Cc: 'Cynde Hill'
Subject: HB 107 ON CRIMINAL LAW DEFINITIONS PERSON/LIFE

Representatives of the Citizens of Alaska,

This is another attempt of man to legally define the right to life for all of us, living and these yet to be procreated by our Heavenly Father. Man and woman were created to join Him in this process of uniting a body and a soul to provide each of us with a way to come to earth to gain knowledge and experience through our choices and consequences. Our ability to participate in this process is one of those choices and we must use this procreative power within the bonds of matrimony and not just for earthly pleasure and then destroy the children we help create because we acted irresponsibly and don't want to suffer the consequences. We have no right to end their lives to cover up our mistakes. God's law is the highest law that exists and if we break it, we will suffer the consequences, as has been recorded in our scriptures through the ages.

life begins at conception; all persons have a natural right to life.

This bill seeks to recognize these truths under man's law, putting the issues forth in legal terms. God's law always trumps man's law and if we don't get the message, we will just join the many civilizations who have been wiped off the face of the Earth to clear the slate for Him to try again.

Subject: Testimony in support of HB107

Dear Judiciary committee members,

Definitions have been hijacked by activists, media, and individuals. If people don't like a definition, they reappropriate it, or shape-shift it into something which is more suitable, or useful, to their beliefs. We've seen this happen with many words and phrases in today's divisive climate; anyone who dares to disagree with the reappropriated definitions is gaslighted and otherwise attacked. There are no absolutes allowed; only politically correct talking points.

It's shameful that we allow ourselves to be manipulated in this manner. Truth does not only become truth when it is convenient for our consciences; truth is an absolute. There is no such thing as "your truth" and "my truth," truth is not dependent on our opinions or what is convenient. Definitions of words must be representative of THE truth.

During the introduction of HB107 last week, I heard Deputy AG John Skidmore answer a question about the legal aspect of when a fetus is a separate life. He was asked at what point in a fetus' gestation someone could be charged with murder. His response indicated that there was no point in the baby's gestation at which it wasn't a separate life or person. Someone could be held to account for killing a fetus, at any point in his or her gestation, if they intended to either kill it, or another person—the mother, and he or she was killed in the process.

The response to the question which Deputy AG Skidmore was asked points out the double standard being applied in the argument for women's rights to "healthcare." Is only a baby when it's convenient, or when the parents want it? The law doesn't think so when it comes to murder.

To deny that a fetus is a separate person for any reason is to deny the obvious. Does a separate life begin when the sperm and the egg join and the cells begin to divide, or when a fetus becomes "viable?" How can we call a single cell amoeba "life" and deny the obvious truth that a fetus is a separate life?

How can a mother grieve the miscarriage of her "baby" at only a few weeks gestation and receive sympathy from the same people who would see an unwanted "fetus" as merely being "tissue?" The games people play in their own minds are astounding to me. We deceive ourselves when we embrace lies.

Each of you were a separate life and a separate person from conception, and I am thankful that your parents loved and wanted you enough to embrace the truth about life.

I urge you to pass HB107 unanimously from Judiciary. Definitions matter.

Thank you!

From: Jasmine Johnson-Kennedy
Sent: Monday, February 26, 2024 12:14
To: House Judiciary
Subject: Vote No on HB 107

Good day,

As a Fairbanks resident, I urge you to vote No on HB 107. The Alaska Constitution protects the right to privacy, making any bill banning abortion unconstitutional. Reproductive health is properly a matter to be decided by the individual in consultation with their doctor and taking into account their individual circumstances, medical conditions, and desired health outcomes.

Defining life as beginning at conception will make IVF illegal, harming families who struggle with infertility and wish to bring children into the world.

Defining life as beginning at conception pierces the privacy veil of the Alaskan Constitution and allows for government oversight of personal medical decisions. This opens a door to the destruction of the constitutional right to privacy which protects so many core Alaskan values.

Miscarriage is a tragic medical reality for many women who struggle with conception and childbearing. It is an event full of grief and disappointment for many families. Defining life as beginning at conception opens already grieving parents and the medical professionals who care for them to potential manslaughter and murder charges. That is a travesty.

Expanding government oversight into doctor's offices and the bathrooms and bedrooms of one's own home is distinctly un-Alaskan and un-American. As a member of your constituency, I urge you to vote NO on HB 107 and remind you that you represent the people of Alaska, not the lobbyists in DC or the special interest groups that support this bill.

