**Subject:** SB 117 REGULATION OF FIREWORKS

Greeting

I'll make this short and sweet

While I understand the danger especially in summer with fireworks

I would like to see the state look into what El Paso have done where firework is legal to sale and set off in Firework safe zones

Consist of a concrete pad, volunteer fire truck station and firework stand

Any where beside this area was still illegal to set off and sale

But it also help spread business to the stands cause you only have 1-2 stand per spot with a few stop different area of city

Can be a source of revenue with a small tax on legal firework
