Hello. I am a private citizen at 116 E 1st Ave, Nome, AK 99762. I am writing in for support of SB61.

Rural Alaska holds many challenges for recycling. It's an incredibly important project to help preserve these native lands that are still used for subsistence. Opportunities like this will allow us to dispose of our electronics and keep our dumps and land free of this specific type of waste.

Thank you for your time and consideration.
