GA 3/13 Add Four Permanent Full-time Positions to Address Increased Caseloads - 2 Public Guardians, and 2 Support Staff	HCS2	Inc	429.7	429.7	0.0	0.0	0.0	0.0	0.0	0.0	0.0	4	0	0
Establish four permanent positions to address the increase in cases in the Office of Public Advocacy (OPA), Public Guardians section. This will place the four non-permanent positions requested in the FY2024 Supplemental request in the FY2025 base budget as permanent positions. OPA is responsible for operating the Public Guardians section, which provides oversight, support, and representation to wards of the state who are unable to provide for themselves. As of December 6, 2023, the current number of wards, including incoming ones, was approximately 1,700. Current caseloads for Public Guardians in Alaska are 85-100 cases, which is more than double the National Guardianship Association recommendation of 40 per position.														
This request will provide OPA with the required support staff to reduce Public Guardian caseloads.

Partnership Grant Staff Support and Office
The Alaska Energy Authority (AEA) received notification from the Department of Energy that AEA has been selected to receive \$206.5 million in federal grant fund from the Grid Resilience and Innovation Partnership (GRIP) Grant Program. These funds are included in the capital budget. The awarded project will construct a High Voltage Direct Current (HVDC) submarine cable to serve as parallel transmission route from Kenai to Anchorage and provide funding for multiple battery energy storage systems (BESS). The expected timeframe of the program is a minimum of eight years.

AEA estimates requiring 12 new positions, including annual core services costs per position of \$25.0 and one-time setup costs of \$10.0 commodities per position. Additionally, AEA will need additional office space and associated utilities totaling \$183.1 per year. All costs will be funded from capital improvement project receipts received by AEA. A corresponding change record is included in the Alaska Industrial Development and Export Authority (AIDEA) operating component to reflect the personal services cost and additional positions. AEA reimburses AIDEA for payroll costs through a reimbursable services agreement and interagency receipts.

The following positions are added:

Full-time Program Manager, range 27 located in Anchorage
Full-time Utility Engineer, range 27 located in Anchorage

Data Library													
The Alaska Energy Authority (AEA) is in the process of updating and revising the online document library. This library includes information about AEA itself, as well as project and program fact sheets. The library will eventually contain research and documentation on projects funded by AEA. This will allow the research, data, and information on these projects to be available to the public. The increase in availability and transparency of projects, both successful and unsuccessful, will help support and advance other affordable or renewable energy projects in the state.													
Prior work on the project was funded by federal funds. This funding will support continued digitization of AEA records to be added to the online repository through direct personal services and contractual support, as well as hosting and administration costs.

Alaska Resource Education (ARE) is seeking \$500.0 a year for two years to expand the statewide workforce development initiatives, focusing on students in both rural and urban schools. Currently providing K-12 Science, Technology, Engineering, and Mathematics (STEM) education, ARE's programs--Spark, Ignite, and Launch--aim to spark interest, ignite passion, and launch students into informed decision-making about natural resources. With Alaska's economy heavily reliant on energy and mineral resources, ARE addresses a workforce shortage by exposing students to local career opportunities. The proposed project aims to establish career pathways, providing information on skills required in natural resource sectors. ARE collaborates with various districts, and additional funding would strengthen partnerships, enabling outreach to new communities. Examples include intensive programs in Nome and Bristol Bay, teaching about mineral exploration in the Northwest Arctic, and classes like Powerful Opportunities for Women in Resources. With over 12,000 students taught in 2023, ARE plans to use additional funding to incorporate new technologies like carbon capture and micro-nuclear energy into its curriculum. The expansion aligns the mission to increase awareness, provide career pathways, and address workforce shortages in Alaska's vital resource industries.													
The sum of \$1,000,000 is appropriated from the general fund to the Department of Education and Early Development to provide a grant to Alaska Resource Education for expanding statewide workforce development initiatives for the fiscal years ending June 30, 2025, and June 30, 2026.

The Governor requested and the legislature appropriated one-time funding of \$5 million for the Alyeska Reading Academy and Institute (ARAI) for FY2024 only. This request maintains that funding in the base budget for ARAI for FY2025 and beyond. ARAI is designed to: 1) provide high quality reading instruction through the Science of Reading to kindergarten through third grade students in a model school setting; and 2) provide a highly effective school setting for Science of Reading instruction to serve as a model for professional development in the State of Alaska. ARAI functions as a culturally relevant resource center, rather than a school, serving students, families, and educators. The ARAI's focus is to provide Science of Reading instruction using highly trained teachers and reading coaches to underserved students. Educators from around the state will have a year-round opportunity to receive hands-on training and practice in teaching reading while earning micro-credentials, certification, and

GA 3/13 Additional Costs After Transferring IT Services Back From OIT Including Increased Personnel Costs and Licensing	HCS2	Inc	405.3	248.7	0.0	156.6	0.0	0.0	0.0	0.0	0	0	0
The Office of Information Technology (OIT) transitioned seven information technology (IT) positions that served the Department of Military and Veterans Affairs' (DMVA) back to the department at the end of FY2023. DMVA is migrating from OIT due to the unique needs of the department and requirements of federal programs. This request includes the portion of anticipated IT position costs not offset by the expected reduction in OIT services, the cost to retain State email for employees, and the cost for licenses that are necessary to support the department's operations.													
Authority is requested in the Office of the Commissioner because IT position costs are allocated based on time spent supporting each division. The cost for email and licenses will be allocated to divisions based on usage.

GA 3/13 Add Statutory Designated Program Receipt Authority for the Iditarod Historical Trail Alliance	HCS2	Inc	200.0	120.0	40.0	30.0	10.0	0.0	0.0	0.0	0	0	0
Additional statutory designated program receipt authority is needed for the Office of History and Archeology (OHA) to accept funding from the Iditarod Historical Trail Alliance. These funds are dedicated towards gathering Iditarod historic trail information in the Alaska Heritage Resource Survey (AHRS) online database. This project will identify data gaps, conduct cultural resource research, field surveys, and contact agencies affiliated with the Iditarod National Historic Trail.