I'm unable to attend or call into the Public Testimony today, because I am an economically productive member of our Alaskan community and will be at work. Please accept this email in its place.

Thank you,

Jasmine Johnson-Kennedy, Fairbanks resident

Subject: HB 107

Greetings committee members,

I am an assemblywoman in FNSB, but my opinions are my own and do not reflect the opinions of the assembly or borough.

Thank you Rep McCabe for bringing forth this bill. I support HB 107. What became clear to me in the early discussions on HB 17 in the last session is that Alaska lacked clear definitions on what constituted life. This bill provides a bit more clarity to discussions on what is life.

"Person" means a natural person or entity that has the moral right of self-determination.

"Life" is defined as the property or quality that distinguishes a living organism from a dead organism or inanimate matter and that is manifested in the function of a metabolism, growth, reproduction, a response to stimuli, or adaption to the environment, each of which originates within the organism.

Having definitions in place would add greater clarity on future discussions and would be beneficial in policy discussions and eliminate confusing debates over what is life.

Regards,

Barbara Haney,

I am writing to share with you that I wholeheartedly support the passage of this HB107.

Babies in utero need a voice on the outside to speak for them and their right to have a life, whether that life is at risk from an abortion or from a domestic violence attack. VERY, VERY few pregnancies cause a risk to the mother. The sad fact is that we don't actually have any REAL numbers, because no one is required to report them.

I work in the pregnancy industry and do early pregnancy ultrasounds. Seeing the heartbeat of a fetus at 6.2 weeks gestation PROVES this is life and needs to be protected.

As an Alaskan, I am deeply saddened by the outcry of support against this bill.

Thank you for your consideration.

Jake Almeida

From: Lena Flensburg
Sent: Monday, February 26, 2024 22:28
To: House Judiciary
Subject: HB 107 IN FAVOR OF IT'S PASSAGE

I am Lena Flensburg from Nikiski, Alaska 62 year Alaska Resident I listened to all the testimony from 64 people who testified on Monday. I believe in LIFE at conception and at the same time recognize there are time when a woman has the need to have surgery done for removal of ectopic pregnancy, molar pregnancy, and probably other situation where the fetus has absolutely no chance of survival or if something isn't done both mother and baby will die. This bill although the testimony made it feel that way doesn't even speak to abortion. It speaks to defining who or what is a person. It opens the door for dialogue which abortionists hate because they consider it an attack on their self claimed free choice. I applaud Rep McCabe for bringing it forward to help define maybe or start to define for those who don't know what the difference is between murder and abortion which both take the life of a human being. If the fetus, baby, fertilized egg, whatever you want to call it has ceased to be viable then it would not be considered murder to remove it with a surgical procedure from the mother. If the fetus, baby, fertilized egg, whatever you want to call it is still alive and viable then removing it surgically and causing it's life to cease would be murder. The same would be true for taking the life of a disabled person or elderly person with euthanization. Our culture sets a low value on life in these times of confusion. If we do nothing to fight against those who who bring death to innocent viable lives we are party to it. Yes there are other important issues to address and you all have tried with the education bill. But if we don't even value the unborn how can we value those who have been born. Thank you for reading my rambling support for defining LIFE!

Hello Representatives,

I am in support of HB107.

Irene Quednow

Hydropower has been generating clean, renewable electricity for over 100 years, providing almost 7% of the US' electricity and 40% of renewable energy. It has enormous growth potential to power more homes, schools, and businesses. Hydropower plants can provide power to the grid immediately, serving as a flexible and reliable form of backup power during major electricity outages or disruptions. It also produces a number of benefits outside of electricity generation, such as flood control, irrigation support, and water supply.

Subject: Opposed to HB 107

To the House Judiciary Committee,

I am writing to express my opposition to HB 107. If passed, this bill would have an immensely negative impact on all pregnant people who may be denied emergency care. I do not have children and I refuse to have my right to an abortion taken away and should I choose to have a child I do not want to live in a state that would deny me care if I were to need emergency care. This bill would also impact Alaskans' ability to access IVF when trying to conceive, a service that is already very difficult to access.

This bill is clearly against the desire of most Alaskans and I urge this committee to not support it and to spend your time and energy on issues that are more important for our state.

