05-DEED Department of Education and Early Development Updated 11/2025

$ in thousands

Dept Priority	Allocation	Project Title	Project Description	Project Cost	Running Total	GF Cost	GF Running Total	Location (City)	House District	FY2026 Allocation
1	Mt. Edgecumbe High School Deferred Maintenance	Replacement of Heritage Hall Dorm Windows (Phase II)	This project will replace all the windows in the Heritage Hall Dorm. Although previously funded and fully designed, construction bid results were rejected due to lack of funds. The additional funds requested will allow the project to move forward.	$ 863.0	$ 863.0	$ 863.0	**$ 863.0**	Sitka	2-A	$ 298.0
2	Mt. Edgecumbe High School Deferred Maintenance	Replacement of Boy's Dorm and Main Girl's Dorm Windows	This project will replace all the windows in the Boy's Dorm and Main Girl's Dorm (buildings 292 & 293), with single-hung, energy efficient vinyl windows. The windows in these dormitories are worn out and the warranties have expired. Replacement parts are becoming difficult to procure due to reoccurring changes in manufacturer's ownership.	$ 3,140.0	$ 4,003.0	$ 3,140.0	**$ 4,003.0**	Sitka	2-A	
3	Mt. Edgecumbe High School Deferred Maintenance	Replacement of Main Academic Building Exterior Envelope	This project will replace the brick siding on the building and replace continuous roof vents with windproof vents. Currently many classrooms are subject to water intrusion during certain weather events. The cause of the water intrusion was recently confirmed, resulting in this funding request.	$ 4,245.0	$ 8,248.0	$ 4,245.0	**$ 8,248.0**	Sitka	2-A	
4	Andrew P. Kashevaroff Facility Operations and Maintenance State Owned	Andrew P. Kashevaroff (APK) Repairs to Damaged Glazing and Exterior Stack Joints	Leaks have appeared in the APK glazing and ceramic envelope. Water intrusion into the glazing has trapped water between glass panes. This has oxidized the copper mesh between panes impacting building aesthetics. Further, freeze-thaw cycles risk loss of large glass panes to cracking and release from their settings. Water intrusion through the ceramic tiles on the northeast side of the building is impacting the conservation lab. Leaks of rainwater into the APK interior impacts the division's mission to preserve objects and archival materials. Leaks increase relative humidity increasing loads on the HVACs and leaks provide habitat for insects that can destroy historical objects and documents.	$ 1,500.0	$ 9,748.0	$ 1,500.0	**$ 9,748.0**	Juneau	4-B	
5	Mt. Edgecumbe High School Deferred Maintenance/New Construction	Dining Hall Renovation	This project will completely renovate the dining hall and kitchen, including the exterior envelope, and provide some realignment of the dining hall to increase the seating capacity of the dining hall. The project will replace and upgrade aging kitchen equipment including major appliances. The building interior has not had major work since 1985, the dining hall is too small to adequately allow all the students to assemble during mealtimes, and some of the kitchen equipment is aging and is beginning to fail.	$ 10,206.0	$ 19,954.0	$ 10,206.0	**$ 19,954.0**	Sitka	2-A	
6	Mt. Edgecumbe High School New Construction	Backup Generator Installation - Building 1331	This project will install a 75 KW backup generator that will serve the gymnasium facilities including the heating plant. In the event of a power outage, the lower campus currently does not have backup power to keep the heating system running or maintain emergency lighting. The backup generator will provide enough electricity to keep the heating plant operational, providing heat as well as basic lighting to ensure student safety and comfort.	$ 1,096.0	$ 21,050.0	$ 1,096.0	**$ 21,050.0**	Sitka	2-A	

05-DEED Department of Education and Early Development Updated 11/2025

$ in thousands

Dept Priority	Allocation	Project Title	Project Description	Project Cost	Running Total	GF Cost	GF Running Total	Location (City)	House District	FY2026 Allocation
7	Mt. Edgecumbe High School Deferred Maintenance	Emergency Generator and Switch Gear Installation, Upper Campus	This project will include the installation of transfer switch gear, transformers, and conduit to intertie the upper campus electrical systems to an existing standby generator. Periodic electrical service interruptions have resulted in the loss of servers and switch gear, rendering the school's internet, email, phone service, and security cameras inoperable.	$ 2,583.0	$ 23,633.0	$ 2,583.0	**$ 23,633.0**	Sitka	2-A	
8	Museum Operations	Sheldon Jackson Museum: Window Replacement	Replace 50-year-old windows with thermal insulated, UV control glazing, and vinyl clad framing to increase energy efficiency and control damaging light on artifacts. The windows have failed seals, deteriorating wood frames, no thermal value, condense moisture and mildew on and between the glass, are not energy efficiency, and covered with 30-year-old deteriorating blinds. The window style must be in keeping with the historical context of the building. New thermally insulated windows with UV protection to replace the 35-year-old single pane windows in the office space is also necessary and included in the overall price. We estimate $500,000 for design and the balance for construction.	$ 1,700.0	$ 25,333.0	$ 1,700.0	**$ 25,333.0**	Sitka	2-A	
9	Mt. Edgecumbe High School Deferred Maintenance	Superintendent Residence Asbestos Abatement	This project will result in the removal of all asbestos-containing material (ACM). The facility was built in the early 1940's and is full of ACM, the most serious of which is located behind the wall and in the attic space.	$ 2,521.0	$ 27,854.0	$ 2,521.0	**$ 27,854.0**	Sitka	2-A	
10	Museum Operations	Sheldon Jackson Museum: Sidewalk Replacement	This project replaces sections of the sidewalk and curb in front of the museum entry and surrounding the flagpole that are deteriorated, pitted, and cracked. The sidewalk has been patched with asphalt. Entire sections of the concrete need to be replaced and leveled. Cost is for grading and leveling with appropriate drainage rock beneath new concrete. Approximate cost is $227,000 for sidewalks and $123,000 for project management, design, and engineering costs.	$ 350.0	$ 28,204.0	$ 350.0	**$ 28,204.0**	Sitka	2-A	

05-DEED Department of Education and Early Development Updated 11/2025
$ in thousands

Dept Priority	Allocation	Project Title	Project Description	Project Cost	Running Total	GF Cost	GF Running Total	Location (City)	House District	FY2026 Allocation
	Museum Operations	Sheldon Jackson Museum: Building Security Camera Upgrade	The museum suffers from instances of vandalism. Further, the museum cares for invaluable artifacts that must be preserved. The museum's security camera system is outdated, and several cameras have stopped working and do not provide a full view of the building envelope. Interior cameras are also not functioning properly, which could impede security investigations. Project would add cameras to security envelope of Sheldon Jackson Museum, enhance camera resolution as well as upgrade wiring and video recording for sustainability. The project adds more cameras, image storage capacity and duration of image storage. Cost includes more intuitive playback and sharing software and a need for an electrician to run new wire.	$ 125.0	$ 28,329.0	$ 125.0	**$ 28,329.0**	Sitka	2-A	
	Mt. Edgecumbe High School Deferred Maintenance	Environmental Cleanup and Renovation of Building 288, Old Firehouse Building	This project will renovate a single-story steel framed building that contains ACM and lead paint. The roof and siding are failing, and the building has become a public hazard. The renovation will include removing hazardous materials, siding, and roofing system. The existing structural supports will remain, and a new roof will be installed to facilitate an outdoor covered area for student activities.	$ 1,279.0	$ 29,608.0	$ 1,279.0	**$ 29,608.0**	Sitka	2-A	
	Mt. Edgecumbe High School Deferred Maintenance	Dormitory Furniture Replacement	This project includes the replacement of dormitory furniture (wardrobes, bunk beds and student desks) in Heritage Hall (building 295) and the Main Girl's Dorm (building 293). The bunk beds, desks and wardrobes in Heritage Hall were installed in 1992 and have exceeded their useful life. In the Main Girl's Dorm approximately one fourth of the bunk beds date back to the 1980's and have exceeded their useful life.	$ 468.0	$ 30,076.0	$ 468.0	**$ 30,076.0**	Sitka	2-A	
	Mt. Edgecumbe High School Deferred Maintenance/New Construction	Student Housing Upgrades	This project will renovate space freed up by the classrooms vacated with the construction of the academic wing expansion project and convert them into dorm space in order to decrease the density of existing dorm rooms in the boys and girls dorms (buildings 292 and 293). The dorm rooms of concern are currently housing six or more students in violation of Alaska DHSS occupancy regulations. Dorm space will be constructed in the dining hall building (building 290), and the second floor of Kuspuk Hall (building 299).	$ 5,210.0	$ 35,286.0	$ 5,210.0	**$ 35,286.0**	Sitka	2-A	
			TOTAL	**$ 35,286.0**						

Deferred Maintenance Project Status Update – November 2025

Summary of Changes from the November 2024 update

Priority #1 Keys and security – This project has been on the list since 2023. We consider it our top priority; however, it tends to not score well enough with the Facilities Counsel to receive funding support. The project was initially requested for FY25 Deferred Maintenance funds but was not awarded. The project is regarding campus security, of both personnel, students and expensive and sensitive equipment.

Priority #2 Maritime Department Davit Cover – This project was on the FY25 & FY26 request lists. The safety issue was learned about during the winter of 2023/24. The project has been briefed at consecutive annual facilities council meetings but has not yet scored well enough to be rewarded with funding.

Priority #3 – The request has not changed. However, this year we presented this project as the Building Trades Exterior Upgrade. There are Deferred Maintenance funds from FY 22 & 25 to get started on the First Lake Building.

Priority #4 – no change. This project has been on the list for two years and has been briefed at two consecutive annual facilities council meetings.

Priority #5 – no change. This project was also a part of last year's backlog update.

Priority #6 – This project was not a part of last year's update but was presented at the FY25 Facilities Counsel meeting over the summer.

Priority #7 – no change. This project was also a part of last year's backlog update.

Priority #8 – The cost was updated based on a structural engineering assessment AVTEC received from STANTEC. This has not been presented at any Facilities Counsel meeting because that structural assessment was completed after the deadline for the annual Facilities Counsel meeting.

Dept Priority	Allocation	Project Title	Project Cost	Running Total	GF Cost	GF Running Total	Location (City)	House District
1	Campus wide Building and Student Security	Keys & security assessment	$1,000.0	$1,000.0	$1,000.0	$1,000.0	Seward	29
AVTEC's Campus includes 19 total buildings. Many of the door locks and keys need to be re-keyed and locks replaced. For example, an "X" Key will open some locks labeled "X" but will not open all locks labeled "X". Many locks are worn, and many keys were cut in a non-specific manner. The system also has several "master" and "sub-master" keys.								
2	Maritime Department Lifeboat (Davit) Trainer	Davit Cover extension	$200.0	$1,200.0	$200.0	$1,200.0	Seward	29
This is a student training safety issue. The current roof does not provide enough coverage to keep the Davit from being filled with snow during the winter months. Extensions for the cover are needed for student training safety.								
3	AVTEC First Lake Campus	First Lake Campus Repairs and Renovations	$3,500.0	$4,700.0	$3,500.0	$4,700.0	Seward	29

AVTEC's First Lake Administration and Construction Technology building needs repairs to ensure a safe and healthy learning environment for AVTEC students. Renovation needs include replacing two boilers aged well beyond their expected life, renovating the loading dock, and repairing exterior damage including loading and garage doors. The entire envelope of the facility, which also houses the Construction Technology program, needs rehabilitation. Egress and ADA compliance will be assessed and updated as needed with this project. There are past years' Deferred Maintenance funds from FY22 & FY 25 for the First Lake building, however the approved amounts will not fully cover all costs. I pitched this project in the FY26 Facilities Council meeting as the Building Trades Exterior upgrade.								
4	AVTEC I.T. Building	Repair & Replace Roof & Wall Leaks in I.T. Services Building	$1,000.0	$5,700.0	$1,000.0	$5,700.0	Seward	29
There are pin hole sized leaks throughout the roof that are causing bubbling inside the walls, in addition to exterior brick failure. This is also causing swelling of window framing which causes the windows to leak. This building is one of the AVTEC Building's that was not a part of the STANTEC Assessment that was conducted in 2021, and full assessment of the condition of the roof and walls will be needed as part of this project.								
5	AVTEC Campus-wide	Campus-wide Repairs for Safety and Health, and ADA Compliance	$1,000.0	$6,700.0	$1,000.0	$6,700.0	Seward	29
AVTEC's campus requires a number of repairs to its curbs, sidewalks, and access roadways to ensure a safe learning environment for AVTEC students. Repair needs include replacing/resurfacing broken, damaged and deteriorating curbs, sidewalks, and access roadways. Americans with Disabilities Act compliant cuts need to be made at various curbsides. Multiple facilities require moderate system modernization and facility repairs.								
6	AVTEC Maintenance Shop	Maintenance Shop assessment	$1,000.0	$7,700.0	$1,000.0	$7,700.0	Seward	29
The building is a safety concern for our maintenance employees.								
7	AVTEC's 4-plex, 6- plex, and 7-plex student housing apartments	Address AVTEC apartment needs, including heat-efficiency upgrades via replacement of windows and exterior doors.	$1,000.0	$8,700.0	$1,000.0	$8,700.0	Seward	29

AVTEC's 17 student housing apartments are in need of upgrades to the doors & windows, both for security and heating efficiency.								
8	AVTEC Applied Technology Campus	Old Applied Technology Building Rebuild	$17,000.0	$25,700.0	$17,000.0	$25,700.0	Seward	29
AVTEC's old Applied Technology building was replaced when it was determined to be unsafe. Now AVTEC needs to demolish the old building and rebuild a new space. The facilities assessment cost is $17,000.0.								

Total **25,700.0**

Deferred Maintenance Prioritization (in Thousands)

Department: Military & Veteran Affairs

Dept Priority	Allocation	Project Title	Project Description	Project Cost	Running Total	GF Cost	GF Running Total	Location (City)	House District	Fed / State Split
1		Bethel Armory Roof Replacement	This appropriation will support the replacement of the failing roof structure of the Bethel Army National Guard Armory. The flat membrane roof system has failed in multiple locations and has received patch repairs. The roof system is beyond its usable life and failures are occurring more regularly allowing water to infiltrate the facility. Water infiltration has led to mold on interior spaces creating a life, health and safety concern for the occupants and the community during disaster response. Highlighted during the 2025 typhoon response efforts, Bethel is a mission critical location for the AKARNG serving as the hub location for western Alaska during disaster response operations.	$2,200.0	$2,200.0	$1,100.0	$1,100.0	Bethel	38	50/50
2		JBER Joint Forces Headquarters Server Room A/C Replacement	This appropriation will support the replacement of (3) 3 Ton A/C units that supply conditioned air to the AKARNG Joint Forces Headquarters Server Room. This mission critical asset ensures network connectivity for National Guard Emergency response capabilities across Alaska, including the Joint Operations Center and State Emergency Operations Center. The A/C units are in a failing state, requiring extensive maintenance costs to keep operational. Failure of these units would cause server overheating, and shutdown network communications across Alaska, leaving the residents of the state without the full emergency response capabilities of the AKARNG. Federal Funds are available to support the AKARNG share of this project.	$300.0	$2,500.0	$75.0	$1,175.0	JBER	18	75/25
3		Ketchikan Armory Roof Replacement	This appropriation will support replacement of the Ketchikan Armory Roof. The roof system is beyond its usable life cycle and has started to fail. Failures in roof membrane is allowing water to penetrate the facility envelope, resulting in interior damages that create an unsafe work space for AKARNG employees. Without appropriations to support roof replacement, the facility will continue to degrade, resulting in higher future costs to repair damages from water intrusion. Without a functioning facility in Ketchikan, the AKARNG will have limited abilities to respond to requests for community support in Southeast Alaska. Federal Funds are available to support the AKARNG share of this project.	$1,800.0	$4,300.0	$900.0	$2,075.0	Ketchikan	1	50/50
4		AMYA Barracks Shower Renovation	This long-overdue renovation project aims to revamp the open bay shower room in each barracks (total of 5), transforming it into individual shower stalls to enhance the safety, privacy, and comfort of young cadets. Currently, the open design does not provide the necessary privacy or security, which is crucial for fostering a supportive and respectful environment.	$1,250.0	$5,550.0	$1,250.0	$3,325.0	JBER	18	100% GF
5		Alcantra FMS Oil Water Separator Replacement	This appropriation will support the replacement of the failing oil water separator, tanks, piping, pumps, and association infrastructure components at the Alcantra FMS.	$750.0	$6,300.0	$375.0	$3,700.0	Wasilla	28	50/50

Deferred Maintenance Prioritization (in Thousands)

Department: Military & Veteran Affairs

Dept Priority	Allocation	Project Title	Project Description	Project Cost	Running Total	GF Cost	GF Running Total	Location (City)	House District	Fed / State Split
6		Alcantra OMS Restoration	This appropriation will support a complete facility restoration of the Alcantra OMS to include replacement of failed HVAC systems, complete refurbishment of the plumbing and electrical systems and installation of NFPA required fire detection & protection systems. Restrooms in facility will be restored to an operational status and renovated to current Army Standards. Project will include replacement/repair of all interior systems to include walls, flooring, lighting and communications.	$3,000.0	$9,300.0	$1,500.0	$5,200.0	Wasilla	28	50/50
7		Barrow Armory Restoration	This appropriation will support the restoration of the AKARNG Armory in Utqiagvik. Due to lack of funds for life cycle sustainment, regular maintenance has been deferred causing deterioration of critical facility components. This project will include leveling of the facility and replacement of the facilities roof, siding, windows, exterior doors, and HVAC systems. This will provide a safe, energy efficient facility for AKARNG soldiers supporting the needs of the community. Federal Funds are available to support the AKARNG share of this project.	$4,000.0	$13,300.0	$2,000.0	$7,200.0	Utqiagvik	40	50/50
8		Nome Armory Restoration	This appropriation will support the restoration of the AKARNG Armory in Nome. Due to lack of funds for life cycle sustainment, regular maintenance has been deferred causing deterioration of critical facility components. This project replacement of the facilities siding and windows in addition to replacement of the air handlers and associated HVAC components. As the 2nd largest HUB in remote Alaska, Nome serves a critical role in the AKARNG's ability to respond to emergencies in support of the residents of Alaska. The facility also houses tenant users including Alaska State Troopers who will benefit from the more efficient facility through a reduction in utility costs. Federal Funds are available to support the AKARNG share of this project.	$1,500.0	$14,800.0	$750.0	$7,950.0	Nome	39	50/50
9		Camp Carroll 57503 Recruiting and Retention	This appropriation will restore Recruiting and Retentions building 57503. Due to a lack of life cycle sustainment and deferring maintenance requirements the facility is desperate need of restoration to provide a safe working environment to the recruiters and the prospective applicants of the AKARNG. Work will include replacement of failing or degraded systems to include HVAC, lighting, paint, carpet, walls, windows, doors, exterior lighting, new asphalt parking surfaces and exterior lighting. The objective of this project is to provide a facility that is functionally adequate and meets the health and safety standards for employees as established by OSHA and Union regulations. Federal Funds are available to support the AKARNG share of this project.	$2,500.0	$17,300.0	$625.0	$8,575.0	JBER	18	75/25

Deferred Maintenance Prioritization (in Thousands)										
Department: Military & Veteran Affairs										
Dept Priority	Allocation	Project Title	Project Description	Project Cost	Running Total	GF Cost	GF Running Total	Location (City)	House District	Fed / State Split
10		JBER Joint Forces Headquarters Facility Lighting Restoration	Formerly known as "JBER Armory Bldg. 49000 Facility Lighting Restoration". This appropriation will support the replacement of degrading interior lighting systems. Effective lighting is essential to providing safe and efficient working conditions for DMVA employees. Lighting system will be replaced with energy efficient LED systems, reducing the States GF Match costs for electrical utility service and maintenance actions to sustain antiquated fluorescent lights. Federal Funds are available to support the AKARNG share of this project.	$2,500.0	$19,800.0	$625.0	$9,200.0	JBER	18	75/25
			TOTAL	**$19,800.0**		**$9,200.0**				

10-DNR Department of Natural Resources

Division Priority	Allocation	Project Title	Project Description	Project Cost	Running Total	GF Cost	GF Running Total	Location (City)	House District	Notes
AG4	Agriculture Plant Materials Center (PMC)	Plant Materials Center Security System Upgrades	Currently only one of six structures at the PMC currently have an operating security system. To further project the States assets and reduce liability to the State this upgrade would allow for four more systems to be installed or upgraded on the other building within the complex.	$10.0	$10.0	$10.0	$10.0	Palmer	25	Security lighting needed around each building on the facility grounds.
AG3	Agriculture Plant Materials Center (PMC)	Maintenance Shop Covered Storage	The foundation and roofing were built to have dry cold storage for state equipment at the time of construction. Due to extreme location weather walls need to be finalized to isolate equipment from wind, rain, and ice.	$65.0	$75.0	$65.0	$75.0	Palmer	25	
AG5	Agriculture Plant Materials Center (PMC)	Plant Materials Center Perimeter Fencing	Continue property fencing to protect state assets and prevent damage to the states seed resources.	$45.0	$120.0	$45.0	$120.0	Palmer	25	Continued fencing in spring of 2025 around the Plant Materials Center property.
AG1	Agriculture Plant Materials Center (PMC)	Primary Maintenance Shop Replacement	The primary maintenance shop has reached its life span and needs to be replaced. It will be replaced with a larger 20x40 shop to better fit the maintenance needs at the PMC.	$125.0	$245.0	$125.0	$245.0	Palmer	25	
AG2	Agriculture Plant Materials Center (PMC)	Access Road and Parking Area Resurface	Both paved and non-paved areas of the access to the facilities seed house, seed lab, greenhouses and fields have degraded over time and are in need of resurfacing to prevent damage to state assets and improve the ability to except tractor trailer loads from producers.	$40.0	$285.0	$40.0	$285.0	Palmer	25	
AG6	Agriculture Plant Materials Center (PMC)	Production Equipment Storage Area	Production equipment and supplies are currently stored in Connex units next to the production greenhouses. Grading and drainage in the area needs to be repaired and the Connex units elevated to prolong their life and provide access during spring and fall when flooding occurs in the area.	$25.0	$310.0	$25.0	$310.0	Palmer	25	
FOR5	Statewide Forestry Facilities Deferred Maintenance	Delta Main Office and Warehouse Window Repair	Repair and replace windows at Delta office and warehouse.	$30.0	$340.0	$30.0	$340.0	Delta	36	
FOR8	Statewide Forestry Facilities Deferred Maintenance	Palmer Office Interior Updates	Carpet and interior painting.	$200.0	$540.0	$200.0	$540.0	Palmer	25	
FOR7	Statewide Forestry Facilities Deferred Maintenance	Install Vehicle Bay Mezzanine in Palmer Warehouse	Mezzanine would utilize high bay environment to add storage capacity.	$60.0	$600.0	$60.0	$600.0	Palmer	25	
FOR9	Statewide Forestry Facilities Deferred Maintenance	Reduce Heat Cost in Fairbanks Buildings	Install a pellet stove to heat the primary buildings, and either decommission the oil heater or reduce it to back-up status.	$250.0	$850.0	$250.0	$850.0	Fairbanks	35	

Division Priority	Allocation	Project Title	Project Description	Project Cost	Running Total	GF Cost	GF Running Total	Location (City)	House District	Notes
FOR4	Statewide Forestry Facilities Deferred Maintenance	Delta Forestry Storage Yard Roof and Cache Storage	Repair or replace deficient shelving and coverings, which protects over $200.0 of fire and resource supplies in the storage yard.	$55.0	$905.0	$55.0	$905.0	Delta	36	
FOR3	Statewide Forestry Facilities Deferred Maintenance	New Heat Source for Delta Office	Install a wood fired boiler to efficiently heat the Main Office. This would provide the primary heat, with the oil-fired boiler becoming the backup heat source.	$80.0	$985.0	$80.0	$985.0	Delta	36	
FOR1	Statewide Forestry Facilities Deferred Maintenance	Copper River Facilities Life Safety Upgrades	Complete stairs, landings, and handrails per the USKH Architects study throughout the Copper River facility to come into compliance. Fuel shed - exterior steps repair handrails with proper grip and reseal landings and steps. Shop- Interior stairs to the mezzanine are not provided with intermediate rails or handrails of proper grip. Office- northwest stairs and landing: Stairs are too steep, handrails need to be installed, and threshold needs repair due to being too abrupt. Office-Ramp: Handrails not of proper grip section, reseal landing, ramp, and steps. Employee parking - Two staircases out of compliance and need replacement. White Warehouse - Needs handrails and thresholds are too abrupt.	$96.0	$1,081.0	$96.0	$1,081.0	Valdez/ Copper River	9	
FOR6	Statewide Forestry Facilities Deferred Maintenance	Building Conditions Survey	The intent of a facilities survey is to identify deficiencies and evaluate eight DOF compounds for compliance with codes in effect for the State of Alaska. Identified corrective actions will be prioritized to ensure health and safety of employees and the public.	$266.0	$1,347.0	$266.0	$1,347.0	Statewide		
FOR2	Statewide Forestry Facilities Deferred Maintenance	Palmer Fire Warehouse Electrical & Mechanical Upgrades	The Fire Warehouse located in Palmer is in desperate need of both electrical and mechanical upgrades. The existing systems are insufficient for the current need and capacity. Additional funding is needed to address critical life safety and compliance deficiencies as a result of the Stantec Facility Conditions Assessment (completed in 2022).	$194.0	$1,541.0	$194.0	$1,541.0	Palmer	25	
	Parks & Outdoor Recreation - Chugach Area	Bird Creek Overflow	Repair access road and pavement. Restripe.	$20.0	$1,561.0	$20.0	$1,561.0	Indian	28	
	Parks & Outdoor Recreation - Chugach Area	Bird Creek Overflow	Replace picnic tables and fire rings.	$50.0	$1,611.0	$50.0	$1,611.0	Indian	28	
	Parks & Outdoor Recreation - Chugach Area	Bird Creek Overflow	Replace toilet with 1 double concrete vaulted toilet.	$250.0	$1,861.0	$250.0	$1,861.0	Indian	28	
	Parks & Outdoor Recreation - Chugach Area	Bird Ridge Trailhead	Repair pavement and restripe.	$50.0	$1,911.0	$50.0	$1,911.0	Indian	28	
	Parks & Outdoor Recreation - Chugach Area	Eagle River	Repair and rehabilitate Mile Hi Saddle Trail.	$125.0	$2,036.0	$125.0	$2,036.0	Eagle River	14

