

North Slope Prevailing Value

4/14/2026

prepared on

As provided under 15 AAC 55.173(a)(2) for gas delivered in the North Slope area, the Department will publish on the 15th day of each calendar quarter, the prevailing value for that quarter. This prevailing value is the weighted average sales price of gas to publicly regulated utilities in the north slope area for the 3-month period ending 1 month before the end of the previous calendar quarter.

In the absence of sales to publicly regulated utilities, the department will determine the prevailing value on another reasonable basis under AS 43.55.020(f):

Filing Period
