### **Letter of Support for House Bill 25**

**3/10/26**

**Dear Members of the Alaska State Legislature:**

**As an Alaskan mission driven business owner, I am writing to express my strong support for House Bill 25, sponsored by Representative Josephson, that requires food establishments to transition from polystyrene ("Styrofoam") containers to safer compostable serveware. The Goods + Sustainable Grocery has NEVER used polystyrene. We offer our customers compostable &/or reuseable options since polystyrene contains harmful chemicals that leach into the foods or beverages, is non-recyclable, and is hazardous to fish, wildlife, and people. I would welcome the opportunity to offer any additional information about our sustainable business practice for this legislation.**

**Please support HB 25 and help Alaskans move into a future that supports people & the planet. There is no reason for civilized society to continue the use of this harmful & toxic material when there are more innovative options on the market each day.**

**Many Thanks,**

**Willow King**

A handwritten signature in black ink, appearing to read "Willow King", written over a horizontal line.
