How NCSL Serves State Legislatures

The National Conference of State Legislatures (NCSL) is the **bipartisan** organization serving **legislators and legislative staff** in America's 50 states, D.C. and territories.

With a strong belief in the importance of the legislative institution, NCSL knows **when states are strong, our nation is strong.**

Federal Budget Approvals and State Appropriations

Federal Budget Approvals

- **CMS** and the **Office of Acquisition and Grants Management (OAGM)** are responsible for approving state RHTP budgets and lifting funding restrictions.
- **Three steps**
 - State receives RHTP award approval (50 states)
 - Federal approval of state RHTP budget
 - Federal lifting of funding restrictions

State Appropriations

- Legislative or executive branch appropriations of RHTP funding

Potential Funding Claw Backs

Source: CMS Rural Health Transformation, Frequently Asked Questions

Future years RHTP funding may be impacted by states' ability to meet policy commitments, spend funds and complete initiatives.

Claw backs related to technical score (initiatives and state policy actions) will be “proportional to incremental award funds based on the technical score points” awarded (per CMS)

Unexpended funds may be redistributed to other states in the next fiscal year.

Behavioral Health Providers

This resource was designed by the National Conference of State Legislatures to educate state policymakers about scope of practice issues related to a range of non-physician health care practitioners who provide important services and can enhance access to care.

Advanced Practice Registered Nurses

Optometrists

Non-physician health care practitioners are increasingly being used to render services in rural and underserved areas to make up for provider shortages. A practitioner's scope of practice refers to what a health professional can and cannot do to or for a patient, and is defined by state professional regulatory boards — typically with the guidance or instruction of the state's legislature. State legislators and other policymakers consider a broad range of issues related to scope of practice, including supervision requirements, prescriptive authority and other requirements for practice.