Status	Title	Divisions	Requestor (Contact at Site)	Description of Facilities	Facilities\Vessels\Aircraft Project Name	Mission Assignment Index	Project Description	System Factor	Need	Project Index Value	Project Cost	Location	Notes
Unfunded	Juneau R/V Medeia Vessel Shipyard Repairs	DCF		Vessels	Vessels	0.9	Shipyard - critical - dry dock fees, sea chest clearing, zincs, rudder/shafts/props inspection/repair, engine alignment, hull coating, transducer replacement, bow thruster installation, sonar tube repair, crane inspect/repair, paint aft deck and main deck. Anticipated timeframe late 2022/early 2023.	0.8	5	3.60	$580.0	Juneau	
Unfunded	Cordova Boat\Gear Shed	DSF		Facilities	Shop	0.8	Boat shed has long outlived its life expectancy and upper deck floors are rotten and are a safety hazard. This project is a repair and not a total replacement. Fuel tank upgrade needed to for hazardous materials containment.	0.9	4	2.88	$250.0	Cordova	
Unfunded	Cordova R/V Solstice Repairs	DCF		Vessels	Vessels	0.8	Sandblast and coat underbody, hull, and rigging. Repower main engine and 50 KW genset	0.9	4	2.88	$550.0	Cordova	
Unfunded	William Jack Hernandez SF Hatchery Natural Gas Line Distribution Replacement	DSF	S Woods 907-269-0781	Facilities	Hatchery	0.7	Replace natural gas lines distribution system throughout site from main meter to 5 buildings and 3 residences. Existing line near residences is corroded and pitted. A leak occurred June 2023 necessitating a complete site shut down. Project can be completed in phases. Phase 1 line replacement went out to bid in August 2023. NO quotes were received.	0.8	5	2.80	$80.0	Anchorage	2-24-25 CP - Viable project. Duplicate with Line 105 below.
Unfunded	Potter Marsh Boardwalk	DWC	Sue Rodman	Facilities	Grounds	0.74	Potter Marsh (Anchorage Coastal refuge) - replace rotting aged boardwalk and rusting heaving piles.	0.75	5	2.78	$2,000.0	Anchorage	Project amount still valid, funding needed. Per DWC Sue Rodman
Unfunded	Kenai MRC Phase 1 of Steel Garage Upgrades	DWC	Cynthia Wardlow	Facilities	Garage	0.75	Immediate need is to reduce the amount of condensation in the building by pouring a concrete slab floor and insulating the walls and roof. The electrical and plumbing rough-in would need to be completed first.	0.74	5	2.78	$200.0	Kenai	Work has not been started. Waiting on approval from HQ to proceed; need remains high. DWC Region 2 Supervisor
Unfunded	Fairbanks Lighting on South Side Replaced	DAS, DCF, DSF, DWC, HAB	Kerry Severide	Facilities	Office	0.74	Exterior lighting on south side replaced	0.74	5	2.74	$75.0	Fairbanks	Still needed
Unfunded	Fairbanks AC Unit North Side	DCF, DSF, DWC, SUB, HAB, DAS	Savereide, Kerry S (DFG);#557	Facilities	Office	0.75	The one providing cooling for the south side was installed in 1996, with the construction of that north side addition, which is nearing the 30-year mark. The average life expectancy is 15-20 years. We have once replaced the condensing units (maybe around 2012?), but all the electronics, controls, etc., are original. The unit has been having issues over the last several years where it just won't come on – DDC controls calls for cooling and reads that it's on, but when checked, the unit is not running. The staff has to manually use the local disconnect to turn it off and back on to get it running. The north side has no opening windows, so if this unit dies, we will only have outside air moving there, and Fairbanks summers can get hot.	0.73	5	2.74	$500.0	Fairbanks	
Unfunded	William Jack Hernandez SF - Oxygen Generator Replacement	DSF	S Woods 907-269-0781	Facilities	Hatchery	0.9	Purchase and install 3 DOCS 200PCI Oxygen Generators to replace 3 OSI generators which are no longer supported, integral parts are no longer made and require extensive maintenance and upkeep. O2 generators are essential equipment for intensive recirculation aquaculture systems. Operating on aging equipment presents a high production risk for fish loss during an equipment failure event.	0.74	4	2.66	$600.0	Anchorage	2-25-25 CPratt - project added
Unfunded	Ruth Burnett SF Hatchery - Oxygen Generator Replacement	DSF	T Hyer 907-451-2628	Facilities	Hatchery	0.9	Purchase and install 3 PCI DOCS 80 Oxygen Generators to replace 2 OSI generators which are no longer supported, integral parts are no longer made and require extensive maintenance and upkeep. O2 generators are essential equipment for intensive recirculation aquaculture systems. Operating on aging equipment presents a high production risk for fish loss during an equipment failure event.	0.74	4	2.66	$600.0	Fairbanks	2-25-25 CPratt - project added-System Factor and Need scores as per criterial notes but greatly under estimate the impact to production if equipment is not replaced.
Unfunded	Bristol Bay Field Camps	DCF		Facilities	Field Camps	0.7	General facility maintenance to Bristol Bay 8 field camps including windows, counters, paint, siding, roofing	0.9	4	2.52	$160.0	Bristol Bay	

Unfunded	Palmer Shop Boiler	DSF, DWC	Tim Peltier	Facilities	Shop	0.8	29 yr. old boiler has far exceeded its useful life - improvement will need to be compatible with current structure	0.75	4	2.40	$25.0	Palmer	Not Started - Funding needed per R4 Mgmt. Coord
Unfunded	William Jack Hernandez SF Hatchery Ozone Generator Replacement	DSF	S Woods 907-269-0781	Facilities	Hatchery	0.74	Replace critical water disinfection equipment that have reached end of life.	0.8	4	2.37	$75.0	JBER	2-25-25 - Retain project. Current ozone generators are no longer manufactured or supported. Staff are investigating new equipment to install. Full replacement of 17 generators likely to exceed $75K.
Unfunded	Alaska Peninsula and Dutch Harbor Facilities	DCF	Sagalkin	Facilities	Facilities	0.75	The Westward Region maintains approximately 20 facilities across the Alaska Peninsula in Dutch Harbor, Chignik, Sand Point, and remote field camps. The region did acquire some DM funds to maintain many facilities, but we have exhausted the funds and there still are a number of projects to do. The region employs a LTC worker and a percentage of the funds would be used for salary to extend his season to perform the work.	0.75	4	2.25	$250.0	AK Pen and Dutch	
Unfunded	Juneau R/V K-Hi-C Shipyard Repairs	DCF		Vessels	Vessels	0.75	Shipyard - critical - deck winch, stainless steel prop, pilot chair, skiff outboard, auxiliary engine.	0.75	4	2.25	$65.0	Juneau	
Unfunded	Fairbanks Main Office Building Heating System Conversion	DAS, DCF, DSF, DWC, HAB	Kerry Severide	Facilities	Office	0.74	Heating system conversion away from Steam – this includes removing/replace 6 other steam units under floor for entry's etc. Also include adding additional heat/vents in the old lab area of the south side of building (Always super cold in these offices because it was a Lab and not set up for individual offices it's been changed to). Convert remaining Boilers to natural gas so they can be dual fired (gas lines are on College road right now)	0.74	4	2.19	$1,000.0	Fairbanks	
Unfunded	Coghill Weir Renovation	DCF		Facilities	Weir	0.74	Numerous repairs are needed - siding, windows, doors, and roof	0.74	4	2.19	$75.0	Coghill Weir

1	Rural Trooper Housing	Rural Trooper Post DM	Repairs, Upgrades, Replacement Projects in Rural Trooper Posts: Rural Trooper Post facilities continue to age and structures are deteriorating. Haines, Dillingham, Galena, Ketchikan: Existing storage is at end of life. Without funding, DPS will continue to have equipment and other items that are critical to our mission not properly secured and protected from the elements, which increases the risk of vandalism and shortens the life spans of valuable response equipment, both reducing our ability to respond to emergency calls for service, participate in search and rescues, and conduct proactive patrols. Ketchikan: The asphalt is deteriorate and has large pot holes. There is a portion of the asphalt located over the septic system. The septic system is from 1981 and will likely be damaged with asphalt replacement. DEC has stated there is a high likelihood the "fallout system" will need to be upgraded with the septic system replacement. Ketchikan: Electrical upgrades are being requested to ensure the post is available for emergency situations where the post would serve as a public emergency shelter. This would include needed upgrades to the generator, automatic transfer controls, and lighting. DPS has 25 Rural Trooper Post locations.	$ 2,000.0	$ 2,000.0	$ -	$ -	25 Locations
2	Aircraft Section	Bethel Hangar lighting, apron, and concrete repairs/upgrades	Replace and install inoperable or missing emergency lighting and exit signs within Bethel hangars. An apron needs to be built on the exterior to drain water and snow from hangar door. Currently, water and snow build up and leak into the hangar, creating a major hazard and an ice bump where the hangar door comes down, which leads to damage to aircraft and the hangar door. The flooring needs to be sealed to limit glacial silt damage to the existing concrete. Concrete is difficult to maintain and replace in the remote location and will continue to degrade if not treated.	$ 760.0	$ 2,760.0	$ 760.0	$ 760.0	Bethel

3	Aircraft Section	Lake Hood Airport Hangar DM, emergency lighting repairs and upgrades, protective canopy replacements	The DPS Aircraft Section hangars 1 & 2 are in poor to critical condition, causing functionality and safety issues. Canopies: Hangar 1 needs a new canopy over the natural gas meter and mechanical room door and another over the exterior electrical panels. Hangar 2 needs a new canopy over the natural gas meters at both hangars. All canopies are to protect equipment and personnel from falling snow and ice from the roof structures. Lighting: Install a middle row of LED shop lights in the parts stockroom (room 107) of Hangar 1 equivalent to 50 to 70 lumens per square foot. Replace hangar lights over the bay and zone the lights so they can be turn off/on as needed. Replace the lighting fixtures with high bay LEDs for added reduction in electricity. Proper lighting is needed to continue work, and the LED option is more cost and energy efficient. Current fluorescent tubes burn out quickly creating dim workspaces that cannot immediately be remedied due to workload on maintenance personnel. Emergency Indicators: Replace inoperable or missing emergency lightings and exit signs for hangars for personnel safety.	$ 2,000.0	$ 4,760.0	$ -	$ 760.0	Anchorage
4	Various	Parking Lot Pavement / Sidewalk Replacement	**ANCH HQ:** Pavement is failing and sidewalks are crumbling. Repairs have been made but are also failing. This is a life, health, safety issue due to slips, trips, and falls ($1,000.0). **Bethel:** Regrade and add gravel to parking area due to unstable and varied substrate. The project will consist of grading and resurfacing with gravel. Resurfacing the Post Parking Area will ensure the public has appropriate and safe access and ensure continuation of DPS's mission. ($500.0)	$ 1,500.0	$ 6,260.0	$ -	$ 760.0	Anchorage & Bethel
5	APSCS	HVAC unit lifecycle refresh	Multi-year project to overhaul sites with new HVAC units to replace R22 units that are no longer supported. To include installation/parts/travel.	$ 500.0	$ 6,760.0	$ 500.0	$ 1,260.0	Statewide
6	APSCS	Reindeer Tower Replacement	Tower was deemed unsafe and unstable in 2019. Funding requested for inspection and remediation.	$ 500.0	$ 7,260.0	$ -	$ 1,260.0	Cantwell
7	APSCS	Replace Saddle Mountain Power Line	Replace power line that suffered failure for several months in 2023 before temporary emergency repairs were able to made.	$ 500.0	$ 7,760.0	$ 500.0	$ 1,760.0	Juneau
8	Training Academy	Sitka Training Academy – Maintenance & Upgrades	The building has an original hydronic heating system, a cast iron fire suppression system, outdated ventilation in classrooms and dorm rooms, and a host of other original fixtures and/ or features that are in need of updates due to age and use. ***$750.0 capital awarded in FY2024.***	$ 750.0	$ 8,510.0	$ 750.0	$ 2,510.0	Sitka

9	Aircraft Section	Statewide tie-down maintenance, fuel tank/systems maintenance, inspections, repair/estimation of replacement of hangar doors and cranes	Aircraft Tie Down Maintenance - Replace broken permanent tie downs, install temporary Duckbills and ice screws. Tie downs are vital to keeping in service patrol aircraft secure in high winds when a hangar is not available. Replace degraded aircraft fuel tanks and fueling systems - Fuel tank and fuel system replacement is needed in Coldfoot, Dillingham, King Salmon, among other locations due to issues with the quality and the age and condition of the fueling systems. Repair or replace hangar doors and cranes- Address hydraulic failures, fabric damage/fraying, and wiring issues. Cranes are used to lift aircraft off of the floor for maintenance and repairs, and need repairs for similar reasons, especially with personnel and vendors working under the aircraft when suspended by the cranes.	$ 395.0	$ 8,905.0	$ 395.0	$ 2,905.0	Statewide
10	APSCS	Tower TIA Inspections, soil and foundation reports	Identify and remove all unused antennas, feedlines, and associated hardware from towers. Perform some minor remediations while onsite. Funding will cover contract tower crew support working on-site with APSCS staff. Will contract for Professional Engineering standards based inspections and reports. Guyed towers were due in 2022 and standing towers were due in 2024.	$ 1,500.0	$ 10,405.0	$ 1,500.0	$ 4,405.0	Statewide
11	APSCS	Engineering Site Inspections and Basic Remediation	Preventative maintenance is several years behind and primarily only break fix visits have been made. Utilize staff and contractors for an average of a week per site. Includes helicopter, consumable materials, per diem, and lodging. $15K per site.	$ 1,500.0	$ 11,905.0	$ 1,500.0	$ 5,905.0	Statewide
12	APSCS	High Voltage Electric Power Line System Engineering Inspections	Obtain engineering reports on existing power line equipment owned by SOA serving public safety communications sites. Several lines are beyond useful life and are needing to be replaced. Recent failures have elevated the need to remediate the aging infrastructure.	$ 400.0	$ 12,305.0	$ 400.0	$ 6,305.0	Statewide
13	APSCS	Ellemar Tower Foundation Footing Repair	Tower Foundation needs extensive repair to fix the loose rocks that are underneath 2 of the 4 tower legs. Estimated cost covers helicopter, APSCS staff, contractors, material transportation, travel, per diem, and consumable materials.	$ 150.0	$ 12,455.0	$ 150.0	$ 6,455.0	Ellemar
14	APSCS	Site access road repair and maintenance	Site access roads in need of repairs to avoid continued damage to snow removal equipment. This project will go towards road repairs and perform brush removal that has overgrown the sides of the roads	$ 1,000.0	$ 13,455.0	$ 1,000.0	$ 7,455.0	Statewide
15	APSCS	Sourdough Shelter Replacement	Replace shelter at Sourdough due to water damage from a leaking roof and was patched a few times. Also has significant insect damage. Estimated cost covers shelter, APSCS staff, contractors, material transportation, travel, per diem, and consumable materials.	$ 250.0	$ 13,705.0	$ 250.0	$ 7,705.0	Sourdough
16	APSCS	Site Shelter Replacements	Life cycle replacement of aging shelters due to water damage and/or insect damage	$ 500.0	$ 14,205.0	$ 500.0	$ 8,205.0	Statewide
17	APSCS	Install security fences at road accessible sites	Includes site prep, contractor installation $50K per site	$ 500.0	$ 14,705.0	$ 500.0	$ 8,705.0	Statewide
18	APSCS	Cleanup Ptarmigan Site	Cleanup unused shelters, old fuel tank, and extra equipment at the site. The remaining liquid in the old fuel tank will need to be properly recovered prior to moving the tank. Estimated costs to cover helicopter, contractors, travel, and consumable materials.	$ 100.0	$ 14,805.0	$ 100.0	$ 8,805.0	Valdez

19	APSCS	Cleanup Mt. Bede Site	Cleanup unused shelters and equipment at the site. Estimated costs to cover helicopter, contractors, travel, and consumable materials.	$ 150.0	$ 14,955.0	$ 150.0	$ 8,955.0	Port Graham
20	APSCS	Cleanup Shuyak Site	Remove old generator, fuel tank (after reclaiming old fuel), solar equipment, and old unused equipment from inside the shelters at the site. Estimated cost to cover helicopter, contractors, transportation, and consumable materials.	$ 150.0	$ 15,105.0	$ 150.0	$ 9,105.0	Shuyak Island
21	APSCS	Cleanup Kitoi Site	Cleanup unused shelters and equipment at the site. Estimated cost to cover helicopter, contractors, transportation, and consumable materials.	$ 150.0	$ 15,255.0	$ 150.0	$ 9,255.0	Afognak Island
22	APSCS	Decommission Tazlina Site	Return the site to original state before SATS installed equipment and shelters. Estimated costs for this site to cover APSCS personnel, transportation, and consumable materials.	$ 100.0	$ 15,355.0	$ 100.0	$ 9,355.0	Tazlina
23	APSCS	Decommission Old Diamond Ridge Site	Return the site to original state before SATS installed equipment and shelters. Estimated costs for this site to cover APSCS personnel, transportation, and consumable materials.	$ 100.0	$ 15,455.0	$ 100.0	$ 9,455.0	Homer
24	APSCS	Decommission Browne Site	Return the site to original state before SATS installed equipment and shelters. Estimated costs for this site to cover large helicopter, APSCS personnel, transportation, and consumable materials.	$ 70.0	$ 15,525.0	$ 70.0	$ 9,525.0	Clear, Anderson
25	APSCS	Decommission Radio Hill Site	Return the site to original state before SATS installed equipment and shelters. Estimated costs for this site to cover APSCS personnel, transportation, and consumable materials.	$ 70.0	$ 15,595.0	$ 70.0	$ 9,595.0	Fairbanks
26	APSCS	Decommission Old Bradley Lake	Return the site to original state before SATS installed equipment and shelters. Estimated costs for this site to cover APSCS personnel, transportation, and consumable materials.	$ 150.0	$ 15,745.0	$ 150.0	$ 9,745.0	Homer
27	APSCS	Statewide towers	continued tower inspections, maintenance, repairs/replacement	$ 5,000.0	$ 20,745.0	$ 5,000.0	$ 14,745.0	Statewide
28	Aircraft Section	McGrath Hangar door replacement	Current door is in need of replacement. The hangar is currently owned by Department of Fish and Game, but DPS is working to acquire it as DPS uses it as-needed. The current door is not operating well and will need to be replaced to be reliable for search and rescue operations once acquired.	$ 600.0	$ 21,345.0	$ 600.0	$ 15,345.0	McGrath
29	Aircraft Section	Bethel Hangar Door Replacement	DPS purchased the Bethel DPS hangar in 1988. The existing hangar door needs to be completely replaced with a vertical-lifting fabric door or equivalent. The existing hangar door is aging, the motors must be replaced periodically and the clearance is low regarding our Caravan 208 tail clearance. This would enhance the clearance of our growing number of aircraft in this major hub in the YK Delta. This type of door offers durability, tightness, operational reliability and minimum maintenance.	$ 1,000.0	$ 22,345.0	$ 1,000.0	$ 16,345.0	Bethel

Total	**$ 22,345.0**		**$ 16,345.0**	

Highlighted projects were put forward to OMB as priorities

Projects Removed from Backlog Since FY25

4	Alaska Wildlife Troopers	King Salmon Float Plane Dock	Dock Replacement: The existing dock was given to the state by the Feds and is on borrowed time. The dock is mission critical as it is the only place for the troopers to dock the float plane. The existing dock is nearing the end of its service life. This dock is essential for DPS's mission in the Bristol Bay Region and the Alaska Wildlife Trooper's mission of resource protection.	$ 150.0				King Salmon
5	Various	ANCH HQ & ABI Generators	Generator fire suppression: Fire protection repairs and upgrades are necessary for the generator building. The building houses 3 generators that provide emergency power for Alaska Bureau of Investigations (ABI) and Anchorage Headquarters (HQ). The generators need to remain ready to ensure mission continuance during power outages.	$ 115.0				Anchorage
6	Various	HVAC Controls Replacement	**ANCH HQ:** The air handler controls will be updated from pneumatic to DDC controls. The controls have been failing and replacement parts are not available. Facilities Council approved FY25? 5900 E Tudor needs to be looked at as well.	$ 1,500.0	$ 4,850.0	$ 1,500.0	$ 4,850.0	Anchorage
9	APSCS	Replacement Building for Jacks Peak and Ellamar Solar Sites Valdez Area.	Replace shelters at Jacks Peak and Ellamar due to water, age and environmental damage. Estimated cost covers shelter, APSCS staff, contractors, material transportation, travel, per diem, and consumable materials.	$ 250.0	$ 5,100.0	$ 250.0	$ 5,100.0	Anchorage
18	APSCS	Cleanup/Refresh Government Peak Shelter	Replace solar and batteries.	$ 50.0	$ 5,150.0	$ 50.0	$ 5,150.0	MatSu Borough
14	APSCS	Summit Lake Foundation/Shelter Repairs	The foundation/shelter repairs continues to settle and we have performed temporary repairs several times. This project would obtain and engineering study to determine a permanent fix and provide funds for the estimated fix.	$ 150.0	$ 5,300.0	$ 150.0	$ 5,300.0	Portage, Hope, Cooper Landing, Moose Pass
19	APSCS	Trims Generator Shelter Replacement	Replace the generator shelter at Trims which consists of removing old shelter, removing outdated external fuel tank, and replacing the generator. Estimated cost covers shelter, APSCS staff, contractors, material transportation, travel, per diem, and consumable materials.	$ 150.0	$ 5,450.0	$ 150.0	$ 5,450.0	Trims

Department of Health FY26 Deferred Maintenance List

Facility	Maintenance Requirement	Priority Value	Estimated Cost
Sitka Health Center	Exterior Windows Repair	16.9	$ 57.4
Fairbanks Health Center	Roofing Replacement Phase II	15.95	$ 165.4
Fairbanks Health Center	Entryway Doors Replacement	11.16	$ 90.7
Fairbanks Health Center	Exterior Building Envelope Replacement	11.16	$ 337.4
Fairbanks Health Center	Reception Area Roll-up Security Doors	11.16	$ 34.8

Sitka Health Center	Window Covering Upgrades	5.07	$ 67.4
Sitka Health Center	Install Kitchen Sink at Breakroom	5.07	$ 15.0
Ketchikan Health Center	Interior Emergency Lighting System	4.89	$ 36.6
Ketchikan Health Center	Toilets & Plumbing Upgrade	4.89	$ 59.0
Fairbanks Health Center	Interior Wall Paint	4.78	$ 54.9
Fairbanks Health Center	Hallway Sub-Floor Repair and Carpet Replacement	4.78	$ 135.0
Anchorage Public Health Lab	SMEO Cooler Replacement	4.32	$ 100.9
Ketchikan Health Center	Flooring Replacement	3.49	$ 54.4
Anchorage Public Health Lab	Parking Lot Seal, Stripe and Sidewalk Repairs	3.08	$ 181.4
Anchorage Public Health Lab	Lighting Fixture Upgrade	3.08	$ 236.4
Juneau Health Center	Generator Installation	3.06	$ 232.0
Ketchikan Health Center	Roof Cleaning & Gutter Repair	2.93	$ 17.0
Anchorage Public Health Lab	Reseal Basement Foundation Walls	2.16	$ 126.5
Anchorage Public Health Lab	Chiller Replacement	1.85	$ 506.1
Anchorage Public Health Lab	Gypsum Wallboard Repair	1.54	$ 106.0
Dillingham Health Center	Exterior Door and Office Window	1.35	$ 18.3
Anchorage Public Health Lab	Compressor Replacement	1.3	$ 75.9
Anchorage Public Health Lab	Tree Root Removal	0.93	$ 50.6
Anchorage Public Health Lab	Paint Interior Walls	0.93	$ 162.5
Anchorage Public Health Lab	Sidewalk Radiant Heat	0.93	$ 109.7
Dillingham Health Center	Flooring Replacement	0.81	$ 27.2
		TOTAL	**$ 5,171.7**

