

China, LNG, and the Alaska Gas Pipeline

**Presentation to Alaska Legislature
February 22, 2018**

**Wenran Jiang, Ph.D.
Special Advisor on China, The Energy Council
Global Fellow, Woodrow Wilson Int'l Center for Scholars
Director, Canada-China Energy & Environment Forum**

China, LNG, and the Alaska Gas Pipeline

Self Introduction:

- **Tenured political economy professor at Univ. of Alberta**
- **Tracking Chinese global energy & resource investments**
- **Organizer of Canada-China annual energy conference since 2004**
- **The Energy Council Special Advisor on China since 2005**
- **Seconded to Alberta Dept. of Energy 2012-2014**
- **Named as one of the 50 most influential people in Alberta in 2014**
- **Advisor to government, private sector on China/Asia projects**
- **Regular media interviews (BNN, CBC, CNN) & op-eds**
- **Facilitated/advised on large energy M&A negotiations**
- **Mission advisor to Natural Resources Canada Minister's China visit**
- **Currently focusing on China related policy/consulting projects**

Meeting with Canadian PM Justin Trudeau, Shanghai 2016

With Canadian former PM Stephen Harper & Deputy Minister of China National Energy Administration Nov. 2017

China, LNG, and the Alaska Gas Pipeline

Overview:

- I. China & its Demand for LNG**
- II. Alaska and LNG Supply**
- III. The AGDC-Sinopec MOU**
- IV. Conclusion**

China, LNG, and the Alaska Gas Pipeline

Overview:

