Juneau, AK 99801

Re: HB 280 – Apportion Taxable Income; Digital Business

Dear Co-Chairs and members of the House Finance Committee:

On behalf of the Alaska Bankers Association (“AKBA”), we write to express concerns with HB 280 as introduced and respectfully request that the Committee amend the bill to incorporate the Multistate Tax Commission’s (“MTC”) *Recommended Formula for the Apportionment and Allocation of Net Income of Financial Institutions*, including the broad definition of “financial institution” set forth in Appendix A of the MTC model statute (enclosed).

HB 280 seeks to move Alaska from cost-of-performance sourcing to market-based sourcing and to adopt a single-sales factor formula for highly digitized businesses. While we understand the intent to modernize Alaska’s corporate income tax system, HB 280’s revised definition of “sales” creates structural problems for financial institutions that could lead to inequitable results and constitutional risk.

I. Exclusion of Core Financial Institution Receipts

HB 280 adopts a narrow definition of “sales” that excludes receipts central to financial institutions’ regular business activities, including interest from lending, net gains from the sale of loans, investment income, net gains from security transactions, and hedging income. For banks and their affiliates, these are not incidental receipts – they are the primary sources of income and thus, should be included in their receipts factor. It also would raise constitutional issues to exclude such large components of the taxpayers’ regular trade or business receipts from the receipts factor because there is a significant mismatch between the receipts included in the corporation’s tax base and the receipts included in sales factor used to determine the percentage of the corporation’s income subject to Alaska income tax.

The constitutional issue is especially important for Alaska because the apportionment provisions for financial organizations (narrowly defined as traditional financial institutions) under Alaska Admin. Code 15 § 20.610 require that the numerator of the sales factor includes

interest income, and receipts from securities and investments, while the denominator of the sales factor would exclude all of those sales under the new definition in HB 280.¹

Excluding these receipts from the sales factor denominator while existing Alaska regulations include them in the numerator creates distorted apportionment results. This structural mismatch may inflate Alaska apportionment percentages, create the risk of more than 100 percent taxation across states, raise Commerce Clause concerns, and require financial institutions to revalue deferred tax assets for financial reporting purposes.

II. Statutory Action Is Required

Alaska law requires income to be apportioned under the Multistate Tax Compact “or as provided by this chapter.” The Compact excludes financial organizations from its general apportionment provisions, and Alaska statutes do not currently contain a comprehensive financial institution apportionment formula.

Because the Department of Revenue may enforce – but not modify – statutory definitions, any correction to HB 280’s treatment of financial institution receipts must be made in statute.

Additionally, Alaska’s current definition of “financial organization” is limited to traditional banking entities and does not adequately include bank holding companies, broker-dealer affiliates, finance lease entities, or majority-owned subsidiaries. This narrow definition produces inconsistent treatment within corporate groups and inequitable results.

III. The MTC Model Provides a Proven Solution

The MTC’s Recommended Formula for the Apportionment and Allocation of Net Income of Financial Institutions provides a tested, uniform, market-based framework. It:

- Uses market-based sourcing;
- Includes net gains (not gross proceeds) from loans and investments;
- Provides detailed sourcing rules for lending, credit card, ATM, merchant discount, servicing, and investment/trading receipts;
- Includes property and payroll factors consistent with traditional three-factor apportionment; and
- Contains a broad definition of “financial institution” that ensures consistent treatment of similarly situated entities.

The model has been in place for over 30 years and adopted by more than 20 states. It reflects extensive collaboration between states and industry and represents the national standard for financial institution apportionment.

¹ Alaska Admin. Code § 20.610(f) provides that “[t]he denominator of the sales factor includes all receipts derived from transactions and activities in the course of the taxpayer’s business as defined in AS 43.19.010 (Art. IV, secs. 15 - 17), 15 AAC 19.251, 15 AAC 19.261 and 15 AAC 19.302, but excludes tax-exempt income.”

Alaska Admin. Code § 20.610(g) provides that [t]he numerator of the sales factor must include

(1) interest, fees, charges, rents, and compensation for services performed when these amounts are derived from loans or assets in the nature of loans sourced to Alaska; . . .

(3) receipts from other securities and investments, if the securities and investments are managed from a location in the state; . . .

IV. Why Amendment Is Necessary

Incorporating the MTC financial institution provisions into HB 280 would:

- Restore appropriate factor representation for core financial receipts;
- Provide clear statutory authority for financial institution apportionment;
- Promote uniformity with other states;
- Reduce litigation and constitutional risk; and
- Provide certainty to taxpayers and the Department of Revenue.