18-DEC Department of Environmental Conservation

Dept Priority	Allocation	Project Title	Project Description	Project Cost	Running Total	GF Cost	GF Running Total	Location (City)
1	Facilities Operations and Maintenance State Owned	Replace scientific laboratory equipment that has aged beyond its useful life of 10 years.	*Scientific laboratory equipment at the department's Environmental Health Laboratory is used to conduct regulatory testing on behalf of multiple Alaskan industries, including shellfish, dairy, and manufactured food and typically has a useful life of 10 years. After 10 years, equipment and technology becomes obsolete and at high risk of breakage or failure. Several items identified in this project are approaching 20 years old, and failure would limit the ability for mariculture products to be brought to market. Replacing aging equipment before system failure is imperative in preventing delays to regulatory testing that protects Alaskans health, life, safety, and socioeconomic well-being.*	$1,585.0	**$1,585.0**	$1,585.0	**$1,585.0**	Anchorage
2	Air Quality	Replace and maintain gaseous instruments at the National Core (NCore) multi-pollutant air monitoring station in the Fairbanks Non-Attainment Area	*The department is responsible for statewide ambient air quality monitoring to ensure compliance with national public health and welfare standards under the Clean Air Act of 1970. Air monitoring instruments are essential tools for protecting public health, ensuring regulatory compliance, and supporting air quality research. Like all precision equipment, these instruments have a finite operational lifespan and require regular maintenance and calibration to function accurately. Over time, the frequency and cost of repairs increase and the reliability of the data they produce can decline. Eventually, the cost of maintaining aging instruments, both in terms of dollars and lost data due to downtime can exceed the cost of replacement. Replacing outdated instruments is a cost-effective strategy and also a critical step in maintaining maximum uptime, which is essential for meeting Clean Air Act requirements, protecting human health, and supporting timely regulatory decisions that favor Alaskans.*	$180.0	**$1,765.0**	$180.0	**$1,765.0**	Fairbanks
3	Air Quality	Replace Federal Equivalent Method (FEM) particulate instrument and a collocated Federal Reference Method (FRM) sampler at the Juneau regulatory station	*The ambient air monitors at the Floyd Dryden site serves as an Alaska-agreed-upon measure to trigger necessary contingency actions stemming from Juneau's prior designation as a PM_{10} non-attainment area and plays a key role in preventing future exceedances due to fine particulate matter ($PM_{2.5}$). The essential Federal Equivalent Method (FEM) particulate instrument and the collocated Federal Reference Method (FRM) sampler at the Floyd Dryden regulatory station in Juneau are nearing the end of their service life. These upgrades are critical for maintaining the integrity of burn curtailment programs, ensuring the delivery of reliable, health-protective data, and avoiding regulatory backsliding. Proactive replacement of aging equipment helps prevent data gaps that could jeopardize federal grant funding, increase regulatory burdens, or hinder public health assessments and air quality research efforts.*	$120.0	**$1,885.0**	$120.0	**$1,885.0**	Juneau
				TOTAL	**$1,885.0**

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Anchorage Aviation HQ - Electrical System Upgrades	Existing electrical system is unsafe in its current configuration. Service Transformers need to be relocated to outside of building for the safety of its occupants. In addition, this critical HQ facility needs backup power in case of electrical outages. This upgrade will remedy an unsafe situation and provide much needed redundant power.	$1,500.0	**$1,500.0**	Anchorage	22
Facilities	Talkeetna SREB - Replace Boiler and HVAC System	Existing boiler has exceeded its life expectancy.	$120.0	**$1,620.0**	Talkeetna	10E
Facilities	Building Automation Rehabilitation	Through out the Northern Region, DOT has many Building automation systems that no longer are supported by OIT. They are in need of system upgrades, component replacement, and contract maintenance. These buildings log utility data, building functionality and provide asset protection. These systems pay for themselves when operational.	$250.0	**$1,870.0**	Fairbanks/ Northern Region Wide	
Facilities	Sterling Hwy Weigh Station	Replace pit heaters. Heaters no longer work and the scale freezes up during the winter.	$150.0	**$2,020.0**	Sterling	
Facilities	ANC Weigh Stations	Replace pit heat trace and pumps. Heat trace no longer work and the scale freezes up during the winter.	$180.0	**$2,200.0**	Anchorage	
Facilities	Birchwood SREB	Existing roof leaks and lacks adequate insulation. Needs to be replaced to prevent further damage to structure and save heating costs.	$150.0	**$2,350.0**	Birchwood	

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Electrical System Upgrade at Thompson Pass	Original construction electrical system in the Shop and Bunkhouse needs to be upgraded to current electrical code including the diesel generator backup. Although compliant at date of original construction, upgrades will result in significant installation of safety features that will provide a higher level of safety for employees.	$350.0	**$2,700.0**	Thompson Pass	9E
Facilities	Anchorage Aviation Building - Replace Concrete Sidewalk and Stairs	Existing sidewalks and stairs are cracked and have potholes creating hazardous conditions for visiting patrons and employees	$55.0	**$2,755.0**	Anchorage	21K
Facilities	Anchorage Highways Maintenance Building - Install Backup Generator	Building has no back-up power in this mission essential facility. Building has administrative areas as well as equipment areas. Serves areas from Anchorage to Girdwood. And areas from Anchorage to Palmer.	$1,000.0	**$3,755.0**	Anchorage	20
Facilities	Anchorage Materials Lab Ventilation/Exhaust System Upgrades	Materials Lab Ventilation/Exhaust System Upgrades	$400.0	**$4,155.0**	Cold Bay	37S
Facilities	Renew, Repair, Refurbish Nome Complex Buildings	Replace SEF septic system, asbestos abatement, lighting/electrical upgrades, siding replacement/insulating, hut roof/siding painting, tank painting, water supply upgrade, bunkhouse upgrades, replace loading dock, replace door jambs	$400.0	**$4,555.0**	Nome Complex	39T
Facilities	Cold Bay Building Demolition	Building Demolition	$2,300.0	**$6,855.0**	Cold Bay	37S
Facilities	St. George old SREB Demolition/Divestment	In 12/2019 NOAA decided they no longer wanted the abandoned maintenance building. Facility demolition will need to be addressed.	$1,000.0	**$7,855.0**	St. George	37

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	South Coast Region heating repairs	South Coast Region heating repairs	$300.0	**$8,155.0**	Southcoast Region	Southcoast Region
Facilities	Dillingham SEF Maintenance Shop - Replace Roof	Existing roof leaks and lacks adequate insulation. Needs to be replaced to prevent further damage to structure and save heating costs.	$275.0	**$8,430.0**	Dillingham	37S
Facilities	Sitka Airport Lighting Regulator Building - Exterior Repairs	Replace roofing, repair siding, replace corroded exterior electrical switch boxes.	$100.0	**$8,530.0**	Sitka	35-R
Facilities	Soldotna Highway Maintenance Station - Install Back-up Generator	Critical Highway Maintenance Station has no back-up power. This generator will provide the needed redundancy in case of emergency power outage.	$125.0	**$8,655.0**	Soldotna	30O
Facilities	Bethel SEF Maintenance Garage - Replace Roof	Existing roof is very old and lacks insulation. We wish to install a new energy efficient roof to save costly heating fuel.	$235.0	**$8,890.0**	Bethel	38S
Facilities	Kodiak Court - Replace Siding and Windows	Upgrade/replacement of deteriorating siding and windows to improve building comfort and performance.	$750.0	**$9,640.0**	Kodiak	32P
Facilities	Illiamna SREB - Replace Roofing and Siding	Existing roof and siding are very old and lack insulation. Department will install a new energy efficient roof and siding to save costly heating fuel.	$225.0	**$9,865.0**	Illiamna	37S
Facilities	Bethel SRE Building - Replace Roof and Siding	Existing roof and siding are very old and lack insulation, new energy efficient roofing and siding to improve building performance.	$100.0	**$9,965.0**	Bethel	38S
Facilities	Cold Bay Warm Storage - Replace Roof, Siding, and Overhead Doors	Existing roof and siding is deteriorated and leaks, Doors are inefficient and allow tremendous heat loss. Upgrade to new insulated doors and insulated siding to save on utility costs	$250.0	**$10,215.0**	Cold Bay	37S

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Replace Peger Maintenance Building Roof	Replace aging roof that has periodic leaks. Replace the existing roofing material with EPDM and increase the ceiling R-value to R-50 or better.	$520.0	**$10,735.0**	Fairbanks	1A
Facilities	Replace Fairbanks SEF Overhead Crane	Current cranes (2 each 7.5 ton) are over 30 years old, parts are no longer available. Functionality and fine control are deteriorating.	$82.0	**$10,817.0**	Fairbanks	1A
Facilities	Replace Siding at Cantwell Station	The existing siding on the shop is an EIFS system that has been damaged in several areas. The siding is coming loose from the substrate and repair would be cost prohibited. The new metal siding would be low maintenance and simpler to repair if necessary.	$250.0	**$11,067.0**	Cantwell Station	6C
Facilities	Northern Region Asbestos Abatement	The average age of NR buildings is 35 years old. Any building constructed prior to 1981 has Asbestos materials throughout. Mastic was used to secure vinyl flooring and carpeting. Asbestos was prevalent in ceiling tiles drywall board, roofing materials and cement board siding. Testing and abatement need to be prioritized in all older buildings.	$375.0	**$11,442.0**	Fairbanks	1A
Facilities	Central Region - Hazardous Materials Assessment/Abatement	OSHA is requiring assessments of Hazardous Materials in all occupied State facilities constructed prior to 1980.	$375.0	**$11,817.0**	Region Wide	0

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Yakutat Maintenance Station - Roof Access, Safety Tie-off, and Exterior Siding Repairs	Roof edge access is too high to be utilized and there are no safety tie-offs to permit access. Clerestory windows have leaked since the building was commissioned. Exhaust stack cap blew off and cannot be replaced without safe access. Work would require installation of ladder ways and pathways.	$175.0	**$11,992.0**	Yakutat	32-P
Facilities	Talkeetna SREB - Install New Floor Drain System	Existing Drain system has deteriorated and no longer functions	$75.0	**$12,067.0**	Talkeetna	10E

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Renew, Repair & Renovate Saint Mary's A/P Complex	Many maintenance issues have been deferred over the years due to lack of district resources and onsite maintenance personnel. Logistics and budget prevented frequent maintenance. Need to replace all t12 lighting in all buildings with LED/ t5/t8 fixtures to improve lighting efficiencies (a total of 33 t12 fixtures). Install lighted exit signs on all required exits, relocate and wire in new fuel tanks, install electric heater in generator module, install new electrical mast at the Town shop, repair leaking SREB roof, clean water holding tank (black inside), fix sewage lagoon fencing, realign sewer drain to lagoon, replace two Plexiglas windows in SEF shop, demolish and dispose of old sand storage shed, general cleanup of complex and in town shop. The SREB bathroom needs to be refurbished. The SEF shop will have water supplied to the shop for a sink and bathroom, and to replace a man-door and the windows. About 2 dozen old fuel tanks ranging in size from 500gal to 10,000gal need to be disposed of too. The NR Regional Roving Crew will be utilized to perform this work. The PCNs on this crew are funded by 100% Capital Receipt Authority.	$200.0	**$12,267.0**	Saint Marys A/P	39T
Facilities	Anchorage Sign Shop - Replace Roof and Insulation	Replace old leaky roof with new roofing materials and install additional insulation to improve the energy efficiency of this old structure	$275.0	**$12,542.0**	Anchorage	22

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Renew Paint on Interior Rural Airport SREBs	Many rural airports in the Interior District need to be scraped and repainted to preserve the buildings. This is logistically intensive due to the fly-in only access to the facilities.	$220.0	**$12,762.0**	NR Rural Airports - Interior District	6C
Facilities	Gustavus Maintenance Shop - Door Installation	Install 2 new doors in equipment storage area.	$50.0	**$12,812.0**	Gustavus	33-Q
Facilities	Dutch Harbor Storage Facility - Repair Concrete Roof	Roof leaks excessively causing safety concerns with electrical panels. Needs drains (scuppers) installed and new membrane	$350.0	**$13,162.0**	Dutch Harbor	37S
Facilities	Skagway Avalanche Shed - Sectional Door Replacement	Install a new sectional door as the old door has become unserviceable.	$25.0	**$13,187.0**	Skagway	32
Facilities	Palmer Highways/SEF Maintenance Station Seal Roof	Roof has some leaks and needs to be resealed.	$85.0	**$13,272.0**	Palmer	8
Facilities	Ketchikan M&O Replace Doors on Cold Storage Shed	Ketchikan M&O needs new doors on the cold storage shed. The present sliding doors are wearing out and becoming a safety issue.	$80.0	**$13,352.0**	Ketchikan	36R
Facilities	Region Wide (South Coast) Lighting Upgrade	Replace inefficient lighting with T8 and LED lighting.	$100.0	**$13,452.0**	Region Wide	32-P, 33-Q, 34-Q, 35-R, 36-R
Facilities	Seven Mile SER Complex - Ventilation Improvement	Replace restroom exhaust ventilator to improve indoor air quality. Install new exhaust system for 1st and 2nd floor copy rooms to reduce heat buildup in the building.	$45.0	**$13,497.0**	Juneau	34-Q
Facilities	Replace Tazlina HQ Building Siding	The project will wrap the building with 2 inches of rigid foam (R-Value=10) and install metal siding for a cost efficiency upgrade. This will eliminate future sand blasting and painting by installing a maintenance free exterior with significant fuel oil savings.	$200.0	**$13,697.0**	Tazlina	6C

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	North Kenai Maintenance Station - Replace Siding	Existing siding is very old and lack insulation. We wish to install new sandwiched foam metal panels to improve the energy efficiency of this structure and save on utility costs	$150.0	**$13,847.0**	North Kenai	29O
Facilities	Anchorage Chemical Storage Building - Roof and Siding Replacement	Existing metal roof and siding have deteriorated and leak. Need to replace with more corrosion resistant finishes.	$200.0	**$14,047.0**	Anchorage	22
Facilities	Region Wide M&O Maintenance Bldg. Office Floor Covering Replacement	Floor finishes are wearing out and need replacement before they become a safety hazard.	$250.0	**$14,297.0**	Region Wide	32-P, 33-Q,34-Q, 35-R,36-R
Facilities	Replace Paxson Bunkhouse	Paxson Maintenance Station has a 60's era trailer that serves as a bunkhouse. It has been added on to over the years to add living space. It has structural issues and wiring from the 60's that we cannot verify is safe. There is another building that acts as a mechanical room that provides heat to this bunkhouse and another bunkhouse adjacent to it. The project will combine 3 buildings into one usable space with all mechanical room needs within a single building as well. This will save operating costs of 1 building vs 3 separate buildings as well as give our personnel a safe livable environment to work in.	$1,000.0	**$15,297.0**	Paxson Maintenance Station	6C
Facilities	Cold Bay Employee Housing - Seal Concrete Foundations	Foundations leak and need to be sealed to prevent water damage to personal belongings and mold infiltration.	$125.0	**$15,422.0**	Cold Bay	37S

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Kodiak Courthouse - Install Direct Digital Controls on Heat/cooling system	The installation of digital controls would allow evening setbacks, and better control of both heating and cooling systems. This upgrade would save energy and increase occupant comfort.	$75.0	**$15,497.0**	Kodiak	32P
Facilities	Kodiak Regional Office - Install new Direct Digital Controls	The installation of digital controls would allow evening setbacks, and better control of both heating and cooling systems. This upgrade would save energy and increase occupant comfort.	$50.0	**$15,547.0**	Kodiak	32P
Facilities	Anchorage Annex - Install AC	Building lacks any cooling capability, needs AC to allow additional cooling for occupant comfort	$140.0	**$15,687.0**	Anchorage	22
Facilities	Repair & Renew Security Fence/Gates at Peger Road	3,700 feet of the existing security fence fabric and posts are in poor shape. Original complex fence has posts that are bent, broken, or missing. In places the fence fabric is damaged and some of the gates need replacement.	$94.6	**$15,781.6**	Fairbanks	1A
Facilities	Renovate Tazlina SEF Steel Storage Rack	Install a roof over the Tazlina S.E.F. steel storage rack. The rack is uncovered and leads to problems with rusty metal, causing project time to run longer because extensive cleaning is necessary. The roof would reduce unnecessarily inefficient labor time, ease inventory location, and reduce inventory loss.	$47.0	**$15,828.6**	Tazlina Station	6C
Facilities	North Kenai Maintenance Station - Install Electronic Security Gate	Gate security will prevent loss due to theft of State Property.	$45.0	**$15,873.6**	North Kenai	30O

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Region Wide (Central) - Construct Refueling Stations from Concrete	EPA requires fueling activities to be conducted on an impervious surface. Need to install concrete fueling pads	$175.0	**$16,048.6**	Region Wide	0
Facilities	Renew Peger Admin Building Ducts by Cleaning	This maintenance housekeeping item is overdue. Improved HVAC efficiency with reduced dust in the air is expected.	$64.0	**$16,112.6**	Fairbanks	1A
Facilities	Anchorage Communications Building - DDC Upgrades	HVAC systems controls needs upgrade to better heat and cool the facility. Many critical communications systems depend on proper cooling in this facility.	$50.0	**$16,162.6**	Anchorage	20
Facilities	Central Region Maintenance Shops/Weigh Stations	Several Shops/Weigh Stations have non-potable water supply need new wells and/or filtration systems	$425.0	**$16,587.6**	Glenn, Potter, Silvertip.	22, 28
Facilities	Replace Peger Complex Windows	Many of the existing windows are single pane with storm panes and have very low R-values. They have high maintenance wood frames with worn out operating mechanisms. New windows will have much higher R-value and low maintenance plastic or fiberglass frames. Maintenance building, Tech Services, Supply, Materials, and SEF.	$152.0	**$16,739.6**	Fairbanks	1A
Facilities	Anchorage Annex - Install Parking Lot Lights	Parking Lot has inadequate lighting and is hazardous to public and employees	$40.0	**$16,779.6**	Anchorage	22

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Replace Rural A/P Building Lighting with LED Lights	Due to the high cost of electricity in rural areas replacing the existing lighting with LED will save 70% on lighting costs. Also the existing metal halide or high pressure sodium lighting have poor color rendering, long warm up and re-strike time and short lifespans relative to LED which reduces maintenance. The end result is better lighting to support operations with electric costs cut more than in half. Payback estimated at seven years which is longer than typical for LED due to rural airport logistical costs. Per A/P cost: $6,000 materials, $2,500 in-house labor, $1,500 travel, per diem & shipping.	$660.0	**$17,439.6**	Region Wide	6C, 39T, 40T
Facilities	Region Wide (Central) - Decommission USTs	Numerous USTs need to be removed from service, tested, excavated or abandoned in place	$300.0	**$17,739.6**	Region Wide	0
Facilities	Renovate - Tazlina Station Sand Storage Building for Salt Storage	Tazlina now has no salt storage, an addition to the existing sand shed would allow M&O better results with snow and ice control. Tazlina is also the district hub and all 6 camps would benefit with the salt storage. Tazlina now struggles with tarps and timbers in an attempt to store salt. A 50X50 addition to the existing sand shed is needed.	$120.0	**$17,859.6**	Tazlina Station	6C
Facilities	Cascade Warm Storage - Replace Siding and Windows	Existing siding is deteriorated and leaks, windows are inefficient and allow tremendous heat loss. Upgrade to new Thermopane windows and insulated siding to save on utility costs	$110.0	**$17,969.6**	Cascade	9E

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Aniak Maintenance Shop - Roof Replacement	Roof is extremely old and leaks excessively	$175.0	**$18,144.6**	Aniak	38S
Facilities	Kodiak Court - Install Drop Ceiling and New Lighting	Install Drop ceiling and lighting in remaining area that did not get previously upgraded	$120.0	**$18,264.6**	Kodiak	32P
Facilities	Aniak Maintenance Shop - Roof Replacement	Roof is extremely old and leaks excessively	$175.0	**$18,439.6**	Aniak	38S
Facilities	Kodiak Courthouse - Upgrade Ventilation System	Many office areas lack sufficient ventilation for occupant comfort. This upgrade would revamp the existing system to provide additional cooling to other office areas.	$156.0	**$18,595.6**	Kodiak	32P
Facilities	Anchorage Drillers Shop - Replace 18 bifold doors	Existing Bi-fold doors are uninsulated and do not seal properly. We are experiencing tremendous heat loss in the building.	$300.0	**$18,895.6**	Anchorage	22
Facilities	Anchorage Highway Maintenance Station - Abate Asbestos	There is asbestos throughout the facility that needs to be removed.	$125.0	**$19,020.6**	Anchorage	22
Facilities	Palmer Warm Storage - Replace Roofing and Siding	Existing roof and siding are very old and have little insulation, new energy efficient roofing and siding will save in utility costs.	$165.0	**$19,185.6**	Palmer	11F
Facilities	Kenai Combined Facility - Repave parking lot	Parking lot has deteriorated and has potholes, cracks, and ruts. Needs new asphalt and curbs to provide a safe surface for visitors and employees.	$165.0	**$19,350.6**	Kenai	30O
Facilities	Kodiak Regional Office - Repair Parking Lot	Pave parking area, existing lot is cracked and potholed	$300.0	**$19,650.6**	Kodiak	32P
Facilities	Anchorage Public Safety - Repave Parking Lot	Existing Parking lot has deteriorated (cracks and potholes, etc.)	$520.0	**$20,170.6**	Anchorage	20
Facilities	Tudor Complex - Repave Yard	Existing pavement has deteriorated and become irreparable. Hugh potholes, cracks, and crumble asphalt litter the complex.	$1,000.0	**$21,170.6**	Anchorage	22
Facilities	Kodiak Court Building Roofing Replacement	Roofing has exceeded its life expectancy and needs replacing	$250.0	**$21,420.6**	Kodiak	32

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Kalsin Bay Maintenance Building - Pave yard around building	Yard is rutted, muddy, and holds water. Need to regrade and pave the yard.	$150.0	**$21,570.6**	Kodiak	32P
Facilities	Kodiak SEF Maintenance Shop - Pave Parking Area	Existing yard is poorly graded, gets extremely muddy, and needs resurfaced.	$182.0	**$21,752.6**	Kodiak	32P
Facilities	Kodiak Airport Equipment Warm Storage - Pave Parking Area	Yard is rutted, muddy, and holds water. Need to regrade and pave the yard.	$150.0	**$21,902.6**	Kodiak	32P
Facilities	Kodiak Regional Office - Renovate 2nd Floor for Leasing	Office building needs to be reconfigured to meet new State Space Standards and Utilization	$80.0	**$21,982.6**	Kodiak	32P
Facilities	Dutch Harbor - Remove Asbestos from Hanger Building	Building contains asbestos and is a hazard to employees entering the facility. Asbestos needs to be removed or contained.	$410.0	**$22,392.6**	Dutch harbor	37S
Facilities	Trims Shop Addition	Add another bay to the Trims Shop. This is needed to help the H&A mission at the Richardson Highway.	$750.0	**$23,142.6**	Fairbanks	01A
Facilities	Delta, Northway sand sheds	Construct sand sheds for Delta and Northway	$1,000.0	**$24,142.6**	Delta, Northway	09E, 06C
Facilities	New Delta Shop	Construct new shop in Delta	$5,000.0	**$29,142.6**	Delta	09E
Facilities	New Northway Shop	Construct new shop in Northway.	$30,000.0	**$59,142.6**	Northway	06C
Facilities	Ernestine bunkhouse	Build/install new bunkhouse in Ernestine station	$1,250.0	**$60,392.6**	Tazlina Station	6C
Facilities	Nelchina salt storage	Nelchina currently has no salt storage bin, a salt storage bin added to the sand shed would allow M&O to respond better to snow and ice events with the changing climate.	$150.0	**$60,542.6**	Nelchina	09E
Facilities	Nelchina Bunk house	Build/install new bunkhouse in Nelchina	$1,250.0	**$61,792.6**	Nelchina	09E

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Western District overhead doors	Replace overhead doors throughout Western District. Many OHD's throughout the Western District are old wooden style that lack insulative values and functionality is rapidly decreasing due to dilapidation and worn out system components. New Doors would create cost savings through reduction in heat loss.	$250.0	**$62,042.6**	Western District	
Facilities	Western District SREB painting	Paint or re-side SREBs throughout Western District	$350.0	**$62,392.6**	Western District	
Facilities	Western District Electrical	Upgrade electrical components-lighting, service panels with LED fixtures and generator capable meters	$100.0	**$62,492.6**	Western District	
Facilities	Valdez storage overhead door replacement	replacement of two wooden overhead doors. They do not operate well, parts are no longer available and lack of insulative properties are not energy efficient.	$40.0	**$62,532.6**	Valdez	
Facilities	Valdez Dot yard lighting upgrade and replacement	Street lights in Valdez DOT yard need replaced. 0riginal lamps installed in mid 1960s poles rotten ,service wire old and stretched by heavy snow load.	$200.0	**$62,732.6**	Valdez	
Facilities	Thompson pass driveway street lighting fix and or replacement	Street lights at the Thompson pass highway maintenance station have not been operational in years and are a necessity during winter months. Underground wires were cut or damaged several years back during a highway construction project	$75.0	**$62,807.6**	Valdez	
Facilities	Cordova yard and outside building lighting upgrade	the outside flood lights at the 13 mile maintenance station need to replaced or upgraded they are not efficient and ballasts are hard to find	$50.0	**$62,857.6**	Cordova	

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Tatitlek Airport heating system unit heater replacements	The unit heaters at the airport maintenance equipment building are very old an there fire boxes or flame pots have been patched in with tin in several spots that have either rusted or burned through	$50.0	**$62,907.6**	Tatilik	
Facilities	Valdez combined facilities side walk replacement	The sidewalks that wrap around the Valdez court house are cracked, uneven and have chunks of sidewalk missing. Snow removal in Valdez is a winter constant and they have been abused.	$200.0	**$63,107.6**	Valdez	
Facilities	Valdez combined facilities parking lot fix ,repair or replacement	parking lot is rough with heaves and pieces missing the back parking lot is only half pavement other half is dirt .The DMV testing area is not suitable for do so.	$350.0	**$63,457.6**	Valdez	
Facilities	19 mile Sheep creek loader shed bifold door upgrade	The bifolding doors on the loader shed are not ideal for the Valdez area they are hard to open in deep snow. Doors need to be replaced with an overhead door as it would be more suitable for this area and not have to be forced open.	$25.0	**$63,482.6**	Valdez	
Facilities	Tazlina District Roof Metal replacements	The Tazlina District has failing metal roofing material that is resulting in increased leakage and water intrusion into multiple buildings. Roof replacement will also address insulation needs and repair of existing damage from leaks. Will address more than 5 buildings within scope of project.	$350.0	**$63,832.6**	Tazlina District	12f

