feel very strongly that health choices should not be a one size fits all government decision . Health decision should be personal because no person has the same medical history, adverse reaction, underlying conditions, or moral/ethical/religious convictions. I do not believe there is any excuse for a government to not allow its owns citizens to travel, access services, or work just because they do not want to participate in a one size fits all medical treatment/intervention/procedure. Coercion, threats, shaming, discrimination, disenfranchising and force should never be excepted Public Health procedures. Thank you for your time
