HB25 Support Letter

Dear Members of the Alaska State Legislature,

Our organization replaced Styrofoam containers with more sustainable alternatives and transitioned from single-use plastic utensils to reusable silverware for our community dinners, the transition was both easy and feasible.

We also joined Plastic Free 907, which is a recognition program of Alaska Community Action on Toxics that highlights businesses and organizations committed to a plastic-free future. Part of Stand Up Alaska's mission is to be good neighbors, and reducing our plastic use and overall environmental footprint was a natural and meaningful step toward living out that commitment.

We support HB25 and thank you for the opportunity to voice our support.

Erin Jackson, Executive Director of Stand Up Alaska
