Subject: Angoon Community Association supports the SB61
Date: Friday, April 04, 2025 8:32:39 AM

My name is Daniel Fredrickson and I am the Angoon Community Associations IGAP coordinator. We support SB61 because not only are we in a remote village that makes its own challenges to properly discard old broken electronics without harming the environment, but we too have a high consumption of bought electronics which in turn provides its share of taxes to the government.

All for all we'd like to continue striving for a healthy living environment while doing our part in recycling goods that still hold value, less environmental clutter, healthier living environment, and back to the cycle it originated from.