Sincerely,
Meneka Thiru

Subject: HB107

House Members,

What is a person? What are the implications and life long lasting affects of an abortion?

I have listened to the public testimony on this Bill. Mostly what I heard was the 1% of cases, or as the Bill sponsor had to repeat multiple times "one offs". I think that you might very rarely hear from a woman who has had an abortion. In my life experience, I have learned why you don't.

All that I can give you is my life experience on this subject. I've been married twice in my lifetime. To my first wife was for eight years, she is now deceased from cancer. My present wife and I have been married twelve years. With these 20 years that I have been married to two women, I've experience first hand what abortion does to a woman. Both of my wife's had abortions, because they didn't think they could take care of the baby on there own. Both had a young toddler at the time of there abortion. Both of them once, twice, or even three times per year they break down crying with me present. Can't tell you how often they do it when I'm not present. I encourage my wife to come to me for anything and everything so i hope she doesn't. When I ask them what's wrong they tell me it's there baby. The baby they aborted. It's actually came to where I don't have to ask my present wife why she's crying, crying for your aborted baby is a special way and the face she makes is recognizable. I want you to know as a husband, this abortion is impossible to comfort or fix for your wife. With my life experience of seeing what abortion done or continues to do to these women, it's imperative that we set laws to protect these "Persons". Both of these cases and in most all cases of aborted Persons, there was no justified reason for it. Both of these women where poor, selfish, and immature. It's just fact. I love my wife and I certainly don't condemn her for having an abortion. This is the truth of the matter.

Our youth can not make this decision to prevent this lose of life, may it be immaturity, selfishness, poverty, or what ever excuse or justification is used. The life long damage to men and women from the affects of abortion, is very large. It's up to law makers like yourself to determine what is write and wrong in our society. Presently in our society in Alaska it is legal to have an abortion. From my life experience abortion causes non repairable damage to women. Both of my wives even named there aborted babies, that should tell you the depth of damage it caused in these women as they grow older and mature. I know that in my maturity, I would certainly want a chance at life no matter the circumstance of my life are going to be. Can't believe I have to actually say this as advanced as our society is. It's not good for men women or society for us to allow abortion. Just so you know, you don't hear public testimony from people like me or my wife because we could not hold it together to speak on this subject. To see the pain abortion causes you must see it first hand. Please strongly consider HB107.

I fully support this bill. It only makes sense that a baby in the mother's womb is a living human. I knew that before becoming a Christian. It is also in statute that if a pregnant woman dies (and/or her baby dies) at the hands of another person, that person will be charged with a crime against both mother and baby. Our laws should be consistent in this matter.

Subject: HB107 Testimony

To the House Judiciary Committee;
the following is testimony for HB107.

My personal experience in life, touches on several facets of the abortion debate. It's not just my experience that I'm representing here. It's that of tens of thousands of other women, who were in distress, and made a horrible decision to end the life of their baby, before they could be born. My son, was one of these people that was never born.

At 17, I was pregnant a second time. I already had a daughter, by the same drug addict boyfriend I was in the process of leaving. I reasoned that I couldn't take care of two little ones by myself, and I couldn't.

Considering giving the child up for adoption didn't go well. Being honest, I was deeply upset about the damage that had been done to my body from being pregnant and giving birth. I didn't want to go through it again so soon.

Also heavily weighing on my mind, was the thought of my child being abused, as I had been. I had seen and experienced evil in this world. It broke my heart to think of someone hurting my child, and for me to not know about it to save them.

I reasoned that both myself, and this child, would be better off if I got rid of him before he could be born. I was sad, troubled and lost, but resolved to my decision.

Back in 1987, you couldn't go in early and have an abortion. There was a risk of having a "missed abortion". There were no pills to take.

I set off to go to a distant city, where I would be asleep for the procedure. On the way there, my boyfriend was stopped for speeding. We missed the appointment.

The clock was ticking and I was still resolved. Another appointment was made to a different clinic. By then, I was thirteen weeks pregnant.

Shortly after entering the clinic, I was directed to the counselor's office. I was very mature, composed and matter of fact. I laid out my argument to allow me to proceed, without dropping a tear. I convinced her that I knew what I was doing, and was fine with it.

On my way from her office to the waiting room, I ran into a girl I knew. Her appointment was ahead of mine. We didn't say much to each other, but I thought of how sad it was that her, and her boyfriend, were killing their baby, yet I mostly blocked feeling that way about my own.

