

SUMMARY OF COASTAL DISTRICT COMMENTS ON ALASKA COASTAL ZONE MANAGEMENT PROGRAM
Compiled by the Office of Representative Seaton

| | | | | | | | |
|---|--|--|--|---|---|---|---|
| Coastal District Comments on Current ACMP | Restricting the ability of district Enforceable Policies to address impacts to coastal resources and uses has limited local participation | The "Designated Areas" requirement makes it difficult to get approval for many types of designated areas, involves costly mapping, and makes it difficult to get approval for local enforceable policies. | "DEC Carveout" of air and water quality issues from ACMP reviews restricts ability to address impacts to coastal resources and uses that are related to air and water quality. | Changes to the Habitat Standard have restricted the geographic scope and types of impacts that can be considered in ACMP reviews | Implementation of the Subsistence Standard is too restrictive to allow districts to write meaningful policies. | Revision to the statewide Mining Standard precludes consideration of hardrock mining during ACMP reviews, and sand and gravel mining operations are limited to a small part of coastal zone. | Definition of Coastal Waters restricts application of district policies to waters with a measureable amount of salinity. |

| | | | | | | | |
| Coastal District Comments on Current ACMP | 90-day limit for consistency reviews inhibits ability to address coastal impacts for complex projects | District comments are not given appropriate weight during consistency review process. | General - Extend the ACMP | General - Lack of meaningful district participation | The ACMP program should be transferred from DNR to another Department | The Coastal Policy Council should be re-established | Additional funding should be allocated and an expedited review if district plans are to be rewritten under a change in statute |
