#### FISCAL NOTE ANALYSIS

# STATE OF ALASKA 2025 LEGISLATIVE SESSION

BILL NO. SB 138

# **Analysis**

# **Background**

Alaska currently imposes an excise tax under AS 43.52 on the lease or rental of passenger and recreational vehicles in the state if the lease or rental of the vehicle does not exceed 90 consecutive days. The rate of the tax for passenger vehicles is ten percent of the total fees and costs charged for the lease or rental of the passenger vehicle. The rate of the tax for recreational vehicles is three percent of the total fees and costs charged for the lease or rental of the recreational vehicle. The current tax applies broadly to nearly all short-term rentals, including those executed via an online platform. However, because the platforms do not report the transactions to the Department of Revenue, it is difficult to enforce the current tax on the individual vehicle owners.

This bill would move the responsibility for collecting and remitting the tax from the individual owner to the vehicle rental platform company if the lease or rental was arranged or executed through the platform and it would reduce the rate to eight percent for those rentals. The bill would allow for a simple method of collecting the vehicle rental tax directly from peer-to-peer platforms. These companies are arranging rentals which have historically been provided by traditional vehicle rental companies, which because they are the owners of the vehicles have filed and paid the tax.

The bill would take effect immediately.

#### **Revenue Impact**

The Department of Revenue has collected an average of roughly \$13 million in vehicle rental taxes over the past four years. The revenue from the vehicle rental tax was \$7.9 million in FY2021, \$13.9 million in FY2022, \$15.1 million in FY2023, and \$15.2 million in FY2024. This bill would capture unreported vehicle rentals that are arranged or executed through a vehicle rental platform and, therefore, would have a positive effect on revenue.

The Department of Revenue does not have enough data on peer-to-peer vehicle rentals in Alaska to provide an estimated revenue impact. Therefore, the change in tax revenue is indeterminate.

### **Implementation Cost**

This bill would require the department to make changes to update its Tax Revenue Management System (TRMS) and Revenue Online (ROL) which allows a taxpayer to file, pay, view their status, and communicate with the division online. Resources required to implement the changes would include staff time to update tax forms, TRMS, ROL, and other miscellaneous costs. These costs would be absorbed by the Tax Division using existing resources.