I did wait my turn in dread. I remember being on the table with IV medicine dripping into me that was about to knock me out. I stared at the vacuum machine and the tool the doctor was about to insert into me. He looked up at me as I looked at him in terror, as I thought he was going to insert the suction tool before I was asleep.

As I slept, the 13 week old little boy I was carrying was literally torn apart as it was sucked out of my womb. To ensure nothing was left behind to cause an infection, his little body parts were reassembled in another room. He was then, maybe, incinerated. He was a person.

I woke up in a recovery room, at the end of a row of other women. After I dressed and was leaving, I looked over at all of them.

The first woman was a thirty something year old. She was sitting up and smiling. The others were teenagers like me. One was crying loudly and profusely. Another was just huddled with her blankets hiding her. Another just stared off into space.

It was literally like an abortion factory. I waited and waited outside the clinic, but still in the building, for my boyfriend to come pick me up. That was awful.

When he finally got there, he was mad that they told him wrong about when to be back to pick me up. He went on a rant. I felt embarrassed, and just wanted to leave so bad. He insisted on saying something, and told me that he, "didn't believe in abortion".

My heart sunk when he said that. Fine time to tell me after the fact. He leaves and tells off the woman at the desk. I leave him, and the state three months later.

Years down the road, our daughter had likewise gotten into doing bad drugs. Her first pregnancy resulted in a miscarriage. She came out of the bathroom with her hands cupped and trembling, holding something.

What she was holding was maybe two inches long. It looked like a big piece of bubble gum in a V shape, with a spine developing down the middle.

It certainly didn't look like a baby or have a heart beat, but it was still, undeniably, the body of a human baby. Science would have identified it as such.

Her second and third pregnancies resulted in the two grandchildren I have living with me. Her fourth pregnancy, 15 years ago, same dad, she aborted.

She was given the RU486, (mifepristone) two part abortion pill, by a bad doctor in Anchorage. (She's not practicing medicine here anymore.)

I didn't even know she was pregnant. She told me about it after she took the first pill. She had two days to think about what she did. We were both in unbearable anguish. I did research on it. At the time, she had no choice but to take the second pill. She did and went to work.

I got a phone call from my daughter, as she sat on the toilet at the gas station she worked at. She told me it was finished. My grandchild was about to be flushed down the toilet.

I asked my daughter a few years later what she thought about abortion. She said, "It's bullshit". I go, what do you mean? She said, "If you're pregnant with a baby, you should have a baby". —Amen.

Next story, my daughter in law and son were expecting their first born when she ended up with preeclampsia. She was at seven months gestation. She had the choice of either giving the baby a chance at life in the NICU at Providence, or abort him.

NICU it was! I have my handsome, little man today because his mother loved, and wanted him, besides thanking God and the NICU staff.

His mother told me that she never realized she could love someone so much! It turns my stomach to think my grandson could have been destroyed along with the other medical waste, had his mother not wanted him.

The issue of unwanted pregnancies, for whatever the reason, has always existed and always will. It's a very complex situation to be in. There's no easy solution, but there are solutions that don't involve murdering a baby.

If you don't want one, don't make one.

Don't make one, then kill it! Get sterilized, temporarily or permanently, by whatever means you choose. Your body, your choice on this one.

These babies are our future. The birth rate here in Alaska has actually gone down, thanks in part to abortion. It's a low key form of genocide that people actually demand.

We are living, human beings from the time we are conceived and attach in our mother's womb to grow. That should be a most sacred and safe place, for us as humans to begin our life here on Earth.

I have thought about that over the years, and how I betrayed my own child in such a horrific way. It pierces my soul. My only consolation is that Christ died for that sin too, and I'm forgiven for it. When I die and leave this world, I'll see my baby.

There are tens of thousands of other women, whose pain and shame prevent them from speaking the truth about this evil, we have for too long allowed in our society.

In honor and remembrance of my son, whom I have named John Anthony, and my lost grandchild, I have written this.

They were real people that should at least be granted the dignity of being referred to as such, after having suffered the indignity of being aborted.

Thank you, to all the members of the Judiciary Committee for your time, and to the sponsor this bill, Rep. Kevin McCabe.

Honorable Representative,

Clear definitions are important to fair implementation of the law. The fact that an unborn child is a living individual, separate and distinct from the mother seems self evident, yet because the fetus has not been specifically designated a person in Alaska statute, ambiguity has led to confusing and unfair implementation of constitutional protections.

