

Dear Labor and Commerce Members,

Please vote no on HB254.

My name is Mattie Yukon, and I am an adult content creator. I use my earnings from my adult content to support my subsistence lifestyle that was taught to me by my parents. If I lost this income I would replace it by traveling to engage in in person sex work in Fairbanks or Anchorage where serial killers like Brian Steven Smith target sex workers.

I only sell my content on OnlyFans and Fansly, which provide age verification services, but I have found my content being sold on various Discord servers and uploaded to tube sites. In some cases the people selling the adult content they stole from me impersonate me. It is almost impossible to get this content removed from Discord servers and police won't even take reports about people stealing and reselling my content because they say they don't know if the thief is located in their jurisdiction. I am confident that I could never be charged with the crime of distributing porn to minors, but the burden of proof is much lower in civil court.

I should not face civil liability for men stealing my content, and you should not allow Representative Vance to use the Legislature to join in men like Brian Steven Smith's attacks on sex workers.

Stop this madness. Vote no on HB254.

Thank you,  
Mattie Yukon