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Tazlina District heating replacements	Multiple buildings with the Tazlina are operating very old heating units that are overdue for replacement based on life expectancy. Experiencing many additional repair work orders for furnaces and Unit Heaters to keep operational and buildings heated. New units will provide Safe and reliable heat and energy savings through operational efficiencies.	$400.0	**$64,232.6**	Tazlina District	12f
Facilities	Deadhorse DOT Fire System Repairs	Fire alarm system is out of compliance, needs replacement sensors and reprogramming. Building is currently out of compliance and is a maintenance Shop/ Bunkhouse.	$30.0	**$64,262.6**	Deadhorse	
Facilities	Sag River DOT Shop Leveling	Sag River Dot Shop is starting to recede into the tundra. The building foundation is kept frozen to prevent the building from sinking into the tundra. The freeze back system needs to be upgraded and the shop leveled out. Failure to repair this system will render the building unusable stopping proper maintenance of the Dalton Highway.	$1,250.0	**$65,512.6**	Sag River	
Facilities	Manley DOT Shop New Roof	Current roof is foam with sealer. The ravens are tearing into foam breaking seal. Repair, add Metal roof over foam, to protect foam from water infiltration. The absorption of water in to the foam roof will add increased weight and will lead to eventual roof failure.	$200.0	**$65,712.6**	Manley	

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Chandalar DOT Bunkhouse Leveling	The Chandalar DOT Bunkhouse is settling down the hill, Causing sheet rock/door issues, sewer line slope issues, etc. Repair raise bunkhouse add beams and new concrete pads, dig out and repair sewer lines to proper slope. Closure of this remote Bunkhouse due to damage will cause major delays in the maintenance of the Dalton Highway.	$200.0	**$65,912.6**	Chandalar	
Facilities	Jim River DOT Rebuild Water Supply	Jim River DOT water is supplied from a well house 1000+ feet across the ground in insulated pipe. The water pipe is quest type pipe and is due for replacement before catastrophic issue. Pipe to be replaced with pex, and new water softener system to be installed.	$75.0	**$65,987.6**	Jim River	
Facilities	Dalton Highway Wide Generator replacement	The Dalton Highway Maintenance Camps have 16 primary power generators that are beyond there useful life. They need to be replaced, but are currently being band aided together to keep the lights on. 50-100k a piece	$2,300.0	**$68,287.6**	Dalton Highway	
Facilities	Coldfoot/ Jim River DOT Finish Double Wall Dispenser Tank Conversion	Jim River DOT and Coldfoot DOT fuel dispenser double wall tanks need to be installed per environmental guidelines, tanks are installed piping and pumps are not. Dismantle of old tank farms and removal of tanks. The tanks are installed they just need to be plumbed and wired.	$150.0	**$68,437.6**	Coldfoot	

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Jim River DOT old shop rehab, or Demolished	Jim River DOT Old Shop is currently being used as cold storage, With generator waste heat. The building in the past was found unsafe, and needs to be rebraced/ engineered Or demolished completely	$250.0	**$68,687.6**	Jim River	
Facilities	Peger Complex Heat pump Upgrades	Update and replace glycol heat pumps, install valves for positive shut off, clean and filter glycol, or replace. Air separators and air vents should be replaced when system is down.	$50.0	**$68,737.6**	Fairbanks	
Facilities	Montana Creek Generator Replacement	Primary power for the Montana Creek Maintenance Station is Diesel generator power. Useful life of a generator is 30,000 hours. Both Gensets are well beyond that figure. Upon replacement, Generators will be put into the SEF replacement plan for future replacement needs.	$250.0	**$68,987.6**	Central	
Facilities	Dalton Highway Glycol Replacement	The Dalton Districts aging heating systems are in need of new glycol. Overtime with the lack of plumbing support, glycol breaks down and becomes a detriment to the heating system. There are several facilities that need a glycol flush and new glycol installed	$200.0	**$69,187.6**	Dalton District wide	
Facilities	Coldfoot shop Siding Replacement	Coldfoot shop's siding is damaged due to plowing over the years. New siding is need to make the place back to new	$75.0	**$69,262.6**	Coldfoot	
Facilities	Coldfoot Heating System Replacement	Replacement of unit heaters in shop, to new Fuel Efficient models, old models are 30+ years old.	$75.0	**$69,337.6**	Coldfoot	

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Chandalar DOT Cold storage upgrade	Chandalar DOT is a very windy place where cold storage is the key. The Old Alyeska camp is located in DOT area and needs to be torn down, and removed. The Existing Chandalar Shop cold storage that is attached to Alyeska camp needs major rehabilitation project as it has been battered by the wind.	$300.0	**$69,637.6**	Chandalar	
Facilities	Sag River DOT Natural Gas Conversion	Sag River DOT shop is in range of Gas Service from Deadhorse. The generators and boilers could run on the more efficient and cleaner energy with little effort to install. This would be a great project to save a lot of heating and electrical costs for the remote facility.	$450.0	**$70,087.6**	Sag River	
Facilities	Sag River DOT Bunkhouse	The Sag River DOT Bunkhouse is old and weather tattered and needs exterior siding and a refresh of insulation package.	$300.0	**$70,387.6**	Sag River	
Facilities	Deadhorse DOT Structure Removal	Deadhorse's old shop is currently used as alternative warm storage. The Permafrost has launched so out of plumb that is in danger of collapsing. It needs to be releveled or removed.	$1,000.0	**$71,387.6**	Deadhorse	
Facilities	Deadhorse DOT	The ARFF facility fire engine replenishment water tank is out of service, it is not big enough for compliance with FAA. It needs a new tank.	$100.0	**$71,487.6**	Deadhorse	
Facilities	Peger SEF Building Ventilation Project	Peger SEF Building needs revitalized Ventilation system to create safe, and OSHA compliant working environment	$500.0	**$71,987.6**	Fairbanks	

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Peger Complex Truck Wash Repair	The Peger Complex Truck wash building is rusting and creating havoc on all mechanical systems. The structural joists are also rusting and will be structurally compromised soon and the building will have to be closed. This building also contains Fairbanks district road brine systems.	$950.0	**$72,937.6**	Fairbanks	
Facilities	Peger Complex Roof/Siding	The Peger complex has several building in the back of the lot that are do for Replacement of metal roofs and siding.	$400.0	**$73,337.6**	Fairbanks	
Facilities	Tok DOT Envelope and Weatherization upgrades	The TOK DOT District HQ is in need of new roof/ Siding/ and Insulation upgrade. This is an old complex in one of the coldest locations in the state, investment in the envelope will see a quick return on a capital investment	$400.0	**$73,737.6**	TOK	
Facilities	South Fork Bunkhouse Rehabilitation	The South Fork bunkhouse has wood rot and Mold, no working heater, and needs a general bring back to life.	$150.0	**$73,887.6**	Southfork	
Facilities	South Fork Generators	South Fork DOT needs new Generators, the current generators are spewing oil everywhere, and have 30,000 hours + on them.	$250.0	**$74,137.6**	Southfork	
Facilities	Bunkhouse Rehabilitation	The Thompson Pace bunkhouse could use a facelift, along with a winterization of windows. The wind blows right through this building in the winter time. This will help with heating costs and morale for the crew	$300.0	**$74,437.6**	Thompson Pass	9E

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Sag River Freeze System	The Sag River DOT freeze tubes are not currently operational, this will eventually lead to camp closure when the Permafrost starts melting under the bunkhouse and water system buildings.	$400.0	**$74,837.6**	Sag River	
Facilities	Nome SEF improvements	Exhaust hood install in machining room, replace failing septic system, replace inefficient office windows, parts room addition needed to alleviate cluttered walkways, replace 1960's generator, encapsulate ACM on walls in generator room, insulate ATCO roof, replace 1950's bifold doors	$750.0	**$75,587.6**	Nome	
Facilities	Nome Highways office siding replacement	Current siding is plywood T1-11 with a net wall R-value of R-10. Install foam board and metal siding to reach an net R-41 for substantial heating fuel savings	$300.0	**$75,887.6**	Nome	
Facilities	Replace fuel pumps throughout Western District	Fuel pumps are failing throughout the district. 3 of 4 have failed in Nome, can no longer get parts to repair. One has failed in Kotzebue, Elim. Purchase and install 4 stand-alone pumps, and install at least 2 tank mounted pumps.	$500.0	**$76,387.6**	Nome	
Facilities	Upgrade cold storage huts	Replace all lighting with LEDs, replace failing doors/jambs, paint exterior walls, seal roofs. All huts are 1950's era, 11 total which provide priceless storage for SEF, Highways, Facilities, Construction, Airports and F&G. Replace partially collapsed loading dock. Pour concrete approaches in front of overhead doors at SEF, Highways shops to reduce entry of mud/dirt into the buildings.	$450.0	**$76,837.6**	Nome	

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Repair failed VLB components	Generator switch gear/auto-start panel has failed, replace deteriorated entry doors, repair and seal ACM covered walls/ceiling. The building contains the Nome Runway regulators and the runway lighting back-up generator.	$150.0	**$76,987.6**	Nome	
Facilities	Provide generator back-up power	Nome Facilities Shop, Highways office/shop and Materials Lab do not have generator back up. Install switch gear and provide portable generators to prevent freeze-ups during power outages.	$175.0	**$77,162.6**	Nome	
Facilities	Fuel tank maintenance	Prepare and paint fuel tanks, filter fuel through a "scrubber" filter system to remove water/sediment. Replace corroded tank fittings and fuel lines/fittings. This will extend the usable life of our tanks, and help to prevent leaks due to corrosion.	$100.0	**$77,262.6**	Nome	

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
Facilities	Improve KSM buildings	Due to lack of personnel and insufficient funding, most of the St. Mary's facilities do not have periodic maintenance done. Two windows in the SEF shop are plexiglass covered and should be replaced with energy efficient units; SREB roof leaks in several areas-need to replace chimney stack components and some roofing to stop leaks; 75% of the sewage lagoon fencing has fallen over and needs to be repaired or replaced; town shop electrical mast has fallen off the building-replace all electrical components outside and restore power; replace bathroom flooring, plumbing fixtures and paint walls/ceiling; replace unreliable and leaking boiler in bunkhouse.	$150.0	**$77,412.6**	St. Marys	
Facilities	Western District DDC systems	All Direct Digital Control (Building Automation) systems require updating with new hardware and software, many components have failed and are obsolete.	$150.0	**$77,562.6**	Western District	
Facilities	19 mile Sheep creek loader shed bifold door upgrade	The bifolding doors on the loader shed are not ideal for the Valdez area they are hard to open in deep snow. Doors need to be replaced with an overhead door as it would be more suitable for this area and not have to be forced open.	$40.0	**$77,602.6**	Valdez	
Facilities	Tatitlek Airport heating system unit heater replacements	The unit heaters at the airport maintenance equipment building are very old an there fire boxes or flame pots have been patched in with tin in several spots that have either rusted or burned through	$35.0	**$77,637.6**

Highways - NR	Vegetation Control	Region-wide Vegetation Control	Perform vegetation control on roads throughout the Region to improve sight distance at curves and intersections, reduce shading, improve drainage, provide clear zones, and control snow drifting. Work will be performed in compliance with the Department's Integrated Vegetation Management Plan.	$750.0	**$67,400.0**	Region-Wide		1-A, 2-A, 3-B, 4-B, 5-C, 6-C, 9-E, 10-E, 32-P, 37-S, 39-T, 40-T
Highways - NR	Drainage	Region-wide Drainage Structure Repairs	Perform drainage structure repairs to include replacement of damaged or failing culverts or installation of new culverts to reduce operational maintenance costs.	$2,400.0	**$69,800.0**	Region-Wide		1-A, 2-A, 3-B, 4-B, 5-C, 6-C, 9-E, 10-E, 32-P, 37-S, 39-T, 40-T

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District
Highways - NR	Bridge	NR Bridge Maintenance	Bridge deck membrane repair, bridge rail repairs, pier debris removal, etc.	$250.0	**$70,050.0**	Region		1-A, 2-A, 3-B, 4-B, 5-C, 6-C, 9-E, 10-E, 32-P, 37-S, 39-T, 40-T
Highways - NR	Other	Wayside Maintenance	Wayside Maintenance responsibility is being assigned to DOT&PF with the implementation of PLO 5150. This project would support these additional responsibilities allowing for 1 year of maintenance and purchase of additional equipment necessary to perform this work.	$400.0	**$70,450.0**	Dalton		6-C
Highways - NR	Asphalt	Taylor Hwy 42 - 64	Repair 12 lane miles of road from MP42-64 on the Taylor Hwy. The current PM funding is inadequate to keep up with the deterioration of this section of highway.	$1,000.0	**$71,450.0**	Tok	Tok	6-C
Highways - NR	Asphalt	Elliott Hwy Resurface	Many sections settled from freeze thaw. A lot of industrial and commercial traffic use this road for Oil Field Support. Reclaim and repave various sections from MP 28-72.	$400.0	**$71,850.0**	Dalton	Livengood	6-C
Highways - NR	Asphalt	Repp Rd Resurface	Reclaim and Pave Repp Rd. Aged surface is past its useful life. Maintenance costs are rising with each passing year.	$2,000.0	**$73,850.0**	Fairbanks	North Pole	3-B
Highways - NR	Asphalt	Dalton Hwy Undulation repair	Many areas throughout this section have settled slowing traffic and creating hazardous conditions. MP 37-49	$300.0	**$74,150.0**	Dalton	7-mile	6-C
Highways - NR	Asphalt	Lignite Road Repairs and Chip Seal	Reclaim and apply new asphalt. Existing surface is past its useful life. This will help to reduce annual maintenance costs.	$500.0	**$74,650.0**	Denali	Healy	6-C
Highways - NR	Asphalt	Healy Road Repairs	Reclaim existing asphalt surface, reconstruct and widen shoulder for the purpose of improving pedestrian access and safety.	$1,000.0	**$75,650.0**	Denali	Healy	6-C
Highways - NR	Asphalt	Mission Road Resurface	Reclaim and Pave Mission Road. Road is well part its useful life and is in need of serious repairs.	$1,000.0	**$76,650.0**	Fairbanks	North Pole	3-B
Highways - NR	Asphalt	Brock Rd Resurface	Reclaim and Pave Brock Rd. Surface is failing due to age.	$1,500.0	**$78,150.0**	Fairbanks	North Pole	3-B

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District
Highways - NR	Asphalt	Ludecker Rd. Resurface	Reclaim and Pave. Existing chip seal is aged and breaking up.	$500.0	**$78,650.0**	Fairbanks	Fairbanks	5-C
Highways - NR	Asphalt	Old Richardson Hwy Chip Seal	Double Chip seal the Old Richardson Hwy from Stringer Rd to the end of maintenance area, approx. 9,800'. Increased traffic from residents has driven the maintenance costs up. Chipping the surface would eliminate the amount of maintenance currently required and reduce dust control problems.	$1,000.0	**$79,650.0**	Fairbanks	Fairbanks	3-B
Highways - NR	Asphalt	Old Badger Road Resurface	Reclaim and Pave . Existing chip seal is aged and breaking up.	$1,500.0	**$81,150.0**	Fairbanks	North Pole	2-A, 3-B
Highways - NR	Asphalt	Spinach Creek Rd Surface Rehab	Repair 5,500' of upper Spinach Creek Rd. The RAP and chip surface has failed. Maintenance costs for this section of road are high because of the almost constant attention needed.	$1,000.0	**$82,150.0**	Fairbanks	Fairbanks	5-C
Highways - NR	Asphalt	Fairbanks Bike Path Surface and Drainage Repairs	Seasonal movement has left many bike paths in the District in serious need of repair to ensure public safety. Drainage needs to be addressed in numerous locations to help stabilize the sub base as well as address ATV damage. Yearly request to be able to maintain at current LOS	$150.0	**$82,300.0**	Fairbanks	Fairbanks	1-A, 2-A, 3-B, 4-B, 5-C, 6-C
Highways - NR	Asphalt	Steese Hwy MP 44-52 Resurface	Reclaim and pave MP 44-52 of the Steese Highway. This short section of the Steese is High Float sandwiched between Asphalt sections. High Float is at the end of its life and in need of repair.	$3,500.0	**$85,800.0**	Fairbanks	Montana Creek	6-C
Highways - NR	Asphalt	Grenac Road Reclaim & Pave	Reclaim and Pave road surface. Bad road conditions due to years of deterioration as a result of Grenac being a low priority road.	$225.0	**$86,025.0**	Fairbanks	Fairbanks	4-B
Highways - NR	Asphalt	Munson Slough Rd Resurfacing	Reclaim & Double Chip. Bad road conditions are due to years of no maintenance with no funds to handle such low priority road.	$250.0	**$86,275.0**	Fairbanks	Birch Lake	6-C
Highways - NR	Asphalt	Lost Lake Rd Resurface	Reclaim and Pave Lost Lake Rd. Existing surface is RAP. Crews must expend large amounts of time to maintain this short section of road.	$350.0	**$86,625.0**	Fairbanks	Birch Lake	5-C

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District
Highways - NR	Asphalt	Balch Way Road Resurfacing	Reclaim and Double Chip. Bad road conditions are due to years of minimal maintenance as a result of minimal funding.	$250.0	**$86,875.0**	Fairbanks	Fairbanks	3-B
Highways - NR	Asphalt	Old Steele Creek Rd Spur. Chip seal.	Band & Chip Seal coat this road to extend it's life. Some ditch cleaning included.	$200.0	**$87,075.0**	Fairbanks	Fairbanks	4-B
Highways - NR	Asphalt	Tazlina District Asphalt Spot Repairs	Crack seal and band roads throughout the Tazlina District to extend the life of existing pavement and provide a safer driving surface.	$91.5	**$87,166.5**	Tazlina	Tazlina	6-C, 9-E
Highways - NR	Asphalt	Old Rich Hwy Bike Path Rehab	Mill and pave bicycle path. MP 101 - 104 .	$300.0	**$87,466.5**	Tazlina	Tazlina	6-C, 9-E
Highways - NR	Asphalt	Copper Center Bike Path Repairs	Patch failed asphalt surface and replace bridge railings on Copper Center bike path	$100.0	**$87,566.5**	Tazlina	Slana	6-C, 9-E
Highways - NR	Asphalt	Tok Local Roads Hi Float	Resurface and Hi Float high traffic local roads in Tok.	$500.0	**$88,066.5**	Tok	Tok	6-C
Highways - NR	Asphalt	Delta Junction Bike path pavement resurface	Resurface bike path. Path has broken pavement, undercut shoulders and breaks at several driveways.	$350.0	**$88,416.5**	Tok	Delta	9-E
Highways - NR	Asphalt	Mineral Creek Loop Rd.	Grind, Grade and Repave MP 0 - 1.8 Mineral Creek Loop Rd. And replace failing culverts	$3,000.0	**$91,416.5**	Valdez	Valdez	9-E
Highways - NR	Bridge	Dan Creek Bridge Repairs	Replace sub-deck and surface on Dan Creek Bridge	$350.0	**$91,766.5**	Dalton	Livengood	6-C
Highways - NR	Drainage	Old Edgerton Drainage Repairs	Drainage repairs. Clean ditches replace 6 damaged pipes. 0-11.8	$550.0	**$92,316.5**	Tazlina	Chitina	6-C
Highways - NR	Drainage	Tok District Culvert Maintenance	Clean out debris and repair minor damage to as many as 200 culverts throughout the Tok District. (primary use of the DM funding would be to rent and transport a backhoe capable of performing this work efficiently)	$350.0	**$92,666.5**	Tok		6-C, 9-E
Highways - NR	Drainage	Nome Highways Culvert Repairs	Replace bad Culverts along Nome highways as needed. 8-Teller Hwy culverts & 10-extension on Kougarok Hwy	$250.0	**$92,916.5**			
Highways - NR	Drainage	Circle Hot Springs Road Culvert Replacement	Replace 24" culverts along this section due to road settlement and damage.	$350.0	**$93,266.5**	Fairbanks	Central	1-A, 2-A, 3-B, 4-B, 5-C, 6-C
Highways - NR	Drainage	Denali Hwy Culvert Repair	Install and replace culverts at multiple locations from MP 60 to 135	$250.0	**$93,516.5**	Denali	Cantwell	6-C, 9-E

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District
Highways - NR	Drainage	Elliott Hwy Culvert Repair	Install and replace buried and failed culverts at multiple locations from MP 72 to MP 159 (Manley)	$500.0	**$94,016.5**	Dalton	Livengood	6-C
Highways - NR	Drainage	Dalton Highway Culverts Repair/Replacement	Repair or replace existing culverts that have failed or are damaged. MP 305-355	$350.0	**$94,366.5**	Dalton	Sag River	40-T
Highways - NR	Drainage	Dalton Highway Culvert Repair	Repair or replace existing culverts that have failed or are damaged. 100-156	$350.0	**$94,716.5**	Dalton	Jim River	6-C
Highways - NR	Drainage	Dalton Highway Culverts Repair/replacement	Repair or replace existing culverts that have failed or are damaged. MP 222-245	$350.0	**$95,066.5**	Dalton	Chandalar	40-T
Highways - NR	Drainage	Dalton Highway Culverts Repair/Replacement	Repair or replace existing culverts that have failed or are damaged. MP 156-175	$350.0	**$95,416.5**	Dalton	Jim River	6-C
Highways - NR	Drainage	Dalton Highway Culvert Repair	Repair or replace existing culverts that have failed or are damaged. MP 37-99.6	$350.0	**$95,766.5**	Dalton	Livengood	6-C
Highways - NR	Drainage	Dalton Hwy Drainage	Reestablish ditches and repair embankment failure caused by saturated ditch lines MP 110-112	$450.0	**$96,216.5**	Dalton	Coldfoot	40-T
Highways - NR	Drainage	Dalton Hwy Shoulder Repair	The shoulder is slipping away from the road. Benching the shoulder , filling and compacting will stabilize the embankment and prevent roadway driving surface failures. MP 37-38 Dalton Highway	$300.0	**$96,516.5**	Dalton	Jim River	6-C
Highways - NR	Drainage	Dalton Hwy Shoulder Repair	Repair shoulder separation and cracking MP 159-171	$800.0	**$97,316.5**	Dalton	Sag River	40-T
Highways - NR	Drainage	Dalton Highway Shoulder Repair	Repair shoulder separation and cracking MP 335-338	$220.0	**$97,536.5**	Dalton	Sag River	40-T
Highways - NR	Drainage	Dalton Highway Shoulder Repair	Repair shoulder separation and cracking MP 355-360	$260.0	**$97,796.5**	Dalton	Sag River	40-T
Highways - NR	Drainage	Denali Hwy Ditch Cleaning	Clean and reestablish drainage ditch on the Denali Hwy between MP 60-131	$250.0	**$98,046.5**	Denali	Cantwell	6-C, 9-E
Highways - NR	Drainage	Parks Hwy Ditch Cleaning	Clean ditches of winter sand. Rent an Excavator and small Dozer. Load our trucks. MP 183-187	$60.0	**$98,106.5**	Denali	Cantwell	4-B, 5-C, 6-C
Highways - NR	Drainage	Old Steese Hwy Culvert Replacement	Replace culverts as needed on the Old Steese Hwy. The road has settled so much that existing culverts are no longer useful. Needed to re-establish drainage.	$400.0	**$98,506.5**	Fairbanks	Fairbanks	4-B

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District
Highways - NR	Drainage	Elliott Hwy Ditch Leveling and Cleaning.	Need to clean and level ditches in various spots from MP 12 to 18 due to permafrost thaw causing standing water along road with no way to drain away from road embankment.	$125.0	**$98,631.5**	Fairbanks	Central	6-C
Highways - NR	Drainage	Steese Hwy Culvert Replacement	Replace cross culverts along this section due to road settlement and damage. MP 122 - 155	$350.0	**$98,981.5**	Fairbanks		1-A, 2-A, 3-B, 4-B, 5-C, 6-C
Highways - NR	Drainage	Steese Hwy Ditch & Culvert Cleaning	Due to years of manpower and equipment shortages and major fires that caused sediment to fill ditches along this section, major cleaning is need to keep the road from added washouts during spring run off. MP 122 - 149	$1,000.0	**$99,981.5**	Fairbanks	Central	6-C
Highways - NR	Drainage	Murphy Dome Rd. Ditch & Culvert Cleaning and Culvert Replacement	Reestablish ditches and clean undamaged culverts. Replace approximately 10 - 24" damaged culverts. MP 8.6 - 15.4	$350.0	**$100,331.5**	Fairbanks	Central	4-B
Highways - NR	Drainage	Circle Hot Springs Road Ditch & Culvert Cleaning	Clean and reestablish the ditches on the Circle Hot Springs Road in Central, now filling with sloughing mud due to fires in FY05. Erosion has caused silt to fill up the ditches and plug culverts. Includes culvert cleaning.	$450.0	**$100,781.5**	Fairbanks	Central	6-C
Highways - NR	Drainage	Chena Hot Springs Rd. Ditch & Culvert Cleaning and Leveling	6 to 25 MP. Due to frost thaw there is numerous sink holes and uneven ditches along this section requiring the need to reestablish proper drainage.	$250.0	**$101,031.5**	Fairbanks	Central	6-C
Highways - NR	Drainage	Fairbanks Area Culvert Replacement	Replace culverts on lower priority roads that have subsided and no longer pass water. Replacing these culverts will improve roadside drainage and will reduce maintenance by eliminating standing water adjacent to the roadway.	$1,200.0	**$102,231.5**	Fairbanks	Fairbanks	1-A, 2-A, 3-B, 4-B, 5-C, 6-C
Highways - NR	Drainage	Fairbanks Area Roads Culvert Marking	Replace/repair missing carsonite markers to aid in locating culverts for thawing or cleaning. Replace broken wood or metal markers due to safety concerns (for brush cutting).	$50.0	**$102,281.5**	Fairbanks	Fairbanks	1-A, 2-A, 3-B, 4-B, 5-C, 6-C