HB 280, as currently drafted, unintentionally distorts the apportionment of financial institution income. The appropriate and tested remedy is to insert the MTC's Recommended Formula, including the broad definition in Appendix A. AKBA stands ready to work with the Committee to draft amendment language that modernizes Alaska's tax system while ensuring fairness, clarity, and economic stability.

Thank you for your consideration,

A handwritten signature in blue ink, consisting of a stylized 'S' followed by a long horizontal stroke.

Sam Mazzeo, President
Alaska Bankers Association

Enclosure: Formula for the Apportionment and Allocation of Net Income of Financial Institutions Amended by the Multistate Tax Commission – July 29, 2015

MULTISTATE TAX COMMISSION
Maximizing the synergies of multi-state tax cooperation

Formula for the Apportionment and Allocation of Net Income of Financial Institutions

Amended by the Multistate Tax Commission – July 29, 2015

Section 1. Apportionment and Allocation.

(a) Except as otherwise specifically provided, a financial institution whose business activity is taxable both within and without this state shall allocate and apportion its net income as provided in this [Act]. All items of nonbusiness income (income which is not includable in the apportionable income tax base) shall be allocated pursuant to the provisions of []. A financial institution organized under the laws of a foreign country, the Commonwealth of Puerto Rico, or a territory or possession of the United States whose effectively connected income (as defined under the Federal Internal Revenue Code) is taxable both within this state and within another state, other than the state in which it is organized, shall allocate and apportion its net income as provided in this [Act].

(b) All business income (income which is includable in the apportionable income tax base) shall be apportioned to this state by multiplying such income by the apportionment percentage. The apportionment percentage is determined by adding the taxpayer's receipts factor (as described in Section 3 of this article), property factor (as described in Section 4 of this article), and payroll factor (as described in Section 5 of this article) together and dividing the sum by three. If one of the factors is missing, the two remaining factors are added and the sum is divided by two. If two of the factors are missing, the remaining factor is the apportionment percentage. A factor is missing if both its numerator and denominator are zero, but it is not missing merely because its numerator is zero.

(c) Each factor shall be computed according to the method of accounting (cash or accrual basis) used by the taxpayer for the taxable year.

(d) If the allocation and apportionment provisions of this [Act] do not fairly represent the extent of the taxpayer's business activity in this state, the taxpayer may petition for or the [State Tax Administrator] may require, in respect to all or any part of the taxpayer's business activity, if reasonable:

- (1) separate accounting;
- (2) the exclusion of any one or more of the factors,
- (3) the inclusion of one or more additional factors which will fairly represent the taxpayer's business activity in this State; or

- (4) the employment of any other method to effectuate an equitable allocation and apportionment of the taxpayer's income.

Section 2. Definitions.

As used in this [Act], unless the context otherwise requires:

(a) "**Billing address**" means the location indicated in the books and records of the taxpayer on the first day of the taxable year (or on such later date in the taxable year when the customer relationship began) as the address where any notice, statement and/or bill relating to a customer's account is mailed.

(b) "**Borrower or credit card holder located in this state**" means:

- (1) a borrower, other than a credit card holder, that is engaged in a trade or business which maintains its commercial domicile in this state; or
- (2) a borrower that is not engaged in a trade or business or a credit card holder whose billing address is in this state.

(c) "**Card issuer's reimbursement fee**" means the fee a taxpayer receives from a merchant's bank because one of the persons to whom the taxpayer has issued a credit, debit, or similar type of card has charged merchandise or services to the card.

(d) "**Commercial domicile**" means:

- (1) the headquarters of the trade or business, that is, the place from which the trade or business is principally managed and directed; or
- (2) if a taxpayer is organized under the laws of a foreign country, or of the Commonwealth of Puerto Rico, or any territory or possession of the United States, such taxpayer's commercial domicile shall be deemed for the purposes of this [Act] to be the state of the United States or the District of Columbia from which such taxpayer's trade or business in the United States is principally managed and directed. It shall be presumed, subject to rebuttal, that the location from which the taxpayer's trade or business is principally managed and directed is the state of the United States or the District of Columbia to which the greatest number of employees are regularly connected or out of which they are working, irrespective of where the services of such employees are performed, as of the last day of the taxable year.