*Weighted by share of world GDP, trade and net capital exports

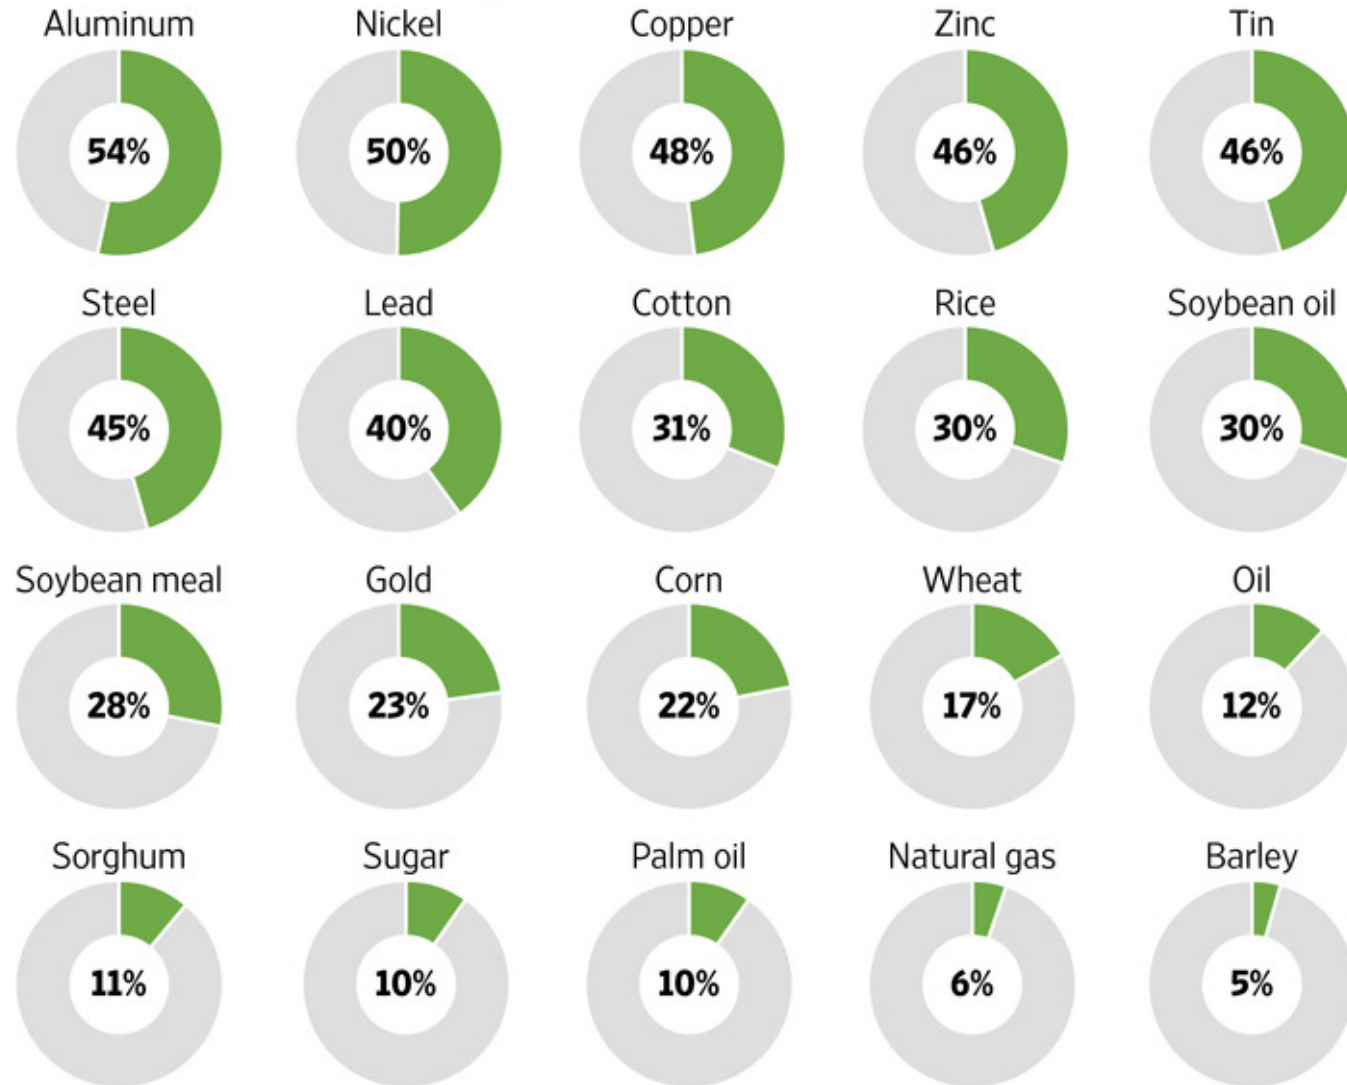

Modernization paradigm on steroids

- 1. Heavy dependence on high capital & labor inputs with low wages, focused on heavy & manufacturing industries**
- 2. Deepening integration with the world economy**
- 3. Huge demand for energy and resources**
- 4. Severe damage to the environment & major contribution to global warming**
- 5. Decisively state interventionist – Marx or Keynes**

Giant Appetite

The main customer for a range of commodities is China, which will continue to wield enormous influence even as slowing economic growth cuts into its demand.

China's share of world consumption

Sources: World Bureau of Metal Statistics (first six months of 2015 for refined metals, slab zinc); World Gold Council (2014 for gold); BP Statistical Review of World Energy 2015 (2014 for oil, natural gas); Metalytics via Morgan Stanley (2015 estimate for finished steel); U.S. Department of Agriculture (2013-14 season for others)

Primary energy demand, 2035 (Mtoe)

Share of global growth 2012-2035

China is the main driver of increasing energy demand in the current decade, but India takes over in the 2020s as the principal source of growth

China surpasses the United States as the world's top energy consumer

Energy Consumption in equiv. Watts of power per capita

Per-Capita Emissions (excl. landuse)

Australia highest per-capita emissions among 'developed' countries

USA almost linear decrease of per-capita emissions from 2007 to 2050

Germany above EU28 average, but catching up by 2030 thanks to -55% target

EU28 already achieved its absolute 2020 emission pledge today

Chinese per-capita emissions same as EU28 today, increasing 23% from 2010 to 2030.

Brazil's pledge to halt net deforestation by 2030 is most important (not shown).

India's per-capita emissions projected to increase 75% by 2030 from very low level. 100 GW solar PV by 2022 Mission most important.

China's 13th Five Year Plan (2016-2020)

- Major shifts in development paradigm**
- Emphasis on balance between growth & environment**
- Huge investment in clean energy sectors**
- Nationwide efforts in reducing coal use**
- Natural gas & LNG demand will rise due to such policy drivers**

Where does China get its gas? 2012 (bcm) (% total)

SINOCHEM GROUP

Yangtze River cuts China from West to East...