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District
Highways - NR	Drainage	McCarthy Road Drainage Improvements	Purchase and install culverts, clean and establish ditches along the McCarthy road to give needed drainage to help preserve the road surfacing that was recently applied while we still have the environmental permits in place.	$350.0	**$102,631.5**	Tazlina	Paxson	6-C, 9-E
Highways - NR	Drainage	Nabesna Road Ditch Cleaning	Clean and reestablish ditches along Nabesna Road, from MP 6-28	$300.0	**$102,931.5**	Tazlina	Slana	6-C
Highways - NR	Drainage	Tok District Culvert Repair	Replace damaged culverts at various locations throughout the Tok District. These are shallow, small diameter culverts that will be replaced by State workers. Primary use of the Deferred Maint funding would be to rent an excavator. Hi-Float will be applied for the finished surface at these culvert installation sites.	$350.0	**$103,281.5**	Tok		6-C, 9-E
Highways - NR	Drainage	Dayville Road	Remove large boulders that require breaking and clean up ditch line.	$50.0	**$103,331.5**	Valdez	Valdez	9-E
Highways - NR	Drainage	Abercrombie Creek Bridge #1204	Excavate under bridge and reestablish channel flow	$750.0	**$104,081.5**	Valdez	Valdez	
Highways - NR	Drainage	Western District Subsidence Damage to Shoulder & In slope Repair	Repair shoulder subsidence, and provide fill, after acquiring necessary environmental permits, from MP 0 - 1 , Kougarok Road	$200.0	**$104,281.5**	Western	Nome	39-T
Highways - NR	Gravel Surface	Teller Highway Improvements	Replace 2 culverts & raise grade on road for ice & flooding problems. Resurface with modified C-1 MP 16.5-19	$350.0	**$104,631.5**	Western	Nome	39-T
Highways - NR	Gravel Surface	Dalton Hwy Frost heave repair	Remove and replace poor embankment material and create road embankment drainage to eliminate these hazardous areas. MP 110-112	$500.0	**$105,131.5**	Dalton	Jim River	6-C
Highways - NR	Gravel Surface	Lignite Road surface	Hilltop needs extensive surface repair	$200.0	**$105,331.5**	Denali	Healy	6-C
Highways - NR	Gravel Surface	Fairbanks Creek Resurface (mining road)	Reshape and put a 2" minus cover coat on road. Install culverts as needed. This road is a low priority so little to no maintenance has led to falling into poor conditions.	$750.0	**$106,081.5**	Fairbanks	Fairbanks	6-C
Highways - NR	Gravel Surface	Kennicott Road Crushed Gravel surface	Place crushed Gravel surface on newly constructed Road Base.	$275.0	**$106,356.5**	Tazlina	Chitina	6-C, 9-E
Highways - NR	Gravel Surface	Old Edgerton MP 0-11.6 gravel resurface	Replace missing/deteriorated crushed gravel surface on 0-11.6 mile Old Edgerton Hwy	$500.0	**$106,856.5**	Tazlina	Chitina	6-C, 9-E

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District
Highways - NR	Gravel Surface	Brenwick Craig Rd Gravel resurface	Haul and place gravel surface on the Brenwick Craig road MP 1-6 for improved grade ability and an improved driving surface.	$60.0	**$106,916.5**	Tazlina	Tazlina	39-T, 6-C
Highways - NR	Gravel Surface	Kougarok Road Improvements	Construct 4 parking area turnouts for vehicles to park off of main highway for safety of public & for snow removal. MP 3-13	$250.0	**$107,166.5**	Western	Nome	39-T
Highways - NR	Gravel Surface	Glacier Creek Road, MP 8.5-17	Glacier Creek Road has become a four-wheel drive trail during rainy conditions. Increased mining and exploration activity beyond Rock Creek Mine at MP 8.3 has accelerated the deterioration of the road. Numerous locations along the road have tundra pushing through because of poor drainage and the heavier traffic.	$500.0	**$107,666.5**	Western	Nome	39-T
Highways - NR	Guardrail	Region-Wide Guardrail Repair	Re-stock and replace damaged guardrail throughout the region.	$1,000.0	**$108,666.5**	Region		1-A, 2-A, 3-B, 4-B, 5-C, 6-C, 9-E, 10-E, 32-P, 37-S, 39-T, 40-T
Highways - NR	Other	Fuel Storage Tank and Pump system Upgrades	Replace aging fuel storage tank and pump systems within Northern Region	$300.0	**$108,966.5**	Region-Wide		37-S, 39-T, 40-T
Highways - NR	Other	Tok District Sand Sheds	This project would provide sand storage sheds for Delta and Northway Maintenance Stations.	$1,500.0	**$110,466.5**	Tok		6-C, 9-E
Highways - NR	Other	Side walk Replacement on Lake Ave.	Replace detreating sidewalks on Lake Ave in Cordova and bring them in to ADA compliance.	$2,000.0	**$112,466.5**	Valdez	Cordova	32-P
Highways - NR	Other	Whitshed Rd. Sloughing Investigate	Investigate and decide appropriate engineered fix for sloughing problem at 2.9 and 3.2 mile Whitshed Rd. in Cordova	$250.0	**$112,716.5**	Valdez	Cordova	32-P
Highways - NR	Other	Peger Rd. Privacy/ Sound Fence Repair	Peger Rd Privacy fence is in need of maintenance due to many years in service and no maintenance efforts. Vehicle strikes and vandalization have left the facility in disrepair.	$1,000.0	**$113,716.5**	Fairbanks	Fairbanks	1-A, 5-C
Highways - NR	Other	Richardson Hwy Fence Repair	Repair fence along the Richardson Hwy between Eielson AFB and Fairbanks. Fence in various stages of disrepair due to years of inattention.	$100.0	**$113,816.5**	Fairbanks	Fairbanks	1-A, 2-A,5-C

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District
Highways - NR	Other	Fairbanks Area Core Roads Curb/ Gutter Repair and Drop Inlet Repair	Replace broken drop inlets, repair damage to bull nose/curb areas on Airport Way/Access, University Ave, Mitchell Expressway, Steese Expressway, College Rd, Peger Rd & Geist etc. (Class 1-2 Routes)	$350.0	**$114,166.5**	Fairbanks	Fairbanks	1-A, 2-A,5-C
Highways - NR	Other	Fence Repair Mitchell Exp.	Fence post along this section have jacked out of the ground and the fence is falling over. Need to reestablish fence to keep access control	$200.0	**$114,366.5**	Fairbanks	Fairbanks	1-A, 2-A,5-C
Highways - NR	Other	Klutina River Boat Launch Access Improvements	This project would provide for various improvements to the existing boat launch facility on the Klutina River. At high flows the existing boat launch can be difficult to utilize due to the rapid current. This project would improve the launching ramp, protect the riverbank, and create a dead water zone to improve boat launching capabilities. This project was required by the Copper River consent decree.	$100.0	**$114,466.5**	Tazlina		6-C, 9-E
Highways - NR	Other	Taylow Highway -Unstable Slopes	This project would survey and record the unstable slopes on the Taylor Hwy from MP 67 to 160. Scouring or other mitigation would occur at a later date.	$250.0	**$114,716.5**	Tok	Eagle	6-C
Highways - NR	Signs	Fairbanks Area Sign Replacement	Replace local road signs in the District to maintain standard compliance.	$250.0	**$114,966.5**	Fairbanks	Fairbanks	1-A, 2-A, 3-B, 4-B, 5-C, 6-C
Highways - NR	Signs	Dalton Hwy Signage	Repair/replace existing signs, delineators and culvert markers. MP 37- 99.6	$250.0	**$115,216.5**	Dalton	7-mile	6-C
Highways - NR	Asphalt	Fish Creek / Fairbanks Creek Road Resurface	Reclaim and Pave Fish Creek / Fairbanks Creek. Road is well part its useful life and is in need of serious repairs.	$1,000.0	**$116,216.5**	Fairbanks	Fairbanks	
Highways - NR	Gravel Resurface / Drainage	Fairbanks Creek Road Resurface	Replace damaged drainage structures and resurface gravel portion of Fairbanks Creek Road. Road is well part its useful life and is in need of serious repairs.	$1,500.0	**$117,716.5**	Fairbanks	Fairbanks	
Highways - NR	Access Control Fence Repairs	District Wide	Repair damaged access control fencing throughout the District	$500.0	**$118,216.5**	Fairbanks	District Wide	

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District
Highways - NR	Guardrail / Glare Barrier Repairs	Steese Highway	Repair damaged guardrail and glare barrier along Steese Highway from MP 2 -5 (Farmer's Loop Road to Chena Hot springs Road)	$750.0	**$118,966.5**	Fairbanks	Fairbanks	
Highways - NR	Vegetation Control	District-wide Vegetation Control	Perform vegetation control on roads throughout the District to improve sight distance at curves and intersections, reduce shading, improve drainage, provide clear zones, and control snow drifting. Work will be performed in compliance with the Department's Integrated Vegetation Management Plan.	$500.0	**$119,466.5**	Fairbanks	District Wide	
Highways - NR	Other	District Sand Sheds	This project would provide sand storage sheds for the Birch Lake & Montana Creek Maintenance Stations.	$750.0	**$120,216.5**	Fairbanks	Birch Lake & Montana Creek	
Highways - NR	Drainage	Fairbanks Area Curb & Gutter Repair	Perform concrete repairs to damaged curb & gutter structures to restore proper drainage	$500.0	**$120,716.5**	Fairbanks	District Wide	
Highways - NR	ASPHALT	Coldfoot banding a crack seal	Band and crack seal MP 175-189	$200.0	**$120,916.5**	Dalton	Coldfoot	40-T
Highways - NR	Signs	Mileposts	R&R missing or damaged milepost signs in the district	$200.0	**$121,116.5**	Dalton		40-T, 6-C
Highways - NR	Asphalt	Denali District Asphalt Repairs	Crack seal and band roads throughout the Denali District to extend the life of existing pavement and provide a safer driving surface.	$200.0	**$121,316.5**	Denali	Healy	
Highways - NR	Vegetation Management	Parks 325 - 344 Vegetation Management	Remove brush in the hills, over guardrail and steep slopes to improve sight distance at curves and reduce shading.	$250.0	**$121,566.5**	Denali	Nenana	
Highways - NR	Gravel Surface	Kantishna Slope Stabilization	Reconstruct the embankment within the failed slope area using a reinforced soil slope.	$750.0	**$122,316.5**	Denali	Kantisha	
Highways - NR	Other	Denali District Sand Sheds	This project would provide sand storage sheds for Nenana, Healy and Cantwell Maintenance Stations.	$3,000.0	**$125,316.5**	Denali		
Highways - NR	Other	Long Lake Embankment stabilization	Sliding embankment along McCarthy Road at MP 46. A "burrito" wrap design will aid in stabilizing similar to other sections of this roadway	$400.0	**$125,716.5**	Tazlina	Chitina	
Highways - NR	Drainage	McCarthy Road MP 47.9 Culvert	A culvert at milepost 47.9 is too short and causing sloughing of the roadway embankment. Culvert is too damaged to allow for extensions and will require a full replacement.	$1,000.0	**$126,716.5**	Tazlina	Chitina	

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District
Highways - NR	Surfacing	Tofty Road Surfacing and Drainage	Improve drainage through ditching, culvert installation and install surfacing on the Tofty Road	$500.0	**$127,216.5**	Dalton	Manley	
Highways - NR	Other	Tanana River Boat Launch and Parking Improvements	Erosion is causing damage to the boat launch and the parking availability. New parking access route and retrofits to the	$250.0	**$127,466.5**	Dalton	Manley	
Highways - NR	Vegetation Control	McCarthy Rd. Vegetation control	Perform vegetation control on entire 60 mile McCarthy road corridor	$100.0	**$127,566.5**	Tazlina	Chitina	
Highways - NR	Drainage	Glenn Hwy culvert replacement	Replace failing 36" culvert at 60 foot fill at mile 139.2. Replace failing 6' culvert at 30 foot fill at mile 154. Replace failing 36" culvert at 20 foot fill at mile 179.	$700.0	**$128,266.5**	Tazlina	Nelchina	
Highways - NR	Asphalt	Delta Local Rds	Resurface and Hi Float high traffic local roads in Delta	$500.0	**$128,766.5**	Tok	Delta	
Highways - NR	Asphalt	Tanana Loop	Resurface Tanana Loop Road with HMA	$500.0	**$129,266.5**	Tok	Delta	
Highways - NR	Bank Stabilization	Dayville RD. MP 5	Stabilize Bank due to sluffing to protect RD. Way from failure	$1,100.0	**$130,366.5**	Valdez	Valdez	9-E
			TOTAL	**$130,366.5**				

Allocation	Activity	Project Title	Project Description	Est Prj. Cost	Cumulative Total	District	Location (City)	House District

			TOTAL	**$41,135.0**				

Allocation	Project Title	Project Description	Est Prj. Cost	Cumulative Total	Location (City)	House District
Harbors	Tenakee Springs SBH breakwaters	Deferred maintenance, rehabilitation, and replacement required to replace two breakwater. The city owns the harbor facility the state owns the breakwaters. The breakwaters are failing full replacement is needed, this is an extreme liability for the estate if these large breakwaters completely fail they more than likely will crash into the harbor facility destroying the city docks and private boats that are moored in the harbor. Funding is needed to design, remove, and replace the floating breakwaters. After replacement transfer to the city is a possibility.	$15,000.0	**$15,000.0**	Tenakee Springs - Chigikof Island	2A
Harbors	M&O Harbor Maintenance	This would allow for harbor repairs scoping and required short term maintenance of harbor facilities to keep them in a safe operational condition.	$150.0	**$15,150.0**	Statewide	1A,2A,6C
Harbors	Hyder Inner Float & SPB	Dredge harbor and area around the Seaplane float . Construct a new rubble mound breakwater extension to replace the failing timber log floating breakwater. Replacement and refurbishment of the docks. This harbor goes dry on low tide and strands boats on the bottom.	$8,500.0	**$23,650.0**	Hyder - Ketchikan area	1A
Harbors	Port Protection Refuge Float, Tidal Grid, SPB	Needs refuge dock replacement, new ADA gangway grid replacement and sea plane dock replacement. This facility is heavily used by the community and commercial fisheries. The dock is sinking and only has a few inches of freeboard. If its not replaced we will need to find $500K to remove the float or recover form the bottom of the ocean.	$3,000.0	**$26,650.0**	Port Protection - Prince of Wales Island	2A
Harbors	Entrance Island Refuge Float	Remove Float or Replacement this float is used by commercial fisheries and people navigating the inside passage as spot to get out of bad weather or to take a break on their journey through southeast. The removal cost is estimated at $500K replacement cost is estimated at $2M.	$2,000.0	**$28,650.0**	Hobart Bay - Petersburg area	2A

Allocation	Project Title	Project Description	Est Prj. Cost	Cumulative Total	Location (City)	House District
Harbors	Funter Bay Cannery Float & SPB	Replacement of dock and seaplane float a new ADA gangway is needed. If this is not replaced we will need $500K to remove or salvage form the bottom of the ocean.	$2,000.0	**$30,650.0**	Juneau area - Admiralty Island	2A
Harbors	Papke's Landing Float	Float deferred maintenance, repairs, and replacement. Has broken stringers and is missing floatation. Needs a new ADA gangway.	$1,243.1	**$31,893.1**	Petersburg area	2A
Harbors	Elfin Cove Inner Float	Float deferred maintenance, repairs, and replacement. Needs a new ADA gangway.	$2,384.8	**$34,277.9**	Elfin Cove - Chigikof Island	2A
Harbors	Kupreanof Float	The community replaced the outer float in 2018 using a USDA RAC grant. Additional repairs are still needed. Dock repairs, and replacement. Needs a new ADA gangway. This dock is used by cruise ship passengers for excursions in Kupreanof.	$1,243.1	**$35,521.0**	Petersburg area	2A
Harbors	Halibut Cove Refuge Float	Float deferred maintenance & repairs. Needs a new ADA gangway.	$1,757.1	**$37,278.1**	Halibut Cove - Kachemak Bay	6C
Harbors	Funter Bay Refuge Float	Replacement is needed for this refuge float. The float is deteriorating. This is a location that is used a lot by people traveling southeast as a safe haven to get out of the weather.	$2,000.0	**$39,278.1**	Juneau area - Admiralty Island	2A
Harbors	Hollis Float & SPB	Float deferred maintenance, repairs, and replacement. Needs a new ADA gangway.	$1,276.5	**$40,554.6**	Hollis - Prince of Wales Island	2A
Harbors	Helm Bay Refuge Float	Remove Float	$500.0	**$41,054.6**	Helm Bay - Ketchikan area	2A

Allocation	Project Title	Project Description	Est Prj. Cost	Cumulative Total	Location (City)	House District
Harbors	Point Baker Refuge Float & SPB	In spring of 2017, community completed a $250K DCCED grant for float deferred maintenance. Remove existing grid. Needs a new ADA gangway.	$1,778.5	**$42,833.1**	Point Baker - Prince of Wales Island	2A
Harbors	Ninilchik Small Boat Harbor	Float deferred maintenance & repairs. Future need is to dredge inner harbor.	$500.0	**$43,333.1**	Ninilchik - Kenai area	6C
		TOTAL	**$43,333.1**			

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
AMHS - Aurora	Lifeboats and Davits Removal	Remove existing lifeboats and davits and replace with Fast Rescue Boats. Mirroring the installation on LeConte.	$750.0	**$750.0**	Aurora	Statewide
AMHS - Columbia	Deck Mooring Machinery and Arrangements	Install Panama chocks and stand-alone capstans for mooring operations on the foredeck so as not to use the existing horizontal capstans on the windlass. Install powered capstans at the spring line tie-up stations.	$1,500.0	**$2,250.0**	Columbia	Statewide
AMHS - Columbia	Stateroom and Forward Lounge Windows	At least 9 staterooms, and 3 lounge windows, and 12 Boat Deck windows need to be reset/resealed to recapture watertight integrity and prevent further leak damage.	$75.0	**$2,325.0**	Columbia	Statewide
AMHS - Columbia	Fixed Fire Fighting System	The fixed fire fighting system on COL is obsolete and it is becoming difficult to find replacement parts. The old CO2 extinguishing agent can be upgraded to something safer and more compact, such as FM200.	$500.0	**$2,825.0**	Columbia	Statewide
AMHS- Hubbard	Void 4 Access	Adding a watertight door from the forward side of the EOS and required lighting and fire protections in order to access void 4 from the hold deck level to increase usable storage capacity and improve safety since the only current access is from the car deck, hatch, and vertical ladder.	$250.0	**$3,075.0**	Hubbard	Statewide
AMHS - Hubbard	Mezzanine Addition to Car deck	Add mezzanine level to the car deck in order to provide storage space. Modifications to the deluge system will be required.	$125.0	**$3,200.0**	Hubbard	Statewide
AMHS - Hubbard	Window/doors/staterooms	Replace failing window and exterior doors. Also, modify office space neat the Purser's Office to create 2 additional crew staterooms.	$250.0	**$3,450.0**	Hubbard	Statewide
AMHS - Kennicott	Mechanical and Electrical Systems/Piping/ Fuel Oil Transfer Pump	In the original Wartsila design, there should be an auto pump out system, where fuel is pumped back to the settler tank.	$30.0	**$3,480.0**	Kennicott	Statewide
AMHS - Kennicott	Deck Sockets	Add 7 flush deck cloverleaf sockets to aft car deck to provide safe vehicle tie down locations in inclement weather.	$65.0	**$3,545.0**	Kennicott	Statewide
AMHS - LeConte	Bow Mooring Protection Box	Design and install a line handler protection box similar to the Aurora	$5.0	**$3,550.0**	LeConte	Statewide
AMHS - LeConte	Upgrade steering system	Upgrade the steering system including steering stand on the bridge. All inclusive package from Pacific Radar is desired. Same as the upgrade on Tustumena.	$300.0	**$3,850.0**	LeConte	Statewide

Allocation	Project Title	Project Description	Project Cost	Running Total	Location (City)	House District
AMHS - Lituya	Main Engine and Propulsion/Controls/Main Engine Monitoring/Main deck, 57, Starboard	Upgrade to the vessel IMACS computer through Prime Mover Controls (PMC). Also provide an additional display on the engineer's computer which is located in the Engineers Workshop. Currently this monitoring system is only on the bridge.	$10.0	**$3,860.0**	Lituya	Statewide
AMHS - Lituya	Main Switchboard	Upgrade main switchboard.	$200.0	**$4,060.0**	Lituya	Statewide
AMHS - Tazlina	Sea Chest Duplex Strainers	Replace single strainers with duplex strainers that will allow servicing of one side while the other continues to operate. Both sea suction supplies must be open in order to feed the ME SW cooling system and the Fire Main/Accommodation Space Sprinkler Systems during simultaneous operation.	$75.0	**$4,135.0**	Tazlina	Statewide
AMHS - Tustumena	Steering System Alarm and Control Upgrades	Upgrade the existing Steering Gear Alarm Panel and Controls with a modern reliable system. Parts are scarce as Matthews Marine, the OEM, no longer supports it.	$250.0	**$4,385.0**	Tustumena	Statewide
AMHS - Tustumena	Overhaul Accommodation Ladder Support Pins	Disassemble port and starboard ladder rotation pins and supports. Renew hardware with stainless, shim to even fore and aft, prime and paint.	$50.0	**$4,435.0**	Tustumena	Statewide
		TOTAL	**$4,435.0**			

Department of Family & Community Services FY26 Facilities Deferred Maintenance List

Facility	Maintenance Requirement	Priority Value	Estimated Cost
Alaska Veterans & Pioneer Home	Fire Door Replacement	26.71	$ 131.6
Johnson Youth Facility - Admin, Annex, Probation and Detention Unit	Walkway Covering & Sidewalk Replacement	18.91	$ 1,032.1
Alaska Veterans & Pioneer Home	Emergency Generator Replacement	18.7	$ 1,042.0
Fairbanks Youth Facility	Generator Replacement	17.93	$ 795.6
Johnson Youth Facility - Admin, Annex, Probation and Detention Unit	Underground Fuel Storage Tank Replacement	13.5	$ 744.3
Alaska Veterans & Pioneer Home	Heating & Ventilation Balancing Verification	13.35	$ 86.0
Alaska Veterans & Pioneer Home	DDC System Replacement	13.35	$ 652.9
Fairbanks Youth Facility	Server Room Emergency Circuits	12.55	$ 78.3
Sitka Pioneer Home - Main Facility	Elevator Modernization	11.74	$ 1,414.6
Johnson Youth Facility - Admin, Annex, Probation and Detention Unit	Fuel Monitoring System Replacement	9.68	$ 34.3
Johnson Youth Facility - Admin, Annex, Probation and Detention Unit	Asphalt Repairs, Sealcoating & Striping	9.68	$ 63.1

		TOTAL	**$ 55,426.3**

Alaska Court System - Deferred Maintenance Projects List FY27 - FY31

Priority	Court Dist.	Location	Project	Project Cost
1	3	Snowden Admin-istration Building	**Replace Exterior Envelope:** Windows in this facility are beginning to leak and allow water into the building causing the frames to rot resulting in additional water damage throughout the facility. Additionally, there are areas of the facility that continue to leak that are not related to the roof and will eventually need to be addressed. Further, the front of the facility has tile work and some artwork that is at risk of complete failure. An initial investigation was started to determine the level of rot occurring behind the envelope but was stopped when it was determined that the testing could be destructive and there wasn't sufficient funding to make the necessary repairs. This project replaces a former project that only included the front of the facility for the facade repairs. For FY26, funding in the amount of $1.5 million was received from the Statewide Governor's Deferred Maintenance fund. The funding requested by the court system is needed to for project completion.	1,000.0
2	3	Anchorage Boney Parking Garage	**Parking Garage Repairs:** The parking garage has experienced concrete spalling, with debris falling onto vehicles. This project will remove damaged concrete, repair and reinforce affected areas, and apply protective coatings to prevent future deterioration, ensuring improved safety for all users. This project is already designed and was bid, but was placed on hold due to insufficient funding.	1,500.0
3	3	Snowden Admin-istration Building	**Elevator Upgrade:** Complete full upgrade to elevators in the facility to modernize and extend useful life. Parts are becoming obsolete and will soon be unavailable, risking complete shutdown.	200.0
4	3	Anchorage Boney Courthouse	**5th Floor / Basement Heating Upgrades Phase 2:** This Phase 2 project addresses existing ducting and heating issues on the 5th floor and basement. Repairs aim to correct airflow problems, inconsistent heating, and duct noise, improving comfort, efficiency, and overall performance of the facility's HVAC system. Additional issues were identified during design, that were not originally in scope but need to be addressed to complete the project.	1,000.0
5	3	Anchorage Boney Courthouse Parking Garage	**Gate Control Replacement:** The Boney Courthouse Parking Garage is in need of a gate control replacement. This will also include the parking gate at the Boney Courthouse lot. The gate has failed and repeated attempts to repair it have been unsuccessful. The parts associated with the gate are no longer in production and there isn't an Alaska-based vendor to provide maintenance. The gate routinely fails in the open position, which allows members of the public to transit into the garage and does not provide adequate security for this staff parking lot.	450.0
6	3	Seward Courthouse	**Courtroom Upgrades:** The Seward Courthouse recently had a clerk's office renovation, which improved and modernized the security and function of the court. The courtroom has both security and deferred maintenance items that still need to be addressed. Presently there is asbestos tile in the courtroom which causes difficulty with creating the audio recording due to sound implications. Additionally, the door hardware, lighting, benches, paint, and windows need to be reviewed, replaced, or repaired. This project is requested in conjunction with a security upgrade for the judge's bench.	350.0

