House Bill 368

Clean Energy Standards and Tax Credits

Summary of Changes from Version H to Y

- Change 1: This deleted the original subsection (h) on page 4, lines 12-20. This removed the voluntary opt-out provision from the bill. This was decided to be unneeded by utilities to protect their ratepayers after other portions of the bill were completed.
- Change 2: New language was added in multiple parts, adding the term “independent power producer”. This added independent power producers to those who may receive clean energy tax credits. This also added the definition of a IPP on page 8, following line 16.
- Change 3: Added a new subsection (c) on page 5, line 25. Allows expanded generating capacity to existing energy facilities to qualify for tax credits.
- Change 3: Added a new subsection (d) on page 5, line 31. Adds schools as qualifying entities to apply for energy tax credits.
- Change 5: Added a new subsection (e) on page 6, line 8. Adds a bonus 1 cent per kilowatt-hour for communities that qualify for PCE funds.
- Change 6: Deleted page 6, line 31, through page 7, line 2 subsection (d). This was a technical change that deleted language that would disqualify entities from receiving the tax credit if under a waiver.
