We need to end the use of polystyrene, single-use products whether they are used for take out food, packaging or any other use in Alaska. There are many other viable alternatives available. These polystyrene products are around FOREVER, clogging our landfills, thrown as trash into our water and on land where they break down into microplastics that then work their way into our foods and our bodies. Support HB 25 and end polystyrene use in Alaska. Show that you love our State more than you love big oil.

Peter Melde