Alaska Court System - Deferred Maintenance Projects List FY27 - FY31

Priority	Court Dist.	Location	Project	Project Cost
7	3	Anchorage Boney Courthouse	**Electrical Upgrades**: According to a 2022 inspection, the electrical systems at the Boney Courthouse are at risk of failure. The systems are original to the building and are past their useful life. This request includes the main distribution switchboard, the distribution equipment (panelboards, transformers, feeders), emergency lighting upgrades, and exit sign upgrades. Funding requested for FY28 is for phase one of a two phase project with phase two funding requested in FY29.	5,800.0
8	3	Palmer Courthouse	**Mechanical Upgrades:** This project involves a comprehensive mechanical system upgrade, including the installation of three new water heaters, replacement of the air conditioning system, and upgrades to various VAV units and other mechanical components. The work will improve system efficiency, reliability, and occupant comfort throughout the facility.	1,500.0
9	4	Rabinowitz Courthouse	**Replace Exterior Concrete:** Replace deteriorated concrete and sealant at front plaza entry. Concrete that presented the most tripping hazards was replaced during FY19. The existing concrete has radiant heating which increases the project costs.	250.0
10	3	Anchorage Nesbett Courthouse	**Replace Deteriorating Countertops:** The existing countertops in the basement (2 each) and 1st floor (4 each) staff restrooms are badly stained and have damaged/lifting laminate, causing water to seep underneath the laminate and damage wood. Funding requested includes a 15% contingency.	25.0
11	3	Snowden Administration Building	**Replace Old Warehouse Lighting:** Retrofit old, inefficient and no longer manufactured T-12 light fixtures with LED compatible light fixtures in the warehouse.	25.0
12	3	444 H Street	**Replace Old Lighting:** Replace old, inefficient lamps with LEDs and retrofit other fixtures as needed.	50.0
13	3	Snowden Admin-istration Building	**Code Required Structural Upgrades at the Warehouse:** Provide new structural support to comply with current seismic code at the warehouse exterior walls. This project cost was updated to reflect current project costs.	150.0
14	3	Snowden Admin-istration Building	**Warehouse Roof Replacement:** Repair and replace the 40-year-old roof on the Snowden Warehouse.	75.0
15	3	Anchorage Nesbett Courthouse	**Update Building Controls:** Replace the pneumatic controls in the Nesbett Courthouse with modern, reliable powered actuators.	450.0
16	3	Kenai Courthouse	**Replace Fire Panel:** Replace aging fire panel and all related components.	65.0
17	3	Kenai Courthouse	**Parking Lot Upgrades:** Judicial Services has reported issues with vehicle access to the facility due to the layout of the landscape. This request would remove existing landscape to make access to the facility easier without damaging vehicles and/or existing landscape.	75.0
18	3	Snowden Admin-istration Building	**Bathroom Renovations:** All bathrooms in the Snowden Administration Building require upgrades including replacement of sinks and fixtures, replacement of toilets, replacement of countertops, replacement of flooring/tile, and painting/patching.	225.0
19	3	Anchorage Nesbett Courthouse	**Bathroom Renovations:** All bathrooms in the Nesbett Courthouse require upgrades including replacement of sinks and fixtures, replacement of toilets, replacement of countertops, replacement of flooring/tile, and painting/patching.	1,250.0

Alaska Court System - Deferred Maintenance Projects List FY27 - FY31

Priority	Court Dist.	Location	Project	Project Cost
20	3	Anchorage Boney Courthouse	**LED Lighting Upgrade:** This project will install LED lighting in the Supreme Court courtroom, 5th floor, and basement. Courtroom installation is more complex due to high ceilings and aesthetic requirements. The upgrade will improve energy efficiency, reduce maintenance, and enhance lighting quality.	1,000.0
21	3	Anchorage Nesbett Courthouse	**Replace Sidewalk Heating Coils:** Replace sidewalk heating coils at the Nesbett Courthouse to assist with snow/ice mitigation in the winter months.	200.0
22	3	444 H Street	**Miscellaneous Mechanical Upgrades:** Replace boiler that is reaching the end of its useful life as well as replace roof top units. Installation of VAV's for all offices will assist with energy consumption and staff's ability to control temperatures within their office spaces.	225.0
23	3	Anchorage Nesbett Courthouse	**Miscellaneous Mechanical Upgrades:** Replace glycol and axiom tanks with plastic rather than galvanized materials; install new heat exchangers in all air handling units with closed glycol loops; retrofit remaining actuators to electronic, and install new expansion tank bladders.	350.0
24	3	Anchorage Nesbett Courthouse	**Breaker Panel Upgrade**: Install new main breaker, 2500amp.	35.0
25	3	Anchorage Nesbett Courthouse	**Key Standardization:** Standardize key matrix to Medico.	100.0
26	4	Rabinowitz Courthouse	**Miscellaneous Interior Upgrades:** Replace all countertops within the courthouse. Existing countertops have delaminated and the trim has suffered water damage. Paint all common area interior spaces to include hallways, lobbies, and general use employee areas. Update finishes on artwork installations to include restaining and protection for specific art pieces from artists who are no longer living.	300.0
27	3	Kodiak Court & Office Building	**Replace Siding and Windows:** Complete replacement of siding and windows in the Kodiak Courthouse. The current siding is faded and will begin to allow water intrusion in the future. The windows are double pane and have significant moisture between panes and is allowing heat to seep from the facility during the winter months. Installation of new windows will improve energy efficiency.	550.0
28	3	Kodiak Court & Office Building	**Miscellaneous Interior Upgrades:** The facility is in need of painting in all common areas, replacement of stair treads, and replacement of interior fixtures such as door hardware, signage, etc.	150.0
29	3	444 H Street	**Bathroom Renovations:** All bathrooms in 444 H Street require upgrades including replacement of sinks and fixtures, replacement of toilets, replacement of countertops, replacement of flooring/tile, and painting/patching.	35.0
30	3	444 H Street	**Elevator Upgrade:** Complete full upgrade to elevators in the facility to modernize and extend useful life.	90.0
31	3	Kodiak Court & Office Building	**Controls Upgrade:** Install direct digital controls, which would allow for setbacks to be done on evenings and weekends. This upgrade could save energy and reduce heating costs, as well as provide better ability to control the heating and cooling systems thereby increasing occupant comfort.	250.0
32	3	Kodiak Court & Office Building	**Upgrade Ventilation System:** Many office areas lack sufficient ventilation for occupant comfort. This upgrade would revamp the existing system to provide additional cooling to office areas.	250.0

Alaska Court System - Deferred Maintenance Projects List FY27 - FY31

Priority	Court Dist.	Location	Project	Project Cost
33	3	Anchorage Nesbett Courthouse	**Jury Deliberation Room Renovations:** Refresh all jury assembly rooms in the Nesbett Courthouse. Work will include: replacement of cabinetry, sink, and counter, painting, replacement of damaged carpet, replacement of tables as needed, and refresh electrical to allow for new technology for evidence management review.	550.0
34	3	444 H Street	**Upgrade Awning:** Upgrade awning on three sides of the facility. The current awning allows for snow and ice to build up which then becomes a safety hazard for cars and pedestrians.	75.0
			Total All Projects	**$18,600.0**

Anchorage Campus	Cuddy Hall Renewal	The Lucy Cuddy Hall, constructed in the 70's, supports UAA's culinary arts program, providing workforce development for Alaska's hospitality and tourism industries. With a backlog of over $9 million, the condition of the underlying building infrastructure is unable to accept modern equipment leading to the University having to decline valuable equipment donations. This investment looks to improve safety, operational reliability, promote program excellence, and unlock private investment in the culinary arts program.	$ 3,000.0	**$ 3,000.0**	$ 3,000.0	**$ 3,000.0**	Anchorage	19-J
Troth Yeddha' Campus	Critical Roof Replacement for UA Museum of the North East Wing	The University of Alaska Museum of the North is a cornerstone of Alaska's tourism economy, a leader in statewide K–12 educational outreach, and a nationally recognized institution housing more than 2.5 million artifacts and specimens that represent millennia of cultural heritage and biological diversity in the North. This facility is not only vital to Alaska's identity, culture, history, and educational missions, but it is also irreplaceable. Protecting the UA Museum of the North is a matter of urgent statewide and national importance. Immediate funding is essential to safeguard this vital facility and the invaluable collections it was built to protect. In 2022, a roof membrane failure in a critical section of the building exposing both public exhibits and protected collections to water intrusion. Despite temporary patches, an in-depth investigation revealed that the underlying roof substrate is rotten throughout due to deteriorating snow guards and vapor barriers. Water continues to actively pool beneath the membrane, requiring continuous mitigation efforts to prevent internal damage. Ice from freezing rain in 2024 and 2025 caused additional snow guard damage, leading to emergency repairs of the roof membrane to prevent water infiltration into the building. This is a critical failure. Without immediate replacement of the roof membrane and substrate, the risk of catastrophic damage to Alaska's most valuable museum collections—including one-of-a-kind cultural objects, scientific specimens, and archival materials—will escalate. Protecting the UA Museum of the North is a matter of urgent statewide and national importance. Immediate funding is essential to safeguard this vital facility and the invaluable collections it was built to protect. Further delays not only threaten the integrity of these priceless resources but also increase future repair costs exponentially.	$ 3,100.0	**$ 6,100.0**	$ 3,100.0	**$ 6,100.0**	Fairbanks	35-R
Ketchikan Campus	Ziegler Building Air Handling Unit & HVAC Controls Upgrade	The Air Handling Unit (AHU) in the Ziegler Building has been rebuilt and repowered several times and has reached the end of its useful life. The Building Automation System Software (BASS) for the Paul and Ziegler buildings is an old version that the manufacturer no longer supports. This project will replace the AHU with a modern unit that is more reliable and upgrade the BASS to the latest version, which will require an upgrade to the BAS server and some of the BAS sensors. This new BASS system will also help improve the operating efficiency of the heating and ventilation systems. The Ziegler Building houses classrooms, administrative offices, and the library. Building and safety codes would require the campus to close without a functioning ventilation system.	$ 200.0	**$ 6,300.0**	$ 200.0	**$ 6,300.0**	Ketchikan	1-A
Anchorage Campus	Campus IT Renewal	The University's IT infrastructure faces a deferred maintenance backlog exceeding $4 million, primarily due to aging network switches that are critical to campus connectivity and digital learning. These outdated systems limit bandwidth, reliability, and security, directly impacting the University's ability to support hybrid and remote education, operate modern facilities, and adapt to evolving student expectations. To address this, buildings will be prioritized in the following order: Administration Building, Professional Studies Building, Consortium Library, Social Sciences Building, Fine Arts Building, Gordon Hartlieb Hall, and Lucy Cuddy Hall. Investing in network upgrades is essential to avoid costly outages, ensure compliance, and maintain the scalability and resilience needed to deliver high-quality, flexible academic experiences in a digital-first environment.	$ 1,000.0	**$ 7,300.0**	$ 1,000.0	**$ 7,300.0**	Anchorage	19-J
Troth Yeddha' Campus	Critical Roof Replacement and Northside Apartment Blocks Accessibility for Cutler Housing Complex	UAF's largest and most heavily used student apartments on the Troth Yeddha' Campus. These apartments are in urgent need of repairs to maintain full utilization of the apartments. Without investment, UAF will lose the most popular housing units and dramatically decrease housing capacity, resulting in an immediate deterrent for enrolling more students and attracting out-of-state students to Alaska. Supporting this funding demonstrates a commitment to enrollment strategies at UAF, student success and retention, fiscal stewardship, and helps UAF meet modern student expectations for high-demand on-campus housing. Well beyond its expected lifespan, years of deterioration, roof failures, and temporary repairs have continued, causing active water leaks, structural damage, and mold growth. Students have been displaced mid-semester, and entire apartments in the 100-block have been shut down to maintain safe and comfortable conditions. All of this occurs while UAF's housing inventory is at full capacity, and closing apartments results in losing students. Recent inspections confirmed that two other remaining blocks are beyond repair, with widespread rot and ceiling failures. This project will remove failed systems, abate structural damage, and rebuild with modern insulation (a vapor barrier and a long-term, warrantied roof), delivering a durable, cost-effective solution that protects public assets and ensures student safety and continuity in their living arrangements. The FY27 request is for Cutler Apartments 200 block, where the roof is the next most critical one in need of immediate repair. In addition, blocks 400–600 are heavily used year-round, but the supporting site infrastructure—retaining walls, sidewalks, stairways, and lighting—has significantly deteriorated and no longer meets safety or accessibility standards. The existing retaining walls are structurally compromised, creating unstable conditions for pedestrians. Pathways have heaved, cracked, or eroded, making them hazardous, especially during the winter months. Students can currently only access the affected apartment blocks from a single direction, limiting mobility and posing challenges for individuals with disabilities, families with strollers, and emergency responders. This portion of the project will reconstruct and realign sidewalks, replace failed retaining walls, install new stairways and accessible ramps, and upgrade lighting for visibility and security. The improvements will ensure full Americans with Disabilities Act (ADA) compliance and restore safe, year-round access to student housing. These upgrades are essential to student well-being, retention, and equitable access to campus housing.	$ 4,160.0	**$ 11,460.0**	$ 4,160.0	**$ 11,460.0**	Fairbanks	35-R
Juneau Campus	Replace / Repair Salt Water Intake Pipes	The Anderson seawater system withdrew water from Auke Bay thru two 6" diameter high-density polyethylene (HDPE) pipes. These pipes were installed in the early 80's using concrete collar anchors set on the sea floor. Since that time the seabed elevation has raised a little more than a foot due to glacial rebound. Glacial rebound, high water flows and Auke Creek meandering have eroded the base from 100 feet of the intake pipes. These pipes will break under the strain if not addressed quickly. This project will repair or replace these intake pipes. Marine Biology Students rely on this seawater system for their studies and research of the local marine environment. Failure to properly maintain this seawater system will force existing students to transfer to a university with a functional seawater system and deter new students from enrolling in the University of Alaska.	$ 370.0	**$ 11,830.0**	$ 370.0	**$ 11,830.0**	Juneau	4-B

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Anchorage Campus	Exterior Safe Access and Circulation Improvements	The University of Alaska Anchorage (UAA) faces critical infrastructure challenges across its extensive network of asphalt roads, parking lots, and multi-use trails, with many areas suffering from severe cracking, potholes, erosion, and base failure due to freeze/thaw cycles and heavy traffic. Current maintenance practices, including crack sealing and cold patching, are insufficient to address the scale of deterioration, and the limited FY24 budget of $25,000 was quickly exhausted. Key pedestrian and vehicle routes—such as West Campus Drive, the Eugene Short Lot, and the Goose Lake Trail—pose increasing safety risks to students, staff, and community members, especially given UAA's role in hosting high-profile events and providing vital trail connectivity within the UMED District. A comprehensive and prioritized remediation plan is urgently needed to ensure long-term safety, accessibility, and sustainability of campus infrastructure.	$ 4,000.0	**$ 15,830.0**	$ 4,000.0	**$ 15,830.0**	Anchorage	19-J
Troth Yeddha' Campus	Irving 1 Elevator Repair and Code Compliance	Installed in 1965, the elevator serving key programs in veterinary medicine, biology, and wildlife sciences, and Toolik Lake Field Station logistics has never been modernized. The unit relies on an obsolete motor-generator system to supply DC power, controlled by an antiquated relay-based logic system that no longer meets code or functional expectations. Recently, the UAF Fire Marshal cited the elevator for a lack of integration with the building's fire alarm system, which prevents the elevator from operating properly in the event of an emergency. This is a life safety concern. Additional deficiencies include a non-compliant pit ladder and stop switch, and a lighting switch located only in the remote machine room, further complicating safe maintenance and operation. This modernization project will bring the elevator into full code compliance and ensure safe, reliable service to critical academic and research spaces. Upgrades will include: •New machine with energy-efficient 3-phase AC motor •Digital variable-frequency drive (VFD) controller •New door operators for car and lobby doors •Replacement governor, ropes, and fire service features •Refurbished elevator car finishes, lighting, and control panels with connectivity to the fire alarm system for proper recall •Code-compliant pit access and lighting improvements The elevator is a critical component of building infrastructure, enabling the safe and reliable movement of people, equipment, and research materials in a facility central to multiple science and field logistics programs. Without repairs and modernization, occupants face increased risks to health and safety, including potential entrapments, delays in emergency response, and barriers to accessibility for individuals with disabilities. Modernization is not only essential for life safety and compliance with ADA standards, but also for sustaining research continuity and ensuring the welfare of all building users.	$ 1,000.0	**$ 16,830.0**	$ 1,000.0	**$ 16,830.0**	Fairbanks	35-R
Ketchikan Campus	Deck Mansards Replacement Phase II	The Paul Building has a Mansard type roof system that was constructed using a cement-bonded siding material. This material has proven to be unable to withstand the frequent precipitation experienced in Ketchikan and is now falling apart. This project will replace the siding/roofing material with a Bermuda metal material that is more resistant to constant rain. Students are protected from the harsh Southeast Alaska climate by the building envelope, including this roofing system. The modern university student has hundreds of institutions to choose from. They are more likely to select a university that looks new with well-maintained buildings. This project had to be cut into two phases because bids came in double the engineer's estimate, and UAS could only fund half of the project.	$ 300.0	**$ 17,130.0**	$ 300.0	**$ 17,130.0**	Ketchikan	1-A
Anchorage Campus	Social Sciences Building & Student Union Energy Performance Upgrades	The Social Sciences Building (SSB), constructed in the 1970s, plays a vital role in supporting the University's academic mission. In collaboration with the Library, SSB functions as an Academic Learning Hub and houses the College of Arts and Sciences (CAS), which is central to the first- and second-year student experience. The building currently carries a deferred maintenance backlog of $26.5 million, underscoring the need for targeted infrastructure renewal. This project will prioritize repairs to the hydronic heating systems, which are essential for maintaining consistent and efficient building temperatures throughout the academic year. Additionally, the scope includes the replacement of pneumatic controls with Direct Digital Controls (DDC) to modernize building automation and improve operational reliability. It is also worth noting that SSB houses the University's IT data center, which supports not only the Anchorage campus but also the broader network of community campuses, making infrastructure reliability in this facility critical to institutional operations. The Student Union (SU), constructed in the 1970s, serves as the heart of the Anchorage Campus—a central hub for gathering and a primary interface between academics, student life, and campus visitors. The building currently carries a deferred maintenance backlog of $17.7 million, reflecting the urgent need for infrastructure renewal. This project will prioritize the replacement of the central air handling unit systems, which are essential for maintaining a safe, healthy, and energy-efficient environment. Additionally, the scope includes addressing under-slab infrastructure that is beginning to fail, ensuring the long-term reliability of critical building systems. By focusing on these foundational upgrades, the project aims to preserve the integrity of the facility while enhancing its role as a vibrant and welcoming space for the campus community.	$ 2,800.0	**$ 19,930.0**	$ 2,800.0	**$ 19,930.0**	Anchorage	19-J

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Troth Yeddha' Campus	Modernizing Engineering Labs: Duckering Life Safety and Material Lab Enhancements	UAF is committed to providing a safe and supportive environment for all Nanook students. UAF continuously works to maintain healthy, code-compliant facilities and reduce risks to students, faculty, and researchers. However, the aging campus infrastructure requires targeted investments to eliminate safety hazards, ensure regulatory compliance, and protect the university's mission-critical teaching and research programs. Duckering Building, a core academic and research facility for the College of Engineering and Mines, presents two critical challenges directly impacting safe student learning environments and delaying high-priority research related to Alaska's infrastructure and natural resource development. A recent Phase I fire alarm upgrade in Duckering revealed widespread code compliance issues related to the building's fire/smoke dampers and fire-rated doors. A temporary mitigation plan is currently in place, but long-term correction is urgently needed to ensure proper fire separation between floors and corridors. •Replacement of outdated or non-functional fire/smoke dampers and associated controllers •Installation of up to 20 new fire-rated doors where existing doors can no longer be repaired •Upgrades to maintain compliance with life safety and fire protection codes Without these improvements, the building remains vulnerable to uncontrolled fire spread and continued citations, and it risks limiting access to labs and classrooms. The Duckering Materials Lab, used for civil and geological engineering instruction, is undersized, lacks proper ventilation, and does not meet ADA accessibility standards. The lab also serves research programs used for processing materials for further analysis in other laboratories. Safety concerns include insufficient respiratory protection and excessive noise levels from soil and concrete testing equipment. This project will: •Connect and reconfigure two adjacent labs to separate incompatible activities (e.g., soil testing vs. concrete mixing) •Install dedicated supply and exhaust ventilation to meet lab safety and air quality standards •Relocate high-noise equipment (dust collector, sieve shakers) to a separate enclosure for acoustic control •Provide ADA-compliant access and accommodations for all lab users These improvements are critical to delivering a safe and fully functional learning and discovery environment for engineering students and maintaining UAF's reputation for producing workforce-ready graduates.	$ 3,025.0	**$ 22,955.0**	$ 3,025.0	**$ 22,955.0**	Fairbanks	35-R
Sitka Campus	HVAC Controls Replacement	The HVAC control systems throughout the Sitka hangar building are old pneumatic style that gives the operator limited options to control the system. This project will replace all the nematic controls with digital controls. This will allow the implementation of building HVAC control strategies that will help save money on utility costs. This project will increase the comfort of students using the facility and lower operating costs for the University.	$ 290.0	**$ 23,245.0**	$ 290.0	**$ 23,245.0**	Sitka	2-A
Anchorage Campus	Creek Bridge Building Envelope Renewal	The Creek Bridge is a critical piece of campus infrastructure that provides year-round, interior access via an enclosed walkway spanning Chanshtnu (Chester) Creek. It serves as a vital connection between East and West Campus, supporting daily movement for students, faculty, staff, and visitors—particularly those with mobility challenges. This project seeks to replace the aging roof and window systems, both of which are significantly deteriorated. The roof suffers from persistent leaks and is well beyond its useful life, while the single-pane windows are outdated, energy inefficient, and no longer meet current building standards. Renewing this facility will enhance accessibility, improve energy performance, and ensure the bridge remains a safe, reliable, and welcoming passageway for the entire campus community.	$ 1,500.0	**$ 24,745.0**	$ 1,500.0	**$ 24,745.0**	Anchorage	19-J
Troth Yeddha' Campus	Enhance Student Access and Privacy - Student Health and Counseling Center Renewal Phase 2	The UAF Student Health and Counseling Center serves as the university's on-campus first-care facility, providing accessible, low-cost medical and mental health services to all UAF students. The center plays a vital role in supporting student wellness, retention, and academic success by offering care ranging from preventive services to urgent medical needs. Originally constructed in the early 1970s, the clinic has not undergone a major renovation since its initial construction. During disease outbreaks and pandemics, longstanding infrastructure limitations—such as inadequate patient separation, poor treatment room accessibility, and insufficient protections for healthcare staff—became critical operational barriers. In response, UAF completed an initial phase of improvements using federal funds to address immediate needs related to patient separation and infection control. The next phase of construction is essential to align the facility with modern healthcare design and regulatory standards. Planned upgrades include improved ventilation systems to enhance air quality and reduce airborne infection risk; installation of cleanable, durable interior finishes suitable for medical environments; enhanced lighting and layout improvements for clinical efficiency and patient safety; and renovation of restrooms to meet ADA accessibility standards. The deferred maintenance backlog for this space will be addressed, replacing plumbing, electrical, and finish systems that are well beyond their useful life. These upgrades are necessary to support the continued safe operation of the clinic, ensure regulatory compliance, and improve the quality of care available to UAF's student population. By modernizing the facility, UAF strengthens its ability to recruit and retain students who expect accessible, high-quality health and counseling services as part of their campus experience. Without these improvements, UAF risks diminished student satisfaction, higher attrition during medical or mental health crises, and reduced competitiveness compared to peer institutions that offer more comprehensive health facilities, directly impacting student retention and graduation rates.	$ 3,000.0	**$ 27,745.0**	$ 3,000.0	**$ 27,745.0**	Fairbanks	35-R
Juneau Campus	Replace Housing-RecCenter Trail Lighting	The existing lighting of the pedestrian pathway that runs between the recreation center and housing does not meet current design standards and has light poles separated by several hundred feet, leaving dark spots along the pathway. This project will replace the lighting to match other campus pathway lighting where poles are shorter, closer together with better illumination at grade level, improving facial recognition. Students are safer walking around campus during Alaska's dark winter months with code-compliant lighting systems. Students who feel safe on campus are more likely to return next year and continue to graduation.	$ 440.0	**$ 28,185.0**	$ 440.0	**$ 28,185.0**	Juneau	4-B

