Re: Support for HB 78 Incentives for Certain Medical Providers

March 4, 2011

Dear Representative Herron and Members of the Alaska State Legislature:

Because the health care workforce shortage in Alaska is reducing health care access for our state's residents, the SEARHC Ethel Lund Medical Center strongly supports HB 78 to establish a loan repayment and incentive program to allow Alaska to compete with the lower 48 in recruitment of providers from a shrinking national pool.

The SEARHC Ethel Lund Medical Center provides comprehensive outpatient care to Alaska Native/Native American patients in the Juneau area (over 6,000 active patients). We have found recruitment of healthcare providers to be extremely challenging, including physicians, physician assistants, pharmacists, physical therapists, optometrists, and other healthcare professionals. Almost all potential applicants request loan repayment.

With alarming and rising vacancy rates, Alaska is posed for a crisis without intervention. Alaska is one of only six states without a state-sponsored support-for-service program such as a loan repayment and incentive program and is losing ground. The competition for recruitment of providers is very difficult. Currently only 2% of medical students nationally are choosing the primary care field; more than 90 pharmacists vacancies exist in Alaska; many communities have inadequate access to dentists; physician assistants and nurse practitioners are increasingly difficult to recruit; nurses, dental hygienists, psychologists, licensed clinical social workers, and physical therapists are all in short supply in Alaska.

The Alaska Health Care Professions Loan Repayment & Incentive Program provides an important part of the solution to the workforce shortage Alaska faces. The proposal was developed after careful review of national studies of best practices for workforce recruitment and retention and input from stakeholders statewide, including consideration of factors unique to Alaska. More cost-efficient and results-producing than other methods, loan repayment and incentives have been shown to effectively help alleviate shortage problems in other states. HB 78 establishes a loan repayment and incentive program customized for Alaska and will provide much needed relief for our state.

The SEARHC Ethel Lund Medical Center supports HB 78 and urges passage of this important legislation. Your active steps to assure the establishment of the Alaska Health Care Professions Loan Repayment & Incentive Program are greatly appreciated.

Respectfully,

Janice Sheufelt, MD
