Date: Friday, April 10, 2026 8:59:28 AM

Members of the Senate Resource Committee:

Please approve and pass on this important bill. The whole LNG project seems to be done covertly and I have no idea of what it will cost Alaskans. I feel this bill will make this process much more transparent.

thank you for your time,
Mary C Burtness

History is repeating itself and 26 years later, today, the same scenario of life, choices, people, positions, companies' names and events have changed names but not the human element of money, pretend, greed, what if's, countries in the world, projects, excitement, under the table money and acquisition agreements. It's all there and coming round, full circle to the same events unfolding to a new generation of the same life's choices. The best chapter is called, "When Pigs Could Fly" written by Bethany McLean and Peter Elkind in their famous book called, "The Smartest Guys In The Room" and it was about the famous company called Enron. It's happening in Alaska today! The main body of actors is in full swing, attempting the same failures of the reporting in the book on Enron and its alliances. The questions today should be asked about how many of these new actors will end up in prison? Bet that is an answer on the horizon but moving fast in the same direction as that company of the past. Some committed suicide, some departed and went in other directions when the stench of bad decisions and bragging drove the best actors away, but the investigations and trials of companies and people documented in the report from court appearances and records were staggering in the telling of those events.

One thing we all know in Alaska, the LNG will be built when the people of Alaska want it done. The pretending of the companies and people and paper waving and shouting from the podium by CEO's will not change what the people of Alaska want, when and where the pipe will go and be built. Remember, all who listen, Alaska will not be torn apart for your profit and gain. Unfortunately for Alaska, it's path is being directed by the same sick standards of the Enron schemes and will not be tolerated by the Alaskans. Now the "players" want secrecy established in law. "Shame" on the Dunleavy Administration and the legislative body that incorporates these underhanded standards to the character of state law.

SB 180 and SB275 need to go in the garbage before the end of this 34th session. Don't look back. The public is tired of the lying, lack of disclosure and secretive shenanigans of the Dunleavy Administration and the legislative persons promoting such behavior through the departments and government employees.

Thank you for taking the time to read my thoughts on this matter.
