No civilians should have access to automatic weapons. There is just no reasonable need, whatsoever. We have a gun-fever in the US (including Alaska) that has caused thousands of preventable deaths, often children. This bill should not only ban glock-type conversion devices but enable a mechanism to criminalize and punish those who deploy them. Thank you for protecting innocent Alaskans and elevating the discussion about hunting is fine, but military-grade weapons should never, ever, be available to the general public.
