**Subject:** Senate Bill 24 - Nicotine cap

Dear Senator Bjorkman,

On Monday, March 3rd, I participated in the public comment session on Senate Bill 24. A question arose regarding the appropriate nicotine cap.

Our goal as responsible businesses is to sell regulated vapor products exclusively to adult consumers. A 50 mg/ml nicotine cap would ban several products that have received full marketing granted orders from the FDA. A marketing granted order means that the manufacturer has demonstrated to the agency that the marketing of their products is *appropriate for the protection of public health*. I respectfully urge you to raise the cap to 70 mg/ml as several FDA-authorized vapor products fall just under this limit.

Sincerely,

Brad Boedecker