(e) "**Compensation**" means wages, salaries, commissions and any other form of remuneration paid to employees for personal services that are included in such employee's gross income under the Federal Internal Revenue Code. In the case of employees not subject to the Federal Internal Revenue Code, e.g., those employed in foreign countries, the determination of whether such payments would constitute gross income to such employees under the Federal Internal Revenue Code shall be made as though such employees were subject to the Federal Internal Revenue Code.

(f) "**Credit card**" means a card, or other means of providing information, that entitles the holder to charge the cost of purchases, or a cash advance, against a line of credit.

(g) "**Debit card**" means a card, or other means of providing information, that enables the holder to charge the cost of purchases, or a cash withdrawal, against the holder's bank account or a remaining balance on the card.

(h) "**Employee**" means, with respect to a particular taxpayer, any individual who, under the usual common-law rules applicable in determining the employer-employee relationship, has the status of an employee of that taxpayer.

(i) "**Financial institution**" means: [insert state's definition here][*for a starting point for the development of a definition, see Appendix A*]

(j) "**Gross rents**" means the actual sum of money or other consideration payable for the use or possession of property. "Gross rents" shall include, but not be limited to:

- (1) any amount payable for the use or possession of real property or tangible property whether designated as a fixed sum of money or as a percentage of receipts, profits or otherwise,
- (2) any amount payable as additional rent or in lieu of rent, such as interest, taxes, insurance, repairs or any other amount required to be paid by the terms of a lease or other arrangement, and
- (3) a proportionate part of the cost of any improvement to real property made by or on behalf of the taxpayer which reverts to the owner or lessor upon termination of a lease or other arrangement. The amount to be included in gross rents is the amount of amortization or depreciation allowed in computing the taxable income base for the taxable year. However, where a building is erected on leased land by or on behalf of the taxpayer, the value of the land is determined by multiplying the gross rent by eight and the value of the building is determined in the same manner as if owned by the taxpayer.
- (4) The following are not included in the term "gross rents":
 - (A) reasonable amounts payable as separate charges for water and electric service furnished by the lessor;
 - (B) reasonable amounts payable as service charges for janitorial services furnished by the lessor;
 - (C) reasonable amounts payable for storage, provided such amounts are payable for space not designated and not under the control of the taxpayer; and
 - (D) that portion of any rental payment which is applicable to the space subleased from the taxpayer and not used by it.

(k) "**Loan**" means any extension of credit resulting from direct negotiations between the taxpayer and its customer, and/or the purchase, in whole or in part, of such extension of credit from

another. Loans include participations, syndications, and leases treated as loans for federal income tax purposes. Loans shall not include: futures or forward contracts; options; notional principal contracts such as swaps; credit card receivables, including purchased credit card relationships; non-interest bearing balances due from depository institutions; cash items in the process of collection; federal funds sold; securities purchased under agreements to resell; assets held in a trading account; securities; interests in a REMIC, or other mortgage-backed or asset-backed security; and other similar items.

(l) "**Loan secured by real property**" means that fifty percent or more of the aggregate value of the collateral used to secure a loan or other obligation, when valued at fair market value as of the time the original loan or obligation was incurred, was real property.

(m) "**Merchant discount**" means the fee (or negotiated discount) charged to a merchant by the taxpayer for the privilege of participating in a program whereby a credit, debit, or similar type of card is accepted in payment for merchandise or services sold to the card holder, net of any cardholder charge-back and unreduced by any interchange transaction or issuer reimbursement fee paid to another for charges or purchases made its cardholder.

(n) "**Participation**" means an extension of credit in which an undivided ownership interest is held on a *pro rata* basis in a single loan or pool of loans and related collateral. In a loan participation, the credit originator initially makes the loan and then subsequently resells all or a portion of it to other lenders. The participation may or may not be known to the borrower.

(o) "**Person**" means an individual, estate, trust, partnership, corporation and any other business entity.

(p) "**Principal base of operations**" with respect to transportation property means the place of more or less permanent nature from which said property is regularly directed or controlled. With respect to an employee, the "principal base of operations" means the place of more or less permanent nature from which the employee regularly (1) starts his or her work and to which he or she customarily returns in order to receive instructions from his or her employer or (2) communicates with his or her customers or other persons, or (3) performs any other functions necessary to the exercise of his or her trade or profession at some other point or points.

(q) "**Real property owned**" and "**tangible personal property owned**" mean real and tangible personal property, respectively, (1) on which the taxpayer may claim depreciation for federal income tax purposes, or (2) property to which the taxpayer holds legal title and on which no other person may claim depreciation for federal income tax purposes (or could claim depreciation if subject to federal income tax). Real and tangible personal property do not include coin, currency, or property acquired in lieu of or pursuant to a foreclosure.

