---

It is horrific enough that semi-automatic weapons are so easily obtained, my son bought one with his federal fisheries payout, because he could!

I am in support of this bill to place a bit of a barrier in purchasing and possession of life threatening weapons.

I support **SB 203** – **This bill prohibits the possession, sale and distribution of so-called “Glock switch” devices**, which are small, easily concealed parts that convert a handgun into an automatic weapon.

Sincerely,  
Suzanne Sauerteig
