

Comments SB116 Education Tax Credits

Council of
Alaska Producers

February 5, 2018

Senator John Coghill
Alaska State Legislature
State Capitol
Juneau, AK 99801

Dear Senator Coghill,

The Council of Alaska Producers (CAP) is writing to support Senate Bill 116, "An Act relating to the insurance tax education credit, the income tax education credit, the oil or gas producer education credit, the property tax education credit, the mining business education credit, the fisheries business education credit, and the fisheries resource landing tax education credit."

CAP is a non-profit trade association formed in 1992 to represent the interests of large metal mines and mine developmental projects in Alaska. CAP informs members on legislative and regulatory issues, supports and advances the mining industry, educates members, the media, and the general public on mining related issues, and promotes economic opportunity and environmentally sound mining practices.

CAP's members have welcomed the opportunity to partner with the State of Alaska and provide funding directly to Alaska's higher education projects and programs that support and enhance the mining industry. Between 2011 and 2017, mining companies in Alaska education tax credit program to invest \$19.6 million in programs such as:

- UAF Mining Engineering research endowment
- UAF Mining Engineering scholarship fund
- UAA Geology Scholarships
- Mining and Petroleum Training Services (MAPTS), UAF Cooperative Extension Services, Anchorage, Soldotna, Juneau
- UAS Pathways to Mining
- UAA Institute of Social and Economic Research
- Northwest Arctic Borough School District
- Angoon High School Vocational Technical program

MAPTS and the Pathways program provide educational opportunities and training that lead directly to good jobs in the industry. The importance of these educational and training programs is underscored by a survey of Alaska's mining workforce which revealed that there is

considerable aging of skilled employees; for example, 47.1 percent of mechanics, 51.1 percent of mining materials engineers and 65.4 percent of mining machine operators are 45 years of age or older. Faced with the challenges of attrition and aging within the current workforce, and competition from the global mining industry, the mining industry embarked on a workforce development planning process which resulted in the Alaska Mining Workforce Development Plan. <http://alaskaminers.org/mining-workforce-development-plan/>.

SB116 extends the education tax credit program so it will continue to promote private investment in higher education in our state, an essential component of realizing the objective of ensuring that Alaskans learn the skills needed to sustain and grow Alaska's mining industry. Thank you for sponsoring this bill.

Sincerely,

A handwritten signature in black ink, appearing to read "K. Matthias", with a stylized flourish at the end.

Karen Matthias