(r) "**Regular place of business**" means an office at which the taxpayer carries on its business in a regular and systematic manner and which is continuously maintained, occupied and used by employees of the taxpayer.

(s) "**State**" means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States or any foreign country.

(t) "**Syndication**" means an extension of credit in which two or more persons fund and each person is at risk only up to a specified percentage of the total extension of credit or up to a specified dollar amount.

(u) "**Taxable**" means either:

(1) that a taxpayer is subject in another state to a net income tax, a franchise tax measured by net income, a franchise tax for the privilege of doing business, a corporate stock tax (including a bank shares tax), a single business tax, or an earned surplus tax, or any tax which is imposed upon or measured by gross or net income; or

(2) that another state has jurisdiction to subject the taxpayer to any of such taxes regardless of whether, in fact, the state does or does not.

(v) "**Transportation property**" means vehicles and vessels capable of moving under their own power, such as aircraft, trains, water vessels and motor vehicles, as well as any equipment or containers attached to such property, such as rolling stock, barges, trailers or the like.

Section 3. Receipts Factor.

(a) **General.** The receipts factor is a fraction, the numerator of which is the receipts of the taxpayer in this state during the taxable year and the denominator of which is the receipts of the taxpayer within and without this state during the taxable year. The method of calculating receipts for purposes of the denominator is the same as the method used in determining receipts for purposes of the numerator. The receipts factor shall include only those receipts described herein which constitute business income and are included in the computation of the apportionable income base for the taxable year.

(b) **Receipts from the lease of real property.** The numerator of the receipts factor includes receipts from the lease or rental of real property owned by the taxpayer if the property is located within this state or receipts from the sublease of real property if the property is located within this state.

(c) **Receipts from the lease of tangible personal property.**

(1) Except as described in paragraph (2) of this subsection, the numerator of the receipts factor includes receipts from the lease or rental of tangible personal property owned by the taxpayer if the property is located within this state when it is first placed in service by the lessee.

(2) Receipts from the lease or rental of transportation property owned by the taxpayer are included in the numerator of the receipts factor to the extent that the property is used in this state. The extent an aircraft will be deemed to be used in this state and the amount of receipts that is to be included in the numerator of this state's receipts factor is determined by multiplying all the receipts from the lease or rental of the aircraft by a fraction, the numerator of which is the number of landings of the aircraft in this state and the denominator of which is the total number of landings of the aircraft. If the extent of the use of any transportation property within this state

cannot be determined, then the property will be deemed to be used wholly in the state in which the property has its principal base of operations. A motor vehicle will be deemed to be used wholly in the state in which it is registered.

(d) Interest, fees and penalties imposed in connection with loans secured by real property.

- (1) The numerator of the receipts factor includes interest, fees, and penalties imposed in connection with loans secured by real property if the property is located within this state. If the property is located both within this state and one or more other states, the receipts described in this subsection are included in the numerator of the receipts factor if more than fifty percent of the fair market value of the real property is located within this state. If more than fifty percent of the fair market value of the real property is not located within any one state, then the receipts described in this subsection shall be included in the numerator of the receipts factor if the borrower is located in this state.
- (2) The determination of whether the real property securing a loan is located within this state shall be made as of the time the original agreement was made and any and all subsequent substitutions of collateral shall be disregarded.

(e) Interest, fees, and penalties imposed in connection with loans not secured by real property. The numerator of the receipts factor includes interest, fees, and penalties imposed in connection with loans not secured by real property if the borrower is located in this state.

(f) Net gains from the sale of loans. The numerator of the receipts factor includes net gains from the sale of loans. Net gains from the sale of loans includes income recorded under the coupon stripping rules of Section 1286 of the Internal Revenue Code.

- (1) The amount of net gains (but not less than zero) from the sale of loans secured by real property included in the numerator is determined by multiplying such net gains by a fraction the numerator of which is the amount included in the numerator of the receipts factor pursuant to subsection (d) of this section and the denominator of which is the total amount of interest and fees or penalties in the nature of interest from loans secured by real property.
- (2) The amount of net gains (but not less than zero) from the sale of loans not secured by real property included in the numerator is determined by multiplying such net gains by a fraction the numerator of which is the amount included in the numerator of the receipts factor pursuant to subsection (e) of this section and the denominator of which is the total amount of interest and fees or penalties in the nature of interest from loans not secured by real property.

