Committee on HB 155, dated 3/2/11
Bill/Subject

I am in opposition of HB 155 because it promotes diminished wages, and drives down standards of living in communities across Alaska.

The current law is fine the way it is.

Thank you for your time.

Committee on HB 155, dated 3/2/11
Bill/Subject

Please Vote this bill DOWN. We have over 12 billion in state surplus and to me this would push good paying job and employ low skill workers raising job related accidents & deaths in the work place compromising everything from schools to safety systems. This Bill to me would not lower bids on projects but just lower wages of the work force. In turn diminishing wages to standard of living. Our 90% local hire provision on thousand of project would ~~be~~ reduced if not eliminating the local hire provision. We already have enough out of state worker on the Slope.

If you would like to Help the people of Alaska, please Pass a Bill that would help employ more Alaskan in Oil field work.

I do not think this Bill should be ammended in any way shape or form. This unnecessary Bill, if approved, only diminishes wages and there are alot of hard working American /Alaskans who rely on the Prevailing Wages to support their families. - You get what you pay for... if you pay someone poorly, then most likely the quality of work will be poor as well. Actually All AK State funded construction jobs should be prevailing wage rates!!

I am against the HB 155. Why would we want to take work away from Alaskans? Why would we jeopardize the standard of living of the Alaskans. Create higher ~~un~~ unemployment rate, and what about crime rate going up? This bill will do just that. Just another way for employers to rob from their employees that deserve good pay. Not to mention underpaid employees. Create unhappy workers. This means low quality construction on our infrastructure and what about the safety of Alaskans. Well paid employees equal good quality of work, good standards of living + a stimulated economy in Alaska. Keep work in Alaska for Alaskans at good pay.
