Subject: Vote for HB 257
Date: Friday, March 13, 2026 5:07:40 AM

Please vote HB 257 out of committee. It will allow more people and devices to generate their own electricity and reduce their electric bill.

We installed solar panels on our old house and they work great. We'd like to do more in that direction, and so do many neighbors.

HB 257 offers a low-cost way for people to start small, or let people with less money get some advantages of home solar.

Thanks, -Mike Bronson

Hello. Please support any bill that will encourage home owners to get solar panels.

I would like to install panels on my roof but am resistant because of the cost

We need to rely less on fossil fuels to save the planet for our children