(g) Receipts from fees, interest, and penalties charged to card holders. The numerator of the receipts factor includes fees, interest and penalties charged to credit, debit or similar card holders, including but not limited to annual fees and overdraft fees, if the billing address of the card holder is in this state.

(h) **Net gains from the sale of credit card receivables.** The numerator of the receipts factor includes net gains (but not less than zero) from the sale of credit card receivables multiplied by a fraction, the numerator of which is the amount included in the numerator of the receipts factor pursuant to subsection (g) of this section and the denominator of which is the taxpayer's total amount of interest and fees or penalties in the nature of interest from credit card receivables and fees charged to card holders.

(i) **Card issuer's reimbursement fees.** The numerator of the receipts factor includes:

- (1) all credit card issuer's reimbursement fees multiplied by a fraction, the numerator of which is the amount of fees, interest, and penalties charged to credit card holders included in the numerator of the receipts factor pursuant to subsection (g) of this section and the denominator of which is the taxpayer's total amount of fees, interest, and penalties charged to credit card holders.
- (2) all debit card issuer's reimbursement fees multiplied by a fraction, the numerator of which is the amount of fees, interest, and penalties charged to debit card holders included in the numerator of the receipts factor pursuant to subsection (g) of this section and the denominator of which is the taxpayer's total amount of fees, interest, and penalties charged to debit card holders.
- (3) all other card issuer's reimbursement fees multiplied by a fraction, the numerator of which is the amount of fees, interest, and penalties charged to all other card holders included in the numerator of the receipts factor pursuant to subsection (g) of this section and the denominator of which is the taxpayer's total amount of fees, interest, and penalties charged to all other card holders .

(j) **Receipts from merchant discount.**

- (1) If the taxpayer can readily determine the location of the merchant and if the merchant is in this state, the numerator of the receipts factor includes receipts from merchant discount.
- (2) If the taxpayer cannot readily determine the location of the merchant, the numerator of the receipts factor includes such receipts from the merchant discount multiplied by a fraction:
 - (A) in the case of a merchant discount related to the use of a credit card, the numerator of which is the amount of fees, interest and penalties charged to credit card holders that is included in the numerator of the receipts factor pursuant to subsection (g) of this section and the denominator of which is the taxpayer's total amount of fees, interest and penalties charged to credit card holders, and
 - (B) in the case of a merchant discount related to the use of a debit card, the numerator of which is the amount of fees, interest and penalties charged to debit card holders that is included in the numerator of the receipts factor pursuant to subsection (g) of this section, and the denominator of which is the taxpayer's

total amount of fees, interest and penalties charged to debit card holders.

(C) in the case of a merchant discount related to the use of all other types of cards, the numerator of which is the amount of fees, interest and penalties charged to all other card holders that is included in the numerator of the receipts factor pursuant to subsection (g) of this section, and the denominator of which is the taxpayer's total amount of fees, interest and penalties charged to all other card holders.

(3) The taxpayer's method for sourcing each receipt from a merchant discount must be consistently applied to such receipt in all states that have adopted sourcing methods substantially similar to subsections (1) and (2) of this section and must be used on all subsequent returns for sourcing receipts from such merchant unless the [State Tax Administrator] permits or requires application of the alternative method.

(k) Receipts from ATM fees. The receipts factor includes all ATM fees that are not forwarded directly to another bank.

(1) The numerator of the receipts factor includes fees charged to a cardholder for the use at an ATM of a card issued by the taxpayer if the cardholder's billing address is in this state.

(2) The numerator of the receipts factor includes fees charged to a cardholder, other than the taxpayer's cardholder, for the use of such card at an ATM owned or rented by the taxpayer, if the ATM is in this state.

(l) Loan servicing fees.

(1) (A) The numerator of the receipts factor includes loan servicing fees derived from loans secured by real property multiplied by a fraction the numerator of which is the amount included in the numerator of the receipts factor pursuant to subsection (d) of this section and the denominator of which is the total amount of interest and fees or penalties in the nature of interest from loans secured by real property.

(B) The numerator of the receipts factor includes loan servicing fees derived from loans not secured by real property multiplied by a fraction the numerator of which is the amount included in the numerator of the receipts factor pursuant to subsection (e) of this section and the denominator of which is the total amount of interest and fees or penalties in the nature of interest from loans not secured by real property.

