FISCAL NOTE ANALYSIS

STATE OF ALASKA
2018 LEGISLATIVE SESSION

BILL NO. HB 217

Analysis

The Department of Environmental Conservation oversees producers and processors of milk, milk products, cheese, and frozen desserts; inspects the sanitation conditions and equipment at the state's dairy farms and milk processing plants, and issues permits to dairy farms, processing plants, and haulers. Currently, raw milk is only allowed to be sold to a milk processing plant or for animal food (18 AAC 32.060), be used for commercial cheese production (18 AAC 32.250), and consumed by the owner of the animal for personal use (18 AAC 32.010). Commercial sales of raw milk to the general public are prohibited.

This bill would exempt manufacturers of potentially hazardous foods (raw milk, shellfish, poultry and poultry products, etc.) from licensing, permitting, certification, packaging, and inspection requirements if certain conditions are met.

The Department would maintain the statutory responsibility to ensure that food sold or offered to the public is safe for human consumption. The Department would use existing resources to conduct extensive public outreach to ensure that the dangers of raw milk are known to potential consumers. Increased response to food borne illness outbreaks related to raw milk may strain existing staff resources, but the cost of increased time and materials is impossible to reasonably estimate therefore the Department is submitting an indeterminate fiscal note.