China National Petroleum Corp. (CNPC)

- China's largest oil and gas producer and distributor and World's 5th!
- PetroChina is listed subsidiary of CNPC.
- CNPC is the majority operator of China's domestic pipelines (71%)
- Dominate in Northern China

Sinopec

- Originally was put in charge of refining and marketing- dominates downstream market
- In 2010 Sinopec became the 2nd largest refiner globally.
- Southern China.

Sinopec

China, LNG, and the Alaska Gas Pipeline

But recent interruptions show conventional wisdoms may be misleading

- Centralized policies caused local confusion**
- Unexpected Central Asia supply cut**
- Short supply of gas, LNG and coal**
- Gas/LNG/coal price jump**

Governing Structure of Chinese NOCs

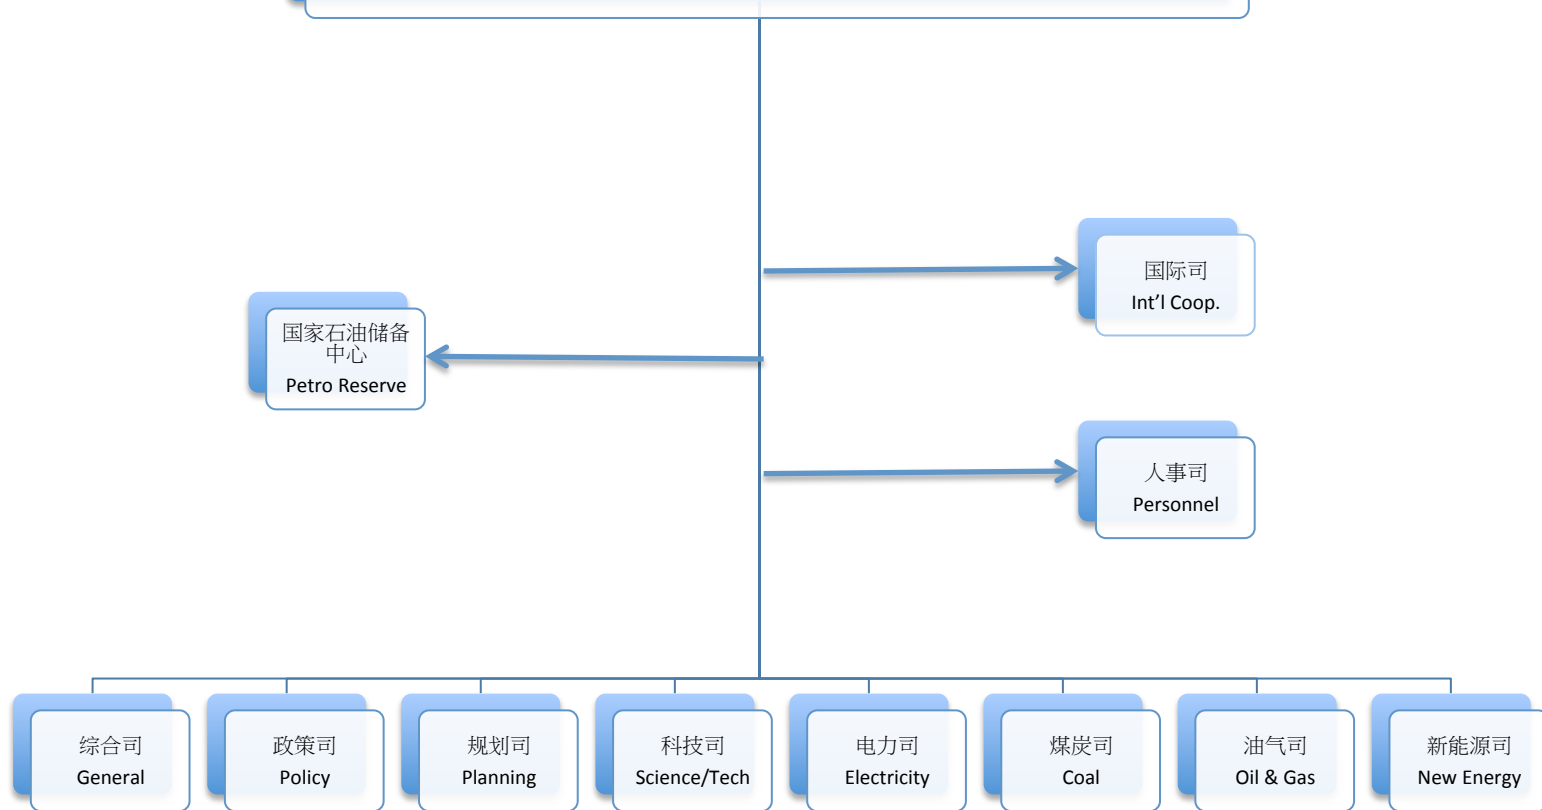

Notes: NEC = National Energy Commission; SASAC = State Assets Supervision and Administration Commission; MOF = Ministry of Finance; MOFA = Ministry of Foreign Affairs; NDRC = National Development and Reform Commission; NEA = National Energy Administration; CBRC = China Banking Regulatory Commission; SOE = state-owned enterprise.

National Energy Administration (NEA)

NEA is responsible for formulating and implementing energy development plans and industrial policies; promoting institutional reform in the energy sector; administering energy sectors including coal, oil, natural gas, power (including nuclear power), new and renewable energy and etc.; taking charge of energy conservation, comprehensive utilization of resources in the energy sector; guiding scientific and technological advancement; organizing and carrying out the R&D of important equipment and guiding the assimilation and innovation of imported complete sets of major equipment; organizing and coordinating key energy-related demonstration projects and promoting the deployment of new products, new technologies and new equipment; approving, reviewing, or examining fixed asset investment projects of the energy sector within national plans and the scale of annual plans in accordance with the authority stipulated by the State Council; conducting energy forecasting and precaution and participating in energy operation coordination and emergency preparedness; formulating and implementing national oil reserve plans and policies; taking the lead in launching international energy cooperation; participating in the formulation of policies related to energy such as resources, finance and taxation, environment protection, and addressing climate change; making recommendations on energy price adjustment and imports and exports aggregate; and undertaking the daily work of the National Energy Commission.

