☐ Urban area

About

This map shows where fixed residential broadband services of at least 25 Mbps download and 3 Mbps upload is deployed and where it is not deployed. The graph on the right side shows the fraction of population with or without access to such broadband.

Enter an address or click on the map to see the list of providers that offer residential services in the census block area on the Providers tab. Each provider's maximum advertised residential speed, and demographic data for the county associated with the census block on the Demographics tab. Tribal lands and urban areas can be displayed by clicking the appropriate box in the legend. Click on the symbol in the upper left hand corner next to - and - to change the view from a street view to a satellite or a terrain view.

This map shows the availability of fixed residential broadband services by speed in an area. Enter your address to find the speed of services in your area. Tribal lands and urban areas can be displayed by clicking the appropriate box in the legend. Click on the symbol in the upper left hand corner next to - and - to change the view from a street view to a satellite or a terrain view. Areas without any population are shown in white. Yellow indicates areas without residential services of at 200 kbps or above. Click each box to see the minimum top residential speed in your area. Zoom out to see the speed of service in the neighboring areas.