For example: if a pregnant woman is intentionally injured and loses her child as a result of that injury, the State of Alaska considers that a murder — at any stage of the unborn child's life. If the mother and unborn child both die, it's double-homicide, at any stage of the child's development. Meanwhile, another pregnant woman who does not want her child may freely dispose of him for any or no reason whatsoever, at any stage of that pre-born child's life.

This is logically inconsistent and unfair to the helpless Alaskans being disposed of.

I pray you will give every consideration to this bill. Search your heart. Have compassion on those less fortunate than yourself.

Sincerely,

Don Haase

We absolutely support this legislation. Life does begin at conception. We have learned so much about “babies” and how fully “human” they are just a very short time after conception. We are told to “follow the science,” so perhaps we should practice what we exclaim?

Gone are the days we could say, “we just didn’t know.” We know! With all the focus on protecting the vulnerable ... for us to think we should not protect humanity’s most vulnerable - a human in the womb - makes us hypocrites.

The dangerous slope we start down once we discount this truth is a very slippery one.

Plz support HB107.

The science is clear.

A unique human being is created during fertilization, individually separate, yet dependent on his or her mother for survival.

While this human being is in the earliest stages of human development, it is a human being.

Other than while in the womb, there is no other stage of human development that makes us question whether a human being is a person.

Other than while in the womb, there is no level of dependence or sentience that makes us question whether a human being is a person.

Other than while in the womb, does the location of a human being make us question whether that human being is a person.

I support HB107 and ask you to do the same, because it is incongruent with our state constitution to say that "some, but not all" human beings are morally relevant persons.

Historically, we can look at "some, but not all" type of thinking as justification for horrific treatment towards our fellow human beings.

The slave traders and early American colonists dehumanized African slaves by calling them property, not people so that they could build wealth for their captors.

American Indians were deemed Savages, not people, displaced from their lands, and slaughtered by those wishing to pave the way for progress.

Jews in Nazi Germany were also viewed as less than human. Not people, but vermin who threatened the strength and prosperity of Germany.

And this was all legal.

We can do better, we can determine that all human beings are persons, regardless of size, dependence, sentience or location.

I urge you to be better than those who came before us and committed these heinous atrocities by refusing to acknowledge the personhood of their fellow man.

I implore to vote yes on HB107 to ensure that all human beings in Alaska are protected from these prejudicial views.

Sincerely,

Kelli Boyle

To whom this may concern, I am in full support of HB 107 because the Word of God is clear about when LIFE BEGINS; at the Zygote stage. Further what is most important is what God created-the development of a human being- only He has the right to take us out of this world, no other, not even the mother carrying the child. No human being has the RIGHT TO CHOOSE to take a life-to do so is murderous.

Bernice Ann Troglio

Jake Almeida

From: Denise Templeton
Sent: Tuesday, March 19, 2024 22:26
To: House Judiciary
Subject: Life Begins at Conception

Good Morning Judiciary Committee,

Life begins at conception.

Our Forefathers knew this.

The **Equal Protection Clause** of the **Fourteenth Amendment** provides constitutional authority to protect unborn children. **Section 5** of the **Fourteenth Amendment** vests Congress with “power to enforce, by appropriate legislation,” the due-process and equal-protection guarantees of **Section 1** of the Amendment. h/t Dobbs v Jackson Women's Health Organization

The Supreme Court's 1973 decision in Roe v. Wade that established a constitutional right to abortion did not define a moment when life begins. But the Dobbs v. Jackson Women's Health Organization does state that future abortion policy may be addressed “through the democratic process in the States or Congress”. h/t Justice Kavanaugh

Our very own Alaska Constitution, in article I, section 1, says all persons have a natural right to life.

So let's get to it. It is only Common Sense!

David says to his creator, God. "You knitted me together in my mother's womb". Each person, regardless of his parentage or handicap, has not been manufactured on a cosmic assembly line, but personally formed by God. All the days of his life are planned out by God before any come to be." Psalm 139:13-16

Please vote yes on HB107.

Thank you,

Denise T.

To: House Judiciary
Subject: HB107

I support HB107 in the definition of life beginning at conception. I am asking that all who have an opportunity to vote on the bill will vote to support it. Nelda Walker