NEA Internal Structure/国家能源局

中國銀行

BANK OF CHINA

- **One of the four largest state-owned commercial banks**
 - Industrial and Commercial Bank of China.
 - Bank of China.
 - China Construction Bank.
 - Agricultural Bank of China
- **Plays a key function in China's global financial network**
- **Jointly lending on major overseas investment**
- **Critical player in this AGDC-Sinopec project**

- **China's Sovereign wealth fund**
- **Established in 2007 with \$200 billion**
- **Total assets now over \$800 billion**
- **Opened first N American office in Toronto in 2011**
- **But moved to NYC in 2015**
- **Plays a key function in China's global financial network**
- **Jointly lending on major overseas investment**
- **Critical player in this AGDC-Sinopec project**

China, LNG, and the Alaska Gas Pipeline

Chinese investment in Canada's oil sands:

Beginning in 2010, CIC made four strategic investments in the oilsands worth about \$1.9 billion in total.

2015 conclusion:

The investments have led to massive losses and much soul-searching at CIC. Today, the corporation's big bets on Canadian resources, not counting Teck, are worth less than 20 cents on the dollar.

China, LNG, and the Alaska Gas Pipeline

Overview:

- I. China & its Demand for LNG
- II. Alaska and LNG Supply
- III. The AGDC-Sinopec MOU
- IV. Conclusion**

China, LNG, and the Alaska Gas Pipeline

- **China's is the largest growing market for LNG**
- **China's demand for LNG is driven by both market & policy**
- **China's energy market growth will be volatile**
- **There are increasing competition for China's LNG market**
- **Global capacities are increasing, partly due to US exports**
- **Chinese overseas energy investment has shifted to the US**
- **Chinese large NOC and investment players are key drivers**
- **AGDC-Sinopec MOU is well positioned**
- **But Chinese are cautious, and are hard negotiators**
- **More work and expertise are required to finalize the MOU**
- **Alaska/AGDC should engage Chinese extensively**
