Subject: Support for SB 150 and HB 164

Dear Chair, Vice Chair and Members of the Labor and Commerce Committee:

Please support SB 150 and HB 154 to modernize net metering for rail belt utilities. Especially since federal tax incentives are no longer in place, meaning we have lost a major incentive for citizens to invest in alternative energy, we need annualized net metering to accelerate return on investment for solar owners.

Thank you for considering changes that may only benefit solar owners now but in the long term will benefit all Alaskans by making renewable energy investments more affordable for more Alaskans.
