Key Elements of Anti-Fraudulent Deepfake Legislation

- Prohibit distribution of unlabeled deepfakes within [90] days of election
 - Why disclosure?
- Standard: “Deceptive and fraudulent” = Shows a person saying or doing something that they did not say or do.
- Cover all persons – not just candidates, parties and committees
- Establish the requirement for disclosure – as prominent as other text, spoken plainly, etc.
- Establish a right for affected parties to seek injunction to take down.
- Establish enforcement and penalties

Protections

- No liability for broadcasters or platforms that make reasonable effort to prevent deepfakes, or that show deepfakes as part of news coverage and describe as deepfakes
- Exception for satire
- Severability