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Anchorage Campus	Campus Safety and Security	This project represents a campus-wide investment in safety and security, recognizing the unique challenges faced by the University of Alaska Anchorage (UAA) due to its location within the University Medical District. The Anchorage Campus is surrounded by a diverse mix of institutions—including three medical facilities (including psychiatric and crisis treatment centers), the largest juvenile justice treatment center in Alaska, a private university, federal government offices, and multiple K–12 schools. These neighboring facilities and the populations they serve require UAA to maintain elevated security measures and responsive safety protocols. This project represents a campus-wide investment in safety and security, recognizing the unique challenges faced by UAA. To meet these demands, this project will enhance access control and door security systems across campus. These upgrades will support compliance with the Clery Act, promote a safer campus environment, and minimize risk for students, faculty, staff, and visitors.	$ 500.0	**$ 28,685.0**	$ 500.0	**$ 28,685.0**	Anchorage	19-J
Troth Yeddha' Campus	Fine Arts Complex Fire Alarm Replacement for End of Life	The Fine Arts Complex is a central hub of the Troth Yeddha' Campus, housing five academic buildings that support key degree programs and host community events. Nearly every student takes at least one class in the complex and routinely accesses essential services such as the library, advising, tutoring, and career services. The fire alarm system provides critical smoke detection and occupant notification, ensuring the timely evacuation of a complex that spans nearly 300,000 square feet of occupied space over 3 acres of campus. The current system is beyond its useful life, with replacement components no longer manufactured, leaving the facility vulnerable to system failure. Without a reliable alarm system, the ability to detect and respond to fire or smoke events is compromised, placing the health, safety, and welfare of thousands of building occupants at risk. A failure of the panel or associated devices would trigger an immediate building closure under fire code, disrupting essential academic, research, and administrative functions. Replacement of the system is therefore not only a life-safety imperative but also essential to maintaining continuous operations and safeguarding institutional resilience.	$ 3,465.0	**$ 32,150.0**	$ 3,465.0	**$ 32,150.0**	Fairbanks	35-R
Ketchikan Campus	Maritime Center Heating System Backup	The Maritime Center currently has no backup heating system. This project will install an electric boiler as a backup to the existing oil boiler. This will reduce the risk of having to shut down the campus during the failure of the main boiler. It will also reduce the monthly utility costs by providing building managers the option of switching between electric and oil, depending on which is the least expensive that month. The Maritime Center houses all of the maritime and building trades courses. When the heating system goes down in the winter, the building has to be closed and classes canceled.	$ 310.0	**$ 32,460.0**	$ 310.0	**$ 32,460.0**	Ketchikan	1-A
Systemwide Services	Butrovich Building Repair	The Butrovich facility is a critical infrastructure facility for the University of Alaska, the State of Alaska, the west coast of British Columbia, and the U.S. In addition to housing UA's administrative offices, many state and federal agencies also rely on the data flowing through the Butrovich data center for critical monitoring of earthquakes, tsunamis, volcanic eruptions and ash warnings, and wildfires. The State of Alaska Division of Homeland Security and Emergency Management's mitigation plan explicitly relies on the data coming from many of these agencies. The Butrovich building was constructed in 1988 and is at a point where many of its building components are reaching their life cycle end. Over the next five to ten years, many of the main mechanical systems will come due for replacement/refurbishing. This project will evaluate/repair the most urgent facility components.	$ 300.0	**$ 32,760.0**	$ 300.0	**$ 32,760.0**	Fairbanks	35-R
Kodiak College	Kodiak College Campus Renewal	Kodiak College (KOC) facilities, constructed in the 1970s and 1980s, face an immediate deferred maintenance backlog of nearly $1.9 million. Many of the building systems no longer meet current standards, and critical infrastructure is approaching the end of its useful life. This project will prioritize the renewal of the Campus Center roof, a key component in preserving the integrity of the facility. The aging roof system contributes to increased maintenance demands and energy inefficiencies, and its replacement is essential to extending the building's lifespan and reducing long-term operating costs. By addressing this foundational need, the project supports a safer, more reliable learning environment for students and ensures that Kodiak College remains a sustainable and resilient part of the University of Alaska system.	$ 951.4	**$ 33,711.4**	$ 951.4	**$ 33,711.4**	Kodiak	5-C
University of Alaska Fairbanks Co	CTC Aviation Maintenance Training Facility Welding and Paint Booth Replacement for Code and Capacity	The UAF Community and Technical College Aviation Maintenance Program is highly successful, with a 100% job placement rate for graduates seeking employment. In response to a growing regional and statewide shortage of FAA-certified airframe and power plant technicians, the program aims to double its student capacity to meet workforce demand. While most instruction occurs at the UAF CTC Aviation Training Facility, key components, specifically painting and welding, are currently taught offsite in non-code-compliant space at the Hutchinson high school building. This arrangement is not sustainable; it increases travel time, limits instructional efficiency, and requires multiple lab sessions to accommodate the full student cohort. A recent design study confirmed that a paint and welding booth can be constructed within the aviation hangar in space left unfinished during the original 2012 renovations. The proposed facility will meet all current code requirements and be appropriately sized to support concurrent lab instruction for up to half the student cohort, significantly improving instructional delivery and supporting program expansion.	$ 2,000.0	**$ 35,711.4**	$ 2,000.0	**$ 35,711.4**	Fairbanks	35-R
Juneau Campus	Install Pedestrian Lighting to Recreation Center	The Auke Lake Way sidewalk does not currently have dedicated illumination; just limited spillover light from the Auke Lake Way street light poles. This project will install pedestrian lighting along the sidewalk to the Recreation Center that matches other campus pathway lighting, where poles are shorter, closer together, with better illumination at grade level, improving facial recognition. Students are safer walking around campus during Alaska's dark winter months with code-compliant lighting systems. Students who feel safe on campus are more likely to return next year and continue to graduation.	$ 110.0	**$ 35,821.4**	$ 110.0	**$ 35,821.4**	Juneau	4-B

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Prince William Sound College	Prince William Sound College Campus Renewal	Prince William Sound College (PWSC) primary facilities, constructed in the 1970s, face an immediate deferred maintenance backlog of $5 million and require strategic reinvestment to ensure continued safe and effective operations. This project will prioritize upgrades to the fire alarm systems and hydronic heating infrastructure, both of which are essential to maintaining a safe, comfortable, and code-compliant learning environment. Reliable fire alarm systems are critical for life safety and emergency response, while efficient hydronic heating is necessary to support year-round operations in Alaska's climate. In addition to the main academic facility, PWSC benefits from residence halls located three blocks south of the campus. Enhancing these systems will improve safety, energy efficiency, and comfort for both academic and residential spaces, reinforcing PWSC's role as a secure and accessible institution for students and the broader campus community.	$ 475.7	**$ 36,297.1**	$ 475.7	**$ 36,297.1**	Valdez	29-O
Troth Yeddha' Campus	Salisbury ADA, Code, and Seismic Upgrades and Compliance	Salisbury Theater is the only performance facility in Interior Alaska capable of supporting UAF's broad academic programs and community outreach activities in the arts, music, and theater. It also plays a vital role in the university's emerging journalism and video production program, which intersects with high-impact initiatives like the OneHealth research program. During a recent fire inspection, multiple life-safety deficiencies were identified, leading the local fire marshal to temporarily close the facility. Emergency code corrections at the stage level were completed in summer 2022, allowing for conditional reopening. However, to remain open, several larger remaining compliance issues must be resolved immediately under the fire marshal's conditional approval. The next phase of renewal and corrective work includes seismic restraint upgrades, ADA accessibility improvements at the stage level, and proper fire separation between the stage and adjacent storage areas. Completion of this project is essential to maintain student access to arts instruction, fulfill degree requirements, and support UAF's cultural, community, academic, and research missions.	$ 3,200.0	**$ 39,497.1**	$ 3,200.0	**$ 39,497.1**	Fairbanks	35-R
Sitka Campus	Replace Windows	Windows in the Sitka building are old technology using aluminum frames with little insulation value. This project will replace the outdated windows with new triple-pane, low-E windows with a high insulation factor. This project will increase the comfort of students using the facility and lower operating costs for the University.	$ 320.0	**$ 39,817.1**	$ 320.0	**$ 39,817.1**	Sitka	2-A
Kenai Peninsula College	Kenai Peninsula College (Kenai Campus) Renewal	The Kenai River Campus (KPC) includes four buildings constructed between 1971 and 1983, each built with varying methods, materials, and systems. These differences contribute to inconsistent building performance and maintenance challenges across the campus. With an immediate deferred maintenance backlog of $3.4 million, strategic reinvestment is essential to preserve facility integrity and ensure operational efficiency. This project will prioritize the renewal of air handling systems and supporting infrastructure, which are critical to maintaining healthy indoor air quality, thermal comfort, and energy efficiency. Aging mechanical systems are increasingly difficult to maintain and no longer meet current performance standards, making their replacement vital to extending the useful life of campus facilities and reducing long-term operating costs. By focusing on these core systems, the project supports a safer, more reliable, and sustainable learning environment for students, faculty, and staff.	$ 1,293.2	**$ 41,110.3**	$ 1,293.2	**$ 41,110.3**	Soldotna	7-D
Troth Yeddha' Campus	Critical Laboratory Ventilation Upgrades in Reichardt and BiRD Buildings	Lab ventilation is required to maintain a specific amount of exhaust air to protect lab users from hazardous chemicals. Many of the lab controllers, built by Phoenix Controls, have reached the end of their useful life and are no longer supported by Phoenix; they must be replaced to keep the air in labs free of hazardous fumes. The majority of these failing valves affect classroom laboratories where students are actively utilizing chemicals. Without the air valve, the required supply and exhaust air cannot be exchanged in the spaces, and the teaching labs will be closed, losing the capacity to teach critical core degree required science programs, affecting nearly half the UAF student enrollment.	$ 1,250.0	**$ 42,360.3**	$ 1,250.0	**$ 42,360.3**	Fairbanks	35-R
Juneau Campus	Housing Apartments Fuel Tank Replacement	Housing Apartment Unit fuel tanks are 35 years old, have reached the end of their useful life, and need to be replaced before they start leaking. This project will replace the 9 existing fuel tanks with new double-walled tanks with leak detection monitoring systems. Failure to replace these tanks before they start leaking could result in significant environmental and reputational damage that could deter students from enrolling in the Alaska University system.	$ 850.0	**$ 43,210.3**	$ 850.0	**$ 43,210.3**	Juneau	4-B
Kenai Peninsula College	Kenai Peninsula College (Homer Campus) Renewal	The Kachemak Bay Campus (KBC) includes two primary facilities: Pioneer Hall, constructed in the 1970s and expanded in 2005, and Bayview Hall, built in 2010. Pioneer Hall, the older of the two, faces an immediate deferred maintenance backlog of $1M and requires targeted reinvestment to maintain its functionality and efficiency. This project will prioritize upgrades to the hydronic heating systems in Pioneer Hall, which are essential for maintaining consistent indoor comfort and energy efficiency in Alaska's climate. Aging mechanical systems are increasingly difficult to maintain and no longer meet current performance standards, making their renewal critical to extending the building's useful life and reducing operational costs. By focusing on this core infrastructure, the project supports a safe, reliable, and sustainable learning environment for students, faculty, and staff.	$ 431.1	**$ 43,641.4**	$ 431.1	**$ 43,641.4**	Homer	6-C
Troth Yeddha' Campus	Bunnell (College of Business) Renewal to support Student Access and Safety	At 70 years old, the Bunnell Building, which has served students for nearly two-thirds of the university's history, remains a heavily used academic facility, serving as home to the College of Business and Security Management, UAF eLearning, and Nanook Technology Services. The building's ground-level corridors are a central circulation route for students, faculty, and staff, but are significantly outdated and present multiple code deficiencies that limit UAF's ability to modernize the space. The upcoming code corrections project will address these deficiencies and improve life safety conditions. Planned work includes replacing aging corridor doors, ceilings, and lighting; upgrading electrical and IT systems; abating asbestos; and bringing corridor walls into compliance with fire separation requirements. In addition, both north stair towers will be reconfigured to exit directly outdoors—resolving current life-safety violations where the stairs discharge into a non-compliant corridor. These improvements are essential to support safe building occupancy, protect high-impact academic and administrative functions, and ensure continued student access to critical services.	$ 2,275.0	**$ 45,916.4**	$ 2,275.0	**$ 45,916.4**	Fairbanks	35-R

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Sitka Campus	Campus Emergency Power	Sitka Campus does not currently have a backup generator for power failure. The campus houses important research material in deep freezers; a prolonged power failure could cause irreplaceable damage to research materials. Student instruction and employee work cannot proceed during a power outage. During the COVID-19 pandemic, UAS relocated their -80 Degree freezer to the Sitka fire hall because they had back-up power allowing it to be used for storage services for the Pfizer Vaccine. This project will install an emergency generator that can accommodate campus operations during a power outage, thus protecting the research materials and improving the resiliency of the UAS Sitka campus while providing improved support and services during an emergency. Student enrollment and retention is directly influenced by the reliability of University facilities.	$ 650.0	**$ 46,566.4**	$ 650.0	**$ 46,566.4**	Sitka	2-A
Matanuska-Susitna College	Mat-Su College Campus Renewal	The Matanuska-Susitna College (MSC) campus includes facilities constructed throughout the 1970s, 1980s, and 1990s, and currently faces an immediate deferred maintenance backlog of $3.2 million. While the campus is well maintained, several building systems and components have exceeded their useful life and require reinvestment to ensure continued reliability and performance. This project will prioritize the renewal of air handling systems and supporting infrastructure, which are essential for maintaining healthy indoor air quality, thermal comfort, and energy efficiency across campus. Aging mechanical systems present increasing challenges to maintenance and no longer meet current standards for performance or sustainability. Investing in these core systems will help extend the life of campus facilities, reduce operating costs, and support a safe, comfortable, and resilient learning environment for students, faculty, and staff.	$ 1,248.6	**$ 47,815.0**	$ 1,248.6	**$ 47,815.0**	Palmer	25-M
Troth Yeddha' Campus	Matanuska Experiment Farm and Extension Center (MEFEC) Public Water System Installation	The Matanuska Experiment Farm and Extension Center (MEFEC) is currently served by an aging private water system that does not meet the water quality standards required for a public water system, nor does it provide adequate fire flow to support the campus's fire sprinkler and suppression systems. The current system consists of a well, a water holding reservoir, and a diesel-powered fire pump, all of which were recently found to be significantly deteriorated during inspection. As MEFEC prepares for a period of renewed campus development and expanded research activities, increased demand will be placed on this insufficient and failing system. To ensure long-term reliability, safety, and regulatory compliance, this project will extend the public water utility from its current terminus at Woodworth Loop to the MEFEC campus, connecting near the existing water reservoir. The project scope includes the installation of hydrants in accordance with applicable codes and regulations and the construction of a bypass loop to maintain continuous flow and prevent freezing during winter months. This investment will enhance fire protection, improve water quality, and support the continued growth of MEFEC's academic, research, and outreach mission. The new water system will also improve the fire suppression capacity on campus, reducing the facilities' risk profile substantially.	$ 2,500.0	**$ 50,315.0**	$ 2,500.0	**$ 50,315.0**	Palmer	25-M
Juneau Campus	Banfield Hall Replace Roofing System	The roofing system on Banfield Hall is 27 years old, is starting to fail, and is almost a decade past its warranty period. The roofing inspector in 2023 recommended replacement of this roof in the next 3-5 years. This project will install a new asphalt shingle roofing system with an expected 30-50 year lifespan. Banfield Hall provides housing for students attending the University. Juneau apartment rental market lacks sufficient facilities and without campus housing many students would not be able to attend the University.	$ 860.0	**$ 51,175.0**	$ 860.0	**$ 51,175.0**	Juneau	4-B
Troth Yeddha' Campus	Atkinson Infrastructure Resiliency & Emergency Systems Modernization	UAF faces a critical challenge in maintaining uninterrupted power and heat—especially during extreme winter conditions, when failure could pose serious risks to safety, research, and campus operations. UAF has no external steam source and must rely on self-generated utilities from the Atkinson cogeneration plant. Maintaining backup power to operate auxiliary boilers in the Atkinson Building is essential to ensuring heat supply and the continued delivery of steam and power across campus. This infrastructure renewal project will address failing systems in the Atkinson, Central Chiller, and Diesel Engine Emergency Generator Buildings, all of which contain aging and increasingly unreliable utility components. Key work includes: •Replacement of steam valves and piping between high-pressure boilers to allow for independent operation during planned or emergency shutdowns •Replacement of an outdated emergency generator with a more efficient and reliable model to support essential utility systems during unplanned outages •Installation of a new battery backup system to ensure continuity of operations and controls during power transitions •Repairs and replacements to central cooling systems, including the chiller and cooling tower, to preserve the chilled water supply serving 15 major buildings and reduce electrical load and costs across campus These critical repairs are vital to sustaining utility services across UAF's Troth Yeddha' campus and ensuring energy reliability, particularly during Alaska's harsh winter months. Without this investment, UAF will experience system failures, costly emergency response, and serious disruption to campus operations, research, and instruction.	$ 3,825.0	**$ 55,000.0**	$ 3,825.0	**$ 55,000.0**	Fairbanks	35-R
Kuskokwim Campus	Maggie Lind and Voc-Ed Building Restroom, Electrical, and Fire Alarm Renewal and Modernization	The UAF Kuskokwim Campus is a critical educational hub for Southwest Alaska, delivering certificates, degrees, and community outreach programs to a broad and remote region. With an average building age exceeding 35 years, many core systems—such as fire alarms, electrical panels, and lighting—have reached or surpassed the end of their useful life. At the same time, high operating costs, particularly for electrical power, strain the campus's ability to focus resources on instruction and student support. A series of infrastructure renewal projects will improve life safety, energy efficiency, and facility reliability, allowing the campus to operate more sustainably while keeping funding focused on its academic mission. Across all campus buildings, interior and exterior lighting will be converted to high-efficiency LED systems, and thermal envelope improvements will include new doors and windows in several facilities. Heating, ventilation, and air conditioning (HVAC) systems in the main academic building and cultural center will be upgraded with improved controls to enhance efficiency and occupant comfort. In the Maggie Lind/Vocational Education Building, targeted code and electrical system upgrades will address critical deficiencies: •Fire alarm panels and detectors, now obsolete and unsupported by the manufacturer, will be replaced to maintain occupancy and life safety compliance. •The main electrical distribution center will be relocated and replaced to correct clearance violations and reduce energy loss. •The main restroom will be renovated with modern finishes and upgraded to meet ADA accessibility standards.	$ 2,000.0	**$ 57,000.0**	$ 2,000.0	**$ 57,000.0**	Bethel	38-S

Troth Yeddha' Campus	Kodiak Seafood and Marine Science Center Energy Reduction: Lab and Exterior Envelope Renewal	The Kodiak Seafood and Marine Science Center is a critical statewide resource for marine research, fisheries development, and workforce training. It provides expertise to local, state, and federal agencies, and partners closely with Alaska's fishing industry to support one of the state's most important economic sectors. The facility is currently heated with expensive fuel oil, placing a significant burden on its operating budget and limiting funds available for research and academic programming. This project will reduce utility costs and improve working conditions through targeted building system upgrades. •The existing ventilation system will be replaced with a modern system that adjusts air supply based on occupancy and lab activity, greatly improving energy efficiency. Additionally, windows and siding on the ocean-facing side of the building will be replaced to reduce energy loss and prevent air infiltration in one of Alaska's harshest coastal environments. •These upgrades will improve indoor air quality, enhance energy performance, and ensure a safer, more reliable lab environment for researchers and students working in support of Alaska's marine industries.	$ 3,000.0	**$ 60,000.0**	$ 3,000.0	**$ 60,000.0**	Kodiak	5-C

(Formatted to Thousands)

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Juneau Campus	Anderson, Clarence L. Building	Aging windows are inefficient, and difficult to open and close. Replacing windows will reduce heating costs through more efficient design, and by making windows easier to close and latch. Some windows are also showing a metallic colored patina.	$ 1,040.0	**$ 1,040.0**	$ 1,040.0	**$ 1,040.0**	Juneau	4-B
Juneau Campus	Anderson, Clarence L. Building	This project will replace an old multimode fiber comm cable that runs to the Anderson building with a new high speed single mode cable. The existing cable runs in an old water line inside the Glacier Highway. The new line will use the same waterline conduit.	$ 30.0	**$ 1,070.0**	$ 30.0	**$ 1,070.0**	Juneau	4-B
Juneau Campus	Banfield, Mildred H. Hall	Banfield Hall is a student residence hall and does not have any back-up power. If Juneau had an extended power outage, the building would go cold and could not be used. In addition, sprinkler system could be triggered due to low pressure from air compressor not running.	$ 370.0	**$ 1,440.0**	$ 370.0	**$ 1,440.0**	Juneau	4-B
Juneau Campus	Banfield, Mildred H. Hall	Lights in the corridors are dim and to not create an inviting atmosphere. This project will replace the existing lights with LED lights that are more energy efficient with a lighting design more appropriate for a residence hall	$ 720.0	**$ 2,160.0**	$ 720.0	**$ 2,160.0**	Juneau	4-B
Juneau Campus	Banfield, Mildred H. Hall	The Elevator in Banfield hall was installed in 1996 and the oil pump unit was replaced in 2016? However, the elevator control unit is no longer being serviced by the vendor and we would have no way to repair it if it should fail. Also, the smoke closures are of an old style that is no longer recommended. This project will replace the controls and smoke closures.	$ 220.0	**$ 2,380.0**	$ 220.0	**$ 2,380.0**	Juneau	4-B
Juneau Campus	Charles Gamble Jr. – Donald Sperl Joint Use Facility	Existing sliding cantilever gates fail frequently during cold weather and high snow events. This project will replace the sliding gates with Vertical swing gates which have worked well at other locations in Juneau. Funding for this project will be split with the Army National Guard according to the current use agreement. This project can be designed, bid and constructed in the current fiscal year.	$ 70.0	**$ 2,450.0**	$ 70.0	**$ 2,450.0**	Juneau	4-B
Juneau Campus	Charles Gamble Jr. – Donald Sperl Joint Use Facility	In January 2022 ice built up around the building and directed melt water into the building which flooded mechanical room and threatened the wood gym floor.	$ 13.0	**$ 2,463.0**	$ 13.0	**$ 2,463.0**	Juneau	4-B
Juneau Campus	Charles Gamble Jr. – Donald Sperl Joint Use Facility	The Bronz Medallion has been damaged by snow plowing operations. This project will replace the medallion and re-install it such that no snow plows can damage it.	$ 10.0	**$ 2,473.0**	$ 10.0	**$ 2,473.0**	Juneau	4-B
Juneau Campus	Charles Gamble Jr. – Donald Sperl Joint Use Facility	The existing lighting system is using old technology and is not evenly distributed across the site. This creates shadows and bright spots making it difficult to see walking surfaces, leading to trips and falls. The existing light fixtures placed along the walkway are of a poor quality and require a lot of time and expense to keep operating. This project will replace all of the exterior site lights and building mounted exterior lights with new LED lighting system. This improved lighting design will improve security and safety at this facility, while also reducing power and maintenance costs. Funding for this project will be split with the Army National Guard according to the current use agreement. This project can be designed, bid and constructed in the current fiscal year.	$ 360.0	**$ 2,833.0**	$ 360.0	**$ 2,833.0**	Juneau	4-B
Juneau Campus	Charles Gamble Jr. – Donald Sperl Joint Use Facility	The existing roofing system is more than 20 years old, past it's warranty period and expected life. Roofing inspector in 2024 recommended replacing this roofing system. This project will replace the existing roofing system with a new EPDM system with an expected life of 40 years.	$ 1,500.0	**$ 4,333.0**	$ 1,500.0	**$ 4,333.0**	Juneau	4-B
Juneau Campus	Charles Gamble Jr. – Donald Sperl Joint Use Facility	There are several sections of concrete sidewalk that have cracked and settled creating a slipping/tripping hazard. This project will repair the cracks with a filler and topcoat surfacing	$ 13.0	**$ 4,346.0**	$ 13.0	**$ 4,346.0**	Juneau	1-A
Juneau Campus	Charles Gamble Jr. – Donald Sperl Joint Use Facility	When people go to leave, many folks do not remember that this is a one way parking lot. This project will realign the parking to angled parking. This will require expanding the parking lot due to loss of number of parking spaces when moving to an angled parking.	$ 190.0	**$ 4,536.0**	$ 190.0	**$ 4,536.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	Eliminate Pneumatic Controls, upgrade HVAC controls, investigate energy recovery upgrades	$ 1,000.0	**$ 5,536.0**	$ 1,000.0	**$ 5,536.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	The carpet in the Egan Library was installed when the building was constructed. The carpet is now more than 30 years old, fading and showing its age with holes being covered up with throw rugs in high traffic areas. This project will replace carpet in the main building	$ 260.0	**$ 5,796.0**	$ 260.0	**$ 5,796.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	The carpet in the Egan Library was installed when the building was constructed. The carpet is now more than 30 years old, fading and showing its age. This project will replace carpet in Rooms 210, 211, 202 and ?.	$ 40.0	**$ 5,836.0**	$ 40.0	**$ 5,836.0**	Juneau	4-B

