---

Members of the House State Affairs committee, I urge you to show your support for HB25 by passing it out of committee it can continue on the path to becoming law. This bill is important to Alaska because it will end much of the use of polystyrene foam food service cartons in the state. Because they are non-recyclable, these containers end up in Alaska's dumps; if burned, they emit toxic fumes, and if buried, do not decompose for a very, very long time.

Thank you for your consideration,
