Date 2/16/2024

FISCAL NOTE ANALYSIS

STATE OF ALASKA
2024 LEGISLATIVE SESSION

BILL NO. HB 293

Analysis

This bill is a DMV Omnibus package that changes Alaska statutes relating to a variety of modernization topics that would allow the agency to pursue electronic solutions for e-titling, digital certificates of registration, and introduces non-domiciled commercial licenses and permits for the state. This bill removes contradictions found within statutes and helps aligns current processes and procedures. This bill will remove statutes pertaining to emission inspections of vehicles, and the statutory definition of 'domiciled,' and adds convenient electronic service options.

With respect to electronic titles: The bill makes modifications to statutes that currently require the issuance of a paper title certificate, which limits the ability to electronically satisfy titling requirements in a modern fashion. The changes in the bill would allow for future title certificates to be issued electronically.

Capital funding of \$1.5 million is essential to cover the comprehensive start-up costs associated with onboarding a new vendor for electronic titling and motor vehicle registration at the DMV. This amount ensures the investment in the necessary technology infrastructure, software development, training programs, compliance measures, and initial operational expenses. It ensures seamless transition to electronic titling, enhancing efficiency, accuracy, and overall service quality at the DMV.

The estimated FY2025 amount is derived from the responses received from the Request For Information process that was posted to the state's online public notice (OPN) system in September 2023. The requested amount will be used to contract the integration of the electronic titling software system. There is an operating expense to access the platform, estimated at this time to be up to \$50,000 per month, \$600,000 annually.