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Juneau Campus	Egan, William A. Library and Classroom Wing	The carpet in the Egan Library was installed when the building was constructed. The carpet is now more than 30 years old, fading and showing its age. This project will replace carpet in the study rooms on the first level.	$ 30.0	**$ 5,866.0**	$ 30.0	**$ 5,866.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	The carpet in the Egan Library was installed when the building was constructed. The carpet is now more than 30 years old, fading and showing its age. This project will replace carpet on the stairways.	$ 80.0	**$ 5,946.0**	$ 80.0	**$ 5,946.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	The Elevator in the Egan Library was installed in 19xx. Elevator Technician recommended in 2017 the elevator be re-built soon Front and rear opening original Otis equipment with early microprocessor LRV. The Vendor was running out of these boards in 2020 and recommend a full modernization.	$ 390.0	**$ 6,336.0**	$ 390.0	**$ 6,336.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	The existing canopy has a 4 foot gap where the canopy narrows down by several feet. This gap results in rain falling on the sidewalk which can cause an icing and slipping hazard during cold weather. This project will fill this gap so the canopy is the same with thru ought.	$ 20.0	**$ 6,356.0**	$ 20.0	**$ 6,356.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	The existing roofing system is a IRMA system that is more than 20 years old, past it's warranty period and expected life. Roofing inspector in 2024 recommended replacing this roofing system. This project will replace the existing roofing system with a new EPDM system with an expected life of 40 years.	$ 1,270.0	**$ 7,626.0**	$ 1,270.0	**$ 7,626.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	The existing seating is not comfortable for the modern American student and needs to be replaced with wider seats.	$ 130.0	**$ 7,756.0**	$ 130.0	**$ 7,756.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	The LG air source heat pumps at have required substantial maintenance repairs to keep running. Local mechanical engineer recommends switching a brand that has been more reliable here in Juneau. This project will conduct a condition assessment report to try and identify the cause of system failures and present multiple solutions to fix the problems.	$ 110.0	**$ 7,866.0**	$ 110.0	**$ 7,866.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	The sound board is an old time dated color. This project will re-color the sound boards to match the current library color scheme	$ 10.0	**$ 7,876.0**	$ 10.0	**$ 7,876.0**	Juneau	4-B
Juneau Campus	Egan, William A. Library and Classroom Wing	Upgrade emergency power so Egan can act as a back-up IT base, Also some additional power for mechanical pumps	$ 130.0	**$ 8,006.0**	$ 130.0	**$ 8,006.0**	Juneau	4-B
Sitka Campus	Hangar 332	Access to the electrical shutoff for the building is through a corridor that has potential to be flooded by the water supply line. This project will install a non-conductive floor grating to ensure safe access to the electrical shutoff in the event of a water supply line failure.	$ 97.0	**$ 8,103.0**	$ 97.0	**$ 8,103.0**	Sitka	2-A
Sitka Campus	Hangar 332	Canopy over this doorway will improve maintenance and extend the life of the entry by protecting the doorway from snow and rain.	$ 130.0	**$ 8,233.0**	$ 130.0	**$ 8,233.0**	Sitka	2-A
Sitka Campus	Hangar 332	Original building elevator has been shut down for extended periods of time due to being old and obsolete. This project will replace the elevator.	$ 430.0	**$ 8,663.0**	$ 430.0	**$ 8,663.0**	Sitka	2-A
Sitka Campus	Hangar 332	The current hot water tank is not adequate to provide hot water to campus facilities. This study will provide information and cost for replacing the hot water tank.	$ 10.0	**$ 8,673.0**	$ 10.0	**$ 8,673.0**	Sitka	2-A
Sitka Campus	Hangar 332	The exterior chiller is non-functional, and requires an active circulating pump to keep water from freezing. Removal of the chiller will allow the decommissioning of the chiller circulating pump which will save money.	$ 45.0	**$ 8,718.0**	$ 45.0	**$ 8,718.0**	Sitka	2-A
Sitka Campus	Hangar 332	The Sitka building was constructed in the 1940's and has not had an seismic design analysis. This project would analysis the existing structure to see if it meets current earthquake design guidelines and if required, make recommendations for seismic reinforcing. Construction of seismic reinforcing, if needed, will be completed under a separate project.	$ 13.0	**$ 8,731.0**	$ 13.0	**$ 8,731.0**	Sitka	2-A
Sitka Campus	Hangar 332	The Sitka Campus office building is inside a logger WWII hanger. This project will determine appropriate office building envelope insulation and the effect of the increased wall and roof insulation the size of heating plant required and the appropriate type of heating plant.	$ 26.0	**$ 8,757.0**	$ 26.0	**$ 8,757.0**	Sitka	2-A
Sitka Campus	Hangar 332	The sprinkler riser room is currently only accessible through a faculty office. An exterior door should be installed to improve safety to the facility in the event of a facility fire.	$ 19.0	**$ 8,776.0**	$ 19.0	**$ 8,776.0**	Sitka	2-A
Sitka Campus	Hangar 332	There are building plans for the Sitka campus hangar that have not been scanned into electronic format. These drawing should be scanned and uploaded to the	$ 3.0	**$ 8,779.0**	$ 3.0	**$ 8,779.0**	Sitka	2-A
Juneau Campus	Hendrickson Annex	The Exterior Deck going around the Hendrickson Annex building is exposed to Juneau's rainy weather and is starting to rot. This project will replace the deck and ramp access.	$ 100.0	**$ 8,879.0**	$ 100.0	**$ 8,879.0**	Juneau	4-B

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Juneau Campus	Hendrickson Annex	The Hendrickson Annex is more than 36 years old and half of the building was a "temporary" addition that was not built to standard permanent construction standards. The construction quality of the addition is one small step above an ATCO trailer, it is not an efficient use of energy, accommodations or work space. With the proposed UA reductions this building will no longer be needed.	$ 100.0	**$ 8,979.0**	$ 100.0	**$ 8,979.0**	Juneau	4-B
Juneau Campus	Hendrickson Annex	The metal roofing system is xx years old and reaching the end of it's useful life. This project will replace the roofing system.	$ 220.0	**$ 9,199.0**	$ 220.0	**$ 9,199.0**	Juneau	4-B
Juneau Campus	Hendrickson, Waino E. Building	The existing roofing system is a PVC system that is more than 25 years old, past it's warranty period and expected life. The Wood shake mansards are rotting and exposing the underlayment. Roofing inspector in 2024 recommended replacing this roofing system. This project will replace the existing roofing system with a new EPDM system with an expected life of 40 years. It will also replace the wood shake mansards.	$ 1,080.0	**$ 10,279.0**	$ 1,080.0	**$ 10,279.0**	Juneau	4-B
Juneau Campus	Hendrickson, Waino E. Building	This project will add an entry vestibule to the existing lower entrance door to the Hendrickson building. This will improve the thermal efficiently of the building and lower heating costs. This project can be designed, bid and constructed in the current fiscal year	$ 160.0	**$ 10,439.0**	$ 160.0	**$ 10,439.0**	Juneau	4-B
Juneau Campus	Infrastructure	Banfield Hall fuel tank is xx years old and reached the end of their useful life and need to be replaced before they start leaking.	$ 290.0	**$ 10,729.0**	$ 290.0	**$ 10,729.0**	Juneau	4-B
Juneau Campus	Infrastructure	Connect Jones House to Auke Lake Way with driveway.	$ 100.0	**$ 10,829.0**	$ 100.0	**$ 10,829.0**	Juneau	4-B
Juneau Campus	Infrastructure	Constructed in the mid-1980's, many of the paved sidewalks and parking lots around the University of Alaska Southeast (UAS) Juneau campus are either beginning to fail, or nearing the end of their useful lives. In order to set priorities for repairing the numerous pavement and drainage deficiencies, this work will be done in phases. This project phase will remove and replace about 20% of the pavement in the 3-10 year category identified in the Engineers pavement report	$ 130.0	**$ 10,959.0**	$ 130.0	**$ 10,959.0**	Juneau	4-B
Juneau Campus	Infrastructure	Constructed in the mid-1980's, many of the paved surfaces around the University of Alaska Southeast (UAS) Juneau campus are either beginning to fail, or nearing the end of their useful lives. In order to set priorities for repairing the numerous pavement and drainage deficiencies, this work will be done in phases. This project phase will remove and replace about one half of the pavement in the 3-10 year category identified in the Engineers pavement report	$ 1,760.0	**$ 12,719.0**	$ 1,760.0	**$ 12,719.0**	Juneau	4-B
Juneau Campus	Infrastructure	Existing facility is dated and does not fit current housing look. New structure would be similar to facility constructed in 2012.	$ 580.0	**$ 13,299.0**	$ 580.0	**$ 13,299.0**	Juneau	4-B
Juneau Campus	Infrastructure	Housing courtyard is surfaced with grass create pavers that have not functioned as advertised. The housing courtyard has an un-finished muddy look. This project will revitalize this area to me more attractive for student gatherings and include, defined fire access, stamped concrete pavement, fire pit, picnic area and landscaping.	$ 220.0	**$ 13,519.0**	$ 220.0	**$ 13,519.0**	Juneau	4-B
Juneau Campus	Infrastructure	Inspections performed by DOT&PF bridge section recommend the over pass be repainted. This project will repaint the overpass with a composite paint system that is expected to last more than 50 years.	$ 190.0	**$ 13,709.0**	$ 190.0	**$ 13,709.0**	Juneau	4-B
Juneau Campus	Infrastructure	Our existing drainage is not sufficient for the amount of water we get - the new sidewalks are already being flooded and will likely be damaged if this continues into the freezing weather	$ 12.0	**$ 13,721.0**	$ 12.0	**$ 13,721.0**	Juneau	4-B
Juneau Campus	Infrastructure	Removal of the Soboleff annex opened up a space that the Master Plan recommended as a Fine Arts Courtyard. This project will hire a design consultant to come up with 3 options for transforming this area into a Fine Arts Courtyard. This portion of the project can be completed in the current fiscal year	$ 20.0	**$ 13,741.0**	$ 20.0	**$ 13,741.0**	Juneau	4-B
Juneau Campus	Infrastructure	The existing flag poles at the Egan Building are all the same height. However, the American Flag Pole should be taller than all other poles.. This project will replace the American flag pole.	$ 10.0	**$ 13,751.0**	$ 10.0	**$ 13,751.0**	Juneau	4-B
Juneau Campus	Infrastructure	The existing tool shed is more than a decade old. The doors and steps are deteriorating on account of inadequate roof overhang. The doors need to be replaced, the stairs and ramp rebuilt, and roof extended to shelter the doors on both ends. This project will build a new tool storage shed that is larger to accommodate the existing supply of tools. The shed will be in a location more convenient for staff to use.	$ 26.0	**$ 13,777.0**	$ 26.0	**$ 13,777.0**	Juneau	4-B

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Juneau Campus	Infrastructure	The landscaping around the Housing Apartment Units has died over the years and has not been replaced. This project will replace and improve the landscaping around the Housing Apartment Units. This project can be phased over several years as funding becomes available.	$ 220.0	**$ 13,997.0**	$ 220.0	**$ 13,997.0**	Juneau	4-B
Juneau Campus	Infrastructure	The new trash facility roof is rusting out and will soon cause damages to the roofing. Water from roof creates ice patches in the winter, consider new gutters.	$ 6.0	**$ 14,003.0**	$ 6.0	**$ 14,003.0**	Juneau	4-B
Juneau Campus	Infrastructure	The pedestrian route from the courtyard to the lower levels classrooms in Novatney & Whitehead buildings is not intuitive, which causes students and staff to take a shortcut down the steep grass slope. This is not a formal sidewalk or stairway and is unsafe, especially during the winter when the slope is covered in ice or snow. This project will install a covered stairway from the courtyard down to the lower sidewalk level.	$ 690.0	**$ 14,693.0**	$ 690.0	**$ 14,693.0**	Juneau	4-B
Juneau Campus	Infrastructure	The service road behind Banfield is rutting from improper drainage and maintenance. Road needs to be re-graded, and compacted to surface drainage does nor run down road.	$ 6.0	**$ 14,699.0**	$ 6.0	**$ 14,699.0**	Juneau	4-B
Juneau Campus	Infrastructure	The Sheffield Bridge crosses Auke Creek. The paint on this bridge is being damaged by snow plows and needs to be repaired. This project will paint the bridge	$ 10.0	**$ 14,709.0**	$ 10.0	**$ 14,709.0**	Juneau	4-B
Juneau Campus	Infrastructure	The Soboleff Annex was removed fall 2018 leaving a gravel pad. This project will temporarily reclaimed so it fits into the campus until a permanent use for the area is identified. The project will include curbs, gutters, sidewalks and landscaping features.	$ 50.0	**$ 14,759.0**	$ 50.0	**$ 14,759.0**	Juneau	4-B
Juneau Campus	Infrastructure	UAS grounds does a lot with plants on campus and having a greenhouse would greatly improve the diversity, dependability and efficiencies of plantings on campus. This project would install a 30x50 green house somewhere close to campus	$ 110.0	**$ 14,869.0**	$ 110.0	**$ 14,869.0**	Juneau	4-B
Juneau Campus	Infrastructure	UAS has completed several heating upgrades to campus building. This project would conduct a study to determine if it appropriate to make similar improvements to some or all of the Housing buildings	$ 13.0	**$ 14,882.0**	$ 13.0	**$ 14,882.0**	Juneau	4-B
Juneau Campus	Infrastructure	UAS has several back up power systems that provide power to a few systems that have been deemed critical to campus. However, much of campus is not able to work during a power outage because there are many electrical systems that are not connected to a back-up power system. This project will install additional back-up power systems that can accommodate all of the electrical demands on the main Juneau campus.	$ 1,300.0	**$ 16,182.0**	$ 1,300.0	**$ 16,182.0**	Juneau	4-B
Juneau Campus	Natural Sciences Research Lab**	Natural Science Research Lab (NSRL) fire alarm and detection system will not be supported by the manufacturer in the near future and needs to be replaced	$ 110.0	**$ 16,292.0**	$ 110.0	**$ 16,292.0**	Juneau	4-B
Juneau Campus	Novatney, Dorothy Building	Elevator equipment is…….xxx years old. The existing elevator rocks and rattles and makes riders feel uncomfortable. This project will replace the elevator. The Elevator technician recommend in 2017 the elevator be replaced soon	$ 570.0	**$ 16,862.0**	$ 570.0	**$ 16,862.0**	Juneau	4-B
Juneau Campus	Novatney, Dorothy Building	The existing steel columns have been buried and are now showing signs of corrosion below grade. This project will expose the columns, remove rust, make any repairs, and then repaint with appropriate underground paint	$ 60.0	**$ 16,922.0**	$ 60.0	**$ 16,922.0**	Juneau	4-B
Ketchikan Campus	Paul, William L. Building	Concrete decks are 50 years old. Structural Steel is inadequate. Structural Engineer estimates minimum 5 years remaining life.	$ 630.0	**$ 17,552.0**	$ 630.0	**$ 17,552.0**	Ketchikan	1-A
Ketchikan Campus	Paul, William L. Building	Perimeter drainage for the building is inadequate. Water constantly flows under the North 2nd Floor entry. Concrete was cut and sump pump installed years ago. If sump goes out 2nd and 1st floor will flood. This is unfeasible to maintain and poses a high risk of flooding. This project will improve the building footing drainage system to cover more of the building and make it gravity drain.	$ 140.0	**$ 17,692.0**	$ 140.0	**$ 17,692.0**	Ketchikan	1-A
Ketchikan Campus	Paul, William L. Building	The Building Automation System for the Paul and Ziegle building is an old version that the manufacturer no longer services. This project will upgrade the BAS to the latest version which will require an upgrade to the BAS server and some of the BAS sensors. This new system will also help improve the operating efficiency of the heating and ventilation systems.	$ 130.0	**$ 17,822.0**	$ 130.0	**$ 17,822.0**	Ketchikan	1-A
Ketchikan Campus	Paul, William L. Building	The elevator in the Paul building is 47 years old, the manufacturer no longer makes replacement parts and needs to be replaced. The elevator has been out of service for extended periods over the past few years. This creates a hardship on students, staff and faculty that have mobility challenges. This project will replace the existing elevator. This project can be designed, bid and encumbered in the current fiscal year and construction would take 18 months	$ 580.0	**$ 18,402.0**	$ 580.0	**$ 18,402.0**	Ketchikan	1-A

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Ketchikan Campus	Paul, William L. Building	This building was constructed in early 1970s and did not include no vestibules on entry doors. The seals on the glass curtain wall have failed creating fogging in-between the window panes. This project will install vestibules on the doorways and replace the glass curtain walls. These improvements will improve the comfort of the building interior and reduce heating cost.	$ 190.0	**$ 18,592.0**	$ 190.0	**$ 18,592.0**	Ketchikan	1-A
Ketchikan Campus	Paul, William L. Building	This is a platform lift.	$ 130.0	**$ 18,722.0**	$ 130.0	**$ 18,722.0**	Ketchikan	1-A
Juneau Campus	Soboleff, Walter A. Building	The Ceiling and lights in the lower Soboleff building are no longer supported with of the shelf parts requiring special ordering and salvaging other lights. The ceiling is outdated and the type makes any utility work difficult and expensive. This project will remove the existing ceiling and install a new drop ceiling matching other places on campus.	$ 60.0	**$ 18,782.0**	$ 60.0	**$ 18,782.0**	Juneau	4-B
Juneau Campus	Soboleff, Walter A. Building	The existing elevator is more than 40 years old has reached the end of it's useful life. It rocks and rattles and makes riders feel uncomfortable. Since 2017, the elevator technician recommended to replace the elevator. This project will replace the existing elevator.	$ 550.0	**$ 19,332.0**	$ 550.0	**$ 19,332.0**	Juneau	4-B
Juneau Campus	Soboleff, Walter A. Building	This project will install a fence around the Kiln area improve the esthetic appearance of this natural gathering area. The fence will include locking gates that will help protect and secure the equipment and supplies stored in the Kiln shelter.	$ 50.0	**$ 19,382.0**	$ 50.0	**$ 19,382.0**	Juneau	4-B
Ketchikan Campus	Southeast Alaska Maritime Training Center	Ketchikan currently does not have a back-up power system. This project will install a generator and switching for temporary back-up power. Electrical Engineer based estimate on a 200 KW generator installed in parking lot.	$ 330.0	**$ 19,712.0**	$ 330.0	**$ 19,712.0**	Ketchikan	1-A
Ketchikan Campus	Southeast Alaska Maritime Training Center	Replace existing 35 year old damaged siding. Add insulation under.	$ 350.0	**$ 20,062.0**	$ 350.0	**$ 20,062.0**	Ketchikan	1-A
Juneau Campus	Student Housing Unit A	Many windows in the Housing apartments have panes that have failed. Housing staff have been doing pane and window replacements piecemeal over the last few years, however this method is falling behind the # of panes that have failed. Housing estimates up to 1/3rd of the apartments has one or more failed window panes.	$ 600.0	**$ 20,662.0**	$ 600.0	**$ 20,662.0**	Juneau	4-B
Juneau Campus	Student Housing Unit A	Some apartment units have walls or rooms that need to be repainted. Shower basins were not typically replaced in last round of renovations, leaving existing apartment units with basins in very poor condition compared to otherwise well-kept areas. This project can be done in $20K smaller projects	$ 13.0	**$ 20,675.0**	$ 13.0	**$ 20,675.0**	Juneau	4-B
Juneau Campus	Student Housing Unit A	The Apartment roofs are covered in moss. removal of moss and addition of zinc strips is necessary. Additionally, a power wash of all apartment buildings would eliminates mold and mildew on siding.	$ 9.0	**$ 20,684.0**	$ 9.0	**$ 20,684.0**	Juneau	4-B
Juneau Campus	Student Housing Unit A	The Boilers in the housing units were installed in early 1980s and are reaching the end of their useful life. This project will replace the boilers and install current heating components associated with boilers. They can be replaced one at a time as funding becomes available.	$ 450.0	**$ 21,134.0**	$ 450.0	**$ 21,134.0**	Juneau	4-B
Juneau Campus	Student Housing Unit A	The D&S valves in the shower are failing and leaking which is leading to mold and wood rot. UAS crews have replaced several D&S valves after finding mold and wood rot on the surface. This project will replace the remaining valves with the hope to catch them before the high cost of replacing rotten wood structure.	$ 250.0	**$ 21,384.0**	$ 250.0	**$ 21,384.0**	Juneau	4-B
Juneau Campus	Student Housing Unit A	The shower pans have been a problem in the UAS apartment units for some time. They frequently leak causing damage to floors and lower ceilings. When the leak is slow, it creates wood rot that requires structural repairs. This project will replace shower pans with new ones that have better sealing qualities.	$ 60.0	**$ 21,444.0**	$ 60.0	**$ 21,444.0**	Juneau	4-B
Juneau Campus	Student Lodge	Existing lighting is harsh and does not give the space a welcoming atmosphere. This project will hire a consultant to design a slighting system that is more appropriate for a loge atmosphere	$ 26.0	**$ 21,470.0**	$ 26.0	**$ 21,470.0**	Juneau	4-B
Juneau Campus	Student Lodge	The concrete curbs around the washers are oversized and hinders proper use of the washing machines. The floor in the room is warn and outdated. This project will remove the concrete curbs, existing flooring and install an epoxy coated floor or similar	$ 25.0	**$ 21,495.0**	$ 25.0	**$ 21,495.0**	Juneau	4-B
Juneau Campus	Technical Education Center	Marine Core (TEC) building boilers date from the 1983 construction of the Technical Education Center and have reached the end of their service lives. This project will conduct a system heating analysis looking at options for replacing the boilers with oil, electric, or heat pump systems. Then the most long term economical heating system will be designed and installed.	$ 650.0	**$ 22,145.0**	$ 650.0	**$ 22,145.0**	Juneau	4-B

Allocation	Project Title	Project Description	Project Cost ($00.0)	Running Total ($00.0)	GF Cost ($00.0)	GF Running Total ($00.0)	Location (City)	House District
Juneau Campus	Technical Education Center	The existing classroom in the Technical Education Center can accommodate 75 students. While this is appropriate for a few classes, most of the classes held in this room have fewer than 40 students. Adding a folding wall to this classroom will improve the teaching environment for the smaller classes sizes and make it possible to schedule more classes in the same space.	$ 120.0	**$ 22,265.0**	$ 120.0	**$ 22,265.0**	Juneau	4-B
Juneau Campus	Technical Education Center	The exterior lighting at the Marine Core Technical Education Building is dimly lit contributing to the higher crime rate in this area of town. This project will replace existing lighting system with a new LED lighting system that increases the ambient light to nationally recognized standards while reducing the overall power consumption. This project can be designed and constructed in the current fiscal year	$ 130.0	**$ 22,395.0**	$ 130.0	**$ 22,395.0**	Juneau	4-B
Juneau Campus	Technical Education Center	The Marine Core Technical Education Center building is exposed to severe weather off the channel. The finish on 3100 sq. ft... of siding is failing and the panels beneath are rusting after 35 years of exposure. Increase insulation value from R-10 to R-30. This project will repair or replace the siding of the East, West, North sides of the building.	$ 1,300.0	**$ 23,695.0**	$ 1,300.0	**$ 23,695.0**	Juneau	4-B
Juneau Campus	Technical Education Center	The Marine Core Technical Education Center building is exposed to severe weather off the channel. The finish on 3100 sq. ft... of siding is failing and the panels beneath are rusting after 35 years of exposure. Increase insulation value from R-10 to R-30. This project will repair or replace the siding on the second floor down Channel side only.	$ 260.0	**$ 23,955.0**	$ 260.0	**$ 23,955.0**	Juneau	4-B
Juneau Campus	Technical Education Center	The Marine Core Technical Education Center building is exposed to severe weather off the channel. The finish siding is failing and the panels beneath are rusting after 35 years of exposure. This project will repair or replace the siding of the penthouse.	$ 160.0	**$ 24,115.0**	$ 160.0	**$ 24,115.0**	Juneau	4-B
Juneau Campus	Technical Education Center	The overhead doors accessing Automotive, Diesel and Construction Tech shops have reached the end of their useful life and no longer shut tightly and keep the elements outside. This project will replace the existing overhead doors which will lower our heating costs.	$ 230.0	**$ 24,345.0**	$ 230.0	**$ 24,345.0**	Juneau	4-B
Juneau Campus	Whitehead, William Massie and Dorothy Johnson Building	UAS has several buildings with LG Air Source Heat Pumps to heat the building. Unfortunately, they have not performed as intended with lower heat recovery and frequent breakdowns. Getting someone to repair the system has been expensive and difficult, resulting in the system being down for months. This project will replace the ASHP with a system that is more reliable. This project supports UA's priority of reducing fixed cost base by increasing efficiency of the heating system and lowering annual energy costs.	$ 730.0	**$ 25,075.0**	$ 730.0	**$ 25,075.0**	Juneau	4-B
Juneau Campus	Whitehead, William Massie and Dorothy Johnson Building	The existing roofing system is past it's warranty period and expected life. The Wood shake mansards are rotting and exposing the underlayment. Roofing inspector in 2024 recommended replacing this roofing system. This project will replace the existing roofing system with a new EPDM system with an expected life of 40 years. It will also replace the wood shake mansards.	$ 410.0	**$ 25,485.0**	$ 410.0	**$ 25,485.0**	Juneau	4-B
Ketchikan Campus	Ziegler, Adolph H. Building	Concrete on the plaza installed in 2011 is deteriorating prematurely, spalling and yielding a rough, uneven surface. This creates slip and trip safety hazards to students, staff and faculty entering the building. This project will remove and replace the concrete walkways and can be bid and constructed in the current fiscal year.	$ 28.0	**$ 25,513.0**	$ 28.0	**$ 25,513.0**	Ketchikan	1-A
Ketchikan Campus	Ziegler, Adolph H. Building	Electronic Door Locking systems are becoming more flexible and affordable. This type of system will allow greater flexibility to administration in who is allowed in the building. It also provides a greater security by quickly keeping door locked for someone who has recently lost privileges to building access. This project will install card lock system on the building entrance doors for Paul / Zenger / Maritime buildings	$ 60.0	**$ 25,573.0**	$ 60.0	**$ 25,573.0**	Ketchikan	1-A
Ketchikan Campus	Ziegler, Adolph H. Building	Ketchikan currently does not have a back-up power system. This project will install a generator and switching for temporary back-up power to the Ziegler and Paul Buildings. Electrical Engineer based estimate on a 200 KW generator installed in parking lot.	$ 330.0	**$ 25,903.0**	$ 330.0	**$ 25,903.0**	Ketchikan	1-A
Ketchikan Campus	Ziegler, Adolph H. Building	The main entrance to Paul is a ramp is steeper than allowed by ADA Accessibility Guidelines (ADAAG). This project will remove and replace existing sidewalks, ramps, handrails and associated retaining walls in order meet current ADA regulations. This project can be designed, bid and constructed in the current fiscal year	$ 450.0	**$ 26,353.0**	$ 450.0	**$ 26,353.0**	Ketchikan	1-A

Systemwide Services	Butrovich Building Repair	The Butrovich facility is a critical infrastructure facility for the University of Alaska, the state of Alaska, the west coast of British Columbia, and the U.S. In addition to housing UA's administrative offices, many state and federal agencies also rely on the data flowing through the Butrovich data center for critical monitoring of earthquakes, tsunamis, volcanic eruptions and ash warnings, and wildfires. The State of Alaska Division of Homeland Security and Emergency Management's mitigation plan explicitly relies on the data coming from many of these agencies. In 2013, while considering upgrades to Butrovich's data center, UA first learned of the potential seismic issues from a consulting engineering firm. After extensive formal engineer analysis predicated on numerous lessons learned from previous earthquakes, many structural and non-structural seismic deficiencies were identified with the steel-moment frame (SMF). The engineering analysis indicates that the SMF facility is vulnerable to damage and loss of operational functionality even from nearby modest seismic events. In addition, the data center's 12,000 square-foot floor also has no seismic bracing. Engineering analysis has shown that Butrovich's life-safety profile and operational readiness can be highly improved with a seismic retrofit. There are three significant "buckets" of work to be accomplished - structural, non-structural, and the data center floor. With these buckets addressed, the risk of the building or a floor collapsing is greatly reduced. The current cost estimate for this project is $14.5 million.	$ 14,200.0	**$ 14,200.0**	$ 14,200.0	**$ 14,200.0**	Fairbanks	35-R
