Subject: Keep Alaska Safe from Toxic Chemicals

Dear Representative,

I have been a volunteer for the Anchorage Waterways Council for 5 years as a water quality monitor. This a position we hold as a family to encourage volunteer service and to learn about the environment we live in and how we affect our environment. This has been a tremendous experience for my family, particularly my children. There are few places on earth like Alaska where we can believe that what we drink and breath is clean. The fish and game that we hunt and eat are truly organic. Please help our state remain free of toxic chemicals inlcuding PBDE's by phaseing out the use, sale and manufacture of products containing PBDEs by 2013.

Thank you for your support,

Kristi, Andrew, Colby, and McKinley Wallace
