- Delete the entire CBR section

### **16) New Section 51. Special Appropriations**

Sec 51, P 101, L3-18 is new 'waterfall' language addressing any potential surplus revenue in FY25.

The Spring Revenue forecast equaled \$6,448,500,000 Unrestricted General Funds at an average annual price of \$78 per barrel of oil. That amount, plus \$90 million of additional revenue, which is roughly equivalent to an average annual price increase of \$2 per barrel (or an annual price of \$80 per barrel) equals \$6,538,500,000 of UGF revenue.

The next tranche of UGF revenue above \$6,538,500,000 (or roughly \$80 per barrel), up to \$645 million, will be split 50/50 between an FY26 energy rebate and the Statutory Budget Reserve (SBR). If the \$645 million of additional revenue is realized, that would add \$500 dollars as an energy rebate to next year's dividend check, and \$322.5 million would be added to the SBR.

Any UGF revenue above \$7,183,500,000 would be appropriated to the Constitutional Budget Reserve, or CBR.

Spring Revenue Forecast	<b>\$6,448,500,000</b>	\$78/barrel
Plus \$90 million of surplus	<b>\$6,538,500,00</b>	equivalent to \$BO/barrel
Revenue before split	<b>\$6,538,500,00</b>	
Next tranche of revenue	<b>\$645,000,000</b>	to be split 50/50 between energy rebate and the SBR
Revenue above	<b>\$7,183,500,000</b>	goes to the CBR