(2) In circumstances in which the taxpayer receives loan servicing fees for servicing either the secured or the unsecured loans of another, the numerator of the receipts factor shall include such fees if the borrower is located in this state.

(m) Receipts from services.

[Note - States should choose one of the following two options for this section:

Alternative Option A. The numerator of the receipts factor includes receipts from services not otherwise apportioned under this section, which receipts shall be sourced in accordance with Reg. IV.17 of the Multistate Tax Commission Allocation and Apportionment Regulations, as amended.

Alternative Option B. Delete this proposed Section 3 (m).]

(n) Receipts from the financial institution's investment assets and activity and trading assets and activity.

(1) Interest, dividends, net gains (but not less than zero) and other income from investment assets and activities and from trading assets and activities that are reported on the taxpayer's financial statements, call reports, or similar reports shall be included in the receipts factor. Investment assets and activities and trading assets and activities include but are not limited to: investment securities; trading account assets; federal funds; securities purchased and sold under agreements to resell or repurchase; options; futures contracts; forward contracts; notional principal contracts such as swaps; equities; and foreign currency transactions. With respect to the investment and trading assets and activities described in subparagraphs (A) and (B) of this paragraph, the receipts factor shall include the amounts described in such subparagraphs.

(A) The receipts factor shall include the amount by which interest from federal funds sold and securities purchased under resale agreements exceeds interest expense on federal funds purchased and securities sold under repurchase agreements.

(B) The receipts factor shall include the amount by which interest, dividends, gains and other income from trading assets and activities, including but not limited to assets and activities in the matched book, in the arbitrage book, and foreign currency transactions, exceed amounts paid in lieu of interest, amounts paid in lieu of dividends, and losses from such assets and activities.

(2) The numerator of the receipts factor includes interest, dividends, net gains (but not less than zero) and other income from investment assets and activities and from trading assets and activities described in paragraph (1) of this subsection that are attributable to this state.

(A) The amount of interest, dividends, net gains (but not less than zero) and other income from investment assets and activities in the investment account to be attributed to this state and included in the numerator is determined by multiplying all such income from such assets and activities by a fraction, the numerator of which is the average value of such assets which are properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the average value of all such assets.

(B) The amount of interest from federal funds sold and purchased and from

securities purchased under resale agreements and securities sold under repurchase agreements attributable to this state and included in the numerator is determined by multiplying the amount described in subparagraph (A) of paragraph (1) of this subsection from such funds and such securities by a fraction, the numerator of which is the average value of federal funds sold and securities purchased under agreements to resell which are properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the average value of all such funds and such securities.

(C) The amount of interest, dividends, gains and other income from trading assets and activities, including but not limited to assets and activities in the matched book, in the arbitrage book and foreign currency transactions (but excluding amounts described in subparagraphs (A) or (B) of this paragraph), attributable to this state and included in the numerator is determined by multiplying the amount described in subparagraph (B) of paragraph (1) of this subsection by a fraction, the numerator of which is the average value of such trading assets which are properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the average value of all such assets.

(D) For purposes of this paragraph, average value shall be determined using the rules for determining the average value of tangible personal property set forth in subsections (c) and (d) of Section 4.

(3) In lieu of using the method set forth in paragraph (2) of this subsection, the taxpayer may elect, or the [State Tax Administrator] may require in order to fairly represent the business activity of the taxpayer in this state, the use of the method set forth in this paragraph.

(A) The amount of interest, dividends, net gains (but not less than zero) and other income from investment assets and activities in the investment account to be attributed to this state and included in the numerator is determined by multiplying all such income from such assets and activities by a fraction, the numerator of which is the gross income from such assets and activities which are properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the gross income from all such assets and activities.

(B) The amount of interest from federal funds sold and purchased and from securities purchased under resale agreements and securities sold under repurchase agreements attributable to this state and included in the numerator is determined by multiplying the amount described in subparagraph (A) of paragraph (1) of this subsection from such funds and such securities by a fraction, the numerator of which is the gross income

from such funds and such securities which are properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the gross income from all such funds and such securities.

