**FISCAL NOTE ANALYSIS****STATE OF ALASKA  
2024 LEGISLATIVE SESSION****Analysis****Purpose of Legislation**

The purpose of this legislation is to establish a comprehensive regulatory structure for Carbon Capture, Utilization, and Storage ("CCUS") projects within the State of Alaska. The bill allows DNR to lease State lands for carbon storage projects, establishes a CCUS regulatory regime within the Alaska Oil & Gas Conservation Commission ("AOGCC"), allows AOGCC to pursue primacy for UIC Class VI carbon dioxide injection wells, and expands existing regulatory authority over oil & gas pipelines to carbon dioxide pipelines.

**New Positions**

The work necessary to stand up the Carbon Capture, Utilization, and Storage Program within the Division of Oil & Gas will be managed with existing staff resources.

**Travel & Services**

No travel or services are required for this bill.

**Capital Costs**

No capital costs are required for this bill.

**New Fund - Carbon Storage Closure Trust Fund**

The legislation creates a new "Carbon Storage Closure Trust Fund." The fund will be funded through payments from Carbon Storage Facility operators based on the volume of injected carbon. The payment amounts will be set by the Alaska Oil & Gas Conservation Commission at the time that a permit is issued for the facility. The fund is intended to be used for long-term monitoring and maintenance related to injected underground carbon after a carbon storage facility has ceased operation and the operator has dismantled infrastructure and remediated the facility site except for the underground carbon.

**Regulations**

This legislation is likely to result in DNR issuing new regulations concerning the evaluation of applications for carbon storage licenses and leases and for establishing a competitive bidding process for competing license applications. DNR anticipates that regulations should be promulgated within 12 months of final passage. DNR is likely to coordinate regulatory proposals with other agencies involved in CCUS oversight activities to ensure harmonization of regulatory programs given the complexity of the subject matter.