- (C) The amount of interest, dividends, gains and other income from trading assets and activities, including but not limited to assets and activities in the matched book, in the arbitrage book and foreign currency transactions (but excluding amounts described in subparagraphs (A) or (B) of this paragraph), attributable to this state and included in the numerator is determined by multiplying the amount described in subparagraph (B) of paragraph (1) of this subsection by a fraction, the numerator of which is the gross income from such trading assets and activities which are properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the gross income from all such assets and activities.
- (4) If the taxpayer elects or is required by the [State Tax Administrator] to use the method set forth in paragraph (3) of this subsection, it shall use this method on all subsequent returns unless the taxpayer receives prior permission from the [State Tax Administrator] to use, or the [State Tax Administrator] requires a different method.
- (5) The taxpayer shall have the burden of proving that an investment asset or activity or trading asset or activity was properly assigned to a regular place of business outside of this state by demonstrating that the day-to-day decisions regarding the asset or activity occurred at a regular place of business outside this state. Where the day-to-day decisions regarding an investment asset or activity or trading asset or activity occur at more than one regular place of business and one such regular place of business is in this state and one such regular place of business is outside this state, such asset or activity shall be considered to be located at the regular place of business of the taxpayer where the investment or trading policies or guidelines with respect to the asset or activity are established. Unless the taxpayer demonstrates to the contrary, such policies and guidelines shall be presumed to be established at the commercial domicile of the taxpayer.

(o) **All other receipts.** The numerator of the receipts factor includes all other receipts pursuant to the rules set forth in [insert your state's regular situsing rules for the receipts not covered by this section].

(p) **Attribution of certain receipts to commercial domicile.** All receipts which would be assigned under this section to a state in which the taxpayer is not taxable shall be included in the numerator of the receipts factor, if the taxpayer's commercial domicile is in this state.

Section 4. Property Factor.

- (a) **General.** The property factor is a fraction, the numerator of which is the average value of

real property and tangible personal property rented to the taxpayer that is located or used within this state during the taxable year and the average value of the taxpayer's real and tangible personal property owned that is located or used within this state during the taxable year, , and the denominator of which is the average value of all such property located or used within and without this state during the taxable year.

(b) **Property included.** The property factor shall include only property the income or expenses of which are included (or would have been included if not fully depreciated or expensed, or depreciated or expensed to a nominal amount) in the computation of the apportionable income base for the taxable year.

(c) **Value of property owned by the taxpayer.** The value of real property and tangible personal property owned by the taxpayer is the original cost or other basis of such property for Federal income tax purposes without regard to depletion, depreciation or amortization.

(d) **Average value of property owned by the taxpayer.** The average value of property owned by the taxpayer is computed on an annual basis by adding the value of the property on the first day of the taxable year and the value on the last day of the taxable year and dividing the sum by two. If averaging on this basis does not properly reflect average value, the [State Tax Administrator] may require averaging on a more frequent basis. The taxpayer may elect to average on a more frequent basis. When averaging on a more frequent basis is required by the [State Tax Administrator] or is elected by the taxpayer, the same method of valuation must be used consistently by the taxpayer with respect to property within and without this state and on all subsequent returns unless the taxpayer receives prior permission from the [State Tax Administrator] or the [State Tax Administrator] requires a different method of determining average value.

(e) **Average value of real property and tangible personal property rented to the taxpayer.**

- (1) The average value of real property and tangible personal property that the taxpayer has rented from another and which is not treated as property owned by the taxpayer for Federal income tax purposes, shall be determined annually by multiplying the gross rents payable during the taxable year by eight.
- (2) Where the use of the general method described in this subsection results in inaccurate valuations of rented property, any other method which properly reflects the value may be adopted by the [State Tax Administrator] or by the taxpayer when approved in writing by the [State Tax Administrator]. Once approved, such other method of valuation must be used on all subsequent returns unless the taxpayer receives prior approval from the [State Tax Administrator] or the [State Tax Administrator] requires a different method of valuation.

(f) **Location of real property and tangible personal property owned by or rented to the taxpayer.**

- (1) Except as described in paragraph (2) of this subsection, real property and tangible personal property owned by or rented to the taxpayer is considered to be located

within this state if it is physically located, situated or used within this state.

- (2) Transportation property is included in the numerator of the property factor to the extent that the property is used in this state. The extent an aircraft will be deemed to be used in this state and the amount of value that is to be included in the numerator of this state's property factor is determined by multiplying the average value of the aircraft by a fraction, the numerator of which is the number of landings of the aircraft in this state and the denominator of which is the total number of landings of the aircraft everywhere. If the extent of the use of any transportation property within this state cannot be determined, then the property will be deemed to be used wholly in the state in which the property has its principal base of operations. A motor vehicle will be deemed to be used wholly in the state in which it is registered.

Section 5. Payroll Factor.

(a) **General.** The payroll factor is a fraction, the numerator of which is the total amount paid in this state during the taxable year by the taxpayer for compensation and the denominator of which is the total compensation paid both within and without this state during the taxable year. The payroll factor shall include only that compensation which is included in the computation of the apportionable income tax base for the taxable year.

(b) **Compensation relating to nonbusiness income and independent contractors.** The compensation of any employee for services or activities which are connected with the production of nonbusiness income (income which is not includable in the apportionable income base) and payments made to any independent contractor or any other person not properly classifiable as an employee shall be excluded from both the numerator and denominator of the factor.

(c) **When compensation paid in this state.** Compensation is paid in this state if any one of the following tests, applied consecutively, is met:

- (1) The employee's services are performed entirely within this state.
- (2) The employee's services are performed both within and without the state, but the service performed without the state is incidental to the employee's service within the state. The term "incidental" means any service which is temporary or transitory in nature, or which is rendered in connection with an isolated transaction.
- (3) If the employee's services are performed both within and without this state, the employee's compensation will be attributed to this state:
 - (A) if the employee's principal base of operations is within this state; or
 - (B) if there is no principal base of operations in any state in which some part of the services are performed, but the place from which the services are directed or controlled is in this state; or
 - (C) if the principal base of operations and the place from which the services are

directed or controlled are not in any state in which some part of the service is performed but the employee's residence is in this state.

[This Act shall be effective for tax years beginning on and after January 1, 2016]

Appendix A — Definition of Financial Institution.

The following definition of a financial institution or a variation thereof could be made part of a statutory proposal or could be adopted by regulation if the state legislature has already delegated the authority to do so to the State Tax Administrator or other administrative officer. Again, the following provides a *starting point* for discussion purposes, and the lack of a uniformly adopted definition by all of the states, while affecting competitive balance, is not critical to the main thrust of the apportionment proposal.

"Financial institution" means:

(1) Any corporation or other business entity registered under state law as a bank holding company or registered under the Federal Bank Holding Company Act of 1956, as amended, or registered as a savings and loan holding company under the Federal National Housing Act, as amended;

(2) A national bank organized and existing as a national bank association pursuant to the provisions of the National Bank Act, 12 U.S.C. §§21 et seq.;

(3) A savings association or federal savings bank as defined in the Federal Deposit Insurance Act, 12 U.S.C. § 1813(b)(1);

(4) Any bank or thrift institution incorporated or organized under the laws of any state;

(5) Any corporation organized under the provisions of 12 U.S.C. §§611 to 631.

(6) Any agency or branch of a foreign depository as defined in 12 U.S.C. §3101;

(7) A state credit union the loan assets of which exceed \$50,000,000 as of the first day of its taxable year;

(8) A production credit association organized under the Federal Farm Credit Act of 1933, all of whose stock held by the Federal Production Credit Corporation has been retired;

(9) Any corporation whose voting stock is more than fifty percent (50%) owned, directly or indirectly, by any person or business entity described in subsections (1) through (8) above other than an insurance company taxable under [insert applicable state statute] or a company taxable under [insert applicable state statute];

(10) A corporation or other business entity that derives more than fifty percent (50%) of its total gross income for financial accounting purposes from finance leases. For purposes of this subsection, a "finance lease" shall mean any lease transaction which is the functional equivalent of an

extension of credit and that transfers substantially all of the benefits and risks incident to the ownership of property. The phrase shall include any "direct financing lease" or

"leverage lease" that meets the criteria of Financial Accounting Standards Board Statement No. 13, "Accounting for Leases" or any other lease that is accounted for as a financing by a lessor under generally accepted accounting principles.

For this classification to apply,

(a) the average of the gross income in the current tax year and immediately preceding two tax years must satisfy the more than fifty percent (50%) requirement; and

(b) gross income from incidental or occasional transactions shall be disregarded;

or

(11) Any other person or business entity, other than [an insurance company taxable under _____], [a real estate broker taxable under _____], [a securities dealer taxable under _____] or [a _____ company taxable under _____], which derives more than fifty percent (50%) of its gross income from activities that a person described in subsections (2) through (8) and (10) above is authorized to transact. For the purpose of this subsection, the computation of gross income shall not include income from non-recurring, extraordinary items.

(12) The [State Tax Administrator] is authorized to exclude any person from the application of subsection (11) upon such person proving, by clear and convincing evidence, that the income-producing activity of such person is not in substantial competition with those persons described in subsections (2) through (8) and (10) above.
